

# **ATC/SEI Conference on Improving the Seismic Performance of Existing Buildings and Other Structures 2009**

**San Francisco, California, USA  
9-11 December 2009**

**Volume 1 of 2**

**Editor:**

**Barry Goodno, Ph.D., P.E.**

**ISBN: 978-1-61567-903-4**

**Printed from e-media with permission by:**

# Contents

## Volume 1

### Plenary Papers

- National Seismic Hazard and Risk—The Problem** **1**  
Mary Lou Zoback, Chesley Williams, Patricia Grossi, and Taronne Tabucchi
- Performance-Based Seismic Upgrade of Building Structural Systems: A 2020 Vision** **10**  
Ronald O. Hamburger
- Progress of Seismic Rehabilitation of Buildings in the U.S.** **17**  
William T. Holmes

### Analysis and Rehabilitation Case Studies 1

#### Case Studies in Seismic Evaluation and Rehabilitation

- Seismic Assessment and Retrofit of BART Parking Structures** **32**  
M. IJ. Schotanus, P. C. Revelli, D. E. Campi, and E. S. Fok
- Seismic Assessment and Retrofit of Engineering Systems in Wellington Hospitals—A Case Study** **44**  
S. R. Uma, Graeme Beattie, and A. B. King
- Seismic Evaluation and Rehabilitation of a Three Story Pre-Northridge Steel Frame Essential Service Facility** **56**  
W. Liu, J. D. Givens, R. Kantikar, and C. Blaney
- Seismic Rehabilitation of an Existing Braced Frame Hospital Building by Direct Replacement with Buckling-Restrained Braces** **68**  
Cale Ash and Stacy Bartoletti
- Seismic Upgrade of a 15-Story Steel Moment Frame Building—Satisfying Performance Criteria with Application of Experimental and Analytical Procedures** **75**  
I. J. Malley, M. Sinclair, T. Graf, C. Blaney, M. Fraynt, C. Uang, J. Newell, and T. Ahmed

#### ASCE 41 Case Studies

- Evaluation of the ASCE 41 Linear Elastic Procedure for Seismic Retrofit of Existing Structures: Pros and Cons of the Method** **85**  
Luis A. Toranzo-Dianderas
- Immediate Occupancy Seismic Upgrade of an Operating High-Tech Manufacturing Facility** **92**  
M. Lisbeth Blaisdell, Andrew D. Mitchell, and Laurie K. Johnston
- Nonlinear Analysis of Pre-Northridge Steel High-Rise Building Using Modal-Pushover-Based Ground Motion Scaling Procedure** **103**  
Ali Sumer, Ryan A. Kersting, and David A. Hutchinson
- Seismic Rehabilitation of Santa Monica Place Mall Based on ASCE 41** **114**  
F. Tasbihgoo, C.-M. Lin, and L. Ho

#### Seismic Mitigation Program Case Studies

- Observations from California's Unreinforced Masonry and Public School Programs and the** **125**

## **California Multi-Hazard Mitigation Plan**

Fred Turner and Julie Norris

## **Risk Based Seismic Evaluation of Pre-1973 Hospital Buildings Using the HAZUS Methodology 137**

Chris Tokas and Roy Lobo

## **Seismic Analysis and Retrofit of Existing Department of Defense Structures in Accordance with the Unified Facilities Criteria 153**

Nathan C. Gould, Regan M. Milam, and James R. Snow

## **The Policy Problem of Non-Ductile Concrete Buildings in Los Angeles: Costly Earthquakes, Uncertain Owners 161**

Fynnwin Prager, Jennie Tucker, and Lena Prudence Sneberger

## **Analysis and Rehabilitation Case Studies 2**

### **Incremental Seismic Rehabilitation and Cost-Benefit Studies**

#### **Financial Benefit of Retrofitting Seismic-Risk Buildings with Passive Control Devices 173**

Seda Dogruel

#### **Incremental Seismic Rehabilitation of Buildings 184**

Barry H. Welliver

#### **Integrated Incremental Seismic Rehabilitation: A Practical Approach to Reducing Risk in Existing Vulnerable Buildings 190**

D. B. Hattis and F. Krimgold

#### **Preliminary Results of a Cost-Benefit Assessment of Replacing Seismically Vulnerable Non-Ductile Reinforced Concrete Frame Structures 201**

A. B. Liel and G. G. Deierlein

#### **Roble Hall at Stanford University: A Case Study in the Evolution of Seismic Rehabilitation Standards 212**

Bret Lizundia

### **Seismic Evaluation and Rehabilitation of School Buildings: An International Perspective**

#### **High Performance Fiber Reinforced Concrete Jacketing in a Seismic Retrofitting Application 224**

C. Beschi, A. Meda, and P. Riva

#### **Performance-Based Retrofit of School Buildings in British Columbia, Canada 234**

Graham Taylor, Carlos E. Ventura, Freddy Pina, and W. D. Liam Finn

#### **Seismic Assessment on In Situ School Testing in Taiwan Using Methodology of ASCE/SEI 41-06 246**

Tsung-Chih Chiou, Yuan-Tao Weng, Shyh-Jiann Hwang, and Kenneth J. Elwood

#### **Seismic Risk Reduction for Schools with Stone Slab Roof Systems in Delhi 258**

W. T. Holmes, J. E. Rodgers, S. Wij, M. Gupta, H. Kumar, L. T. Tobin, and A. Seth

### **Earthquake Performance Assessment and Retrofit of Public Buildings in Istanbul: ISMEP Project**

#### **Development of Guidelines and Effective Retrofit Strategies for Public Schools and Hospitals in Istanbul, Turkey 268**

H. Kit Miyamoto, Amir S. J. Gilani, S. B. Erdurmus, and M. E. Akdogan

<b>Displacement-Based Seismic Rehabilitation of Non-Ductile RC Frames with Added Shear Walls</b>	<b>281</b>
Haluk Sucuoğlu and Can Karageyik	
<b>Improving the Seismic Performance of Existing Structures in Istanbul, Turkey</b>	<b>294</b>
Rafael Alaluf and Craig A. Cole	
<b>Parametric Evaluation of Seismic Retrofitting Techniques Applied to the Public School Buildings in Istanbul</b>	<b>307</b>
C. Tuzun, C. Zulfikar, C. Yenidogan, U. Hancilar, M. E. Akdogan, and M. Erdik	
<b>Performance Comparisons of Seismic Assessment Methods with PSD Test Results of a Deficient RC Frame</b>	<b>319</b>
G. Ozcebe, E. G. Kurt, B. Binici, O. Kurc, E. Canbay, and U. Akpınar	
 <b>Analysis and Rehabilitation Case Studies 3</b>

## **Suggested Improvements to Guidelines, Standards, and Analysis Procedures 1**

### **Improving ASCE 31 and 41**

**An Action Plan for Improving the Seismic Performance of Existing Buildings: ATC 71** 442

A. T. Merovich

**Concept Paper on Utilizing the FEMA P695 (ATC-63) Ground Motion Spectral Shape Guidelines to Adjust the Target Displacement in the ASCE/SEI 41 Nonlinear Static Procedure** 453

C. B. Haselton, C. A. Kircher, and A. B. Liel

**Evaluation of Coefficient Method for Seismic Assessment of Existing Buildings Built on Soft Soil Sites** 465

Jorge Ruiz-García

**Resilience Criteria for Seismic Evaluation of Existing Buildings: A Proposal to Supplement ASCE 31 for Intermediate Performance Objectives** 477

David Bonowitz

### **Current Experimental and Analytical Research on Existing Reinforced Concrete Columns**

**Experimental Study on Dynamic Behavior of Multi-Story Reinforced Concrete Frames with Non-Seismic Detailing** 489

Soheil Yavari, Kenneth J. Elwood, Shih-Han Lin, Chiun-lin Wu, Shyh-Jiann Hwang, and Jack P. Moehle

**Local Deformation Measures for RC Column Shear Failures Leading to Collapse** 500

Matthew R. LeBorgne and Wassim M. Ghannoum

**Progressive Collapse Simulation of Reinforced Concrete Buildings Using Column Models with Strength Deterioration after Yielding** 512

Toshikazu Kabeyasawa, Toshimi Kabeyasawa, and Yousok Kim

**Response Estimation of Non-Ductile Reinforced Concrete Columns Subjected to Lateral Loads** 524

H. Sezen and M. S. Lodhi

**Simultaneous Shear and Axial Failures of Reinforced Concrete Columns** 536

Kurt W. Henkhaus, Julio A. Ramirez, and Santiago Pujol

### **Development of Guide for Seismic Rehabilitation of Existing Concrete Buildings**

**Guide for Seismic Rehabilitation of Existing Concrete Buildings: Vision** 547

K. J. Elwood

**Guide for Seismic Rehabilitation of Concrete Buildings: Summary of Future Changes** 551

H. Sezen, J. Dragovich, W. Ghannoum, L. N. Lowes, S. F. Brena, and K. J. Elwood

**A Practical Model for Beam-Column Connection Behavior in Reinforced Concrete Frames** 560

Anna Birely, Laura Lowes, and Dawn Lehman

**Seismic Performance Evaluation of Rehabilitated Reinforced Concrete Columns through Jacketing** 572

Sergio F. Breña and Sergio M. Alcocer

## **Suggested Improvements to Guidelines, Standards, and Analysis Procedures 2**

### **All About PMLs**

**A Definition Undone: Explicit Estimation of PMLs in the Age of Reliance on Design Ground** 584

<b>Motion Records</b>	
Mahmoud M. Hachem, Terrence F. Paret, and Gary R. Searer	
<b>Report Cards for Buildings: A Proposed Rating System for Earthquake Performance</b>	<b>593</b>
Ron Mayes, Kate Stillwell, Marguerite Bello, Mathew Bittleston, Stephen Bono, David Bonowitz, Evelyn Bravo, Doug Hohbach, David McCormick, Lee Pursell, and Ann Roche	
<b>The Problems with PMLs</b>	<b>605</b>
Gary R. Searer, Terrence F. Paret, Brian E. Kehoe, and Mahmoud M. Hachem	
<b>Improving Acceleration Demands for Acceleration-Sensitive Nonstructural Components in Buildings</b>	
<b>A Comprehensive Study of Floor Acceleration Demands in Multi-Story Buildings</b>	<b>616</b>
