2009 First International Conference on Networks & Communications

(NETCOM 2009)

Chennai, India
27 - 29 December 2009
## Session 1: Adhoc and Sensor Networks

Secure Key Exchange and Encryption Mechanism for Ad Hoc Networks ................................................................. 1
  *S. Sumathy and B. Upendra Kumar*

Impact of Sink Mobility on Network Performance in Wireless Sensor Networks .......................................................... 7
  *K. Thanigaivelu and K. Murugan*

Intelligent Clustering in Wireless Sensor Networks ........................................................................................................ 12
  *Ehsan Heidari and Ali Movaghar*

A Novel Algorithm for Graded Precision Localization in Wireless Sensor Networks .......................................................... 18
  *Sanat Sarangi and Subrat Kar*

MSTBBN: M-way Search Tree Based Base Station to Node Communication Protocol for Wireless Sensor Networks ................................................................. 23
  *Pankaj Gupta, Tarun Bansal, and Manoj Misra*

  *Abhishek Samanta, Dripto Bakshi, Amitava Mukherjee, and Mita Nasipuri*

Neural Network Based Energy Efficient Clustering and Routing in Wireless Sensor Networks ........................................ 34
  *Neeraj Kumar Nehra, Manoj Kumar, and R.B. Patel*
Opportunistic Auto-Adaptive Dissemination in Vehicular Ad-hoc Networks ........................................40
   Niu Jianwen, Liu Chang, and Ma Jian
K Bipartite Partitioning Algorithm for Channel Allocation Problem
in Wireless Mesh Networks ........................................................................................................46
   Rajiv Misra and Ajay Shukla
Posture-Predictive Power Control in Body Sensor Networks Using
Linear-Quadratic Gaussian Control ..........................................................................................52
   Muhannad Quwaider, Azizah Muhammad, Jongeun Choi, and Subir Biswas
Cross-Layer Interference Avoidance MAC Protocol for Dense Wireless Sensor
Networks ......................................................................................................................................60
   Behnam Dezfooli, Marjan Radi, and Mohammad A. Nematbakhsh

Session 2: Heterogeneous Wireless, WLAN, and Mobile Networks

Vertical Handoff in Heterogeneous Wireless Mobile Networks ...................................................66
   Chandravva Hebbi and S.V. Saboji
Multiple Mobile Routers Based Seamless Handover Scheme for Next
Generation Heterogeneous Networks ........................................................................................72
   Arun Prakash, Rajesh Verma, Rajeev Tripathi, and Kshirasagar Naik
A Practical Approach for Planning WLAN Deployment under 3G Cellular
Network .......................................................................................................................................78
   Samir K. Sadhukhan, Swarup Mandal, and Debashis Saha
A Scheduling Policy for Battery Management in Mobile Devices .............................................83
   B. Malarkodi, B. Prasana, and B. Venkataramani
AMOBIROUTE: An Advanced Mobility Based Ad Hoc Routing Protocol
for Mobile Ad Hoc Networks .......................................................................................................88
   Suparna DasGupta and Rituparna Chaki
Node Mobility Support Scheme Between the Mobile Network and PMIPv6
Networks ........................................................................................................................................93
   Hyo-Beom Lee, Youn-Hee Han, and Sung-Gi Min
An Analytical Model of Multi-service Call Admission Control in Next
Generation Wireless Overlay Networks ...................................................................................98
   Asish K. Mukhopadhyay, Sajal Saha, Suranjan Ghose, Debasish Saha,
   and Dhinaharan Nagamalai
An Improved Method of Detecting Spoofed Attack in Wireless LAN ......................................104
   Shikha Goel and Sudesh Kumar
Session 3: Measurement and Performance Analysis

Performance Study of Large Block FEC with Drop Tail for Video Streaming over the Internet ................................................................. 109
   Omar Almomani, Osman Ghazali, and Suhaidi Hassan

High Performance Image Steganalysis Through Stego Sensitive Feature Selection Using MBEGA ............................................................. 113
   S. Geetha, Siva S. Sivatha Sindhu, V. Kabilan, and N. Kamaraj

Accuracy of 3D Location Computation in GSM Through NS2 .............................................................. 119
   Anand Gupta, Harsh Bedi, M.S. Don Bosco, and Vinay Shashidhar

Cricket/Mica2 Based Discrete Event Simulator for WiHoc Ver.1.0 Localization Analysis .......................................................... 123
   Shamala S., Sangeetha T., and Moqry A.

Performance Improvement of Wireless Sensor Networks Using Layered Space Time Codes .......................................................... 129
   M.A. Bhagyaveni and K. Rajeswari

The FN Quadratic Marking/Dropping Probability Function ......................................................................................... 135
   Mohammed M. Kadhum and Suhaidi Hassan

Performance Analysis of MANET under Blackhole Attack ......................................................................................... 141
   Anu Bala, Munish Bansal, and Jagpreet Singh

Comparative Study of Various Cooling Schedules for Location Area Planning in Cellular Networks Using Simulated Annealing .............................................................................................................................. 146
   Nilesh B. Prajapati, Rupal R. Agravat, and Mosin I. Hasan

Session 4: Network Architectures, Protocols, and Routing

A Pascal Graph Property and Computer Network Topology ......................................................................................... 151
   Sanjay Kumar Pal, Samar Sen Sarma, and Subhrendu Guha Neogi

Perceptual Features Based Isolated Digit and Continuous Speech Recognition Using Iterative Clustering Approach .............................................................................................................................. 155
   A. Revathi and Y. Venkataramani

Just Queueing (JQ): Scheduling Algorithm for the Internet ......................................................................................... 161
   Yaser Miaji and Suhaidi Hassan

Performance of Dominating Sets in AODV Routing Protocol for MANETs ......................................................................................... 166
   A. Nagaraju and B. Eswar

On-body Packet Routing Algorithms for Body Sensor Networks ......................................................................................... 171
   Muhammad Quwaider and Subir Biswas

End-to-End Network Delay-Constrained for QoS Multicast Routing ......................................................................................... 178
   Balakannan S.P, Yier Yan, Jae Seung Yang, and Moon Ho Lee

Enhancing QoS and QoE in IMS Enabled Next Generation Networks ......................................................................................... 184
   Kamaljit I. Lakhtaria
Session 5: Network Operations and Management

Securing Internet Protocol (IP) Storage: A Case Study ................................................................. 190
  Siva Rama Krishnan Somayaji and Ch. A.S. Murty

Tree-Like Peer-to-Peer Symmetric Key Management in Mobile Ad Hoc Network ................................................................. 196
  Girish Kumar Fatnaink and M.M. Gore

Service Coverage Bounds Through Efficient Load Approximation in UMTS Network Planning .................................................................................. 202
  Sasthi C. Ghosh, Roger M. Whitaker, Stuart M. Allen, and Steve Hurley

An Energy-Conserving Topology Maintenance Algorithm for MANETs ....................................................... 208
  S. Muthuramalingam, P. Janani, B. Bavya, and R. Rajaram

Agent Based Web Services with RuleML for Network Management .................................................. 214
  Mydhili K. Nair and V. Gopalakrishna

A Status Monitoring System Design/Implementation for Home Appliances Controlled by Home Server .................................................................................................................. 220
  Boyoungh Lee, Sojung Yang, and Deokjai Choi

A Genetic Algorithm Based Oblivious Image Watermarking Scheme Using Singular Value Decomposition (SVD) .................................................................................. 224
  B. Jagadeesh, S. Srinivas Kumar, and K. Raja Rajeswari

Energy Based Quantization for Image Compression Using Contourlet Transform .......................................................................................................... 230
  Kilari Veeraswamy, B. Chandra Mohan, Y.V. Bhaskar Reddy, and S. Srinivas Kumar

Session 6: Network Security, Trust, and Privacy

PhishNet: Enhancing the Security Aspect of IMS Users ............................................................................... 235
  Reshmi Maulik and Nabendu Chaki

Fault Analysis of Security Policy Implementations in Enterprise Networks ....................................................... 240
  P. Bera, S.K. Ghosh, and Pallab Dasgupta

Multicrypt: A Provably Secure Encryption Scheme for Multicast Communication .......................................................................................................... 246
  A. John Prakash and V. Rhymend Uthariaraj

An Attack Vector for Deception Through Persuasion Used by Hackers and Crackers .......................................................................................................... 254
  Mosin I. Hasan and Nilesh B. Prajapati

Anonymous but Traceable IP Address-Based Communication System ............................................................................... 259
  Keiichi Sakakima, Shingo Ata, and Hiroshi Kitamura

A Scheme for the Design and Implementation of a Distributed IDS ............................................................................... 265
  K.B. Chandradeep

Secure Mobile Multicast Handoff Mechanisms Using a Time-Limited Key ............................................................................... 271
  Miyeon Yoon, Kwangkyum Lee, Mijoo Kim, and Yongtae Shin
A Middleware Architectural framework for Vehicular Safety over VANET
(InVANET) ..............................................................................................................................................................277
Saravanan K., Arunkumar Thangavelu, and K. Rameshbabu

An Approach for Security Assessment of Network Configurations Using Attack Graph
..............................................................................................................................................................................283
Nirnay Ghosh and S.K. Ghosh

Galaxia: A Semi-decentralized System for Implementing Secure-Group P2P Networks
..............................................................................................................................................................................289
Saurav Muralidharan, Sajin Koroth, Nevil Anto, and Rafieequ Pandarachalil

“Reminder: please update your details”: Phishing Trends ..................................................................................................................295
Cynthia Dhinakaran, Jae Kwang Lee, and Dhinaharan Nagamalai

Workshop Papers

GRAPH-HOC 09: First Workshop on Applications of Graph Theory in Wireless Ad Hoc Networks and Sensor Networks

On Some Sufficient Conditions for Distributed Quality-of-Service Support in Wireless Networks ..............................................................................................................................................301
Ashwin Ganesan

On a Local Heuristic for a Reverse Multicast Forwarding Game ..................................................................................................................307
Sarvesh Kumar Varatharajan and Gunes Ercal-Ozkaya

Random Key Graphs—Can They be Small Worlds? .............................................................................................................................313
Osman Yagan and Armand M. Makowski

Semiring Pruning for Information Dissemination in Mobile Ad Hoc Networks .................................................................................................319
Kiran K. Somasundaram and John S. Baras

A Graph Based Approach to Supporting Reconfiguration in Wireless Sensor Networks ..............................................................................................................................................................................326
Wouter Horré, Kevin Lee, Danny Hughes, Sam Michiels, and Wouter Joosen

WiMoNe 2009: First International Workshop on Wireless and Mobile Networks

An Alternative Approach to Find the Fermat Point of a Polygonal Geographic Region for Energy Efficient Geocast Routing Protocols: Global Minima Scheme ..........................................................................................................................................................................................332
Kaushik Ghosh, Sarbani Roy, and Pradip K. Das

Analysis of Hierarchical Mobile IP Based Fast Mobility Management Schemes ...............................................................................................338
Sajal Saha, Subhasree Bhattacharjee, Rajib Nath Bhowmick, Asish K. Mukhupadhyay, and Dhinaharan Nagamalai

Efficient Power-Aware Packet Scheduling for Multiantenna Packet Radio Systems .................................................................................................344
Stanislav Nonchev and Mikko Valkama
Time Domain Equalization Technique Using RAKE-MMSE Receivers for High Data Rate UWB Communication System .......................................................... 349
  Susmita Das and Bikramaditya Das

Vulnerabilities in Some Recently Proposed RFID Ownership Transfer Protocols .......................................................... 354
  Gaurav Kapoor and Selwyn Piramuthu

Anomaly Behavior Analysis for Web Page Inspection .......................................................... 358
  Chia-Mei Chen, Wan-Yi Tsai, and Hsiao-Chung Lin

Fairness Strategy and Scheduling Algorithm for IEEE 802.16 Wireless Access Systems .......................................................... 364
  Sheng-Tzong Cheng, Bo-Fu Chen, and Chih-Lun Chou

**NCS 2009: The First International Workshop on Network and Communications Security**

Fuzzy Switching Controller for the Security in 802.11 Networks .......................................................... 370
  Xu Huang and Dharmendra Sharma

Performance Evaluation of ADV with AODV for Mobile Ad-hoc Networks .......................................................... 376
  A. Nagaraju and CH. Ramya Krishna

An Agent Based Security Framework for Protecting Routing Layer Operations in MANET .......................................................... 381
  N. Jaisankar, R. Saravanan, and K. Durai Swamy

An Improved Collaborative Recommender System .......................................................... 386
  M.K. Kavitha Devi and P. Venkatesh

A Handoff Management Scheme for Mobile Station in Wireless Body Area Mesh Networks .......................................................... 392
  Jilong Li, Jangkyu Yun, Junhyung Kim, Icksoo Lee, and Kijun Han

An Efficient Routing Protocol Based on Position Information in Mobile Wireless Body Area Sensor Networks .......................................................... 396
  Kihyun Kim, Ick-Soo Lee, Mahnsuk Yoon, Junhyung Kim, Honggil Lee, and Kijun Han

Analysis and Proposal of Wireless Mesh Network’s Routing Metric for WBAN .......................................................... 400
  Sooyeol Yang, Jeongbae Yun, Jangkyu Yun, Honggil Lee, and Kijun Han

A Self-Adjustable Rate Control in Wireless Body Area Networks .......................................................... 404
  Young-mi Baek, Byung-hwa Lee, Jeongbae Yun, Keuchul Cho, and Kijun Han

Simulation Based Performance Comparison of Community Model, GFMM, RPGM, Manhattan Model and RWP-SS Mobility Models in MANET .......................................................... 408
  Gowrishankar S., SubirKumar Sarkar, and T.G. Basavaraju

iMeasure Security (iMS): A Novel Framework for Security Quantification .......................................................... 414
  Vijayaraghavan V. and Sanjoy Paul

Supporting Negative Authorization in Spatiotemporal Role Based Access Control .......................................................... 422
  Samrat Mondal and Shamik Sural
A Framework for Licensed Digital Signatures ................................................................. 428
   Alper Ugur and Ibrahim Sogukpınar
Packet Marking with Distance Based Probabilities for IP Traceback .................................. 433
   Turker Akyuz and Ibrahim Sogukpınar
Crowd Management with RFID and Wireless Technologies .................................................. 439
   Mohammad Yamin and Yasser Ades
