2009 Second International Conference on Education Technology and Training

(ETT 2009)

Sanya, China
13 – 14 December 2009
## Table of Contents

**Message from Conference Chair**

**Organizing Committee**

**Reviewers**

### ETT 2009

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construction and Practice of Teaching Team for General Colleges</td>
<td>3</td>
</tr>
<tr>
<td>Xianzhang Feng</td>
<td></td>
</tr>
<tr>
<td>ZPD-Based Multi-level Teaching Pattern in Software Engineering--A Case</td>
<td>7</td>
</tr>
<tr>
<td>Lingfen Wang, Xizuo Li, Wei Li, and Haiyu Song</td>
<td></td>
</tr>
<tr>
<td>Study of Data Structure and Algorithm Course</td>
<td></td>
</tr>
<tr>
<td>Young Hoon Sung, Yong Ho Moon, and Seok Wun Ha</td>
<td>10</td>
</tr>
<tr>
<td>Development of a Robot Flight-Simulator Education Programming System</td>
<td></td>
</tr>
<tr>
<td>for Beginners Based on Web 2.0 - ARFLIS</td>
<td></td>
</tr>
<tr>
<td>Young Hoon Sung, Yong Ho Moon, and Seok Wun Ha</td>
<td></td>
</tr>
<tr>
<td>Improving Personalized Talent Education by Strengthening Specialty</td>
<td>16</td>
</tr>
<tr>
<td>Haiyu Song, Xizuo Li, Pengjie Wang, and Dandan Zhao</td>
<td></td>
</tr>
<tr>
<td>Direction of Information System in Software Engineering</td>
<td></td>
</tr>
<tr>
<td>Yu Lijie, Xia Liwen, and Guo Wenrong</td>
<td>19</td>
</tr>
<tr>
<td>Teaching Web Technology by Learning-By-Doing</td>
<td></td>
</tr>
<tr>
<td>Cai Tijian</td>
<td>22</td>
</tr>
<tr>
<td>Comparison and Analysis on Practical Teaching Model of Electronic</td>
<td></td>
</tr>
<tr>
<td>Commerce</td>
<td></td>
</tr>
<tr>
<td>An Innovative Education System for International Service Engineering</td>
<td>26</td>
</tr>
<tr>
<td>Yingjie Xia, Guohua Zhan, Sen Zhang, and Yang Li</td>
<td></td>
</tr>
<tr>
<td>On the Role of Problem-Solving and Mathematical Modeling</td>
<td></td>
</tr>
<tr>
<td>in Application-Oriented Talents Training</td>
<td>30</td>
</tr>
<tr>
<td>Chengming Qi, Jianjing Sun, and Ping Li</td>
<td></td>
</tr>

</table>
Advance your Education with Distance Learning .................................................................34

Yang Jinxian and Zhang Ying

Indaptation and the Corresponding Solution in Distance Learning ........................................38

Zhang Ying and Yang Jinxian

Simulative Constructivism in Management Teaching ..............................................................41

Wei Zhang and Lan Pan

A New Model of Teaching-Learning Process for Microcomputer Courses .............................44

Xu Jiangchun, Mao Jianlin, Chen Xianning, Fu Lixia, and Wu Jiande

Discussion on the Construction of E-Commerce Education Program .....................................48

Jing Yang and Hua Jiang

Interaction on Multimedia Teaching ......................................................................................52

Xiao-Ping Zong and Pei-Guang Wang

Research of ERP Practice Teaching System of the Economics and Management Majors of Independent Institutes .................................................................56

Jing Yang and Hua Jiang

Problems on College Administrative Staff Performance Appraisal and Its Countermeasures ......60

Baoliang Xing, Feng Xu, and Jing Zhao

Analysis of Factors Affecting the Motivation of Female College Students in Participation in Physical Training .................................................................64

Wei Zhang, Zhiguang Liu, and Lei Li

Research on the Application of Computer Multimedia Technology in College Teaching Aerobics ...........................................................................................................67

Wei Zhang and Caixia Wang

The Investigation of Junior Middle School Teachers’ Teaching Ability in the Classroom and Some Strategies Towards Them .................................................................71

Jian Li, Feng Xu, and Jinting Yang

Data Management Mode Research Based on Learners’ Learning Information – An Example of Network Courses .................................................................74

Jin Zhang and Hong Shen

Research on Teaching Reform of Computer Networks Course ..............................................79

Jian Feng

The Study on the Application of Multimedia Technology in College Basketball Teaching ...........................................................................................................83

Lei Xu and Zhiguang Liu

On the Construction of Net-Based Microteaching Training Mode ........................................86

Guirong Zhang, Fenglian Bian, and Guolin Li

Analyzing Algorithm of Multi-camera Multi-touch System for Educational Application ...........................................................................................................90

Xiang Li, Yongtian Wang, Yue Liu, and Jinghui Xie
Establishing a New Self-Learning Mode in CAI Courseware Designing .........................................................95
Cai Qixian, Huang Xiaolu, Wang Zhiwen, and Wang Huqi

Iris Location Algorithm Based on Gradient Direction Information .................................................................99
Zhiwen Wang, Shaoli Li, Guqing Xie, and Songzhi Su

How Feedback Intervention Affects the Performance of Self-Efficacy: An Eye Movement Study .................................................................102
Jing Hu, Chenxiao Tang, Xi Lei, Xuemin Zhang, and Zhao Xia

Effect of Gaze Direction and Face Expression on Visual Reflexive Attention ..............................................108
Xin Guan, Qi Wang, Ji Zhang, and Xue-ming Zhang

Science Education and Fostering of Critical Thinking in China .................................................................114
Cuilan Qiao

A Kind of Virtual Oscilloscope Used in Experiment Teaching Based on Sound Card and LabVIEW ..............................118
Aiju Chen and Jingjing Liu

Research on the Evaluation Model of University Bilingual Teaching Quality ..............................................122
Xiaorui Zhang and Zhichun Yue

Research on Technological Innovation Ability for Enterprises in Handan Based on Fuzzy Comprehensive Appraisal Model .........................................................................................126
Xiaorui Zhang and Zhichun Yue

Design of Learning Activities for Online Course Based on Web2.0 .................................................................130
Lina Sun, Wenxin Liang, and Bo Nan

Automation Professional Education and Quality Education .............................................................................133
Shuangbao Ma and Huanqi Tao

Face Recognition Based on LFDA and LS-SVM .................................................................................................136
Qi Shen and Ruixiang Liu

Adult Distance Education Students' Perspective on Critical Success Factors of e-Learning .............................................140
Farn-Shing Chen, Chin-Wen Liao, and Tsai-Hsiu Chen

Research and Practice in Analog Circuit Experiment Teaching ........................................................................144
Fengde Guo and Jun Rao

A Discussion on the Training Mode of University Administrative Staffs under the Specialization View .........................................................146
Xiaohua Li, Jianhua Zhao, and Ligang Fan

Building Up Web Course Electromechanics Based on Web Information Technology .........................................................150
Miao Manxiang

The International Comparison of Professionalization of University Administrators and the Related Apocalypse .............................................................................154
Xiaohua Li, Junshuan Liu, and Jianhua Zhao
The Framework of Knowledge Abilities Qualities on Business English and Curriculum Development ................................................................. 159

Xi-lan Sun, Ming-wang Shi, and Xi-ling Chen

Application of Combined Grey Neural Network and Data Mining in Information Technology Education ................................................................. 163

Qu Zhiming and Hou Wei

Application of Network Learning Theory and Design Principle in CAI Based on Clustering Algorithm and Rough Set ................................................................. 167

Qu Zhiming and Hou Wei

Application of PCFA in Assessing Operation Environment of Computer Security in Education Management ................................................................. 171

Qu Zhiming and Huo Hai-ying

Application of Performance Technology in Vocational Technology Education Based on Comprehensive Fuzzy Evaluation ................................................................. 175

Qu Zhiming and Huo Hai-ying

Design of C Language On-Line Study and Test System Based on Web ................................................................. 179

Wen X.L.

Design and Implementation of Workflow System on Bachelor Degree Final Design ................................................................. 183

Fixiang Gao, Bo Wei, and Lan Yao

The Exploration and Practice of Multimedia Teaching in Course of Microcomputer Principle and Application ................................................................. 189

Xin Zhang, Qun Gao, Shutian Wei, and Yanli Zhang

Research on the Talents Training of GIS Based on the Market Multi-level Needs ................................................................. 192

Youliang Chen and Xiaosheng Liu

A Bilingual Teaching Modal in a Programing Language Course ................................................................. 197

Hanjing Li, Kuanquan Wang, and Yuying Wang

Application Research of CD IO in MCU Teaching Reform ................................................................. 201

Wang Qingdong, Mi Jun, and Wang Guimei

Multilingual Information Service Platform for University Digital Library ................................................................. 204

Rongjian Xie and Dan Wu

Effective Training for College Librarian on Multilingual Information Service ................................................................. 208

Rongjian Xie and Dan Wu

Educational Resources Optimization and Efficiency Increase in Curriculum Equivalency of Sino-Foreign Cooperation Programs ................................................................. 212

Yilu Shen

Psychological Contract -- A New Kind of Exploration to the Study of Employment Relationship in Organizations of Knowledge-Based Employees ................................................................. 216

Yilu Shen
The Impact of Job Satisfaction Affect on Turnover Intention: An Empirical Study Based on the Circumstances of China ................................................................. 220

Qin Zhou

Research on the Construction of Network Study Platform Based on Blended Learning ........................................................................................................... 224

Mingzhang Zuo, Lixin Diao, and Xiaomei Liu

The Method of Similarity-Difference Comprehensive Evaluation on Test Paper Quality in Colleges and Universities and Its Application ........................................... 227

Ruilin Guo, Guanzhi Mao, Yafei Liu, Yanzhen Liu, Jingshun Wang, and Ruifeng Cui

An AHP-Based Study on the Assessment of Bilingual Teaching in Higher Education Institute ........................................................................................................... 231

Yaoxiang Li, Lihai Wang, and Xibin Dong

Clifford Algebra ........................................................................................................... 235

Wang Rui and Zhi Derui

Research and Practice on Network Instructional Design of Blended Learning Promoting the Optimization of Teaching Process ........................................................................... 238

Xu Jiamei and Hui Peng

Layered Optimal Teaching Mode in Software Engineering Graduate Education ........................................................................................................... 244

Yin Ming

Experimental Teaching Design and Exploration of System Dynamics Simulation ........................................................................................................... 249

Haiyan Yan and Bo Xu

Exploration and Practice on Excellent Course Construction in Industrial Design Specialty ........................................................................................................... 253

Sun Yingying

Exploiting Biosafety Examination System Based on Flex ........................................... 256

Qu Junxiong, He Miao, Zhang Shubo, Zuo Jing, Zhao Yanchao, and Liu Guanghua

Reading Based on Metaphor Theory in Cognitive Linguistics ........................................................................................................... 260

Xia Wenhong

A Personalized Educational System Based on the Fabric of Knowledge ..................... 264

Meng Xu, Rong Gu, Xiaoxuan Zheng, and Manlin Zhang

Design and Implementation of HPC-Based Research-Oriented Learning Environment for Structural Chemistry ........................................................................................................... 267

Xin Liu, Hui-min Guo, and Chang-gong Meng

The Dynamic Analysis of Demand and Supply of Its Balance Control of Universities Distance Education Based on the Perspective of Service Concept ........................................................................................................... 271

Liu Zeshuang and Li Jing

Based on Similar Distance Vector Algorithm Immune Genetic Characteristics of the Creative Talents of Genetic Selection ........................................................................................................... 274

Liu Zeshuang, Yan Fuqiang, and Li Jing
An Exploration Study of Competence-Based Training Needs of Hotel Sales
Li Li, Ping He, and Liu Yang .......................................................... 277

An Evaluation Model for Staff of Enterprise Based on Improve Niche Measure
Dong Yu-hong and Wang Xi-zhong ..................................................... 282

Research on the Sustainable Development Ability Evaluation
of Prefectural-Level City in Hebei Province ........................................ 286
Dong Yu-hong and Wang Xi-zhong

Discuss of QinQ Technology in E-Learning ........................................ 290
Chengwen Zhu and Wang Li

Comparison of Security Methods in Access Network .......................... 294
Chengwen Zhu and Wang Li

Intuitive Learning and Artificial Intuition Networks ............................... 297
Weidong Tao and Ping He

Teaching Reform and Innovation Based on CDIO ............................... 301
Yang Liu, Chunting Yang, and Xiaoyan Yang

Software Engineering Talent Cultivation in the CDIO Learning Cycle .... 305
Chunting Yang, Yang Liu, and Jun Zhan

Applied Research on the Mobile Learning in Foreign Language Learning ................................................. 309
Xinghong Liu

Innovative Experiment Teaching in Engineering Practice Courses ........ 313
Xiao Chen

To Build Positive Teacher-Student Relationship in Universities .............. 317
Yang Gao

Campus Network Based E-learning System in Chinese Universities .......... 320
Chengcheng Zhang, Guiyue Yao, and Fei Wang

Multi Dimensional Vector Space Based Evaluation Method for
the Effectiveness of Using ICTs in College Teaching Curriculum ............... 323
Chengcheng Zhang, Shumei Xu, and Fei Wang

The Implement of an Image Stitching Algorithm Based on Feature Extraction ........................................ 327
Yi Zhuang, Xinrong Hu, and Jianchun Wang

Heuristics Learning System Based on Non-optimum Recognition .............. 331
Yumeng He and Weidong Tao

Study on Seedtime of "Zero-Approach" Teaching Mode (ZATM) Based
on Web ......................................................................................... 335
Xianzhi Tian

Views on Chinese Technical and Vocational Education Based on
an Innovation Perspective .................................................................. 339
Tao Ye and Su Shiwei
Research on Relationship among Teaching, Scientific Research and Talents
Training ............................................................................................................................................................... 343
   Jing Zhao
Discussion of Testing Paper Design in Educational Software ................................................................. 347
   Zhang Jing, Zhang Jin, and Chen Junlan
The Application Analysis and Investigation of Multimedia Technique in Tennis Teaching ................................................................. 351
   Zheng Jun-Hong and Zu Xiao-Fang
Application of Fuzzy Clustering Analysis in Education Management ............................................... 355
   Zhao Yong-Xia
Briefly Analyzing Comprehensive Experiment Training Teaching for Computer Major ................................................................. 357
   Zu Xiao-Fang and Zheng Jun-Hong
Mathematical Innovation and the Development of Productivity ................................................................. 360
   He Dingxiu, Guo Jie, Xiao Yu, and Hu Xuanzi
A Research on Blahs Bear Correlative and Cognize Warp of Deaf Undergraduates ................................................................. 364
   Qiang Li and Chenfei Lu

Author Index
