# TABLE OF CONTENTS

## VOLUME 1

### SESSION 3 DEINKING RESEARCH

**Enzymatic Deinking of Inkjet Printed Papers** .......................................................... 1  
*Nural Yilgor, Anjan Velpumadugu, Kundan Kumar, John Cameron*

**The Effects of Sizing on the Enzymatic Deinking of Copy Printed Wood-free Paper** ........................................ 50  
*Hossein Resalati, Juha P. Koskela*

**Deinking of Inkjet Digital Non-impact Printing** .................................................. 80  
*Jeffery S. Hsieh*

### SESSION 4: CURRENT TRENDS IN PULPING & BLEACHING

**Influence of Acid Leaching of Chips on Environmental and Process Performance of Eucalypt Pulp Production** .......................................................................................................................... 91  
*Jorge Luiz Colodette, A. H. Mounteer, C. S. Mudado, J. L. Gomide, N. R. Del'Antonio*

**A Fundamental Review and Critical Analysis of Hexenuronic Acids and Their Impact in Elemental Chlorine-Free Bleaching** ................................................................. 121  
*Brian N. Brogdon*

**The Chemical Versus Energy Cost Tug of War: A Pulp Mill Perspective** .................. 170  
*Peter W. Hart*

### SESSION 5: ADDRESSING ENVIRONMENTAL SUSTAINABILITY CHALLENGES

**Understanding Carbon Footprints in the Forest Products Industry** ........................... 201  
*Reid Miner, Brad Upton, Caroline Gaudreault*

**Climate Change Compliance Considerations for an Integrated Pulp & Paper Facility Utilizing Combined Heat & Power: A Case Study** ................................................................. 226  
*Steven A. Hudson, Anthony W. Buxton, Todd J. Griset, Glenn S. Poole*

**Water Accounting in Sustainability Programs** ...................................................... 246  
*Paul Wiegand*

### SESSION 6: NEW TECHNOLOGY SHOWCASE

**A Multi-faceted Biorefinery for Pulp Mills** ........................................................... 264  
*Andrew Gibson*

**Algas Fluid Technology Systems as Your Partner for Efficient Water Treatment and Fiber Recovery** ................................................................. 278  
*Pierre Ratz*

**Management and Control of the Stickies Spectrum** ............................................ 297  
*Brent Cowan*

**Chemical Free Kappa Number & Brightness Analyzer** .......................................... 322  
*Chris Pederson*

**L&W Pulp Tester** .................................................................................................... 335  
*Per-Olof P. Warendh*

**EATON SC9000 MV AC Drive Technology Improves Weyerhaeuser Energy Efficiency** ................................................................. 354  
*David B. Durocher*

**New Data Reconciliation Technology Tracks Processes On-line** ............................ 368  
*Larry Wasik*
SESSION 7: INK MEASUREMENT AND ADDITIVE INFLUENCE

The Influence of PCC Filler on Near-Infrared Scattering, Absorption and Residual Ink Measurement Error
Mika Körkkö, Antti Haapala, Ari Ämmälä, Jouko Niinimäki, Ossi Laitinen

Methods for Process Water Ink Content Analysis
Antti Haapala, Jouko Niinimäki, Mika Körkkö, Ossi Laitinen

SESSION 8: ALTERNATIVES TO CAUSTIC IN BLEACHING

Addition of Magnesium Hydroxide and Oxygen to D1 Stage Bleaching
Raymond C. Francis, Ashish Jain, Nihar Das, Samar K. Bose

An Evaluation of the Effects of Mg(OH)2 Addition to the Extraction Stage
Daniel Connell, Sean Smith

Using Magnesium Hydroxide for pH Control to Improve the Chlorine Dioxide Brightening Stages of ECF Bleaching Sequences
Yonghao Ni, Sarwar Jahan, Zhibin He

SESSION 10: WASTE WATER DISCHARGE PERMITTING

Water Permitting 101
Paul Wiegand

Greenfield Development and TMDLS: NPDES Permitting of a New Facility Discharging to a Nutrient-Impaired Stream
Mark R. Johnson, Greg S. Mitchell

SESSION 11: NEW TECHNOLOGY ROADMAP FOR THE FOREST PRODUCTS INDUSTRY – STRATEGIC PRIORITIES FOR TRANSFORMATIONAL R&D

Overview - Rationale for the New Roadmap, the Process Used, the Two Workshops, the Timetable and the Action Plan
Ron Brown

Reducing Carbon Emissions and Energy Consumption
Norman Marsolan

Significantly Reducing Fresh Water Consumption
Gopal Goyal

Getting Value from Woody Biomass in New Ways
John Cowie

Improving Supply of Biomass
Ron Brown

Developing New Product Features
John Cowie

Improving Recovery and Recycling of Waste Wood and Paper Products
David White

SESSION 12: WHAT'S NEW IN RECYCLING

Low Alkali Deinking of ONP/OMG - A New Strategy for Changing Times
David R. Jones, Dan E. Glover

Modified Kaolin-Based Deinking Reagent for Recycled Paper
Cesar Basilio, Steven Sheppard
SESSION 14: RELIABILITY & PROCESS CONTROL

Boost Electrical Reliability & Capitalize on Existing Energy Assets in the Mill ........................................ 703
  Gregg Dixon

A Plan for Leveraging Instrumentation and Control Technology to Reduce Energy Costs and Improve Overall Mill Profitability ........................................ 714
  John (Chip) D. Rennie, Robert P. Sabin

VOLUME 2

How the Changing Regulatory Landscape is Affecting Equipment Reliability ........................................ 775
  Grant Crosley, Chris Muller

SESSION 15: UPDATED RESIDUALS MANAGEMENT PRACTICES

Management of Paper Mill Sludges ................................................................................................. 824
  Robert Laughlin, Niel Erasmus

SESSION 17: TAPPI STANDARDS: 2010 AND BEYOND

The Changing Role of TAPPI in the Development of Standards for the Global Paper Industry ............... 835
  James C. Abbott

Brightness Confusion for Paper Consumers .................................................................................... 879
  M. Todd Popson, Patrick C. Robertson

Sources of Variability in Testing Absorptive Rate of Tissue Paper .................................................. 907
  Paul D. Beuther, Michael W. Veith

SESSION 18: RECYCLING TRENDS AND TECHNOLOGY

Trends in the Use of Recovered Fiber - Role of Institutional and Market Factors .................................... 953
  Maija Hujala, Anni Tuppura, Kaisu Puumalainen, Anne Toppinen

Fundamental Studies Applied for Latest Development in Deinking Flotation Technology ..................... 976
  Jukka Heimonen, Bob Belair

SESSION 19: ENGINEERING KRAFT FIBERS THROUGH PULPING OPERATIONS I

Differences in Juvenile Pinus Taeda (Loblolly Pine) Grown in Santa Catarina, Brazil and the Southern United States ........................................................................................ 1006
  Peter W. Hart

Impact of Cellulase Enzymes on the Physical Characteristics of Softwood Kraft Fiber ....................... 1016
  Rosy Covarrubias, Chris Williams, Holly Richardson

Optimal Industrial Birch Black Liquor for Xylan Sorption .................................................................... 1026
  Espen Ribe, Fredrik Wernersson, Hans Theliander

SESSION 20: RECOVERY BOILER DESIGN, MATERIALS & OPERATION

Investigation of Recovery Boiler Superheater Design and Performance - Part 1 ................................. 1061
  John L. Clement, Thomas M. Grace

Investigation of Superheater Design and Performance - Part 2 .......................................................... 1108
  Thomas M. Grace, John L. Clement
Effects of Sulphide on Melting Temperatures of Smelt and Carryover Particles in Kraft Recovery Boilers
Honghi Tran, Patrice Chartrand, Xiaosong Mao

Update of the American Forest & Paper Association Recovery Boiler Program
Thomas J. Grant

SESSION 21: LUBRICATION & HYDRAULICS: CONTINUING EDUCATION IN CURRENT BEST PRACTICES, MILLWIDE DCS – UNDERSTANDING CONTROL FUNCTIONS

A Practical Approach to Hydraulic Trouble Shooting, How and What to Teach Your Maintenance Engineers and Technicians
Wade Parks
Automatic Grease Lubrication Systems for Harsh Environments such as Machine Wet End, Lime Kiln, Stacke-Reclaimer
David Gervasi

SESSION 23: APPLICATIONS OF NEAR INFRARED SPECTROMETRY IN WOOD, PULP AND PAPER

Rapid At-line and On-line Determination of Pulp Mill Process Variables
Brian Curtiss, Don Campbell
Experiences in Field Assessment of Kraft Pulp Yield in Plantation Eucalypts
Roger Meder, Geoff Downes, Nicholas Ebdon
A Multi-site, Multi-species Calibration for the Prediction of Cellulose Content in Eucalypts Woodmeal
Geoff Downes, Chris Harwood, Roger Meder

SESSION 24: STICKIES DEPOSIT CONTROL

Using Cyclodextrin to Stabilize and Control Colloidal Micro-stickies to Improve Paper Machine Runnability
R. Daniel Haynes
Effect of Cyclodextrins on the Properties of Cationic Polyacrylamides
Ying Wang, Sujit Banerjee

SESSION 25: RECOVERY BOILER CORROSION

Superheater Corrosion at Temperatures Below Deposit First Melting Temperature
Johanna Tuuremo, Mikko Hupa, Sonja Enestam
Corrosion Monitoring of Recovery Boiler Tubes at Irving Pulp and Paper
Kelly McKeeen, Andy Justason, Chris Halcron, Don McCabe, Chris Welch
SAVCOR Boiler Diagnostic System (BDS) - Correlating Process Changes to Risk Monitoring for Extended Boiler Performance and Reduced Corrosion and Plugging Potential
Yurij Duda, Jukka Kouri, Rodrigo Prado

SESSION 28: BLEACH PLANT DEPOSIT CONTROL

Deposit Management for the Bleach Plant
Sergey M. Shevchenko, Prasad Y. Duggirala
New Methods for Analysis of Extractives and Application in Control of Pitch
Philip M. Hoekstra, Grant Proulx, Thomas E. McNeel
SESSION 29: NONWOODS SESSION

Kenaf CMP Pulp; An Alternative Potential to Supplement Wood Shortages for Making Newsprint

Hossein Resalati

SESSION 30: IMPROVED BOILER DESIGN AND OPERATION

New High Power Recovery Boiler with Improved Operational Safety Features

Anne Aikio, Kari Haaga

Effect of Lignin Separation to Black Liquor and Recovery Boiler Operation

Esa Vakkilainen, Erkki Välimäki

Power Boiler Air Emission Compliance with New Scrubber Technology - A Case Study

Kimmo Peltonen, Magnus Randqvist

Improving Bark-fired Boiler Operation with the Use of an Over-grate Burner

Mia Clark, Dave Burton, Tamsin Patience

SESSION 32 & 39 PROCESS SIMULATION WORKSHOP

CADSIM Plus Process Simulation: Mill Applications & Engineering Success

Larry Wasik

SESSION 34: APPLICATIONS OF NEAR INFRARED SPECTROMETRY FOR AUTOMATED MONITORING AND PROCESS CONTROL OF PULPING PROCESSES

Understanding the Kraft Liquor Cycle: A Need for On-line Measurement and Control

Jack Porter, Tom Sands, Thanh Trung

Closed Loop Control of ClO2 Generator Using FT-NIR Analyzer

Thanh Trung, Jim Menard, Gerry Ferweda, Ed Dylke

Experience and Learning from FT-NIR Installations in North American Pulp Mills for Applications in Digester, Recovery Recaust, and ClO2 Generator

Tom Sands

SESSION 36: NONWOODS SESSION

Bleaching of Rice Straw Pulp with Various Options for Oxygen Reinforcement in Plant Practice

A. K. Ray, Bhaskar Johri, Anuj Maheswari, Anuj Mittal

Delignification of Bagasse by Soda-Oxygen Process

A. K. Ray, G. Karandhikar

SESSION 37: ADVANCES IN BOILER EFFICIENCY

Modern Method to Determine Recovery Boiler Efficiency

Esa Vakkilainen, Pekka Ahtila

Recovery Boiler Reheat Steam Cycle

Tim Hicks, Bill Stigovolti, John Monacelli

Optimized Energy Production and Optimized Combustion

Jari Leppäkoski
<table>
<thead>
<tr>
<th>SESSION 38: UPDATE ON DUPLEX SS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>UNS S32202 - A Lean Duplex Grade for the Pulp and Paper Industry</strong></td>
</tr>
<tr>
<td>Fred M. Kratt</td>
</tr>
<tr>
<td><strong>Stress and Environmental Factors Affecting Stress Corrosion Cracking of Duplex Stainless Steels in White Liquor Environments</strong></td>
</tr>
<tr>
<td>Preet M. Singh, Di Yang, Kevin Chasse</td>
</tr>
<tr>
<td><strong>Effect of Flow on Corrosion of Pulp Mill Equipment</strong></td>
</tr>
<tr>
<td>Preet M. Singh, Jamshad Mahmood</td>
</tr>
<tr>
<td><strong>Duplex 2205 - Experiences in Pulp and Paper Industry of a 30 Years Old Steel Grade</strong></td>
</tr>
<tr>
<td>Lena Wegrellus, Arne Bergquist</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SESSION 40: NEW AIR COMPLIANCE PRACTICES AND TECHNOLOGIES</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Membrane WESP - A Lower Cost Technology for Fine Particulate Control</strong></td>
</tr>
<tr>
<td>Hardik Shah, John Caine</td>
</tr>
<tr>
<td><strong>Testing of a Pilot-Scale Ozone-Enhanced Catalytic Reactor for Oxidative Treatment of Waste Gas Emissions from the Pulp and Paper Industry</strong></td>
</tr>
<tr>
<td>Catherine B. Almquist, E. Sahle-Demessie, Venu Gopal Devalapelli</td>
</tr>
<tr>
<td><strong>Leak Detection and Repair Program Management</strong></td>
</tr>
<tr>
<td>David Owen, Brandon Kennemur</td>

</table>

<table>
<thead>
<tr>
<th>SESSION 44: EVAPORATORS &amp; KRAFT LIQUOR CYCLE</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Multivariate Analysis of Variables Affecting Thermal Performance of Black Liquor Evaporators</strong></td>
</tr>
<tr>
<td>Honghi Tran, Bill Downing, Denys Holik, Odessa Websdale, Hamideh Hajiha</td>
</tr>
<tr>
<td><strong>Commercial Application of Short Column Resin Bed Technology - Chloride Removal</strong></td>
</tr>
<tr>
<td>James Lockhart, Jim Wearing, Wayne Bucher</td>
</tr>
<tr>
<td><strong>Commercial Recovery of ClO2 Generator Sesquisulfate By-product Using Short Column Resin Bed Technology</strong></td>
</tr>
<tr>
<td>Wayne Bucher, James Lockhart, Jim Wearing, Dennis Carwile</td>
</tr>
</tbody>
</table>
The LignoBoost Process & use of Lignin as a New Bio-fuel
Per Tomani, Niklas Berglin, Peter Axegard

SESSION 45: ALTERNATIVE FUEL USE IN PULP MILLS

Advantages in Conducting Operational Trial Burns of Ground Petroleum Coke
Douglas W. Knott

Impacts of Burning High Sulphur Fuels in Lime Kilns
Honghi Tran, Sabrina Francey

SESSION 46: BIOREFINERY

Conceptual Design and Financial Projections for a Kraft Mill Sludge-to-Ethanol Plant Using SSOF Enzymes
David J. Webster, Harry Cullinan, Yoon Y. Lee

Improving Anaerobic Conversion of Pulp Mill Secondary Sludge to Biogas by Pretreatment
Honghi Tran, Emma Master, Nicholas Wood

SESSION 47: RESHAPING THE INDUSTRY II: OPPORTUNITIES AND INCENTIVES

The Forest Products Industry at a Crossroads: Preliminary Nems Analysis of Renewable Standards and Cap and Trade Policies
Marilyn A. Brown, Youngsun Baek

Project Finance: How Environmental Securities & Government Incentives Can Help Plant Improvement Projects Reach the Finish Line
Alex Schay

Federal Tax Incentives for Renewable Energy
Karen Williams, Lewis Horowitz

SESSION 49: BIOENERGY

Increase Production in Your Recovery Boiler with LignoBoost - Extract Valuable Lignin for Biorefinery Production and Replacement of Fossil Fuels
Henrik Wallmo, Anders Larsson, Martin Wimby

Energy Products from Wood Waste Using Torbed Reactor Technology
Robert Laughlin, Niel Erasmus

Gas Cleaning Aspects of Non-fossil Fuel Gasification Systems
Kenneth C. Schiffer

SESSION 50: ENERGY & CHEMICALS FROM BIOREFINING CELLULOSIC MATERIALS

Conversion of Agricultural Biomass into Ethanol
Maha M. Ibrahim, Morsi M. Mahmoud, Waleed K. El-Zawawy, Nadia A. Soliman, Yasser R. Adel-Fattah

Boosting Enzyme Performance During Cellulose and Starch Hydrolysis
Sujit Banerjee, Jian Lu, John T. Reye, Kendra Maxwell, Swati Rao

Xylan from Bleached Hardwood Pulp - New Opportunities
Agnete Fuhrmann, Björn Krogerus

The Effect of Modified Alkaline Pulping of Southern Pine, Integrated with Hemicellulose Pre-extraction on Pulp Properties
Gopal A. Krishnagopalan, Harry Cullinan, Sung-Hoon Yoon
SESSION 51: USING MATERIALS TO MANAGE YOUR ASSETS MORE EFFECTIVELY

Recent Advancements in Cemented Tungsten Carbide Tooling and Wear Parts for the Nonwovens Converting Industry ..................................................................................................................... 2741
Frank Rymar

Tank and Vessel Management: Environmental and Safety Spin........................................................................... 2786
David Owen, Sanjay Datar

Author Index
