# TABLE OF CONTENTS

Uncertainty, Change Management the Application to Risk & Safety for Infrastructure Projects How it Happens in Australia ................................................................. 1
  T. C. Haskins

A Safety Enhancement Model of Software System for Railways ................................................................. 7
  S. Chandrasekaran, T. J. Madhumathy, M. Aparna, R. S. Jain

  C. Comar, F. Gasperoni, J. F. Ruiz

A Unified Approach for System Safety and Software Safety ........................................................................ 18
  D. Mizuguchi, M. Hirayama, S. Yoshizawa

Relevance of Measurement Theory to Safety and Safety Integrity ............................................................. 23
  I. H. A. Johnston

Making Robust ALARP Decisions for In-service Systems ........................................................................ 29
  A. J. Rae, M. Nicholson

A Deviation Based Systems of Systems Safety View for Modelling Architectural Frameworks .................. 35
  G. Despotou, T. Kelly

Deriving Safety Cases from Automatically Constructed Proofs .................................................................. 41
  N. Basir, E. Denney, B. Fischer

The Role of the Human in an Autonomous System .................................................................................. 47
  R. D. Alexander, N. J. Herbert, T. Kelly

Safety Analysis of Sub-systems ............................................................................................................... 53
  B. Bradshaw, D. Madeley, I. Herath

Stability of Public Transportation Systems in Case of Random Failures and Intended Attacks - A Case Study from Switzerland ........................................................................................................... 59
  R. Dorbritz, U. Weidmann

Process and Structural Safety: Do We Need to Have Hazards? ................................................................. 65
  A. B. Buchan, C. J. Bolton

IEC 61508 and IEC 61511 Assessments - Some Lessons Learned .......................................................... 68
  M. H. Lloyd, P. J. Reeve

Goal-based Safety Standards and COTS Software Selection ..................................................................... 74
  C. Menon, J. McDermid, P. Hubbard

Software Safety Assurance - What is Sufficient? ...................................................................................... 80
  R. D. Hawkins, T. Kelly

Is a Common UK Competency Scheme a Bear-Trap? ............................................................................ 86
  A. D. Bain

Skills and Competence Underpin Safety in the UK Electrical Power Industry .................................... 93
  J. C. Steed

Creating a Competence Argument to Support a Safety Case ................................................................. 99
  P. R. Mayo

Towards a Comprehensive Consideration of Epistemic Questions in Software System Safety .......... 105
  C. M. Holloway, C. W. Johnson

The MOD Procurement Guidance on Software Safety Assurance Assessing and Understanding Software Evidence ................................................................................................................................. 110
  P. R. Caseley, T. A. D. White

Politics and Patient Safety Don't Mix: Understanding the Failure of Large-scale Software Procurement in Healthcare .......................................................................................................................... 122
  C. W. Johnson

Safety Arguments in Aircraft Certification ................................................................................................. 128
  Lining Sun, T. Kelly

The Integration of Alarm Device Into Socio-technical Systems: The Case of an Onboard Alert Device (ACAS) ................................................................................................................................. 134
  P. Amaldi, A. Chellappah

Towards Establishing a Self-management Architecture for Dynamic Risk Management in 'Intelligent' Aero-Engine Control .................................................................................................................. 141
  Z. Kourd, T. Kelly, J. McDermid, R. Calinescu, M. Kwiatkowska

A Pragmatic Integration of Risk Management Processes .......................................................................... 148
  M. Brownsword
Hydrogen Fuel Cell Taxi: Safety Analysis Experiences
I. Herath, D. Madeley, B. Bradshaw

Investigating the Potential Use of System Dynamics As a Tool for Event Analysis in the Nuclear Industry
N. J. Carhart

What Does Safety Mean for Networks?
J. Muller, G. Perruchoud, H. Borel, P. Bonne

Predicting the Future: The Integrated Risk Picture
E. Perrin, B. Kirwan

Integrated Safety & Quality Framework for ATM/CNS Technical Services
P. Bonne

Dynamic Temporal Risk Allocation in Complex Hazard Management
R. L. Maguire

Proposed Methodology for Performing Risk Identification Workshops Based on Safety Climate
K. Choi, K. Yeung, A. Saleem

Safety Critical Task Risk Assessment in Offshore Installation Decommissioning: A Methodology
A. P. Bradbeer, E. Butterworth, G. M. Rolt

Electrical Safety - A Perspective Based on Incidents
W. F. Bates

Safety Tactics for Reconfigurable Process Control Devices
A. E. Hill, M. Nicholson

Replacing SIS on Live Processes Plant
C. Timms

Success is Not Merely Absence of Failure - A Systems-Engineering Approach to Safety Assessment
D. Fowler, E. Perrin, R. Pierce

Safety Assessment of the SESAR Operational Concept - European Air Traffic Management in 2020 and Beyond
D. Fowler, E. Perrin, R. Pierce

Deriving a Generic System Definition for Railway Risk Assessments Applied to BP-Risk
S.-L. Bepperling

Severity of Harm in Semi-quantitative Risk Assessment Method
B. Milius

Some Observations on Novel Concepts in New IEC 61508 Draft
J. Braband, S. Griebel

Arguing the Safety of FPGAs Within Safety Critical Systems
J. R. Clegg

The Human Contribution to System Safety
J. Reason

Securing the Interface: Safety-Critical Interaction Between Humans and Mobile Robots
P. B. Ladkin

Safety Cases & Safety Assessments
D. Kritzinger

Safety Culture Enhancement in European Air Traffic Management - Rising to the Challenge
B. Kirwan, K. Mearns, R. J. Kennedy, R. Gordon
