Advanced Fossil Energy Utilization

Topical Conference at the 2010 AIChE Spring Meeting and 6th Global Congress on Process Safety

San Antonio, Texas, USA
21 – 25 March 2010

ISBN: 978-1-61738-437-0
# TABLE OF CONTENTS

Boiler Bromide Addition - A Survey on Bromine Based Mercury Abatement from Flue Gas at Coal Combustion and Waste Incineration Plants ................................................................. 1
Bernhard V. Vosten

Modeling Mercury Chemistry in Coal-Fired Air Preheaters: Effects of Sulfur Trioxide and Surface Area ................................................................. 3
Brydger Van Otten, Andrew Fry, Constance L. Senior

Speciation Control of Mercury for Coal-Fired Power Plants ................................................................. 6

Mercury Control with Regenerative Activated Coke Technology ................................................................. 10
James Peters

Energy Security and Affordability in the 21st Century ........................................................................ 21
John Hofmeister

Real Time Detection of Gaseous Metal Contaminants in Coal Flue and Fuel Gas ................................................................. 22
Erik C. Rupp, Evan J. Granite, Dennis Stanko

Recent Advances in the High Temperature Capture of Elemental Mercury by Inorganic Sorbents: Packed Bed and Flow Reactor Studies ........................................................................ 26
Sang-Jun Lee, Yang Li, Jost O.L. Wends

On-Line Studies of Pd Based Sorbents for the Removal of Gaseous Metal Contaminants: Capture and Regeneration ........................................................................ 27

Qualitative Prediction of Sorbent Performance for Mercury Capture by Lab-Scale Tests ......................... 33
Evan J. Granite, Erik C. Rupp, Henry W. Pennline

On the Solubility of Mercury in Liquid Hydrocarbons ........................................................................ 34
Nicolas S. Bloom, D. Gallup

In-Situ Electrochemical Detection of Trace Metal Vapors at Bismuth-Doped Carbon Screen Printed Electrodes ........................................................................ 39
Donghai Lu

Novel Polymer Membrane Process for Pre-Combustion CO2 Capture From Coal-Fired Syngas ........................................................................ 40
Timothy C. Merkel, Meijuan Zhou, Sylvie Thomas, Haiqing Lin, Adrian Serbanescu

Evaluation of the Technical and Economic Performance of the Calcium Looping Process for CO2 and H2S Capture From Coal-Derived Synthesis Gas ........................................................................ 42
Daniel P. Connell, Shwetha Ramkumar, L. S. Fan, Robert M. Statnick

Development of Freeze Granulated Oxygen Carriers for Chemical Looping Combustion of Solid Fuels ........................................................................ 44
Yi Zhang, Aurora M. Ruel, Kunlei Liu, James K. Neathery, Joseph E. Remias

Pulverized Coal Pyrolysis & Gasification in N2/O2/CO2 Atmospheres by Thermo-Gravimetric Analysis ........................................................................ 53
Muhammad Faisal Irfan

Future Feedstocks for Petroleum and Petrochemical Industries ........................................................................ 54
D. P. Lal

Hydrogen Production From Residual Heavy Oil ........................................................................ 64
Graciela Prieto, Oscar Prieto, Carlos R. Gay, Kazunori Takashima, Akira Mizuno

Hydrogen Production From Ammonia Decomposition: Study On the Synergetic Effect of DBD Plasma and Cheap Metal Catalysts ........................................................................ 72
Li Wang, Yue Zhao, Hongchen Guo, Weimin Gong

Plasma Reforming of E85 for Hydrogen Rich Gases Production ........................................................................ 75
Xinli Zha, Trung Hoang, Lance L. Lobban, R.G. Mallinson

Non-Thermal Plasma Reforming of Refractory Tars and Oils Generated by Biomass Gasification ........................................................................ 76
Lyman Frost, S. Elangovan, J. Hartvigsen

Non-Thermal Plasma Logistic Fuel Reformer for TARDEC ........................................................................ 77
Lyman Frost, J. Hartvigsen, S. Elangovan

Fluidized Bed Plasmas Reactor for Catalyst Preparation. Application for SCR NOx by Hydrocarbons in Mobile Sources ........................................................................ 83
Marjorie Foix, Patrick da Costa, Cedric Guyon, Michael Tatoulian

Production of Hydrogen From Sugar by a Liquid Phase Electrical Discharge ........................................................................ 85
Selma Mededovic Thagard, Graciela Prieto, Ellen R. Fisher, Kazunori Takashima, Akira Mizuno
Forming Small Organic Molecules From CO2 Using a Dielectric Barrier Discharge (DBD) Plasma

Michael A. Lindon, Dushyant Shekhawat, Earl Scime, Michael Gallagher, Matt Galante, Jeffrey Atkinson, Bruce Tepke

Measurement of OH Radical in DBD Reactor with/without Catalyst by HPLC for Toluene Removal

Yufang Guo, Xiaobin Liao, Daqi Ye

Hydrogen Production by Reforming of Logistic Diesel Fuel in Supercritical Water

Carsten Cremers, Dominik Müller, Karsten Pinkwart, Jens Töhle

Catalytic Reforming On Hexaaluminate Based Catalyst Supports

Nicholas E. McGuire, Neal Sullivan, Robert J. Kee, David T. Wickenham

Ni-Substituted Oxide Catalysts with Oxygen Ion Conductivity for Methane Steam Reforming

Mark Smith, David A. Berry, Dushyant Shekhawat, Daniel J. Haynes, James J. Spivey

Hydrogen and Carbon Nanotubes Production Over Co-Mg-Al Catalysts by Catalytic Decomposition of Methane

Antonio Monzón, Nieves Latorre, Carlos J. Royo, Eva M. Romeo

Non-Catalytic Multi-Fuel Reformer for Syngas Production for Fuel Cell Applications

Andrea Pastore, Epaninondas Mastorakos

Integrated Hydrogen Production, Purification and Compression Demonstration Project

Tony Boyd, Ali Gulamhusein, Annu Li, Satish Tamhankar, David DaCosta, Mark Golben

Perovskite Sorbents for Removal of Sulfur, Arsenic and Phosphorus

Sara A. Rolfe, David A. Grubbie, M.V. Mundschau

Post-Combustion Carbon Capture Research Progress through the DOE/NETL Existing Plants Program

Timothy E. Fout, Jared Ciferno, Lynn Brickett

Vapor-Liquid Equilibrium (VLE) Study of CO2 with MEA and Ammonia Solvents

Donald Johnson, Zhe Lu, Joseph E. Remias, Kunlei Liu, James K. Nearthey

Stripper Configurations for CO2 Capture by Aqueous Amines

David H. Van Waggoner, Gary T. Rochelle

Enhancing Post-Combustion CO2 Capture in Power Plant – A Catalytic Approach

Reynolds A. Frimpong, Quanzhen Huang, Joseph E. Remias, James K. Nearthey, Kunlei Liu

Design of a Continuous Foam-Bed Reactor System for CO2 Removal From Power-Plant Exhausts

Amit A. Gaikwad, Ashok N. Bhaskarwar

An Incremental, Multi-Technology Approach to Retrofitting Existing Pulverized Coal Power Plants for Carbon Capture

David C. Miller

Hydrogen Production by Ethanol Reforming Driven by Solar Energy

Marcello De Falco, Fausto Gallucci

Autothermal Reforming of Ethanol in a Fluidized Bed Membrane Reactor for Ultra-Pure Hydrogen Production

Fausto Gallucci, Martin van Sint Annaland, JAM Kuipers

Stability Study of Dense Cermet Membranes for Hydrogen Separation

Hydrogen Enriched Natural Gas (HENG): Generation and Applications in Combined Heat and Power Generation and as a Fuel for High Efficiency Boilers

Tom Whidden, Toby Boutot, Zhuomin Liu, Scott Norton, Blair Allen, Josephine Bullerwell, Peter E.G. Gogolek

Ag/ZnO One Dimensional Catalyst for the Steam Reforming of Methanol by Hydrogen Production

Raül Pérez-Hernández, Albina Gutiérrez-Martínez, María E. Fernández-García, Gilberto Mondragón-Galicia, Francis Leonard Deepak, Alvaro Mayoral, Miguel Jose-Yacaman

Comparison of Sulphur–Iodine, Copper–Chloride and Hybrid-Sulphur Thermochemical Cycles for Hydrogen Production

Nesrin K. Demir, Ibrahim Dincer, Greg F. Naterer

Enhancing the Water Gas Shift Reaction Using Synthetic Sorbents for the Capture of CO2

Saquib Sultan, Christoph R. Müller, John S. Dennis

Hybrid Membrane Absorption Process for Post Combustion CO2 Capture

S. James Zhou, Howard S. Meyer, Benjamin Bikson, Yong Dung

Post-Combustion CO2 Capture Using An Efficient Membrane Process

Xiaotong Wei, Timothy C. Merkel, Haiqing Lin, Bilgen Firat, Jenny He, Karl D. Amo, Richard Baker

Characterization of Coal Flame Impacts Under Oxy-Combustion

Bradley Adams, Andrew Fry

Equilibrium and Kinetic Studies Carbon Dioxide Capturing On Ca-Based Sorbents

Jorge Pena Lopez, Panagiotis (Peter) Smirniotis, Vasillios I. Manousiouthakis

Metal-Adeninate Porous Materials for Selective CO2 Capture

Nathaniel L. Rossi
Theoretical Screening Good Sorbents for CO₂ Separation ................................................................. 213
Yuhua Duan

Utilization of Carbon Dioxide Towards Control/Suppression of Underground Coal Fires .................. 224
Ali S. Rangwala, Evan J. Granite

Possible Use for CO₂ Captured from Coal Derived Flue Gas: Reforming of Methane in Electric
Discharge Plasma ..................................................................................................................................... 230
Erik C. Rupp, Evan J. Granite

Survey of Potential Uses for Carbon Dioxide Captured From Coal-Burning Power Plants ................... 232
Evan J. Granite, Erik C. Rupp, Bryan D. Morreale, Henry W. Pennline, Dirk Link, David Luebke, Todd H.
Gardner
