2010 International Conference on Intelligent Systems, Modelling and Simulation

(ISMS 2010)

Liverpool, United Kingdom
27 – 29 January 2010

IEEE Catalog Number: CFP1025J-PRT
ISBN: 978-1-4244-5984-1
# Table of Contents

Welcome Message from the Chairs .......................................................................................................... xii
Conference Organization .......................................................................................................................... xiv
International/Technical Program Committee ...................................................................................... xv
International Reviewers ........................................................................................................................ xvi
Technical Sponsors ................................................................................................................................... xviii
Plenary Abstract 1 ..................................................................................................................................... xix
Plenary Abstract 2 .................................................................................................................................... xxii
Plenary Abstract 3 ................................................................................................................................... xxiv

## A. Intelligent Systems

Intrusion Detection by New Data Description Method ................................................................. 1  
*Mohammad Ghasemi Gol, Reza Monsefi, and Hadi Sadoghi Yazdi*

Beck Depression Inventory Test Assessment Using Fuzzy Inference System .............................. 6  
*Retro Dina Ariyanti, Sri Kusumadewi, and Irving Vitra Paputungan*

A New Support Vector Data Description with Fuzzy Constraints ....................................................... 10  
*Mohammad Ghasemi Gol, Mostafa Sabzekar, Reza Monsefi, Mahmoud Naghibzadeh, and Hadi Sadoghi Yazdi*

Selecting Informative Genes from Microarray Data by Using a Cyclic GA-Based Method ............... 15  
*Mohd Saberi Mohamad, Sigeru Omatu, Safaai Deris, and Michifumi Yoshioka*

The Use of Location Based Services for Very Fast and Precise Accidents' Reporting and Locating ......................................................................................................................... 21  
*Faisal Alkhateeb, Eslam Al Maghayreh, Mohammad Tubishat, and Shadi Aljawarneh*

An Intelligent Classification Model for Rubber Seed Clones Based on Shape Features through Imaging Techniques .................................................................................................................. 25  
*Hadzli Hashim, Fairul Nazmie Osman, Syed Abdul Mutalib Al Junid, Muhammad Adib Haron, and Hajar Mohd Salleh*

</table>
Application of Feed-Forward Neural Network and MMI-Supervised Vector Quantizer to the Task of Content Based Audio Segmentation by Co-operative Unmanned Flying Robots ................................................................. 111

Ladislava Smítková Janků and Kateřina Hyniová

C. Methodologies, Tools and Operations Research

Usage of Embedded Process Functional Language as a Modeling Tool for Embedded Systems Development ................................................................................................................. 116

Marek Běhálek and Petr Šaloun

CODESL: A Framework for System-Level Modelling, Co-simulation and Design-Space Exploration of Embedded Systems Based on System-on-Chip ................................................................................................................................. 122

Y. W. Hau, Mohamed Khalil-Hani, and M. N. Marsono

Randomness Modeling in Supply Chain Simulation ................................................................................................................................. 128

Galina Merkuryeva and Olesya Vecherinska

Simulation-Based Vehicle Scheduling with Time Windows ......................................................................................................................... 134

Galina Merkuryeva and Vitalijs Bolshakovs

Automated Average Cycle Length Detection in Chaotic Time Series ................................................................................................................. 140

Cristina Maria Ţeştanache, Gheorghe Cosmin Silaghi, and Cristian Marius Litan

Usability Evaluation of Web Office Applications in Collaborative Writing ............................................................................................................. 146

Muhammad Afsar Khan, Nauman Israr, and Sher Hassan

Strategies for Improving MDA-Based Development Processes ................................................................................................................. 152

Mehdi Fahmideh Gholami and Raman Ramsin

D. Bio-informatics and Bio-Medical Simulation

A Three-Stage Method to Select Informative Genes from Gene Expression Data in Classifying Cancer Classes ................................................................................................................................. 158

Mohd Saberi Mohamad, Sigeru Omatu, Safaai Deris, and Michifumi Yoshioka

Simulation of the GPTAD Applied to the Removal of Blood Clots That Arise during Peripheral Vascular Disease ................................................................................................................................. 164

G. Romero, I. Higuera, M. L. Martinez, G. Pearce, and N. D. Perkinson

Correlation-Based Network Inference and Modelling in Systems Biology: The NF-kappa B Signalling Network Case Study ......................................................................................................................... 170

Paola Lecca, Alida Palmisano, and Adaoha E. C. Ihewaka

E. Discrete Event and Real Time Systems

Discrete Event Simulation of Embedded Systems from Graphical Notations ................................................................................................................................. 176

Fateh Boutekkouk and Mohamed Benmohammed

Multi-view Communication Visualization for Wireless Network Simulations ................................................................................................................................. 181

Peter Janacik, Johannes Lessmann, and Michael Karch
F. Image, Speech and Signal Processing
Compression Algorithms for Audio-Video Streaming ................................................................. 187
    Tarif Riyad Rahman and Miftahur Rahman
A Fast Affine Projection Algorithm Based on Matching Pursuit in Adaptive Noise Cancellation for Speech Enhancement ........................................................................... 193
    N. Sonbolestan and S. A. Hadei
Comparative Study of Neural Networks for Image Retrieval ...................................................... 199
    B. Veera Jyothi and Kumar Eswaran
Implementation of DSP Techniques to Estimate Distances Covered by an Automobile Using PIC18F452 from Acceleration Signal Output ................................................................. 204
    Taha Ali, Shahid Nasim, Junaid Ali, and Naveed Ahmed
On the Use of Decision Tree for Posture Recognition .............................................................. 209
    Nooritawati Md Tahir, Aini Hussain, Salina Abdul Samad, and Hafizah Hussin

G. Industry, Business and Management
A Two Phase Clustering Method for Intelligent Customer Segmentation .................................... 215
    Morteza Namvar, Mohammad R. Gholamian, and Sahand Khak Abi
Data Mining Applications in Customer Churn Management .................................................... 220
    Sahand Khak Abi, Mohammad R. Gholamian, and Morteza Namvar
Security Standards Perspective to Fortify Web Database Applications from Code Injection Attacks ......................................................................................................................... 226
    Sushila Madan and Supriya Madan

H. Human Factors, Social & Economic Sciences
Estimation of Car Demand in Iranian Market: Using Discrete Choice Model ............................. 231
    Hamid Saeedi, Mohsen Fattahi Ardakani, and Mohammad Javad Shahbazi

J. Engineering: Civil, Mechanical, Chemical, Industrial, Manufacturing and Control
Nonparametric Driveline Identification and Control ................................................................. 238
    A. Abass, S. Zhao, and A. T. Shenton
Automotive Driveline Modelling, Inverse-Simulation and Compensation .................................. 244
    A. Abass and A. T. Shenton
Smart Distance Keeping: Modeling and Perspectives for Embedded Diagnosis .......................... 250
    Hassan Shraim, Othman Nasri, Philippe Dague, Olivier Heron, and Mickael Cartron
Technical Challenges in Network-Centric Control and Communication Systems ...................... 256
    Vasilis N. Tsoulkas, Leonidas Dritsas, and Athanasios A. Pantelous
Robust Performance Issues in Tracking Control over Networks ............................................... 264
    Leonidas Dritsas, Vasilis N. Tsoulkas, Athanasios A. Pantelous, and Antony Tzes
Robust Control of a Closed-Loop Identified System with Parametric/Model Uncertainties and External Disturbances

R. Doraiswami, Lahouari Cheded, Haris M. Khalid, Qadeer Ahmed, and Amar Khoukhi

A Time-Varying System Control Using Implicit Flatness: Case of an Inverted Pendulum

Chafik Maghzaoui, Ali Mansour, and Houssem Jerbi

K. Energy, Power Generation and Distribution

Energy Efficient Lighting System Design for Building

Wan Norsyafizan W. Muhamad, Mohamad Yusof Mat Zain, Norfishah Wahab, Noor Hafizah Abdul Aziz, and Rosmalini Abd Kadir

An Energy Efficient Cluster-Head Selection for Wireless Sensor Networks

Ma Chaw Mon Thein and Thandar Thein

Load Flow Simulation of Western Grid of Bangladesh Power System Using PSAT and Performance-Based Comparison with PowerWorld

Shibani Ghosh, Avijit Saha, and Nurunnahar Islam Mou

L. Transport, Logistics, Harbour, Shipping and Marine Simulation

Analysis of Time and Distance Delays in Car Following Models

Valeriy Naumov

N. Parallel and Distributed Architectures and Systems

A Fast Simulation for Thousands of General Homogeneous Fork/Join Queues

Ray Jinzhu Chen, Haiying Zhang, and Hailong Hu

Offloading Region Matching of Data Distribution Management with CUDA

Shih Hsiang Lo, Yeh Ching Chung, and Fang Ping Pai

Quantifying Distributed System Stability through Simulation: A Case Study of an Agent-Based System for Flow Reconstruction of DDoS Attacks

Omer Demir and Bilal Khan

AGC4ISR, New Software Architecture for Autonomic Grid Computing

Mehdi Bahrami, Ahmad Faraahi, and Amir Masoud Rahmani

Applying Rules as Policies for Large-Scale Data Sharing

Arcot Rajasekar, Reagan Moore, Mike Wan, Wayne Schroeder, and Adil Hasan

P. Internet Modelling, Semantic Web and Ontologies

Simulations of Some Physical Phenomena Using the Numerical Calculations

Eliza Consuela Isbasoiu
R. Mobile/Ad Hoc Wireless Networks, Mobicast, Sensor Placement, Target Tracking

Cross Layer Scheduling Scheme for Dense Wireless Sensor Networks .................................................334
  Nauman Israr

Real Time Monitoring Critical Parameters in Tissue Culture Growth Room ..............................................................339
  Noor Hafizah Abdul Aziz, Wan Norsyafizan W. Muhamad,
  Norfishah Abdul Wahab, Ahmad Jais Alias, Ahmad Tarmizi Hashim,
  and Rozita Mustafa

Bees_Ants Based Routing Algorithm ...........................................................................................................................344
  Eslam Al Maghayreh, Salam Abu Al-Haija, Faisal Alkhteeeb, and Shadi Aljawarneh

Call Admission Control Mechanism for Optimal QoS in Next Generation Wireless Networks ..........................................................350
  Ramesh Babu H. S., Gowrishankar, and Satyanarayana P. S.

Log Analyzer for Network Forensics and Incident Reporting ..................................................................................356
  Joshua Ojo Nehinbe

Automated Technique for Debugging Network Intrusion Detection Systems ............................................................362
  Joshua Ojo Nehinbe

Radio Channel Characterization for IEEE 802.11 .................................................................................................................368
  Deepak C. Karia, B. K. Lande, and R. D. Daruwala

S. Performance Engineering of Computer & Communication Systems

Hardware Acceleration of OpenSSL Cryptographic Functions for High-Performance Internet Security ........................374
  Mohamed Khalil-Hani, Vishnu P. Nambiar, and M. N. Marsono

An Approximate Actual Network Performance Evaluation Method ........................................................................380
  Jozef B. Lewoc, Antoni Izworski, Slawomir Skowrons, Georgi Marko Dimirovski, and Vesna Ojleska

Synthesizing Clustered, Secured, and Hierarchical Networks through Genetic Algorithms ..................................................385
  Shouq Al-Subaihi, Luwa Al-Hubail, Paulvanna Nayaki Marimuthu,
  and Sami J. Habib

A Novel Method for Supporting Locality in Peer-to-Peer Overlays Using Hypercube Topology .................................391
  Mohammed Gharib, Zeynab Barzegar, and Jafar Habibi

T. Circuits, Sensors and Devices

Modelling of NPN Bipolar Junction Transistor Characteristics Using Gummel Plot Technique ........................................396
  Zoofakar A. S. and Shahrol N. A.

Graphene Nanoribbon Fermi Energy Model in Parabolic Band Structure ....................................................................401
  Mohammad Taghi Ahmadi and Razali Ismail
A 2.4GHz 1.8-V CMOS Sub-harmonic Mixer with Inherent Harmonic-Rejection ........................................406
Mitra Gilasgar
New Advances on Modelling Control Processes Applied to Detection Trains
Operations ........................................................................................................................................412
JD. Sanz-Bobi, G. Romero, J. Felez, and R. Galan
A Low Power 2.4GHz Double-Balanced CMOS Sub-harmonic Mixer ..................................................418
Mitra Gilasgar
Electric Field and Ultrasonic Sensor Based Security System ................................................................423
Rohit Sharma, Karandeep Singh Dhingra, Nikhil Pandey, Rahul Garg, and Rohit Singhal

U. e-Science and e-Systems
Security Mechanisms in Network Protocols .................................................................................................427
Marcin Kołodziejczyk and Marek R. Ogiela
A Quantitative Model of Grid Systems Performance in Healthcare
Organisations ........................................................................................................................................431
Saleh Altowaijri, Rashid Mehmood, and John Williams
Context-Aware Pervasive Service Composition ........................................................................................437
Jiehan Zhou and Jukka Riekki
The Evolution of E-Business Environment in Fashion Sector ........................................................................443
Christiana Arvaniti

Author Index ........................................................................................................................................451
