Serviceability of Concrete Members Reinforced with Internal/External FRP Reinforcement

Session at the ACI Spring 2009 Convention

ACI SP 264

San Antonio, Texas, USA
15-19 March 2009

Editors:

Carlos E. Ospina                      Tarek Alkhrdaji
Peter H. Bischoff

Some format issues inherent in the e-media version may also appear in this print version.
# TABLE OF CONTENTS

**SP-264—1**  
Deflection Control for FRP-Reinforced Concrete Members: An Overview ................................................................. 1  
by A. Scanlon

**SP-264—2**  
Effect of Sustained Loads on Flexural Crack Width in Concrete Beams Reinforced with Internal FRP Reinforcement ................................................................................................................. 13  
by S.P. Gross, J.R. Yost, and D.J. Stefanski

**SP-264—3**  
Cracking and Deflection Behavior of One-Way Parking Garage Slabs Reinforced with CFRP Bars .................. 33  
by S. El-Gamal, B. Benmokrane, and E. El-Salakawy

**SP-264—4**  
The Story Behind Proposed Changes to ACI 440 Deflection Requirements for FRP-Reinforced Concrete .......... 53  
by P.H. Bischoff, S. Gross, and C.E. Ospina

**SP-264—5**  
Effective Moment of Inertia Expression for Concrete Beams Reinforced with Fiber-Reinforced Polymer (FRP) .......................................................................................................................................... 77  
by H. Vogel and D. Svecova

**SP-264—6**  
Deflection and Cracking Behavior of RC Beams Strengthened in Flexure .............................................................. 95  
by S. Matthys and L. Taerwe

**SP-264—7**  
Modified Branson’s Formula for Deflection of FRP Strengthened Concrete Beams ............................................. 111  
by H.A. Rasheed and H. Charkas

**SP-264—8**  
Deflection Control of Reinforced Concrete Beams and One-Way Slabs with Externally Bonded FRP .............. 129  
by C.E. Ospina

**SP-264—9**  
Effective Moment of Inertia of Concrete Beams Prestressed with Aramid Fiber-Reinforced Polymer (AFRP) Tendons ........................................................................................................................................ 147  
by Y.J. Kim

**SP-264—10**  
Design Implications of Creep and Long-Term Deflections in FRP-RC Beam-Columns .................................. 163  
by A. Mirmiran, H. Erdogan, and A. Singhvi

**SP-264—11**  
Significance of Cracking Uncertainty on Predicting Deflection of FRC-RC Beams ........................................... 179  
by J.J. Kim, A.M. Said, and M.M. Reda Taha
