Sustainable Engineering Forum

Presentations at the 2009 AIChE Annual Meeting

Nashville, Tennessee, USA
8-13 November 2009

ISBN: 978-1-61567-944-7
# TABLE OF CONTENTS

- **Shaping Our Energy Future: Advanced Research at the U.S. Department of Energy** .......................................................... 1
  - Jacques Beaudry-Losique
- **The Challenges of Scale and Sustainability in U.S. Energy Policy** .......................................................... 2
  - Marilyn Brown
- **The Nation's Renaissance in Energy Technology** .......................................................... 3
  - Dana C. Christensen
- **Clean Coal Technology and CO2 Capture: A Perspective** .......................................................... 4
  - L.-S. Fan
- **Advanced Biofuels - The Path Forward** .......................................................................................................................... 5
  - W. Densmore Hunter
- **Surface Functionalisation of Bacterial Cellulose Nanofibrils as the Route to Produce Green Polylactide Nanocomposites with Improved Properties** .......................................................... 6
  - Koon-Yang Lee, Jonny J. Blaker, Alexander Bismarck
- **All Green Composites for a Sustainable Manufacturing: Where We Are and Future Directions!** .......................................................... 7
  - Amar K. Mohanty
- **Sustainable Bio-Based Green-Composites for Automotive Interior Parts** .......................................................... 8
  - Hyun-Joong Kim, Byoung-Ho Lee
- **The Effect of Mono- and Poly-Organic Acids On Thermoformed Starch-Protein Composites** .......................................................... 15
  - C.I. Onwulata, Sudarsan Mukhopadhyay
- **Chain Scission Reaction in Hydrolytic Degradation of Polylactic Acid** .......................................................... 22
  - Shri Ramaswamy, Yaoang Liu, Ulrike Tschirner
- **Surface Modification of Cellulose Fibers by Starch Grafting** .......................................................................................................................... 23
  - Delong Song, Chunxu Dong, Yulin Deng
- **Environmentally Conscious Process Design - Identifying Tradeoffs Between Environmental Protection and Economic Viability at Different Scales** .......................................................... 24
  - Geoffrey F. Grubb, Bhavik R. Bakshi
- **Eco-Industrial Park Construction of the Korean Petrochemical Complex** .......................................................... 25
  - Changhyun Jeong, Chonghun Han
- **Integration of Industrial Scale Processes Using Biomass Feedstock in the Petrochemical Complex of the Lower Mississippi River Corridor** .......................................................................................................................... 26
  - Debalina Sengupta, Ralph W. Pike, Thomas A. Hertwig, Helen H. Lou
- **Towards Sustainable Manufacturing in Electroplating Industry: A Hierarchical Decision-Making Approach for Integrated P3 Technology Development** .......................................................................................................................... 33
  - Jie Xiao, Yinlin Huang
- **Sustainable Technologies for Arsenic Remediation and Carbon Dioxide Sequestration** .......................................................... 34
  - Cafer T. Yavuz, Vicki L. Colvin, Galen D. Stucky
- **Energy Efficiency – A New Methodology** .......................................................................................................................... 35
  - Renata Barros Pimentel Machado, Andreas Alexander Hahn, Valter Cesar Souza, Flavio Waltz
- **Material Balance for Leading Pretreatment Processes Including Sugar Conversion Using Switchgrass as Feedstock** .......................................................................................................................... 40
  - Rebecca J. Garlock, Leonardo da Costa Sousa, Bruce E. Dale, Yenkatesh Balan
- **Effects of Enzyme Loading and β-Glucosidase On Enzymatic Hydrolysis of Switchgrass Processed by Leading Pretreatment Technologies** .......................................................................................................................... 41
  - V. Ramesh Pallapolu, Urvi D. Kothari, Y. Y. Lee, Charles Wyman, Bruce Dale, Richard T. Elander, Mark Holtzapple, Michael Ladisch, Ryan E. Warner, Steven R. Thomas
- **Optimization of Enzyme Formulation On Pretreated Switchgrass** .......................................................................................................................... 42
  - Matthew Falls, Mark Holtzapple
- **Interaction of Cellulase and Non-Cellulase Enzymes with Switchgrass Processed by Leading Pretreatment Technologies** .......................................................................................................................... 43
  - Jian Shi, Mirvat Ebrik, Bin Yang, Charles E. Wyman
- **Comparative Study On Enzymatic Digestibility of Upland and Lowland Switchgrass Varieties Processed by Leading Pretreatment Technologies** .......................................................................................................................... 44
  - Youngmi Kim, Nathan S. Mosier, Michael R. Ladisch, Mark Holtzapple, Bruce Dale, Y. Y. Lee, Charles Wyman
- **Native and Pretreated Switchgrass Surface and Ultrastructure Imaging Analysis and Process Modeling Update of Various Leading Pretreatment Technologies** .......................................................................................................................... 45
  - Richard T. Elander, Bryon S Donohoe, Todd B Vinzant, Tim Eggeman

</table>
An Incremental, Multi-Technology Approach to Retrofitting Existing Pulverized Coal Power Plants for Carbon Capture 272
David C. Miller

Conversion of Solid Fuels in the Iron-Based Chemical Looping Process 273
Hyung Rae Kim, Fanxing Li, Liang Zeng, Deepak Sridhar, Fei Wang, Andrew Tong, Nobusuke Kobayashi, L.-S. Fan, R. Mark Bricka, Troy Fleming, Todd French, Suresh Arora

Bio Conversion of Glycerol to Methane and Hydrogen 274
R. Mark Bricka, Troy Fleming, Todd French, Suresh Arora

Bioremediation Costs Estimation in Lakes and Reservoirs through Dynamic Optimization Based On Hybrid Eutrophication Models 275
Vanina Estrada, Maria Soledad Diaz

Reimagining Agriculture to Accommodate Large Scale Energy Production 277
Bruce E. Dale, Lee R. Lynd, Tom L. Richard, Robert P. Anex, Mark Laser, Bryan D. Bals

Development of a Sustainable Microalgal Biofuels Industry: Of Ponds, Promises and Prospects 279
Al Darzins

Catalytic Conversion of Sugars to Conventional Liquid Fuels 281
Randy Cortright

Abengoa Bioenergy New Technologies Development of Enzymatic Cellulosic Ethanol 282
Robert Wooley

Engineering Microbial Metabolism for Production of Advanced Biofuels 284
Jay D. Keasling

Algenol Biofuels’s DIRECT to ETHANOL Technology 285
Paul Woods

Coal, Biomass, and Algae as Precursors to Liquid Fuels 286
Charles Taylor, Anthony V. Cugini, Cynthia Powell

Technology Challenges for Sustainable Energy Solutions – Battelle’s Perspective 287
Charles Lucius

The Challenge of Feedstock Flexibility 288
Dwight E. Anderson

Lignocellulosic Biomass to Ethanol: Process Design and Economics for Corn Stover 297
Ling Tao, Andy Aden, David Huntb, Abhijit Dutta, Chris Kinchin, Daniel Inman, David D. Hsu, Doug Dudgeon, John Lukas, Bryan Olthof, Paul Schoen, Matt Worley

The Effects of Xylooligomers On Enzymatic Hydrolysis of Pure Cellulose and Pretreated Corn Stover 301
Qing Qin, Bin Yang, Charles E. Wyman

Enzyme-Catalyzed Conversion of Glycerol to Glycerol Carbonate: Effect of Dialkyl Carbonate, Molar Ratios, Solvent Identity and Catalyst Loading On Reaction Rates, Conversions and Selectivity 302
Kerri A. Cushing, Steven W. Peretti

Conversion of Fermentation Inhibitors and Byproducts in Biorefinery Recycle Water Into Electricity 303
Abhijeet P. Borole, Jonathan R. Mielenz, Choo Y. Hamilton, Tatiana A. Vishnivetskaya

Wood-Based Biorefinery: An Update On the ESF Technology 304
Thomas E. Amidon, Shijie Liu

Process Engineering for Lignocellulosic Ethanol Facilities: a Combined Model- and Experiment-Based Approach and Comparison with Operational Results From a Demonstration-Scale Plant 305
Keith Flanagan, Dave Litzen, Dennis Harstad, Jim Schatzke

Chemical Characterization of Catalytic Hydrodeoxygenated Bio-Oil and Their Distilled Fractions 306
El barbary M. Hassan, Sanjeev K. Gajjela, Fei Ya, Phillip Steele

Biomass Conversion Via Direct Chemical Looping Technology – Process Simulations 307
Liang Zeng, Fanxing Li, Hyung Rae Kim, Deepak Sridhar, Fei Wang, Andrew Tong, Zhenchao Sun, Nobusuke Kobayashi, L.-S. Fan

Ethanol Fermentation From Hot-Water Wood Extract Hydrolysate with A Modified Pichia Stipitis Strain HWR 318
Alan M. Shupe, Shijie Liu

Anaerobic Fermentation of Hemicellulose Present in Pre-Pulping Extracts of Northern Hardwoods to Carboxylic Acids 319
Rakhi Baddam, G. Peter van Walsum

Sustainability Initiatives at Several U.S. Institutions of Higher Education 330
M. P. Sharma, Robert W. Peters

Interdisciplinary Tribal Energy Design Project 331
Daniel T. Schwartz

Education Modules for Teaching Sustainability in An Mass and Energy Balance Course 332
Kaiilung Zheng, Doyle P. Bean, Helen H. Lou, Thomas Ho, Yulin Huang
A Sustainable Design Project for the Process Separations Class .......................................................... 333
Jeffrey R. Seay, Richard A. Liner, Jason B. Gish

State of Green Construction Building in the State of Alabama: LEED Certification of Selected Buildings .......................................................... 334
Robert W. Peters

Effect of Cellulose-Binding Module Choice On Catalytic Activity of Cellulases .................................................. 348
Danielle Tallman-Erecat, Edward Y. Kim, Supratim Datta, Dean Dibble, Gang Cheng, Masood Hadi, Michael Kent, Seema Singh, Blake Simmons, Rajat Sapra

Synergistic Interactions Between Fungal and Bacterial Glycosyl Hydrolases On Ammonia Fiber Expansion Treated Corn Stover ............................................................................................................................................... 349
Dahai Guo, Shishir P. S. Chanduwat, Bruce E. Dale, Venkatesh Balasubramaniam

The Importance of Surface Area: Comparing Switchgrass Hydrolysis After COSLIF and SAA Pretreatments at Standard and Low Cellulase Loadings .......................................................... 350
Joseph A. Rollin, Noppadon Sathitsuksanoh, Zhiquang Zhu, Y.-H. Percival Zhang

Desorption of CBH1 From BMCC Substrate Is a Function of Enzymatic Activity .................................................. 351
Zhoulqiang Ye, Andrew N. Lane, R. Eric Berson

Interaction of the Enzyme with Substrate Is the Most Significant Factor Accounting for Enzyme Deactivation in the Enzymatic Hydrolysis of Cellulose ............................................................................................................................................... 352
Zhoulqiang Ye, Kristen M. Hatfield, Andrew N. Lane, R. Eric Berson

Media Requirements for Aerobic Cultivation of Saccharomyces Cerevisiae TMB 3400-F30-3 On Undetoxified Softwood Dilute Acid Hydrolyzate .......................................................... 353
Caroline Häggström, Ulrika Rova, Tomas Brandberg, David Hodge

Analyses of Switchgrass Bio-Oils .................................................................................................. 354
Roberto Galiaso, Lance Lobban, Daniel Resasco, Richard Mallinson

Influence of Pyrolysis Parameters On Individual Component of Bio-Oil ............................................................................................................................................... 355
Suchithra T. Gopakumar, Sushil Adhikari, Ram B. Gupta

Potential Use of Sugar Beet (Beta Vulgaris L.) Bagasse as a Renewable Hydrocarbon Source Via Fast Pyrolysis ............................................................................................................................................... 356
Sedat H. Beis

Product Distribution From Fast Pyrolysis of Hemicellulose ............................................................................................................................................... 357
Pushkaraj R. Paturwadhan, Justinas A. Satvito, Robert C. Brown, Brent H. Shanks

Reaction Kinetics of Coal Gasification with the N2/O2/CO2 Mixture ............................................................................................................................................... 358
Muhammad Faisal Irfan, Katsuki Kusakabe

Fast Pyrolysis of Wood Lignin: Towards A Continuous Process ............................................................................................................................................... 359
Sedat H. Beis, Sairkrishna Mukkambala, Nick Hill, Ta-Hsuan Ong, Adriaan Van Heiningen, Brian G. Frederick, M. Clayton Wheeler, Elizabeth Stenmler, William J. DeSisto

Water Energy Interface ............................................................................................................................................... 360
Robert W. Peters, Atul Kajale

Optimization Under Uncertainty for Water Consumption in a Pulverized Coal Power Plant ............................................................................................................................................... 366
Juan M. Salazar, Stephen E. Zimey, Urmila Diwekar

Reducing Water Demand by Increasing Energy Efficiency for Bio-Ethanol ............................................................................................................................................... 367
Peter Pfomrn, Mohammed Hussain

Use of Microbial Fuel Cells for Produced Water Treatment ............................................................................................................................................... 368
Abhijeet P. Borole, Costas Tsouris

Catalytic Production and Upgrading of Biomass Derived Monofunctional Hydrocarbons ............................................................................................................................................... 369
Elfj I. Gurbuz, Edward L. Kunkes, Dante A. Simonetti, Ryan M. West, Juan Carlos Serrano-Ruiz, Christian A. Gaetner, James A. Dumesic

Enerkem’s Thermochemical Biorefineries: Converting Heterogeneous Biomass Into Alcohols ............................................................................................................................................... 371
David Lynch

Gas- and Aqueous-Phase Hydrogenation of Acetic Acid Over Ru Catalysts ............................................................................................................................................... 375
George W. Huber, Hakan Ocay, Ye Xu

Commercializing Pyrolysis Oil Into Motor Fuels Leveraging the Existing Refining Infrastructure ............................................................................................................................................... 376
Thomas O. Foust, Robert Baldwin, Jim Frederic

Thermal Pretreatment Options for Thermochemical Conversion of Lignocellulosic Biomass ............................................................................................................................................... 377
Weiran Yan, Charles J. Coronella, Tapas Saha, Victor H. Vasquez

Pyrolysis Investigations and Ash Melting Behaviour of Agricultural Residues Used as a Fuel in Small Furnace Installations ............................................................................................................................................... 378
Martina Poppenwimmer, Harald Raupenstrauch

Investigating the Effects of Ethanol Organosolv Pretreatment On Buddleja Davidii ............................................................................................................................................... 386
Bassem Hallac, Pouloti Sammalkari, Yunqiao Pu, Michael Ray, Richard Murphy, Arthur J. Ragauskas
Ethanol Production from SPORL-Pretreated Lodgepole Pine: Preliminary Evaluation of Mass and Energy Balance
Jun Yong Zhu, Xuejun Pan, Roland Giese, W. Zhu, B.S. Dien, S. Tian

Optimization of Process Parameters for Alkaline Pretreatment of Switchgrass
Urvi D. Kothari, Y. Y. Lee

Characterizing the Effect of AFEX Pretreatment Severity On Corn Stover Cell Wall Ultra-Structural Modifications and Formation of Ammonolysis by-Products
Shishir Chandravat, Bryon Donohe, Leonardo D. Souza, Naveen Naik, Ramin Vismeh, James Humpla, Umesh Agarwal, A. Daniel Jones, Michael E. Himmel, Bruce E. Dale, Venkatesh Balan

Understanding Ionic Liquid Pretreatment of Lignocellulosic Biomass by Hyperspectral Raman Imaging
Lan Sun, Chenlin Li, Blake Simmons, Seema Singh

ABE (Acetone, Butanol, and Ethanol) Production From Fiber-Enriched DDGS Pretreated by Electrolyzed Water
Xiaojuan Wang, Yi Wang, Hao Feng, Hans Blaschek, Zhiyi Li

Sustainable Bioprocess Synthesis Routes for Tailor-Made Chemicals
Chutima Swangkotchakorn, Rafiqul Gani, John Woodley, Jan-Dierk Grunwaldt

Synergy of Technological and Ecological Systems for Self-Reliant Process Design
Robert A. Urban, Bhavik R. Bakshi

Effect of Green Roofs On Building Energy Cost
Sandra Nunez, Robert W. Peters

Supercritical Carbon Dioxide: A Promising Green Solvent in One-Pot Synthesis of ZrO2-TiO2 Nanotubes
Rahima A. Lucky, Paul A. Charpentier

Synthesis of Crystal α-Capric Betaine Surfactant
Yan Fang, Minyun Jiang

Dissolution and Fractionation of Wood and Straw Using Ionic Liquids
Miguel A. Tavares Cardoso, Gianluca Marcotullio, Jaap van Spronsen, Geert-Jan Witkamp, W. de Jong, J. Ruud Van Ommen

An Assessment of The Recovery and Recycle of Ionic Liquids (ILs) Following Lignocellulosic Biomass Pretreatment
Thehazhnan K. Ponnaiyan, Ananth P. Dadi, Fei Zhao, Christa M. Graham, Constance Schall, Jared Anderson, Sasidhar Varanasi

Acetic Acid Removal From Pre-Pulping Wood Extract
Aymo Abdurahman, Adrian van Heiningen, G. Peter van Walsem

Key Metric Comparison of Five Cellulosic Biofuel Pathways
Ben Thorp

Preliminary Studies of pH and Char Particle Content On Bio-Oil Aging
Caitlin D. Naske, Sarah E. Crosby, Andrew McMaster, Keisha B. Walters

Production of Fisher-Tropsch Liquids From Biomass-Derived Syngas
Weihua Deng, Zheng Li, Justinas A. Satrio, Robert C. Brown

Novel Solid Base Catalyst for Condensation of Carboxylic Acids
Ambareesh Murkute, James Jackson, Dennis Miller

Electrochemical Oxidation of Glycerol Combined with Product Adsorption
Peter Stengel, Susanne Lucy, Mathäus Siebenhofer

Kinetics of Glycerol Selective Oxidation Over PtBi/C Catalyst
Wenbin Hu, Daniel Knight, Arvind Varma

Heterogeneously Catalyzed Conversion of Cellulose to Sugar Alcohols
Ryan Ravenelle, Carsten Sievers, John C. Crichtenden

Fractionation of Corn Stover Using Aqueous Ammonia and Hot Water
Chang Geun Yoo, Tae Hyun Kim

Comparison of Bench Scale and Pilot Plant Operations Via Characterization of a Ni/Mg/K/Al2O3 Tar Reforming Catalyst
Matthew M. Yang, Whitney Jablonski, Kimberly Magrini-Bair

Development of Comprehensive Models to Predict the Processability of Miscanthus in Biological Conversion
Taiying Zhang, Charles Wyman, Bin Yang, James Zhang

Effective Hemicellulose Hydrolysis in a Pilot Scale Continuous Pretreatment Reactor; Improving Reactor Design and Understanding Process Performance
Erik Kuhn, Noah D. Weiss, Nicholas J. Nagle, Melvin P. Tucker, David Sievers, Richard T. Elander

How Dilute Acid Pretreatment Produces a Highly Digestible Cellulosic Substrate
David K. Johnson
Kinetic Modeling of Lime Pretreatment of Switchgrass ................................................................. 464
Rocio Sierra, Matthew Falls, Mark Holtzapple

Cellulose Dissolution in Ionic Liquids: Influence of Ion Structure On β-Glucosidase Stability and Activity ................................................................. 465
Xingian Geng, William McDanel, Wesley A. Henderson

Effect of Biomass Size Partitioning On Pretreatment and Enzyme Requirements Using Response Surface Analysis ................................................................. 466
Sivetha Mahalakshmi, Geoffrey Siming, Clint Willford

Two-Stage Pretreatment of Miscanthus with Alkaline Peroxide and Electrolyzed Water for Ethanol Production ................................................................. 467
Attila de Frias, Xiaojuan Wang, Hau Peng

Hydrothermal Pretreatment of Switchgrass for Ethanol Production ........................................... 468
Sandee Kamar, Urv D. Kohari, Lingzhao Kong, Y. Y. Lee, Ram B. Gupta

Solvent Fractionation of Biomass: Applications of Switchgrass Pretreatment for Biofuels ............ 469
C.J. O’Lenick, Joseph J. Bozell, Timothy G. Rials, Rene Buchinger, Anton Astner, Stuart Black, Stacy A. Warwick

High Value Products Derived From Biological Pretreatment ................................................................. 470
Deepak Singh, Xiaochen Yu, Salin Chen

Ionic Liquid Pretreatment of Lignocellulosic Material for Enhanced of Enzyme Hydrolysis .............. 471
Indira Priya Samayam, Constance Schall, Sasidhar Varanasi

The Kinetics of Reversion Reactions During Acid Pretreatment of Biomass ........................................ 472
Mark R. Nimlos, Heidi M. Pilath, Michael E. Himmel, David K. Johnson

Optimization of Energy and Material Balances in Small-Scale Bioethanol Production System .......... 473
Kazushiro Mochidzuki, Qingrong Qian, Akiyoshi Sakoda

Development of a Supercritical Water Microchannel Reactor for Reforming Biomass to Hydrogen Gas ............................................................................. 474
Aaron Goodwin, Greg Rorrer

Role of 5-HMF in the Char Formation Mechanism in the Supercritical Water Gasification Process ........ 475
Athika Chuntanapun, Yukisho Matsumura

Mechanical Mixing of Non-Newtonian Fluid Flow in Anaerobic Digestion ................................ 484
Liang Yu, Shulin Chen

Numerical Simulation of Heat Transfer through the Pyrolysis of Woody Biomass ......................... 485
Ken-ichiro Tanoue, Widy Widjayantri, Kei Tamasaki, Tatsuo Nishimura, Miki Tamiguchi, Ken-ichi Sasauchi

Thermodynamics of An Aqueous-Alkaline Carbonate Carbon Fuel Cell ....................................... 491
Michael J. Antal Jr., Gerard C. Nihous

Bioprocessing Waste Paper to Ethanol & Byproducts ................................................................. 492
Jon Henry, Murat Ozkaya

Evaluation of Methods for Co-Immobilized Enzyme Pellet Development for Xylose-Xylulose Isomerization ........................................................................... 493
Bin Li, Patricia Relue, Sasidhar Varanasi

Mass Transfer Limitations of Enzymatic Hydrolysis of Cellulose at High Insoluble Solids Concentrations ............................................................................ 494
Daniel L. Williams, David Hodge

Enzymatic Hydrolysis of Cellulosic Substrates Under High Solid Loading ...................................... 495
Wei Wang, Y.Y. Lee

Effects of Polyvinyl Alcohol and Surfactants On the Enzymatic Hydrolysis of Alkali-Treated Waste Newsprint ........................................................................... 496

Cellulosic Ethanol Progress in China ...................................................................................... 497
Xin Xiao

A Techno-Economic Analysis of Carbon Dioxide Bio-Mitigation Using Microalgae ....................... 498
Samuel A. Morton III

A Framework to Determine Economic Potential and Environmental Impact of Sustainable Polygeneration Facilities ................................................................. 499
Norman E. Sammons Jr., Wei Yuan, Mario R. Eden, Harry T. Cullinan, Burak Aksoy

Synthesis of Technology Pathways for AN Integrated Biorefinery ............................................... 500
Buping Bao, Denny K. S. Ng, Mahmoud M. El-Halwagi, Douglas H. S. Tay

Carbon-Fueled Fuel Cell Using Charcoal From Unused Biomass .................................................. 505
Azusa Okazaki, Toshihiko Hikami, Kazuhiro Mochidzuki

Energy and Fuel Value of Wastewater Sludge Residuals .......................................................... 509
Kevin Schmidt, Cody Wagner, Charles J. Coronella, Victor R. Vásquez

Fractionation and Bioconversion of Micro-Algae Into Bioethanol ................................................ 510
Jung Kon Kim, Tae Hyun Kim, Eun Ju Lee, Dong Uk Ahn
Improvements in Dilute-Acid Steam Pretreatment and SSF of Softwood, Using Yeast Cultivated On Hydrolyzate, for Bioethanol Production .................................................. 561
Sanam Monavarti, Mats Galbe, Guido Zacchi

Investigating the Role of the Cel7A Linker Peptide in Enzymatic Hydrolysis of Cellulose Chains: A Simulation Study ................................................................. 562
Xionge Zhao, Courtney Taylor, Clare McCabe, William S. Adney, Michael E. Himmel

Scale-up Issues From Bench to Pilot ............................................................ 563
Dennis D. Gertenbach, Brian L. Cooper

Implementation of the U.S. Environmental Protection Agency's Waste Reduction (WAR) Algorithm in Cape-Open Based Process Simulators ........................................ 577
William M. Barrett Jr., Jasper M. Van Baten

Techno-Economic Analysis of Waste to Energy Process Based On Biorefinery Process Models ................................................................. 578
Jie Chen, Hayk Khachatryan, Craig Frear, Shulin Chen, Eric Jessup

Bioenergy and Sustainability: An Engineer's Unit Operations/Mass Balance Approach ................................................................. 579
Peter Pfromm, Richard Nelson, Vincent Amanor-Boadu

Ranking Energy Efficiency of UAB Buildings and Quantitative Determination of Heat Transfer Reduction From Setback Schemes .................................................. 580
Dana Lackey, Robert W. Peters

Modeling of a Continuous Two-Phase Bubble Column Reactor for the Production of Biodiesel From Free Fatty Acids ................................................................. 590
Richard A. Cairncross, Minhazuddin Mohammed, Cory Melick

Evaluation of Reaction Conversion and Energy Consumption During Biodiesel Production Using a Pilot Scale High Shear Mixer Reactor ................................ 591
Sipho C. Ndlela

Optimization of Ultrasound-Enhanced Intensification of Biofuel Synthesis Using a Multifrequency Reactor and Taguchi Statistical Experimental Design Methodology .................................................................................................................. 600
Nareesh N. Mahamuni, Yusuf G. (Debo) Adewuyi

Efficiency of Lipase Immobilized Mesoporous Silica as Catalyst for Preparing Biodiesel ................................................................. 604
Sang-Hyuk Ye, Won-Hyun Jeon, Sun-Geon Kim

Optimization of a Pilot Plant for Production of Biodiesel From Jatropha Cures L. Oil ................................................................................................................................. 605
Rogelio Sotelo-Boyás, Ma. del Pilar Piña-Delgado, Morayma Uribe-Gomez

Conversion of Inexpensive Oils Into Biodiesel Using ZnO Nanoparticle Catalyst ................................................................................................................................. 606
Shuli Yan, Manhoe Kim, Steven Salley, Simon K. Y. Ng

Two-Phase Bioconversion Process for Effective Utilization of Hexoses and Pentoses in Corn Stover ................................................................. 607
Xuan Li, Tae Hyun Kim

Simultaneous Enhancement of Solid-Liquid Clarification and Removal/Recovery of Fermentation Inhibitory Compounds From Biomass Slurries ................................................................. 608
Todd Menkhaus, Devon Burke, Brian Carter, Patrick C. Gilcrease

The Potential of Cellulosic Ethanol Production From Municipal Solid Waste: A Technical and Economic Evaluation ................................................................................................................................. 609
Juan Shi, Bin Yang, Charles W. Wyman, Shri Ramaswamy, Huajiang Hua

Potential for Hydrogen Production Using Microbial Electrolysis Cells From Biorefinery Recycle Water ................................................................................................................................. 610
Abhijeet Borole, Jonathan R. Mislenz

Effects of Dilute Acid Pretreatment Conditions On Enzymatic Hydrolysis Monomer and Oligomer Sugar Yields for Aspen, Balsam, and Switchgrass ................................................................. 611
Jill R. Jensen, Juan E. Morinelly, Kelsey R Gossen, Michael J Brodeur-Campbell, David R Shonnard

Adsorption of Second Generation Biofuels Using Polymer Resins with in Situ Product Recovery (ISPR) Applications ................................................................. 613
David R. Nielson, KristaJna Jones Prather

Controlling the Rheology of Biomass ................................................................................................................................. 614
J. R. Samantuk, C. Tim Scott, T. W. Root, D. J. Klingenberg

Impact of Hemicellulose Pre-Extraction for Bioconversion On Birch Kraft Pulp Properties ................................................................................................................................. 615
David Hodge, Jonas Helmerius, Jonas Yinblad von Walter, Curt Lindström, Ulrika Rova

Kinetics of Sulfur Deactivation of Steam Reforming Catalyst ................................................................................................................................. 616
Stefan Czernik, Whitney Jablonski

Increasing the Economic Efficiency of a Biomass Feedstock Used for Greenhouse Heating ................................................................................................................................. 617
Monty Singleteray, Mark Bricka

Investigation and Modeling Natural Biodegradation System in Soil; Application for Designing An Efficient Biological Pretreatment Technology for Biofuel Production ................................................................................................................................. 618
Mythreyi Chandoor, Deepak Singh, Shulin Chen
Life Cycle Assessment of Ethanol in 2022 ................................................................. 619
David D. Hsu, Garvin A. Heath, Daniel Inman, Andy Eden, Margaret K. Mann

Indirect Land Use Changes in Ethanol Fuel Derived From Corn Grain and Corn Stover.................................................................................. 620
Sungdo Kim, Bruce Dale

Techno-Economic Analysis of Corn Butanol Process ............................................... 621
Ling Tao, Andy Eden

Sustainability Metrics for Liquid Biofuels .................................................................. 624
Raymond L. Smith

Life Cycle Assessment of Products From Pyrolysis BioOil: Heat and Power Generation .................................................................................. 625
David R. Shonnard, Jing Fan, Matthew Alward, Jordan Klinger, Adam Sadehvandi, Tom N. Kabes

Life Cycle Assessment of Wood Pyrolysis for Bio-Oil Production for Use as a Wood Preservative .............................................................. 626
Heather S. Thomas, R. Mark Bricka

Study of the Sustainability of An Integrated Ecosystem with Energy Considerations .................................................................................. 627
Prakash R. Kotecha, Joshua Templeton, Urmila D. Divekar, Heriberto Cabezas

A Systematic Framework to Determine Economic Potential and Environmental Impact of Polygeneration Facilities ................................................. 629
Norman E. Sammons Jr., Wei Yuan, Mario R. Eden, Harry T. Cullinan, Burak Aksoy

Analysis of Industrial Sustainability Under Uncertainty Using Design of Experiments Technique and Fuzzy Logic Method ........................................................................................................ 630
Zheng L. Liu, Tinlun Huang, Cristina Piluso, Jie Xiao

Integrated Multiscale Modeling of Economic-Environmental Systems for Assessing Biocomplexity of Material Use ........................................................................................................ 631
Vikas Khanna, Bhavik R. Bakshi

Trends in Solvent Management in the Pharmaceutical Industry .................................. 632
C. Stewert Slater, Mariano J. Savelski

A Green Two-Step Preparation of Dimmer Acids ...................................................... 633
Yan Cai, Yongmei Xia

Making Pharma Greener - An Overview of 4 Years of the ACS GCI PR .......................... 639
Julie Manley, Concepcion Jimenez-Gonzalez

Key Green Engineering Research Areas of Pharmaceuticals and Fine Chemicals - a Perspective From Manufacturers ............................................. 640
Concepcion Jimenez-Gonzalez, Julie Manley

Asymmetric Bioreduction of Aromatic Nitro Compounds and Nitroalkenes with Enolate Reductase and Nitroreductase Enzymes ......................................................... 641
Yanto Yanto, Melanie Hall, Andreas S. Bommarius

Nearcritical Water for the Benign Removal of N-Boe Protecting Groups ................ 642
Ryan Hart, Elizabeth Cope, Pamela Pollet, Charles A. Eckert, Charles L. Llotta, Douglas P. Kjell

A Paradigm for Scale-up of Piperylene Sulfone as a Sustainable Pharmaceutical Solvent ................................................................. 643
Gregory Marus, Pamela Pollet, Eduardo Yhmeister, Megan Donaldson, Veronica Llopis Mestre, Charles L. Llotta, Charles A. Eckert

Space Solar Power: The Cornerstone for Sustainable Energy, Economy, and Environment .................................................................................. 644
Darel W. Preble

Conversion of Wastewater Treatment Facilities Into Biorefineries ................................ 649
Jacqueline Hall, W. Todd French, Rafael Hernandez, William E. Holmes, Andro H. Mondala

Optimal Synthesis of a Pulverized Coal Power Plant with Carbon Capture .............. 650
Prakash R. Kotecha, Juan M. Salazar, Urmila Divekar, Stephen Zitney

Massive Deep-Cycle Pb-Acid Batteries for Energy Storage Applications .................. 652
Wenhua H. Zhu, Ying Zhu, Bruce J. Tatarchuk

Can Large-Scale Advanced-Adiabatic Compressed Air Energy Storage Be Justified Economically in An Age of Sustainable Energy? ................................................................ 656
Amy Shen, William Pickard, Nicholas Hansing

Alan Curzons, Richard Henderson, Concepcion Jimenez-Gonzalez, Celia S. Ponder

Cellulosic Ethanol Production: Improving Viability through Enterprise-Wide Modeling and Optimization ......................................................... 658
Paritosh K. Sharma, Omar Galan, Jose Romagnoli

Accounting for Ecosystem Services in Ecologically Based Life Cycle Assessment (Eco-LCA) by Combining Qualitative and Quantitative Information .............................................................. 660
Shweta Singh, Bhavik R. Bakshi

Thermal Conversion of Carboxylate Salts (Biomass-to-Mixed Alcohols) .................. 662
Mohit Bhatia, Keith D. Hurley, G. Peter van Walsum, M. Clayton Wheeler
Sustainability Under Uncertainty: A Systems Analysis Perspective ................................................................. 670
Urmila Diwekar, Yogendra Shastri

Multistage Stochastic Optimization with Recourse in Batch Plant Scheduling ............................................... 671
Fei Wang, Li Sun, Helen H. Lou

Integrated Exergy and Material Based System Analysis for Sustainability Enhancement Under
Uncertainties .................................................................................................................................................. 672
Zheng Liu, Yinlun Huang

Comparison of Probability Bound Analysis and Information Gap Methodologies for the
Sustainability of Industrial Ecosystems ........................................................................................................ 673
Helen H. Lou, Kailiang Zheng, Xiang Li

Nanoscale Reactions at CO2—H2O–Mineral Interfaces: Challenges in Monitoring CO2 in Geologic
Sequestration ............................................................................................................................................... 674
Young-Shin Jun, Hongbo Shao, Kathleen O’Malley, Ryan E. Matos
