2009 4th IEEE International Workshop on Systematic Approaches to Digital Forensic Engineering

(SADFE 2009)

Berkeley, California, USA
21 May 2009
Table of Contents

Fourth International IEEE Workshop on Systematic Approaches to Digital Forensic Engineering
IEEE/SADFE 2009

Message from General Chair
Message from Program Chairs
Organizing Committee

File Fragment Classification—The Case for Specialized Approaches ................................................................. 3
Vassil Roussev and Simson L. Garfinkel

Snapshot Filtering Based on Resource-Usage Profiles ........................................................................................ 15
Frank Adelstein and Carla Marceau

Analysing Access Control Specifications ............................................................................................................ 22
Christian W. Probst and Renè Rydhof Hansen

Digital Device & Forensics Concerns in Jails, Prisons and Supervisory Environments ............................................. 34
Natalie Armstrong, Michael Losavio, and Deborah Keeling

A Distributed Triage Model for Digital Forensic Services to State and Local Law Enforcement ............................. 36
Michael Losavio, Deborah Keeling, and Adel Elmaghraby

Using JavaTM to Design Forensically Resistant Applications ............................................................................. 38
Cedric J. Jeannot, Ibrahim N. Imam, and Adel S. Elmaghraby

Two Models of Digital Forensic Examination ....................................................................................................... 42
Fred Cohen

High Assurance Digital Forensics: A Panelist’s Perspective ................................................................................. 54
Steven J. Greenwald

A Formal Rule-Based Scheme for Digital Investigation in Wireless Ad-hoc Networks ............................................. 62
Slim Rekhis and Noureddine Boudriga

Automating Disk Forensic Processing with SleuthKit, XML and Python ............................................................. 73
Simson L. Garfinkel

OleDetection—Forensics and Anti-forensics of Steganography in OLE2-Formatted Documents .......................... 85
Robert F. Erbacher, Jason Daniels, and Steena Montiero

Panel: Technical, Social and Legal Frameworks for Digital Forensics and CyberInfrastructure Security ............ 97
Jean West, Ulf Lindqvist Peter J. Vasquez, Michael Losavio, and Sean Peisert
