# TABLE OF CONTENTS

## ACTIVE CONTROL

**An Examination of Rotor Loads due to On-Blade Active Controls for Performance Enhancement using CFD/CSD Analysis** ................................................................. 1  
Rohit Jain, Hyeonsoo Yeo, Inderjit Chopra

**Active Rotor Controls for Vibration Reduction and Performance Enhancement** ...................................................... 23  
Kumar Ravichandran, Shreyas Ananthan, Inderjit Chopra, Benjamin Hein

**Low-Speed and High-Speed Correlation of Smart Active Flap Rotor Loads** ................................................................. 45  
Sesi Kottapalli

**Exploitation of Active Controls and Morphing Technologies to Enhance Rotor Aerodynamic Performance in Hover Conditions** ............................................................................................................................... 82  
Cristina Garcia-Duffy, Andrea D’Andrea, Stefano Melone

## DESIGN I

**Multibody Dynamics Model of a VTOL Teetering Rotor** .............................................................................................. 103  
Jinwei Shen, Pierangelo Masarati, Jeremy Bain, Todd Hodges

**A Promising New Vertical Take-Off and Landing (VTOL) Aircraft Concept** .......................................................... 111  
John M. Lawrence

**Experimental Performance Optimization of a MAV-Scale Cycloidal Rotor** ............................................................... 119  
Moble Benedict, Tejaswi Jarugumilli, Inderjit Chopra

**Experimental Investigation of an Insect-based Flapping Wing Hovering Micro Air Vehicle** ..................................... 136  
Pranay Seshadri, Moble Benedict, Inderjit Chopra

## ACOUSTICS/AERO

**Validation of HART II Structural Dynamics Predictions Based on Prescribed Airloads** ............................................. 157  
Sung Nam Jung, Jae-Sang Park, Soo Hyung Park, Yung Hoon Yu

**Aerodynamic and Acoustic Design of a Low Noise Dual Rotor Tail-sitter** ................................................................. 169  
Jeremy Bain, Kyle Collins

**A Study of Acoustic Reflections in Full-Scale Rotor Low Frequency Noise Measurements Acquired** .......... 180  
Natasha L. Barbely, Ben W. Sim, Cahit Kitaplioglu, Pat Goulding II

## DYNAMICS/LOADS

**Transient Loads Control of a Variable Speed Rotor During Lagwise Resonance Crossing** ....................................... 188  
Dong Han, Joseph Wang, Edward C. Smith, George A. Lesieutre

**Analytical, First Principles Modeling of Elastomeric Dampers** ..................................................................................... 197  
Sesi Kottapalli, Olivier A. Bauchau, Chuangkuan Ju, Serkan Ozbay, Yogesh Mehrotra

**Pitch Link Loads Reduction using Fluidlastic Isolators** ................................................................................................. 212  
Dong Han, Christopher D. Rahn, Edward C. Smith

## TILTROTORS

**Improving Blade-Element Design Methods for High Speed Proprotors** ................................................................. 221  
Daniel Patt, Harold Youngren

**Integration of Rotor Aerodynamic Optimization with the Conceptual Design of a Large Civil Tiltrotor** ................................................................. 236  
C. W. Acree Jr.

**Influence of Pitch Attitude on Tiltrotor Autorotation Characteristics** ................................................................. 248  
John Vorwald
UH-60 COMPUTATIONAL STUDIES

Icing Studies for the UH-60A Rotor in Forward Flight................................................................. 261
  Nischint Rajmohan, Jeremy Bain, Michael Nucci, Lakshmi Sankar, Robert Flemming, T. Alan Egolf, Richard Kreeger

Air-loads Prediction of a UH-60A Rotor inside the 40- by 80-Foot Wind Tunnel.......................... 277
  I-Chung Chang, Ethan A. Romander, Mark Pottsadam, Hyeonsoo Yeo

Numerical Simulation of Free-Flight Rockets Air-Launched from a Helicopter............................ 288
  Bum Seok Lee, Min Seung Jung, Oh Joon Kwon

COMPUTATIONAL AERODYNAMICS - I

Reduced Order Nonlinear Unsteady Aerodynamic Modeling Using a Surrogate Based Approach........ 299
  Bryan Glaz, Li Liu, Peretz P. Friedman

CFD/CSD Simulation of Baseline UH-60 and Swashplateless Rotors.......................................... 314
  Arun Jose, Shreyas Ananthan, James D. Baeder

Loosely Coupled CFD/CSD Analysis for a Helicopter Rotor in Hover and Forward Flight................ 338
  Sung-Hwan Yoon, Jin Sung Kwak, Sangjoon Shin, Chongam Kim

TESTS & EVALUATION

Application of Out-of-Plane Warping to Control Rotor Blade Twist........................................... 348
  Yannick Van Weddingen, Olivier Bauchau, Sesi Kottapalli, Serkan Ozbay, Yogesh Mehrotra

Wind Tunnel Investigation of Flow Around a Rotor in Ground Effect........................................ 362
  N. D. Nathan, R. B. Green

An Experimental Study of Rotorcraft in Ground Effect................................................................. 381
  Gregory J. McCauley, William Tsai, Omer Savas

COMPUTATIONAL METHODS - I

Addressing Today's Aeromechanic Questions by Industrial Answers........................................... 390
  Markus Dietz, Christoph Maucher, Dieter Schimke

Large-Scale Domain Decomposition for a Scalable, Three-Dimensional Brick Finite Element Based
  Rotor Dynamic Analysis.................................................................................................................. 408
  Anubhav Datta, Wayne Johnson

Parallel Computing for Rotorcraft Analysis.................................................................................... 422
  Hao Kang, Hossein Saberi

Rotor Loads Identification Methodologies at Agustawestland...................................................... 431
  Ermanno Fosco, Francesco Vincenzo, Attilio Colombo, Claudio Monteggia, Pierre Abdel Nour, Nicholas Griffiths,
  Chris Hutchin

FLIGHT CONTROL

Preliminary Assessment of a Candidate Structure for Robust Rotorcraft Flight Control.................... 450
  Ronald A. Hess

Simulation of Dynamic Interface Flight Control Concepts Using the Charm Toolbox for MATLAB........ 463
  Robert McKillip Jr., Jeffrey Keller, Dan Wachspress, Glen Whitehouse, Todd Quackenbush, Jason Colbourne

Development and Operation of an Automatic Rotor Trim Control System for the UH-60 Individual
  Blade Control Wind Tunnel Test...................................................................................................... 474
  Colin R. Theodore, Mark B. Tischler

Modeling Biodynamic Interference in Helicopter Piloting Tasks................................................... 496
  Ronald A. Hess

COMPUTATIONAL METHODS - II

CFD Method for Efficient Analysis of Flapped Rotors...................................................................... 505
  Rene Steijl, Mark Woodgate, George Barakos
