1st International Conference on Sensor Networks and Applications 2009

(SNA-2009)

San Francisco, California, USA
4-6 November 2009

Editor:

G. K. Lee

INTERNATIONAL SOCIETY FOR COMPUTERS AND THEIR APPLICATIONS

1st International Conference on Sensor Networks and Applications (SNA-2009)

November 4 - 6, 2009
Hilton San Francisco Fisherman’s Wharf
San Francisco, California USA

TECHNICAL PAPER INDEX

RESOURCE ALLOCATION ISSUES IN SENSOR NETWORKS

Distributed Resource Management and Parallel Routing for Data Acquisition in Heterogeneous Sensor Networks
Wei Chen, Heh Miao, Liang Hong, Saleh Zein-Sabatto, Husam A. Adas, and Karaman Suzan
(Tennessee State University, USA) ........................................................................................................ 1

Strategies for Sensor Selection in Monitoring Toxic Chemical Diffusion Scenarios
Nikhil Padhye (Indian Institute of Technology, India), Chilukuri K. Mohan, Kishan G. Mehtrotra,
Pramod K. Varshney (Syracuse University, USA) ..................................................................................... 7

Seung-yun Kim, Osman Guzide and Seth Cook (Shepherd University, USA) ........................................... 13

TASK MAPPING AND SCHEDULING OF SENSOR NETWORKS

Reaction-Diffusion Generation of Data Highways in Dense Wireless Sensor Networks Graphs
David Lowe (University of Technology, Sydney, Australia) and Daniele Miorandi (CREATE-NET, Italy) ...... 19

Observation-based Cooperation in Mobile Sensor Networks
Briana Wellman (The University of Alabama, USA), Stacey Downing (Norfolk State University, USA),
Gary Moore (Tennessee State University, USA) and Monica Anderson (The University of Alabama, USA) ..... 26

Coordinated Checkpointing Protocol for Sensor Network-based Distributed Computing Systems
Jinho Ahn and Yoon Deuk Seo (Kyonggi University, Korea) ................................................................. 31

Collision Avoidance Multi-channel MAC Protocol (CAMMAC) based on Dedicated Control Channel in Wireless Ad hoc Network
Bin Li and Yonghe Liu (University of Texas at Arlington, USA) ............................................................. 37
APPLICATIONS OF SENSOR NETWORKS

Acoustic Based 3D Localization and Sea-bed Modeling for Underwater Sensor Networks  
Hady S. AbdelSalam, Syed R. Rizvi and Stephan Olariu (Old Dominion University, USA) ........................................... 42

An ad-hoc Wireless Sensor Networks with Application to Air Pollution Detection  
David Fotue, Guy Tanonkou and Thomas Engel (University of Luxembourg, Luxembourg) ........................................ 48

A Component-Based Sensor Network for Environmental Monitoring  
Arno Puder, Teresa Johnson, Kleber Sales, Marcello de Sales and Dale Robinson (San Francisco State University, USA) .......................................................................................................................................... 54

Distributed Algorithms for Mobile Event Swarming  
Fatma Mili, Kenneth Elder, Ankur Acharya and Ashok Prajapati (Oakland University, USA) ................................. 60

Activity Recognition in a Dense Sensor Network  
William A. Hoff and James W. Howard (Colorado School of Mines, USA) ................................................................................................................................. 67

SENSOR NETWORKS AND ENERGY USAGE

Wireless Sensor Network Optimisation through Control-Theoretic Adaptation of Sample Rates  
David Lowe and Steve Murray (University of Technology, Sydney, Australia) ......................................................... 73

Grid Block Energy Based Data Gathering Algorithm for Lower Energy Delay and Longer Lifetime in Wireless Sensor Networks  
Natarajan Meghanathan (Jackson State University, USA) ................................................................................................. 79

Nitin Sharma, Jong-Hoon Youn, Azad Azadmanesh and Neeraj Shrestha (University of Nebraska at Omaha, USA) .................................................................................................................................................. 85

INTERFACES FOR SENSOR NETWORKS

Deployment of an Autonomous Sensor Network for Remote Sensing Applications  
Jason W. Faulring and May Casterline (Rochester Institute of Technology, USA) ................................................................. 91

Directing Web Search Engines using a Knowledge Amplification by Structured Expert Randomization Architecture  
Stuart H. Rubin (SPAWAR, USA), Isai Michel Lombera (San Diego State University, USA), Michael Armella, Jeremy Conn, S. C. Chen (Florida International University, USA) and Gordon K. Lee (San Diego State University, USA) ......................................................................................................................... 97

Modified Tinyos for Energy Efficient Image Transmission in Wireless Multimedia Sensor Networks  
Mohammad Mehdi Faghih, Mohsen Ebrahimi Moghaddam, and Maghsoud Abbaspour (Shahid Beheshti University, Iran) .............................................................................................................................................. 103
SECURITY ISSUES IN SENSOR NETWORKS

Hybrid Encryption Secure Routing Protocols for Wireless Sensor Networks
Sahar Mostafa, Hesham El Zouka, Mohamed Abou El Nasr (Arab Academy for Science and Technology, Egypt) ............................................................................................................................ 109

Detecting Compromised Nodes in a Wireless Sensor Network using Trust
Cheryl V. Hinds and Jim Alves-Foss (University of Idaho, USA) ................................................................. 115

Architectural Support for Securing Sensor Networks Against Remote Attacks
Mohammed I. Al-Saleh, Patrick G. Bridges and Jedidiah R. Crandall (University of New Mexico, USA) .... 120

INVITED SESSION ON OPTIMAL PERFORMANCE
AND ENERGY EFFICIENCY OF SENSOR NETWORKS

Joint Rate-Routing Control for Fair and Efficient Data Gathering in Wireless Sensor Networks
Ying Chen and Bhaskar Krishnamachari (University of Southern California, USA) ................................. 128

A Game Theoretic Framework for Decentralized and Distributed Energy Utilization in Wireless Sensor Networks
Chih-kuang Lin and Øivind Kure (NTNU, Norway) ................................................................................ 136

MODELING ISSUES IN SENSOR NETWORKS

Primate-Teaming-Inspired Mobile Sensor Network Topology Auto-Formation Modeling
Fei Hu, Yao Wu and Qi Hao (The University of Alabama, USA) ................................................................. 142

Coloured Petri Net Model for the Formal Validation of Sensor Networks
Saneh Zairi (University of Tunis, Tunisia) and Eric Neil (University of Lyon, France) ................................. 148

Data Fusion via Nonlinear Space Transformations
Julio J. Valdés, Sylvain Létournea and Chunsheng Yang (National Research Council Canada, Canada) ............................................................................................................................. 154

Exploring Redundancy in Sensor Deployment to Improve Fault Tolerance
Wei Shen (Zhejiang Sci-Tech University, China) and Qishi Wu, Yunyue Lin (University of Memphis, USA) ................................................................................................................................. 160

Adaptive versus Static Channel Width for MASNET Routless Routing Protocol
Mohammad AlOtaibi and Hamdy Soliman (New Mexico Institute of Mining and Technology, USA) .......... 166
