# TABLE OF CONTENTS

## VOLUME 1

### NASHVILLE CASE HISTORY RESULTS

Nashville's Rehab Program - A Strategic Plan Removes 3.6 Billion Gallons of I/I ................................................................. 1  
George Kurz, Gregory Ballard, Paul Stonecipher

### QUANTIFYING RDII – THE DIAGNOSTIC STRATEGY

Quantifying RDII: The Diagnostic Strategy ............................................................................................................................... 39  
Patrick Stevens
Patrick Stevens

### COST EFFECTIVE I/I REDUCTION

Sewer Rehabilitation - A Proven Strategic Plan Success ................................................................................................................. 144  
George Kurz

### A 10-STEP STRATEGIC PLAN FOR A REHABILITATION PROGRAM

Sewer Rehabilitation - A Ten-step Strategic Plan .......................................................................................................................... 182  
George Kurz

### SEWER SERVICE LATERAL REHABILITATION

Rehabilitation of Sewer Service Laterals - Crucial to Program Success! .......................................................................................... 220  
George Kurz, Paul A. Stonecipher

### SCATTERGRAPHS – THE ENGINEER'S FRIEND

Scattergraphs – The Engineer’s Friend ........................................................................................................................................ 266  
Pat Stevens

### STANDARDIZATION I/I ANALYSIS & CALCULATIONS

Standardization of I/I Calculations .............................................................................................................................................. 267  
George Kurz, Gregory A. Ballard, Michael A. Burgett, James R. Smith

### MEASURING INTERCEPTOR CAPACITY & I/I

Improving Confidence Levels for Measurement of Interceptor Capacity & I/I ................................................................. 299  
George Kurz, Dwight Williams, Michael R. Gardner, Shanna Stone

### TUTORIALS: INTRO TO SEWER & WATER REHAB TECHNOLOGIES

Internal Joint Seals * ......................................................................................................................................................... 334  
Terry Bell
Sliplining * ......................................................................................................................................................... 375  
Richard Turkopp
Cured-In-Place-Pipe * .............................................................. 379
Denise McClanahan

Pipe Renewal with Folded Pipe Liners * ........................................ 410
Grant Whittle

Grout-In-Place-Lining * ............................................................. 445
Michael Spero

Lateral Lining * ........................................................................ 498
Dave McArthur

Sectional Point Repairs: Modern Methods Making Repair of Small Sections of Pipe Both Effective & Economical ................................................................. 564
Larry Kiest Jr.

Controlling Root Infiltration with Chemicals * ............................... 585
Parke Raffensperger

Bypass Pumping * ..................................................................... 653
Cam Gould

Pipe Bursting: Static, Hydraulic, Splitting & Laterals * ...................... 655
Nate Hrabosky

SEWER REHABILITATION & CONSTRUCTION

Laredo’s Flores Storm Sewer Improvement * .................................... 715
Riazul Mia, Russell Ford

VOLUME 2

HDD On-Line/On-Grade Case Study * ........................................... 730
David Jeong

Design-Build Sewer Rehabilitation Solution for Military Base Project * .................................................. 770
David Goldwater

Emerald Coast Utilities Authority: Central Water Reclamation Facility “Design & Conservation Challenges for Transmission Mains” * ................................................... 776
Jason Garz, Bruce Neu

Novel Trenchless Application for Critical Grade Municipal Distribution Installations * ........................................ 786
Samuel Ariaratnam, Ira A. Fulton, Ryan Erger

Pilot Tube Microtunneling in Baton Rouge * .................................... 822
Troy Stokes

Increasing Your Revenue Stream Through Pipeline Laser and Sonar Profiling * ............................................. 857
N.H. Bennett

Rehab of 100-Year-Old Brick Storm Sewer * .................................... 859
Datta Shirodkar, Michael Spero

Trenchless Reconstruction of 60” Cast Iron Pressure Pipe * .................. 871
Kelly Odell, Michael Krosnosky

Turning the Corner: Examining the Role of Preventative Maintenance in Establishing an O&M Asset Management Program * ...................................................... 901
Darryl Macy, Stuart Tillery

MANHOLE REHABILITATION

Severe Wastewater Testing Program for Rapid Evaluation of Manhole Linings * ............................................. 926
Vaughn O’Dea

A Practical Review of Manhole Safety Practices and Procedures * ........................................................ 994
Steve Henning

True Green Manhole Liner * ...................................................... 996
Danny Warren

Manhole Inspections for New Installations & Rehabilitation: How to Do It and What to Look For * .................. 999
Michael Lukas

How to Identify & Eliminate Manhole Chimney Area Leakage * .............................................................. 1018
William Goff
Overcoming Unique Field Installation Obstacles for Cured-In-Place Manhole (CIPM) Lining * ....................... 1081

Bill Oberti

PIPE BURSTING: VIEW FROM THE FIELD

Decommissioning of Abandoned Gas Mains Utilizing the Pipe Bursting Method * ............................................... 1146
Alan Goodman

Large Diameter Gravity Sewer Pipe Bursting in the Bay Area Using Two Different Static Methods * ............... 1164
Richard Botteicher

The Underground Story to Trenchless Technology on an Island * ................................................................. 1188
Karla King, Matt Timberlake

Static Pipe Bursting Cartridge Loading Techniques for Installation of Segmented/Sectional Product Pipe * ........................................................... 1225
Collins Orton

Trenchless Replacement of Slipped and CIPP Lined Pipes on Malmstrom Air Force Base * ............................ 1359
Alan Goodman

Asbestos Cement Pipe: What are the Real Rules? * ........................................................................ 1406
Kent Von Aspern

VOLUME 3

Clay-to-Clay Static Pipe Bursting Process: A First in California * ................................................................. 1417
John Gulzow, George Mallakis

FORCE MAINS & PRESSURE PIPE

Elmendorf Air Force Base uses CIPP Solution for Structural Rehab of Water Mains * ........................................ 1500
Joseph Loiacono, Hazim Yunis, Nick Hebnes

Cured-in-Place Pipe for Pressure Pipe Rehabilitation * ............................................................................. 1538
Keith Oxner

Replacement of Gas Mains Utilizing the Pipe Bursting Method in North America * .............................................. 1579
Alan Goodman

Large Diameter Static Pipe Bursting Solution for Replacement of Lined Ductile Iron Force Main * ................. 1600
Brian Hunter, Jeff Greene, J. Chris Ford

Live Inspection of Large Diameter PCCP Using a Free-Swimming Tool * ...................................................... 1677
Cliff Jones

PIPELINE ASSESSMENT & CERTIFICATION PROGRAM (PACP) IMPLEMENTATION STRATEGIES AND TECHNIQUES

Pipeline Assessment & Certification Program (PACP) Implementation Strategies and Techniques -
Part I: Common PACP Coding Error * ................................................................. 1709
Rod Thornhill

Pipeline Assessment & Certification Program (PACP) Implementation Strategies and Techniques -
Part II: Strategies for Storing and Delivering PACP Data * ................................................................. 1739
Rod Thornhill

WATERWORKS CONFERENCE

The Study of Carbon Fiber Reinforced Polymer (CFRP) as a Long Term Repair Solution * ............................ 1758
Heath Carr

Largest Pre-Chlorinated Pipe Bursting Project in North America * .............................................................. 1808
Todd Grafeneuer

Tampa Bay Water Tackles Growth with Diverse Underground Installations .................................................. 1835
Amanda Rice

Design of Distribution Pipeline for Reclaimed Water System * ................................................................. 1836
Rodrigo Pigna, Ricardo Vieira
In-Service Assessment of Metallic Mains *
Cliff Jones

Greensboro’s Pilot Program for Water Pipebursting Leads to Expanded City Wide Program *
Robbie Bald Jr., Jeff Greene

Assessing Long-Term Performance of Polyethylene Pipe Materials in Potable Water Applications *
Ken Oliphant

Managing & Maintaining a Concrete Cylinder Pipe (CCP) Water Main *
Geoffrey Goodwin, Christine Carroll

TRENCHLESS TECHNICAL SYMPOSIUM/NASTT FORUM

Advancing the Envelope: New Trenchless Projects with HDPE Pipe *
Jeremy Ellingson, Larry Petroff

International Standards for Technology and Underground Utilities *
Alison Ratliff

Look Ma, No Hands: Using Automated Controls in Temporary Bypass Pumping Applications *
Joseph Abbott

VOLUME 4

Performance Limits Testing of Internally Restrained PVC Pipe *
Craig Fisher

The Trenchless Industry Needs a Standard Definition of “Structural” Liners *
George McAlpine

Reduce Your Carbon Footprint Using Trenchless Technology *
George Ragula, David O’Sullivan, Christian Braehler Jr., Keith Hanks, Samuel Ariaratnam

Renewal of Water Distribution Pipes Using Elastomeric Polyurea Lining *
Mohammad Najafi, Trupti Anil Kulkarni, Mustafa Kanchwala

Magnetic Tomography Method - New Non-Contact, Non-Intrusive Method of Inspection for Pipelines
Made with Ferrous Materials *
Vitali Grigil

HORIZONTAL DIRECTIONAL DRILLING: RIGONOMICS

Rigonomics: Advanced HDD Planning
Danny Crumpton, Jim Agnew, Chad Agnew, Frank McKenney

The Ice Road Highway: New Technique of Installing Large Diameter Casing Over Existing Collapsed Infrastructure *
Bob Harr

Emergency River Crossing Completed Using HDD & Design Build *
Jim Williams

Extend the Life – and Profitability – of Your Small Rig
N/A

Successfully Implementing Mud Cleaning Technology *
Tom Tibor

Determining the Economic Viability of Directional Drilling *
Paul Rogers

UNDERGROUND UTILITIES

Converting Overhead Utilities to Underground *
Don Buckner

Manual of Practice for Belowground Pipeline Networks for Utility Cables *
Lawrence Slavin

Pushing the Limits of Hard Rock Auger Boring: How to Make a Project a Record-Breaker *
Chris Sivesind

Cable Systems in Multi-Purpose or Shared Structures *
Jey Jeyapalan
Long-Distance Thermal Grouting of Underground Conduit-In-Casing Case Histories, Technology & Application * ................................................................. 2458
  Guy Dickes
Hurricanes’ Utilities Impact and Rapid Recovery * ................................................................. 2504
  C. Vipulanandan, Sam Rosania
Excavation Risk Management & Cost Avoidance * ................................................................. 2542
  Don Buckner

DAMAGE PREVENTION & SAFETY CONFERENCE

Providing Better Ticket Information to One-Call Helps Get the Paint Down When and Where You Want It ................................................................. 2586
  Walt Kelly
Supplementing One-Call: How to Get Accurate Locates on Private Property ................................................................. 2587
  Mike Parilac
Preventing Deadly Accidents in Confined Work Spaces ................................................................. 2588
  Kirby Lastinger
Cross Bores and Legacy Guidelines ................................................................. 2589
  Mark Bruce
Understanding the Latest D.I.R.T. Root Cause Data ................................................................. 2590
  J.D. Maniscalco
Locating Existing Underground Utilities for Tie-Ins * ................................................................. 2623
  Loren Snyder

NEW TECH FOR SEWER/WATER CONSTRUCTION & REHAB

Part 1: New Milestone in Guided Auger Boring with Front Steer Technology * ................................................................. 2632
  Gregor Nieder
Part 2: Polyurea Lining of Water Mains Using Spray in Place Pipe Technology * ................................................................. 2641
  Gary Natwig, Mario Perez, Mohammad Najafi

SEWER REHABILITATION

Rehab of Very Large Non-Circular Sewers – Challenges Galore * ................................................................. 2689
  Michael Spero, Datta Shirodkar
21st Century Resin Alternatives for Pipe Rehab ................................................................. 2708
  Dave Kozman, Rajesh Turakhia
Solving Hydrogen Sulfide Corrosion with Proven Solutions * ................................................................. 2710
  Jeff Beck
Black Point WWTP at Miami-Dade Uses Corrosion Protected Concrete * ................................................................. 2732
  Rodney Lovett, William Shook

STORM WATER PIPE REHABILITATION

Structural Rehabilitation of Storm and Sewer Pipe by the Centrifugally Cast Concrete Pipe Process * ................................................................. 2739
  Steve Henning
Rehabilitation of Storm Sewers Utilizing Spray Technologies * ................................................................. 2768
  E.F. Chip Johnson

HORIZONTAL DIRECTIONAL DRILLING: RIGONOMICS & OPERATIONS

Improving the Economics of HDD Pilot-Drilling Using Gyroscopic Steering Tools * ................................................................. 2808
  Jim Cloud, Albert Wesselink
Alternatives for HDD Rock Drilling ................................................................. 2825
  Carl Seeliger
DAMAGE PREVENTION AND SAFETY CONFERENCE: STAKING U

Staking University’s Locator Certification Seminar ................................................................. 2826
  Mike Parilac

SEWER/WATER CONSTRUCTION & REHABILITATION

Giving Your Utility What They Want: HDD with Familiar Pipe Materials * ........................................ 2827
  Richard Botteicher
Identifying and Quantifying Risk When Selecting a Tunnel Launch Shaft Location * .......................... 2830
  Roman Grijalva
CIPP Lateral Case Study: MSD – Louisville, KY .................................................................................. 2852
  Cole Perkins

HORIZONTAL DIRECTIONAL DRILLING: RIGONOMICS & OPERATIONS

New Technology: Herrenknecht Pipe Thruster * .................................................................................. 2853
  Gerhard Lang
Targeted HDD Design Under Levees to Reduce Potential for Hydraulic Fracture and Inadvertent Returns * .......................................................... 2894
  Andrew Sparks
