2009 International Conference on Information Management, Innovation Management and Industrial Engineering

(ICIII 2009)

Xi’an, China
26-27 December 2009

Volume 1
Pages 1-632
# Table of Contents

**Volume - 1**

- Preface - Volume 1
- Organizing Committee - Volume 1
- Reviewers - Volume 1

Research on Security Status Recovery in Temporal Role-Based Access
Yu Wanjun and Wang Yong ........................................................................................................27
Resolution to DM Technology for Coal Mine Safety Data ..........................................................30
Gang Lu, Yu-bo Sun, Jiao Hai, and Keqi Han
The Study on the Open Technological Innovation Mode and Innovative Resource Optimization of Taiwan-Funded Enterprises in Yangtze River Delta .............................................34
Liu Guoyan and Sun Chunxiao
Analysis on the Gap of Regional Indigenous Innovation Capability of China ............................38
Peng Jianjuan
Evaluation of Strategic Investment Value of the Real Estate Industry ........................................42
Xia Zhou and Xiuzi Zhang
Application of Comprehensive Fuzzy Evaluation in Total Quality Management ..............................46
Yongmei Zuo and Zhiming Qu
Application of PCFA in Assessing Main Control Links and Management Tools of ERP ..............................50
Yongmei Zuo and Zhiming Qu
Research on Framework for Sensor Network Based on SWE ..................................................54
Zhong-Sheng Wang and Jian-Guo Wang
The Key Effect Factors of the First-line and Middle Manager IT Usage Intention ..............................60
Man-Hui Huang and Kang Xie
Design Evaluation and Strategy Selection for Product ................................................................64
Li Gao and Yi-lin Chi
Research on the Top Management Team Behavioral Integration, Strategic Decision Speed and Firm Performance towards Time-Based Competition .........................................67
Jiajun Gu and Fenghua Xie
Design of Electrical Safety Tool Ark Monitoring System Based on ARM ......................................71
Wang Sheguo, Zhang Fuliang, and Yuan Yuanjin
Expansion Method for Linear Integral Equation by Approximate Daubechies Wavelets as Bases for Obtain Galerkin System ................................................................................75
Zhongshe Gao and Yonghong Shen
Using Modified Shapley Value to Determine Revenue Allocation within Supply Chain ............78
Chao-hui Yi
The Marketing Innovation of the Self-Medication OTC Drugs with Reference to the Reform of Medical Treatment ........................................................................................................81
Yu Weizhen
Study on Application of E-business Based ERP in Coal Enterprise .........................................88
Minmin Zhang and Jian Zhang
A Two-Stage Hybrid Heuristic for Vehicles Routing Problem with Pickups and Deliveries ................................................................. 92
  Bigang Hong and Changshi Liu
Exploring for VMI Strategy Impact of Supply Chain Flexibility .............................................................. 98
  Yang Huaizhen, Li Lei, and Li Linghua
Game Analysis of Price Competition and Cooperation of Telecom Operators .................................................. 102
  Zi-yang Cheng and Shou-lian Tang
Empirical Study on Universities Logistics Service Performance Evaluation Based on AHP ....................................................... 106
  Qian Qiang and Lai Xinan
City Scientific and Technological Progress Level Classification Based on Support Vector Machine ......................... 110
  Jing Zhao and Xinghua Dang
The Problems and Countermeasures for Implementing Green Building in China ......................................................... 114
  Xiao Yuejun and Qiao Zhichun
Based on u-n under the Flux Observer Spindle Motor Direct Torque Control System Simulation .................................... 119
  Fang Xu, Ke Zhang, Lixiu Zhang, and Yuhou Wu
Formal Derivation of the Longest Common Subsequence Problem with PAR Method ............................................... 123
  Lingyu Sun and Ming Leng
An Approach of Product Configuration Based on Decision Tree and Minimum Conflicts Repair Algorithm .................. 126
  Guangxing Wei and Yanhong Qin
Modeling Customer Lifetime Value in Buyer-Seller Relationships ................................................................. 130
  Chang Xue
Application of Improved Multiple Linear Regression Method in Oilfield Output Forecasting ......................................... 133
  Liang Guo and Xianghui Deng
The Key Factors Affecting Technological Innovation in Shaoxing Textile Industry .................................................... 137
  Chen Shouyu and Lu Wencong
A Study on the Difference of Cognition to Stakeholder Interests Based on Enterprise Ownership ............................... 141
  Chen Xin and Wang Yueping
Firm Size and Innovation Performance: An Empirical Study from Chinese Photoelectron Industry ............................ 145
  Jin-ying Liu

Evaluation Analysis on Sustainable Development of Civil Engineering

An Xinzheng, Du Ruixue, and Yi Cheng

The Diffusion of ISO9000 Certification in China: A Trend Analysis Based on Grey Verhulst Model

Yongqing Chen and Erli Liu

A SVM Classifier Research Based on RS Reducts

Guojun Zhang and Jixiong Chen

A Discrete Time Geo/G/1 Queue with Feedback, Balking and General Retrial Times

Pei-shu Chen, Yi-juan Zhu, and Zong-hao Zhou

Ownership Properties and Six Sigma Implementation: An Exploratory Study Based on Chinese Manufacturing Enterprises

Yongqing Chen and Erli Liu

Binarization Algorithm of Passport Image Based on Global Iterative Threshold and Local Analysis

Zhiwen Wang, Shaozi Li, Songzhi Su, and Guoqing Xie

Organization Cost, Sales, General and Administrative Expenses and Management Cost

Ping Kang and Zuguang Hu

Research on Model Predictive Control for Inventory Management in Decentralized Supply Chain System

Dong Hai, Tang Xiao-hua, Tong Yan, and Li Yan-ping

Study of Customer Behavior Sensitive Marketing Strategy for Retailer

Jinshi Zhao and Jiazhen Huo

Construction of Precaution Index System for Internal Crisis in Expressway Project Operation

Chen Yun, Deng Hong-wei, and Hou Yun-fei

Research on the Innovative Modes and Innovative Routes of Software Engineering Theory

Yu Gao and Xiangzhong Feng

A Model Study on Knowledge Grows Up System of Software Project Based on Data Mining Technology

Zhao Likun

A Model of Demand for Urban Reused Water

Yushan Chen and Tao Duan

Analysis of the Correlation Effect on Hi-Tech Business Incubators Cluster in China

Kefan Xie, Hua Liu, Shi Zhao, and Xianjing Ruan
A Fuzzy-AHP Based Innovation Ability Evaluation System for Small and Medium-Sized Enterprise Clusters ................................................................. 277
  Ying Huang and Jin-Chang Li
Why Absorptive Capacity is More Essential in Some Situations? The Contingency View of Supply Chain Knowledge Sharing ........................................ 282
  Heng Liu, Xiyao Li, and Chenlu Zhang
Application of Principal Component Analysis to Lubricating Oil Spectral Data ................................................................. 286
  Hongxiang Tian and Tao Liu
The Evaluation on the Delivery Mode of the FMCG of the Small and Medium-Sized Enterprises .............................................................................................................................. 290
  Xiaoguo Pan and Ruoyun Zhang
Lean Production Characteristics Analysis Based on Tech-Economic Paradigm ................................................................. 294
  Ruan Pingnan and Ren Weimao
A Spatial Econometric Analysis of Venture Capital, R&D Institutions, Enterprise, University and Knowledge Spillovers .............................................................................................................................. 299
  Wan Kunyang and Yan Yan
A Searching Model of Trustworthy Supply Chain - TSFM ................................................................. 304
  Jun-Feng Tian, Qiu-Ge Sun, and Qian Liu
Transformer Substation Online Detection System Based on Lon Works Bus ................................................................. 309
  Xiao Ying and Peng Xuange
Research of the Evaluation Method of Construction Project Based on Vague Set .............................................................................................................................. 312
  Nansheng Pang and Yifei Lin
A New Vision on the Mechanism of College Teaching Faculty Construction .............................................................................................................................. 316
  Xiaohua Li, Jianhua Zhao, and Junshuan Liu
Evaluation Indicator System of Regional Vehicle Marketing Team Performance with Delphi .............................................................................................................................. 319
  Lixin Cui and Jinlong Zhang
Soft Budget Constraint, Debt Financing and Investment .............................................................................................................................. 324
  Lei Zhu
The Study of Instantiation for Decision Support Emergency Event Model .............................................................................................................................. 328
  Li Wen and Shumin Zhou
Innovation & Management of Biotechnology Education Highlands & Preparations Engineering Laboratory .............................................................................................................................. 332
  Ping Wan, Jun Chen, Xin-Guo Li, Li-Zhen Li, and Quan-Xi Wang
Preliminary Study on the Inventory Strategy of Traditional Chinese Medicines .............................................................................................................................. 335
  Ping Wan, Mei-Na Sun, and Min-Hao Wang
Strategy of Green Logistics and Sustainable Development .............................................................................................................................. 339
  Liu Ping
Urban Logistics Nodes Land Use Planning: A Scale Forecast and Allocation Model

Daqiang Chen, Lijun Bai, and Danzhi Sun

The Study on Credit Information Interactive System of Regional Logistics Trade

Zhou Li and Liu Bingwu

Study on Innovative Method Based on Integrated of TRIZ and DMAIC

Jianmin Xie and Futian Li

Spatial Data Integration and Conflicts Resolving Approaches

Yu-hong Wang and Sheng-wu Hu

Automotive Supply Chain Performance Influencing Path Analysis Based on Fuzzy Petri Net

Jia Wang

An Audio Watermarking Algorithm Based on Fast Fourier Transform

Xiumei Wen, Xuejun Ding, Jianhua Li, Liting Gao, and Haoyue Sun

The Endogenous Optimization Mechanism of Investor Protection

Yong Yang

A New Model of ISEE Based on Product Line

Jianli Dong and Ningguo Shi

The Basic Task Analysis in the Knowledge Management Process

Chengxiong Zhou, Zhuojun Liu, Shulian Niu, and Lanxiang Zhao

Analysis on the Dynamic Relationship between the Agglomeration of Industry and Innovation Environment in Changzhou

Wang Zhihua

The Research on Multi-task Bundling of Public-Private Partnerships Based on Principal-Agent Model

Shijian Fang, Liyun Liu, Jianhua Bao, and Wenli Fang

Research on Leader-Member Exchange and Work Performance

Jiang-shi Zhang, Shu Du, Shu-ming Ma, and Xiang-yao Wang

The Evaluation of Relative Efficiency of High Growth Technological SMEs Based on DEA Approach

Hao Jing

A Conceptual Frame for Supplier Management in China

Xiao Jing Wang

A Multi-objective DEA Approach in Chinese University Evaluation

Zheng Yang and Liang Liang

The Research of ETF Arbitrage Decision Support System

Liu Jia and Zhu Donghua

Study on the Event Volunteer Management Based on the Service Blueprint

Yisong Lydia Zheng, Liqiang Deng, and Meiling Li
Deriving Common Weights in University Evaluation Based on Standard Samples

Zheng Yang and Liang Liang

Research on Vehicle Routing Problem with Time Windows Based on Improving Ant Colony Algorithm

Li Guiyun

Existing Condition Analysis and Optimization Resource Allocation of the Construction Industry in China

Hao Zhijie, Xiao Yuejun, and Hao Zhiyong

Study on the Analysis of Information Technology Capability of Third-Party Logistics Firms and its Constructing

Ju-hong Chen and Meng-hua Zhao

Decision Making on WEEE Recycle Product Quality and Recycling Logistics Technology Investment

Wei Li, Ming-yong Lai, Guang-ming Zeng, and Kai Nie

On the Analysis Methods of Face Stability in Shield Tunnel Excavation

Zhi Bin

Modeling and Analysis of Reverse Supply Chain Based on Generalized Stochastic Petri Nets

Zhao Haiyan and Luo Shengqiang

Analyses and Strategies of Knowledge Sharing in the Organization Based on Utility Theory

Wei Guo, Qian Zhang, Keying Zhang, and Huaping Pan

Research of Enterprises Independent Innovation Ability Based on the Angle of Projects-Driven

Wang Feng, Ge Baoshan, and Zhang Li

A Goal Programming Model for Reverse Logistics Network Planning

Xiang-yun Chang, Fan Ti-jun, and Xia Ying

Construction and Application of Regional Technology Diffusion Model

Zhang Jingqiang

Comprehensive Evaluation Method Combining SVD with Ordinal Operator

Cong Li

Research on the Implementation of Auto Reverse Logistics

Qin Ying

The Continuous Improvement Model of Lean Production Based on Multi-type and Small-Batch Production

Tchidi Megan Florent, He Zhen, and Agnantounkpatin Arnaud Romaric

Research on Model of Fuzzy Petri Net Evaluation on Implementation Process of PFI Project

Hai-ling Li, Ben-shan Shi, and Ke-jian Liu
A Survey of PDA Use in PBL-Medical Curricula ......................................................... 477
  Rattiporn Luanrattana and Khin Than Win

Fuzzy Evaluation of Supply Chain Agility Based on Improved Term Weighting Method ................................................................. 483
  Wang Fei and Wang Shilei

On the Existence of Knowledge Capital of the Firm .................................................. 486
  Kaiming Wang and Jiliang Mo

Knowledge Transfer in Knowledge Network of IT Consulting Company ..................... 490
  Hongli Liu and Lei Zhao

Evaluation System and Its Application for Undeveloped Port-Shoreline Resources ................................................................. 496
  Mei Sha and Binhuang Qiu

Construction of Command System of Emergency Logistics ..................................... 501
  Chen Yun, Hu Di-huang, and Tan Ning

Productivity Evaluation to Chinese Agriculture Based on SBM Model .......................... 505
  Lihong Ren

Evaluation of Business Internal Control Based on Unascertained Measure and Information Entropy ................................................................. 509
  Jinting Yang, Yinghui Liu, and Zilai Sun

Spatio-temporal Analysis of Hazards to Achieve Safer Schedule ............................... 513
  Feng Xu and Yuanbin Song

Research on Constructing Model of Enterprise Staff Loyalty ..................................... 517
  Xu Jun

Development and Research on Preventive Maintenance Timing Determination System of Asphalt Pavement ................................................................. 521
  Guo-xiang Hu and Jie Li

Research on Supply Chain Cooperative Technology Innovation in Uncertain Environment ................................................................. 524
  Hong Xianpei and Zhang Huaige

Theory and Application of Format-Management in Highway Projects .......................... 528
  Hui-hua Chen, Meng-jun Wang, and Cui-cui Xu

Low Self-Efficacy User Acceptance of Information Technology Innovations ................ 533
  John Qi Dong

The Evolution Time's Complexity of Network Organization .................................... 537
  Ying Yan and Minqiang Li

Network Externality and Managerial Incentives .......................................................... 541
  Yu-yin Yi and Ai-ping Zhang

The Research on the BP Neural Network Application in Food Supply Chain Risk Management ....................................................................................... 545
  Xiao Jing, Zhang Dongjie, and Ma Zhongsu
Performance Evaluation of Supply Chain Based on Fuzzy Matter-Element Theory .............................................................. 549
   Xiaoyan Tao
Applying KMV Model to Credit Risk Assessment of Chinese Listed Firms ................................................................. 553
   Xiao-ju Gou and Si-wen Gui
Forecasting Model of Agricultural Products Prices in Wholesale Markets Based on Combined BP Neural Network -Time Series Model ................................................................. 558
   Shouhua Yu and Jingying Ou
The Strategic Upgrading and Restructuring of China's Shanzhai Cellphone Industry under Financial Crisis ................................................................. 562
   Liu Xue Feng and Zhou Xiao Chao
Study on Corporate Governance Based on ACO ........................................................................................................... 566
   Li Wangqing and Wang Mingli
Comprehensive Evaluation on Green Productions Based on TOPSIS Methodology ................................................................. 570
   Xiuyan Jia
The Measurement and Evaluation of the Internationalization of R&D ................................................................................ 573
   Ya-fei Luo and Lei Peng
The Application of Customer Relationship Management to the Integrated Kitchen Cabinet Enterprises ................................................................. 579
   Jijuan Zhang and Zhenya Zhong
A Study of Implementing Path of Service Innovation ........................................................................................................... 583
   Jianyu Zhang
An Empirical Examination of the Relationship Between Corporate Social Responsibility Orientation and Personal Value of Managers ................................................................................ 587
   Zhihua Jiang
Empirical Research on Supply Chain Relational Capital and Its Influence on Supply Chain Synergy ................................................................. 591
   Lu Shan and Tang Jing
Evaluation on the Science & Technology Innovation Capability of High-Technology Industry in China ................................................................................ 596
   Sui Li
Empirical Analysis of Factors Influencing Service Encounter Quality of Hospital Health Center: A Case of Hangzhou ................................................................................ 600
   Jing Hua Li and Xin Liu
Real Estate Market Structure and Technological Innovation ........................................................................................................... 604
   Shufeng Liu and Mingyu Gai
Innovation and Application on Evaluation Methods of Regional Tourism Resources ................................................................................ 608
   Li You-jun and Liu Zheng-xin
International Transfer of Retailers' Core Competencies: A Theoretical Framework

Xuhui Wang and Xiaojing Wang

Fuzzy Comprehensive Evaluation on Urban Green Development Based on Improved Algorithm

Hua Jiang and Jing Yang

Improved Integrated Optimization Model Research of Mode and Route in Multimodal Transportation

Kang Kai, Niu Haijiao, Zhu Yuejie, and Zhang Weicun

A University Student Behavioral Intention Model of Online Shopping

Yong Hu, Xin Sun, Jing Zhang, Xiangzhou Zhang, Fanghao Luo, and Lijun Huang

An Intelligent Model for Software Project Risk Prediction

Yong Hu, Xiangzhou Zhang, Xin Sun, Mei Liu, and Jianfeng Du

ICIII 2009 - Volume 2

The Research and Analysis of E-procurement for Iron and Steel Enterprises ..........................3
*Jie Yang and Ruoyun Zhang*

Temporal Data Store and Access Based on C-TRDM .................................................................7
*Qixian Cai, Xiaolu Wang, and Ping Tan*

On M&A Forecast Model of Target Firms Basing on Chinese Listed Companies ..................................................10
*Cai Yang and Ma Haifeng*

Do Managers Influence their Pay? Evidence from Stock Incentive Plans in an Immature Market Economy .................................................................14
*Huihui Yang and Anlin Cheng*

Research and Application Bidding on the New Model in Hebei Province .................................................................18
*Wang Fei and Tian Yu*

Financial Decision Support System Research Based on Data Warehouse .................................................................23
*LingLing Du*

Introducing a New Method to Predict the Project Time Risk .................................................................27
*Li Haitao and Zhang Xiaofu*
The Effect of Religiosity on Shopping Behavior: An Exploratory Study during the Transitional Period in China .................................................................31
  Li Jianfeng, Liu Hongping, and Du Lanying
International Capital Reversals: Consequences and Determinants ..................................................35
  Yuming Yin, Jing Xu, and Yao Li
Research on Damage Detection of Frame Structures Based on Wavelet Analysis and Norm Space .................................................................39
  Dong Xiaoma, Sun Qingzhen, Wei Baoli, and Hou Xiaoying
Empirical Study on the Relationship between Regional Technological Innovation Capacity and Regional Energy Consumption Intensity ........................................42
  Xiufang Du and Xiaofei Yan
Application of Gray-Situation Decision to the Investment of Real Estate and Stock .................................................................46
  Xiao-feng Zhang and Xing-ting Peng
Study on Transfer Pricing Evaluation System and Quantitative Model of Foreign-Invested Enterprises .................................................................52
  Ying-hui Cui and Cui-hong Wang
Effect Analysis Over the Stock Market to Housing Disbursement ..................................................55
  Xiao-feng Zhang and Xing-ting Peng
Site Selection of Urban Track Traffic Routes Based on GA-SVM .................................................................59
  Minan Tang and Enen Ren
The Project Review of Information Quality Management of Agricultural Scientific Data Sharing Center in China .................................................................63
  Li-rong Song and Guo-min Zhou
User Interesting Collaborative Filtering Model Based on Multi-agent ...........................................67
  Hua Wang, Cuqin Ma, Shaoling Huang, and Lizhen Liu
Fuzzy Mathematical Research on Tax Planning for Location of Foreign Direct Investment .................................................................71
  Qi Yang
Fuzzy Evaluation Model of Accounting Firm Knowledge Management Performance .................................................................75
  Zhi-hong Zhu and Da-wei Xue
A Research on the Computer-Aided Decision Support System for Selecting the Infrastructure Project Financing Mode .................................................................79
  Zhao Hui and Wang Xueqing
The Study on the Incentive Issues of All-Involvement Technological Innovation Based on Organizational Slack .................................................................82
  Heping Zhong
Research on Show Frames of Management Information Visualization .................................................................86
  Wang Xueyi, Li Yafang, Ji Yalin, and Dai Dongsheng
Name Consistency of Topological Objects in Instant Collaborative Design .............................................90
   Shu-xu Jing and Qi Yuan
Research on the Contents and Structure of Social Support Network for Private
Entrepreneurs in Transitional Environment .........................................................................................94
   Xueyan Wei and Ningxin Wang
Study on Effect of Spillway Trough on Spillway Crest Length of Sand Basin .....................................98
   Quanli Zong, Huanfang Liu, and Hua Tang
The Impact of Minimum Wage Policy on Wages and Employment in China ........................................102
   Xiao-Yong Xiao and Bao-Lin Xiang
Research on Enterprise Reverse Logistics Outsourcing Risk Evaluation Based
on Fuzzy Comprehensive Analytic Method .............................................................................................106
   Wei Zhang and Tijun Fan
The Model of the Business Management Decision of the Whole Employee
Stock Ownership Enterprise Based on AHP ............................................................................................110
   He Yonggui and Zhang Yu
Finite Element Analysis on Mechanical Behaviors of a Steel-Concrete Hybrid
Structure ..............................................................................................................................................114
   Zeliang Yao and Guoliang Bai
Firm Resources and Dynamic Capability Promotion: An Empirical Study ............................................118
   Wang Xiaojing
Digital PID Applied into Adjustable Thyristor Voltage Module .........................................................122
   Zhao Zhihong and Sun Peng
Research on Knowledge Transfer within an Industrial Cluster Based
on Cognitive Model ...............................................................................................................................125
   Wang Lan
The Performance Analysis of Innovation Investment in Electronics Industry
in China - Based on the Analysis of Panel Data during 1998-2007 .........................................................129
   Si-ao Liu and Yangen Lu
Bid Evaluation Research of Construction Project Based on Two-Stage Entropy
Weight .................................................................................................................................................133
   Zhang Yi and Wang Zhuofu
An Empirical Analysis Based on the Industry Chain of China Coal Industry
Cluster ....................................................................................................................................................136
   Qiao Bin, Zhang Bao-zhi, Zhao Xiao-liang, and Han Zheng-rong
Research on Influence of Control to Intellectual Property Risk and Innovation
Performance in Knowledge-Based Alliance ............................................................................................141
   Zhang Ke-ying and Liu Ruixia
Research on the Ways of Improving Principal-Agent Efficiency at Two Levels
for Venture Capital ..................................................................................................................................146
   Guan jun and Ye Yun-feng
Risk Analysis of Construction Schedule Based on PERT and MC Simulation ..............................................150
   Jian-wen Huang and Xing-xia Wang
Construction and Practice of the Value Innovation Strategy for Service Enterprises ...........................................................................................................................................................................154
   Zhang Xin and Lioupei Chun
A New Method for Implementing Information Search Scripting ....................................................................158
   Jun Yu and Zhi-yi Hu
Interactive Development between Dalian and Other Coastal Cities in Liaoning Province .........................................................162
   Aimin Liu and Dan Wang
Access Control Policies for Web Services in Medical Aid System ........................................................................167
   Li-Qun Kuang, Yuan Zhang, and Xie Han
Research on Recycling Mode of Discarded Household Electrical Appliance .........................................................171
   Gao Pingquan, Fan Houming, Tan Chaofeng, Zhang Jingyao, Li Jiashu, and Feng Lin
The Complex System Characteristic Analysis of Enterprise Financial Core Competence .................................................................177
   Jingpu Chen
Institution innovation Analysis on Corporate Cross Shareholding ........................................................................181
   Qimo Chen
Research on Returned Logistics Network Planning of Regional Discarded Household Appliance Recycling and Disposal Based on Revenue Maximization ........................................................................................................186
   Gao Pingquan, Fan Houming, Tan Chaofeng, Zhang Jingyao, Li Jiashu, and Feng Lin
Content Protection Based on Trusted Computing in Mobile Terminal ........................................................................192
   Liu Ren and Niu Dongxiao
The Evolutionary Analysis of Trust Mechanism in the Industrial Cluster Based on Social Network ........................................196
   Li Xing and Ran Ruguo
Design and Application of the Intelligent Antiterrorist Commanding System Based on the Platform of GPSone/CDMA 1X/GIS ................................................................................................................200
   Li Zhigang, Gao Chuang, and Wang Lidong
The Ecological Measures of the New Type of Cave Dwelling Design in Loess Plateau ..........................................................................................................................203
   Yu Chun-long and Zhang Fu-hao
Research on Innovative International Strategy of Chinese Automotive Corporations Based on Financial Crisis ..................................................................................................................207
   Miao Qing, Wang Xu, and Ge Lina
Comparison of Internet Financial Reporting between China and United States .......................................................211
   Shang Yu and Ding Rijia

A Research on Innovation Ability of Chinese High-Tech Industry Evaluation .................................................................448
   Pan Xia, Chen Jun, and Ju Xiao-feng
A Novel Two-Phase Method for the Classification of Incomplete Data .................................................................................................452
   Xiuyun Qu, Bo Yuan, and Wenhuang Liu
Application of Fuzzy Comprehensive Evaluation Method for Bid Evaluation of Power Equipment Based on Weight of Entropy .................................................................................................456
   Jie Yao, Li-chun Wang, and Bin-Bin Liu
Research of Knowledge Flow in Knowledge Ecosystem .................................................................................................................459
   Li Geng
Research on the Collaborative Innovation-Oriented Path of Enhancing Regional Innovation Capability .................................................................462
   Wei-yi Yi and Bo Yu
Research on the Relationship between Organizational Learning, Product Innovativeness and Product Quality .................................................................................................................466
   Xiong Wei and Feng Xiaobin
The Cournot Model with Incomplete Information Based on the RDEU Theory .................................................................471
   Guoqiang Xiong, Ling Li, and Yaqi Liu
Tag Recommendation Based on Continuous Conditional Random Fields .........................................................................................475
   Xin Liu, Yang Wang, Zhiang Liu, Zhen Yuan, Maoqiang Xie, and Yalou Huang
The Study of Implementation Technology of JDF-Based Printing ERP System ........................................481
Wenjie Yang, Jie Shi, and Haoxue Liu

A Two-Level Place Names Identification Based on the N-Shortest Path and CRFs .................................................................484
Xin-fu Li, Jian-feng Shi, and Mei Zheng

Relationships between Organizational Learning, Innovation and Performance: An Empirical Examination .................................................................488
Jiang Chen, Zhi-Cheng Liu, and Neng-Quan Wu

Study of Intelligent Semantic Information Processing System Based On Ontology .................................................................493
Lan Song, LiYan Xiong, and Hong Wang

Research of Permission Administration System Based on Access Control Matrix .................................................................496
Xiaofei Li and Xusheng Xie

The Approach for Enterprises to Realize Technological Innovation .................................................................................................499
Ge An-hua and Tao Peng

Research on the International Competitiveness of Hunan Tobacco ........................................................................................................503
Yong Lan and Zhiying Sheng

Optical Flow Estimation Algorithm Time-Based Multi Correlation Matching ...................................................................................507
Jing Xu and Huamin Yang

Study of the Framework of Engineering Construction Management System for Tianjin Section of Mid-route of South to North Water Transfer Project .................................................................511
Wang Wei

Context-Awareness Support for Content Recommendation in E-learning Environments .................................................................................................514
Yanlin Zheng, Luyi Li, and Fanglin Zheng

Duplication Dynamics Simulation for Interdiscipline Behavior of Scientists .................................................................................................518
Chun-hua Niu

A Chinese E-learning Network Platform Based on Web2.0 .........................................................................................................................522
Xin Liu, Z‘ang Liu, Zhen Yuan, Maoqiang Xie, and Yalou Huang

Research on the Value Chain Extension of Automotive Industry Based on the Mode of Industrial and Financial Capital Combination .........................................................................................................................526
Shusong Ba, Wenli Fang, Jianhua Bao, and Liyun Liu

Research on Classification and Subdivision Model of Telecom Rural Channel Based on Clustering Analysis .................................................................................................531
Wang Yuan and Zhang Yihua

Directions in Management Research: An Analysis of the Best Articles in Academy of Management Journal .................................................................................................535
Dan Shi and Yanping Li
Applied Research on Legitimation Todel and Strategies for Smartcard System Project

Xiang-yang Xu and Yongqin Du

Spillover Effects and Technology Innovation in Local Firms: Evidence from China

Muqiang Zheng and Mingchang Zhong

Backpacker Internet Information Search Behavior: A Case Study of University Students in China

Fen Luo and Jian Li

Analysis on the Effect of E-business in the Book Retail Market

Lulu Yang

Design and Implementation of Two-Level Proxy Server Dynamic Invocation System

Qian Zhicong, Luo Delin, Gao Qinquan, Chen Haiping, He Jialong, and Wu Shunxiang

Analysis of Enterprise Downsizing Management Mode Based on 5S Management

Yan Shumin and Li Xiaoling

Study on Performance Management of Enterprise R&D Staff

Houqing Cai and Xincai Qin

The Controller Design Based on Fieldbus and System-on-Chip

Shiwei Lin

Research on the Mechanical Behavior and Strength Calculation of Solid Steel Reinforced Concrete Special-Shaped Columns

Zong-Ping Chen and Jian-Yang Xue

Empirical Analysis of Influences of China's Fictitious Economy on Money Supply

Ying-ying Zhou and Chuan-zhe Liu

Case Study on Leveraged Financing Structure and Excessive Investment Activities in Domestic Listed Companies

Liu Xiang-bin

Entrepreneur Innovation and Industry Cluster Technology Upgrading Based on Knowledge Learning Process

Gui-lan Hu and Congying Wang

Research on the Evolution of Industrial Cluster from the Perspective of Knowledge Sharing

Yong-yue Zhu and Bei Hu

The Quantitative Model of Flexibility Capacity of Distribution Logistics System Vased on PPC and Fuzzy Matter-Element

Zhiyong Zhang, Xuefeng Song, and Shouping Gui

Formal Analysis of SET Registration Protocol Based on Strand Space

Hong Wang, Chen Wang, and Weijing Yin
Study on the Necessity for Establishing the Theory of Public Project Governance ...............................................................................................................................................................599

Du Yaling and Yin Yilin

On Topological Properties of Diffusion Network for Instant Messaging System .......................................................................................................................................................................603

Yuanping Zhao, Qiang Yan, and Huaying Shu

A New Near-Duplicate Detection System Using Object Semantics for Filtering Image Spam .......................................................................................................................................................................607

Zhaoyang Qu and Yingjin Zhang

Vessel Real-Time Monitoring System Based on AIS Temporal Database ..............................................................................................................................................................611

Zheng Pan and Shujun Deng

Cluster Supply Chain Network Structure and Knowledge Transfer ........................................................................................................................................................615

Binghua He and Guofang Song

Distributed Collaborative Production Planning: Multi-agent System Framework and Coordination Technology ........................................................................................................................................................619

Zhixiang Chen

Analysis of Discipline Development Discrepancy between the Provincial Cities of China Based on Output of Scientific Papers ........................................................................................................................................................625

Jingjing Wang and Qiang Wu

Author Index - Volume 3
2009 International Conference on Information Management, Innovation Management and Industrial Engineering

(ICIII 2009)

Xi’an, China
26-27 December 2009

Volume 4
Pages 1-646
ICIII 2009

Table of Contents

Volume - 4

Preface - Volume 4
Organizing Committee - Volume 4
Reviewers - Volume 4

ICIII 2009 - Volume 4

Study of Environment Risk of Mining Area Based on Triangular Fuzzy Number ................................................................. 3

Lihua Ma

Research on Risk Degree of Project Duration in U-PERT Network ................................................................. 6

Lihua Ma

Governance Mechanism of Regional Brand: A Perspective of Industrial Cluster ................................................................. 10

Ying Liang

Management to Social Enterprise - From a Perspective of Social Innovation ................................................................. 14

Cai Ning, Sun Wenwen, and Shen Qitaisong

Route Optimization for Bus Dispatching Based on Genetic Algorithm-Ant Colony Algorithm ................................................................. 18

Minan Tang, Enen Ren, and Chunyan Zhao

A Network for Emergency Logistics Management Inspired by Immune Multi-Affinity Model ................................................................. 22

Zhi-Hua Hu
The Enterprise High-Performance Work System and Its Enlightenment to Enterprises of Our Country .................................................................26

An Yuxin

An Improved Genetic Algorithm Based on Van Der Laan-Talman Algorithm .................................................................30

Guangyuan Liu, Jingjun Zhang, and Yanmin Shang

Research and Application of the Data Mining Technology on the Modern Enterprise Performance Evaluation System .........................................................34

Zhang Yihua and Wang Yuan

Study on Coordination Models of Container Logistics System .................................................................40

Wei Liu

Clustering Analysis of Chinese Water Transport Based on Importance Values .................................................................43

He Yuancheng and Dong Qianli

Security Scheme for Sensitive Data in Management-Type SaaS .................................................................47

Jing Xu, Tang Jinglei, He Dongjian, and Zhang Yang

SOA-Based Service Survivability in Financial Information System .................................................................51

Zhang Gaoyu, Wang Yingying, Xiang Hua, and Zhou Zhizhao

The Two-Factor Evaluating Model of Coal Resources Mining Rights Based on Vasicek Interest Rate .................................................................54

Zou Shaohui and Zhang Jinsuo

A Decision Support Framework for Port Efficiency Discovery Based on Intelligent Data Integration .................................................................58

Yan-Ping Meng, Bin Yang, You-Fang Huang, Yong-Sheng Yang, and Zhi-Hua Hu

High Frequency Financial Time Series Forecasting via Particle Filtering .................................................................62

Zhang Gaoyu, Li Qiongfei, Luo Qing, and Zhou Zhizhao

Study of the Case of Learning Bayesian Network from Incomplete Data .................................................................66

Cao Yonghui

Study of Group Stewardship and Learning for Work Group Effectiveness .................................................................70

Cao Yonghui

An Integer Linear Programming Model for Continuous Berth Allocation Problem .................................................................74

Jie-Min Yang, Zhi-Hua Hu, Xiang-Qian Ding, and Jack Xunjie Luo

An Algorithm for Extracting Geometric Features from Point Cloud .................................................................78

Xu-Fang Pang and Ming-Yong Pang

The Impacts of Social Capital and External Organizational Integration on New Product Development Performance .................................................................84

Wu Jiaxi

Modernizing Government: Reengineering through Knowledge Management Approach .................................................................88

Hau-Dong Tsui, Tsang-Yean Lee, and Chong-Yen Lee

Efficiency and Productivity in the Chinese Maritime Seaports .................................................................93

Li Qian and Liu Dawei
Research on Cost Control of Sewage Treatment Engineering Based on Project Financing .................................................................................................................................160

Li Chen-yang, Chen Hong-guang, and Lv Fu-cai

A Method for Evaluating Residential Value Based on Value Engineering Theory ..................................................................................................................................166

Yang Dong and Gu Jie

Cloud Computing Support for Personal Knowledge Management .................................................................................................................................171

Luyi Li, Yanlin Zheng, Fanglin Zheng, and Shaochun Zhong

Evolution and Upgrading of Industrial Cluster from Changing Business Model Perspective: A Case of Mold Industrial Cluster in Beilun ..................................................175

Dong Ying

Low-temperature Air-cooler Economic Analysis .................................................................................................................................179

Hongyu Shen, Sichao Tan, Ruijeng Tian, and Mou Wentong

Design of the E-business Interactive Platform Used on Virtual Reality Technology .................................................................................................................................183

JuChi Kuang, RuiHu Kuang, XiaoDong Jiang, and Guangzhao Liu

Application of Support Vector Regression and Particle Swarm Optimization in Traffic Accident Forecasting .................................................................................................................................188

Zeng Qing-wei, Fu Ai-Ying, and Xu Zhi-Hai

Fuzzy Comprehensive Evaluation Model of Railway Design Quality .................................................................................................................................192

Mengjun Wang, Chaoxian Tang, and Yapin Yang

Analysis on Development Law and Incentives for Beijing Urban Rail Transit .................................................................................................................................196

Yang Liu and Chang Yan

Real Option Model Application and Sensitivity Analysis in Mineral Resources Investment Project .................................................................................................................................200

Wenbo Tan, Haibin Liu, and Wei Zhang

A Study on Job Satisfaction of Hotel Employees .................................................................................................................................204

Zhen Liu and Jie Yang

Fuzzy Random Forecasting on Success Time and Capacity of Product R&D .................................................................................................................................210

Jian-Qi Mao, Tong Wang, and Zhao-Jun Liu

A Study on Co-interaction between Knowledge Sharing and Service Innovation Based on Team Climate .................................................................................................................................214

Cai Xiang, Shu Yong, and Chen Guo

The Combination Competitive Strategy and Its Performance: A Empirical Study from China .................................................................................................................................218

Bingyun Zheng

Knowledge Contribution Model and Application .................................................................................................................................222

Wu Jilan

Determining All Candidate Keys Based on Karnaugh Map .................................................................................................................................226

Yi-Shun Zhang

The Research of Container Multimodal Transport Risk Assessment Based on BP Neural Network .......................................................... 293
Feng Xiang, Xu Zhao, and Xiaoxia Ma

Structural Analysis on Japan-Oriented Sector of Beijing Software and Information Service Outsourcing Industry .................................................. 299
Jiawen Shen

A Differential Duopoly Game with Sticky Prices, Advertising and Differentiated Goods Based on Goodwill: A Memoryless Closed-Loop Nash Equilibrium ........................................................................................................... 302
Wu Xiao-jie, Wang Xiu-qiong, Liao Nuo, and Huang Shan

Empirical Study on Chinese Social Development during Year 2001 to 2007 - Study Based on G1- TOPSIS Combination Weighting Evaluation .................................................................................................................. 308
Yunjiang Geng and Guotai Chi

Research on Influencing Factors of Exhibitor Satisfaction in China ................................................................. 312
Yingkang Gu, Yan Wang, and Jie Yang

Risk Evaluation of Venture Capital Based on AHP and Grey Relational Analysis Methods ................................................................. 316
Haitao Su, Ruiqing Jiang, and Xiaowei Ma

Quality Chain Service Management of Manufacturing Based on Grid ................................................................................................. 321
Hua Dong, Jian Xie, and Shiyuan Yang

Distribution Policy Based Information Dissemination Management System ................................................................. 325
Zhou Zhizhao

A Risk Evaluation Method for Customer Relationship Management (CRM) Technological Initiatives ........................................................................................................... 329
Baolong Ma, Fei Li, and Yi Wang

Rights Expression In Database Rights Management Based on XrML ................................................................................................. 333
Luo Yishu, Huang Juan, and Le Jiajin

Online Price Extraction and Decision Support for Agricultural Products ................................................................................................. 337
Yu Chun-Yan, Ma Jun, and Zhao Yu-Yan

A Breast Detecting Algorithm for Adult Image Recognition ................................................................................................. 341
Xiaoyin Wang, Changzhen Hu, and Shuping Yao

Research of Synthetic Evaluation of Maintenance Accessibility for Complex Equipment ................................................................................................. 345
Jian-jun Yang, He Zhuo-ting, and Chun-hui Yang

Knowledge Search Abroad and Innovation Performance: An Empirical Study of Chinese High-Tech Firms ................................................................................................. 352
Chen Xue-guang

The Development of Shared Understanding among IS Leadership Team: A Multiple Case Study in China ................................................................................................. 356
Zhao Zhao, Wang Yunfeng, and Chen Xiaochun
A Model for Evaluating the Quality of Web Service Based on New Artificial Immune Network Classifier .................................................................360
   Liping Chen, Weitao Ha, and Guojun Zhang

Multi-dimensional Model Method for the Human Resource Allocation in Multi-project ..........................................................364
   Junjie Chen, Chuxiu Yun, and Zhen Wang

An Urban Criminal Statistic Profile Vector Algorithm ..........................................................367
   Lin Jianhui

The Impact of Relational Closeness, Relational Capability on Supply Flexibility ..........................................................371
   Zheyu Liu, Lan Wang, Ping Wang, and Hua Song

Population Structure Effect in Supermarket Site Selection based on DEMATEL ..........................................................375
   Ruixia Liu and Sunmei Xie

Qualitative Evaluation of E-Government Service Based on Participatory Index and Balanced Scorecard Approach ..........................................................380
   Jie Chen

Empirical Test of the Relationship between Technology Transfer and Independent R&D ..........................................................384
   Baojie Chen and Ao Chen

A new measuring technique on auditorium binaural impulse responses ..........................................................388

Xiaobo Wu, Wei Dou, and Zhigang Fan
Research on Organizational Conflicts Coordination in Knowledge Chain Based on the Third Party Management ................................................................. 524
Dunhu Liu
The Appraisal of Land Capitalization Rate Based on Artificial Neural Networks Theories ................................................................. 528
Xiekui Zhang, Wenshan Chen, and Shuchen Li
Profit and Financing Choice: An Empirical Comparison on the Basis of Traditional Empirical Model and Debt-Equity Multi-model ........................................ 532
Qingfeng Cai, Guanfeng Tong, and Zhirui Zeng
The Expected Discounted Penalty Function in the Erlang(2) Risk Process under Stochastic Interest Force ................................................................. 536
Yujuan Huang and Wenguang Yu
The Gerber-Shiu Discounted Penalty Function with Stochastic Interest Force under a Two-Step Premium Rate Risk Model ................................................................. 540
Yujuan Huang and Wenguang Yu
Information Visualization Analysis of the Hot Research Topics and the Research Fronts of Information Resources Management (IRM) ...............................................................544

Chen Lanjie

The Local e-Government Practice in China: A Survey of the G2C Practice of “Changxing County” ........................................................................................................548

Ji Zhi and Yang Zhenhua

An Empirical Research of Relationship between Corporate Strategy, Manufacturing Flexibility and Performance - Concrete Evidence Analysis through the Manufacturing Enterprises in PRD ......................................................552

Weihong Xie, Xiaochao Cheng, Luan Jiang, and Peixin Shan

Several New Copula Models Based on Autoregressive Condition .................................................................556

Wenden Yi and Aihua Huang

Research of Critical Success Factors for Implementing Knowledge Management in China ...........................................................................................................561

Suxia Gai and Congwei Xu

An Exploratory Study on Consumers’ Perceived Trust of Transaction Virtual Community .................................................................565

Bao Dun-an and Dong Da-hai

A Study on the Supply Chain’s Service Process Capability Index Based on Service Blueprinting .................................................................568

Liu Wei-hua and Zhang Wei

A Business Processes’ Multi-objective Optimization Model Based on Simulation .................................................................572

Liang Quan and Guo-shuang Tian

Analysis of the Competition-Cooperation Relations among the Supply Chain Enterprises Using Grey Controlling Theory .................................................................576

Kai Gan and Chenghu Zhang

The Impact of Global Financial Crisis on China’s Trade in Forest Product and Countermeasures .................................................................580

Yukun Cao and Hongfei Guo

A Study on Application of Fuzzy Analytic Hierarchy Process in Performance Evaluation of R&D Personnel in Enterprise .................................................................584

Li Chengbiao

Average Shilling Attack against Trust-Based Recommender Systems .................................................................588

Fuguo Zhang

Sustainability of Finance Advantage to Achieve Company Competitive Strategy Under .................................................................592

Guo Yue and Yang Qin

A Framework of City’s Used e-Product Collection Information Network to Relieve Information Poverty of Citizen: Shanghai City as an Example .................................................................596

Chen Zhi-gao and Chang Xiangyun
Study of the Theory of Knowledge Entropy for Innovative Development of Industrial Groups .......................................................................................................................................................... 602

RuiHu Kuang and JuChi Kuang

A Research of the Effects of Relationship Norms and Face on Consumers’ Willingness to Regain Relationships with Brands ........................................................................................................................................ 606

Huang Jing and Yao Qi

Evaluation Model of Technological Learning Efficiency Based on Independent Innovation .............................................................................................................................................. 611

Zhao Hongmei and Zhu Chaoqiang

Using SysML in Systems Design ........................................................................................................................................................................ 615

Tiago S. Costa, Alberto Sampaio, and Gustavo Alves

Scientific Management - The First Step of Building Energy Efficiency .................................................................................................................................................................. 619

Yanpeng Wu

A Data Aggregation Scheme in Wireless Sensor Networks for Structure Monitoring ...................................................................................................................................................... 623

Anjun Zhao, Junqi Yu, and Zhijie Li

Information Consumption Differences between China-Urban and Rural Residents: Based on the Data of 2000-2007 ............................................................................................................................................. 627

Xiao Tingting

Multi-objective Decision-Making and Combination Evaluation of Green Manufacturing Enterprises .................................................................................................................................................................. 631

Wang Xianlin, Zhang Hua, and Song Jiajia

The Contribution of Networking Innovation Process to Successful Innovation within Industrial Clusters: Theory and its Framework .................................................................................................................................................................. 635

Jiang Wei and Haiyan Zhu

Analysis of the Life Cycle Cost of the Power Plants Based on Analytic Hierarchy Process Method .................................................................................................................................................................. 639

Huang Yi and Huang Wen-jie

Automation Software Reliability Model Selection Based on Unascertained Set ......................................................................................................................... 643

Yanrui Liu and Yanfen Gao

Author Index - Volume 4
