CONTENTS

Time Varying Systems

An MPC-Based Approach to Robust Control of a Hypothalamic-Pituitary-Adrenal Axis Model
Amos Ben-Zvi, Jong Min Lee, Gordon Broderick

Explicit LPV-MPC with Bounded Rate of Parameter Variation
Thomas Besselmann, Johan Löfberg, Manfred Morari

LPV Synthesis with Integral Quadratic Constraints for Distributed Control of Interconnected Systems
Paolo Viccione, Carsten W. Scherer, Mario Innocenti

Gain-Scheduled $H_\infty$-Control for Discrete-Time Polytopic LPV Systems Using Homogeneous Polynomially Parameter-Dependent Lyapunov Functions
Jan De Caigny, Juan Camino, Ricardo C. L. F. Oliveira, Pedro L. D. Peres, Jan Swevers

Controller Reconfiguration through Terminal Connections Based on Closed-Loop System Identification
Klaus Trangbæk

Stability Analysis of Positive Linear Switched Systems: A Variational Approach
Michael Margaliot, Michael S. Branicky

Parametric uncertainty

Robust Proportional-Integral Control of a Laboratory Model Using Programmable Logic Controller SIMATIC S7-300
Radek Matušů, Katarína Vaneková, Roman Prokop, Monika Bakosová

Automated Design for Robust PID Controllers
Ralf Weller, Juergen Ackermann

Stability Margin of Systems with Linear Parametric Uncertainty
Petr Husák

Robust Decentralized Control with Scalar Output of Multivariable Plants with Uncertain Structures
Elizaveta Parsheva

Integral Quadratic Separation Applied to Polytopic Systems
Dimitri Peaucelle

Relationships among Different SOS-Based Relaxations for Quadratic Distance Problems
Andrea Garulli, Alfio Masi, Antonio Vicino

Applications

Antenna Robust Control Design Using Feedforward Action for Accurate Pointing Onboard a Spacecraft
Meir Pachter, Victor Barba

QFD of a Multivariable Nonlinear Flexible Manipulator: Benchmark Problem
Oded Yaniv, Aron W. Pila

Reduction of Torque Ripple in Brushless DC Motor Drives
Yoni Mandel, George Weiss

Using Sampled-Data Dynamic Controller to Stabilize Rotating Pulses
Yelena Smagina, Moshe Sheintuch

Optimal Steady-State Traffic Control for Isolated Intersections
Jack Haddad, David Mahalel, Bart De Schutter, Ilya Ioslovich, Per-Olof Gutman

Binary Distillation Control in a Descriptor System Set-Up
Ansgar Rehm

Adaptive and Nonlinear Control

New Non-Linear QFT Technique
Oded Yaniv, Shmuel Safonov

Applying Continuous Piecewise Linear Approximations to Affine Non-Linear Control Systems
Andrés García, Osvaldo Agamennoni, José Figueroa
Memoryless Adaptive Robust Controllers Guaranteeing Asymptotic Stability for Uncertain Nonlinear Time-Delay Systems
Hansheng Wu

SPR and APR Untangled
Ilan Rusnak, Izhak Barkana

One-Step Active Control Strategy As Approximation of Dual Control
Jan Rathouský, Vladimír Havlena, Jan Štecha

$H_\infty$ Control

Robust Control of Greenhouse Temperature and Humidity
Waleed I. R. Agmail, Raphael Linker, Avraham Arbel

Multiobjective Robust Control with HIFOO 2.0
Suat Gumussoy, Didier Hienion, Marc Millstone, Michael Overton

Static $H_\infty$ Optimal Output-Feedback of Linear Systems with Pole Constraints—a Non-Smooth Optimization Approach
Isaac Yaesh, Uri Shaked

Robust Reduced-Order Output-Feedback $H_\infty$ Control
Isaac Yaesh, Uri Shaked

On Simplifying Solution to Normalized Anisotropy-Based Stochastic $H_\infty$ Problem
Michael Tchaikovsky, Alexander P. Kurdyukov

Advances in Sliding Mode Control and Applications

Robustness of Homogeneous Sliding Modes to Relative Degree Fluctuations
Arie Levant

Optimal Sliding Mode Controllers for Spacecraft Attitude Maneuvers
Chutiphon Pakdeebon, Alan S. I. Zinober

Sliding Mode Velocity-Observer-Based Stabilization of a 3-DOF Helicopter Prototype
Yury Orlov, Marlen Meza-Sánchez, Luis T. Aguilar

Second Order Sliding Modes and Finite Reaching Time Adaptive Nonlinear Control
Yuri B. Shhtessel, Christopher Edwards, Sarah K. Spurgeon

High Order Sliding Mode Control Based on a Time Optimal Control Scheme
Vincent Bregeault, Franck Plestan

Sigma-Delta Sliding Mode Control of Buck Power Converters Using the Delta Operator Approach
Alberto Luviano-Juárez, John Alexander Cortés-Romero, Hebertt J. Sira-Ramírez

Infinite-Dimensional Systems I

Memory Resilient Gain-Scheduled State-Feedback Control of LPV Time-Delay Systems with Time-Varying Delays
Corentin Briat, Olivier Sename, Jean-François Lafay

A Convex Optimization Approach to Stability of Systems with Uncertain Delays
Emilia Fridman, Uri Shaked, Kun Liu

Lyapunov-Krasovskii Functionals Parameterized with Polynomials
Alexandre Seuret

Stability Analysis of the Heat Equation with Time-Delayed Feedback
Sina Yamaç Çalışkan, Hitay Özbuy

Delay Range Stability of Distributed Time Delay Systems
Frederic Gouaisbaut, Yassine Ariba

Robust Implementation of Controllers Containing Distributed-Delay Elements: A Case-Study
Roman Gudin, Leonid Mirkin

Robust Nonlinear Control

Variable Structure Control of Uncontrollable Quantum Systems
Daoyi Dong, Ian Petersen
Feed-Forward Compensation of Hysteresis Compliance Using Inverse Preisach Model .......................... 243
  Michael Ruderman, Torsten Bertram
Backlash and Friction Reciprocal Effect on Limit Cycle Existence ............................................. 249
  Arkady Lichtsinder, Per-Olof Gutman
A Method for Robust Regulation of Non-Minimum-Phase Linear Systems .................................... 255
  Francesco Delli Priscoli, Alberto Isidori, Lorenzo Marconi
Full Decoupling Via Feedback in Nonlinear Descriptor Systems: Algebraic Approach ..................... 261
  Alexey Shumsky

Infinite-Dimensional Systems II

Adaptive Sliding Mode MRAC of Delayed Nonlinear Plants with Actuator Failures ........................... 267
  Boris M. Mirkin, Per-Olof Gutman, Yuri B. Shtessel
Improved Stability Conditions for Sampled Data Systems with Jitter ............................................ 273
  Laurentiu Hetel, Alexandre Kruszewski, Thierry Marie Guerra, Jean-Pierre Richard
Control of Uncertain Linear Systems with a State Delay Based on an Uncertainty and Disturbance Estimator .................. 279
  Alon Kuperman, Qing-Chang Zhong
Observer Design for a Class of Transport-Reaction Systems: A Direct Lyapunov Approach .............. 284
  Alexander Schau, Jaime A. Moreno, Emilia Fridman, Jesus Alvarez
Exact Controllability of Coupled PDE-ODE Systems .................................................................... 290
  George Weiss, Xiaowei Zhao

Linear Systems

Controllability, Observability in Networked Control ........................................................................... 295
  Stefano Longo, Guido Herrmann, Phil Barber
Optimization Approaches for Controller and Schedule Codesign in Networked Control ................... 301
  Stefano Longo, Guido Herrmann, Phil Barber
Loop Shifting for Systems with Adobe Input Delay ............................................................................ 307
  Leonid Mirkin, Zalman J. Palnor, Dmitry Shneiderman
LMI-Supported Design of Residual Generators Based on Unknown-Input Estimator Scheme .............. 313
  Anna Filasová, Dusan Krokavec
Transient Response Improvement of the Robust Servomechanism Problem for Sinusoidal Signals .......... 319
  Michael Chang, Edward J. Davison

Clearance of Flight Control Laws Using Optimization

Generation of flexible aircraft LFT models for robustness analysis ................................................. 325
  Clément Roos
Flight Control Law Clearance Using Optimisation-Based Worst-Case Search .................................... 331
  Hans-Dieter Joos
Formulation of the Stability Margins Clearance Criterion As a Convex Optimization Problem ........... 337
  Christakis Papageorgiou, Rikard Falkeborn, Anders Hansson
Clearance of Flight Control Laws for Time Varying Pilot Input Signals ........................................... 343
  Daniel Skoogh, Peter Elisasson, Fredrik Berefelt, Rafiz Amiree, Daniel Tourde, Lars Forssell
Clearance of Flight Control Laws Via Parameter-Dependent Lyapunov Functions ................................. 349
  Andrea Garulli, Alfo Masi, Simone Paolletti, Ercüment Türköglu
Trajectory Tracking for UAVs with Bounded Inputs and Some Related Applications ........................ 355
  Amit Ailon

Authors Index ...................................................................................................................................... 361
