Contents

Extension to the Basic Data Types for Better Data Representation................................................1
Shivanagowda G M

Empirical Studies to Measure the Artifact Recovery.................................................................4
Nadim Asif

Story-Wall: Supporting Agile Software Development in a Distributed Context.........................9
Lorena Delgadillo, Olly Gotel, David Leip

SoBA: A Tool Support for Story Card Based Agile Software Development.............................17
Chetankumar Patel, Muthu Ramachandran

Story Card's Values Oriented Prioritization Matrix for XP (Agile Software Development)........24
Chetankumar Patel, Muthu Ramachandran

Acceptance Test Driven Story Card Development: an Improved Requirement
Elicitation Process in XP.............................................................................................................30
Chetankumar Patel, Muthu Ramachandran

Novel Hierarchical Structure towards Effective e-Testing System.............................................37
Suleman Jalil

TILO – An Automated Unit Testing Framework for DLLs.........................................................45
Octavian Paul ROTARU, Ion I. DIACONU, Marian DOBRE

Recovering Structural Consistency between Design and Implementation using
Correspondence Relations.........................................................................................................53
Anne-Therese Kortgen, Christof Mosler

Using defect data to drive Organizational Training efforts......................................................61
Santiago Matalonga, Tomás San Feliu

Service Delivery Responsibilities in Large Offshore Software Projects....................................69
Anand V. Hudli, Raghu V. Hudli, Sathish Pathakota

Orthogonal Decomposition of Finite-State Behavior Models As a Basis for
Determining Components in Software Architectures..............................................................77
Sukhamay Kundu

Parametric Software Cost Estimation for the Solitary Programmer........................................85
Royce Nobles, Devon Simmonds, Gene Tagliarini
Need of Appropriate Component Reusability Metrics and Standards for Component-Based Systems.................................................................................................................................92
Nasib S. Gill

Methodology for Automatic Generation of Exhaustive Behavioral Models in Reactive Autonomic Systems.................................................................................................................................95
Javier Quiroz, Olga Ormandjieva

Towards Automatic Diagnostic of Conceptual Problems in Requirements Text.........................105
Shadi Moradi Seresht, Olga Ormandjieva

Security Modeling and Analysis in a Software Architecture Design...............................................115
Lirong Dai, Kendra Cooper

Increment Iterative Extreme Programming (IIXP) Methodology for Developing Static Web Presence.........................................................................................................................................123
Ahmed Hassan M.H Ali, S. Raviraja, Omer Ishag Eldai

Visualizing Safety Score for the Digital Home..................................................................................128
Nary Subramanian

Increment Iterative Extreme Programming (IIXP) Methodology for Developing Web Application.................................................................................................................................135
Ahmed Hassan M.H Ali, S. Raviraja, Omer Ishag Eldai

Increment Iterative Extreme Programming (IIXP) Methodology For Developing Intranet Web Based Systems..........................................................................................................................140
Ahmed Hassan M.H Ali, S. Raviraja, Omer Ishag Eldai

Adaptation in a Pervasive Computing Environment..........................................................................145
Jed Limke, Jun Kong, Jing Dong

MaST: A Tool for Aiding the Staff Training Management by Using Influence Diagrams............156
Kawal Jeet, Vijay Kumar Mago, Bhanu Prasad, Rajinder Singh Minhas

Semantic Web Information Retrieval and Domain Knowledge Representation Using Unified Modeling Language..................................................................................................................................165
Minal Bhise

A Novel Approach for Software Property Validation........................................................................173
Salamah Salamah, Irbis Gallegos, Omar Ochoa
