2010 25th Biennial Symposium on Communications

(QBSC 2010)

Kingston, Ontario, Canada
12-14 May 2010
TABLE OF CONTENTS

Wireless Networks I

On the Evaluation of the LTE-Advanced Proposal within the Canadian Evaluation Group (CEG) Initiative: Preliminary Work Results .......................................................... 1
Raouia Nasri (Université du Québec, CA)
Edenalisoa Rakotomanana (Université du Québec, CA)
Sofiène Affes (Université du Québec, CA)
Alex Stèphenne (Université du Québec, CA)

Proxy Signature-Based RSU Message Broadcasting in VANETs .......................................................... 5
Subir Biswas (University of Manitoba, CA)
Jelena Mišić (Ryerson University, CA)

Throughput Optimization of a Power-Aware MAC for WLANs in Correlated Shadowing Environments .......................................................... 10
Amr El Mougy (Queen’s University, CA)
Elyes Bdira (Queen’s University, CA)
Mohamed Ibnkahla (Queen’s University, CA)

Implementation of Bootstrapping for P2P Overlays in MANETs .......................................................... 14
Afzal Mawji (Queen’s University, CA)
Hossam Hassanein (Queen’s University, CA)

Signal Processing for Communications I

Exploiting Motion Estimation Resilience to Approximated Metrics on SIMD-Capable General Processors: From Atom to Nehalem .......................................................... 18
Steven Pigeon (Ecole de Technologie Supérieure, CA)
Stéphane Coulombe (Ecole de Technologie Supérieure, CA)

A Bayesian Approach for SAR Images Segmentation and Changes Detection ........................................... 24
Tarek Elguebaly (Concordia University, CA)
Nizar Bouguila (Concordia University, CA)

Improving the Signal to Noise Ratio of Event-Related EEG Signals in High Risk Newborns .............. 28
Timothy Falkner (University of Maine, US)
Ali Abedi (University of Maine, US)
Marie Hayes (University of Maine, US)
Jonathan Paul (University of Maine, US)
Sign-Based Spectral Clustering ................................................................. 32
H.T. Kung (Harvard University, US)
Dario Vlah (Harvard University, US)

Information Theory I

On Holant Theorem and Its Proof .............................................................. 40
Ali Al-Bashabsheh (University of Ottawa, CA)
Yongyi Mao (University of Ottawa, CA)
Abbas Yongacoglu (University of Ottawa, CA)

Rate-Distortion Function for Gauss-Markov Source with Side Information at the Decoder ........................ 44
Yingzi Gao (Concordia University, CA)
M. Reza Soleymani (Concordia University, CA)

Optimization of the End-to-End Distortion of a Gaussian Source in Layered Broadcast Transmission ......................................................... 49
Jing Wang (Simon Fraser University, CA)
Jie Liang (Simon Fraser University, CA)

High Resolution Quantization Codebook Design for Multiple-Antenna Fading Channels .................. 55
Behrouz Khoshnevis (University of Toronto, CA)
Wei Yu (University of Toronto, CA)

Wireless Sensor Networks I

Quantifying the Effects of Placement Errors on WSN Connectivity in Grid-Based Deployments ................................................................. 59
Fadi M. Al-Turjman (Queen’s University, CA)
Hossam S. Hassanein (Queen’s University, CA)
Mohamed A. Ibnkahla (Queen’s University, CA)

Wireless Sensor Networks for Domestic Energy Management in Smart Grids .................................. 63
Melike Erol Kantarci (University of Ottawa, CA)
Hussein T. Mouftah (University of Ottawa, CA)

Optimal Node Repositioning for Tolerating Node Failure in Wireless Sensor Actor Network ............ 67
Abdullah Alfadhly (King Fahd University of Petroleum and Minerals, SA)
Uthman Baroudi (King Fahd University of Petroleum and Minerals, SA)
Mohamed Younis (University of Maryland Baltimore County, US)

Detecting the Defective Nodes in Wireless Sensor Networks ......................................................... 72
Mohammad Nikjoo-S (University of Toronto, CA)
Konstantinos N. Plataniotis (University of Toronto, CA)
Security and Multimedia Communications

Dynamic Reconfiguration of Optical CDMA Signature Codes to Combat with Eavesdropping ........ 76
  Jen-Fa Huang (National Cheng Kung University, TW)
  Yao-Tang Chang (Kao Yuan University, TW)
  Chun-Ming Huang (National Cheng Kung University, TW)
  Yao-Hsin Yao (National Cheng Kung University, TW)

Performance Analysis of Modern TCP Variants: A Comparison of Cubic, Compound and New Reno ................................................................. 80
  I. Abdeljaouad (University of Ottawa, CA)
  H. Rachidi (University Of Ottawa, CA)
  S. Fernandes (University of Ottawa, CA)
  A. Karmouch (University of Ottawa, CA)

Cyclostationary Signature Suppression in Chaos-Based Communication System ..................... 84
  Georges Kaddoum (LaCIME Laboratory, CA)
  Samuel Gagné (LaCIME Laboratory, CA)
  François Gagnon (LaCIME Laboratory, CA)

Video On-Demand Streaming on the Internet – A Survey ......................................................... 88
  Xiangyang Zhang (Queen’s University, CA)
  Hossam Hassanein (Queen’s University, CA)

Secret Sharing of 3D Models using Blakely Scheme ................................................................. 92
  Esam Elsheh (Concordia University, CA)
  A. Ben Hamza (Concordia University, CA)

Communication Theory I

On the Uplink-Downlink Duality for Gaussian Vector Channels with Colored Noise and Applications to CDMA Transmitter Adaptation .............................................. 96
  Dimitrie C. Popescu (Old Dominion University, US)
  Shiny Abraham (Old Dominion University, US)
  Otilia Popescu (Old Dominion University, US)
  Octavia A. Dobre (Memorial University of Newfoundland, CA)

Spatiotemporal Distribution and Modulation Schemes for Concentration-Encoded Medium-to-Long Range Molecular Communication ..................................................... 100
  Mohammad Upal Mahfuz (University of Ottawa, CA)
  Dimitrios Makrakis (University of Ottawa, CA)
  Hussein Mouftah (University of Ottawa, CA)

A Novel Selective Multiuser Diversity Algorithm for Nakagami Fading Channels .................. 106
  Oscar Filio (Cinvestav IPN MX, MX)
  Valeri Kontorovitch (Cinvestav IPN MX, MX)
  Fernando Ramos-Alarcón (Cinvestav-IPN, MX)
BER of Antipodal Signaling in Laplace Noise ................................................................. 110
Sijing Jiang (University of Alberta, CA)
Norman C. Beaulieu (University of Alberta, CA)

Wireless Sensor and Mesh Networks

On the Energy Efficiency of LT Codes in Proactive Wireless Sensor Networks .................. 114
Jamshid Abouei (University of Toronto, CA)
J. David Brown (University of Toronto, CA)
Konstantinos N. Plataniotis (University of Toronto, CA)
Subbarayan Pasupathy (University of Toronto, CA)

Experiments of Multi-Channel 802.11 Wireless Mesh Networks with TCP Proxies .............. 118
Adam Kohn (Ryerson University, CA)
K.L. Eddie Law (Ryerson University, CA)

Investigating the Validity of the Gaussian Approximation for the Distribution of the
Aggregate Interference Power in Large Wireless Networks .............................................. 122
Muhammad Aljuaid (Carleton University, CA)
Halim Yanikomeroglu (Carleton University, CA)

High-Resolution Hybrid Localization in Passive Wireless Sensor Nets ............................. 126
Jun Chen (University of Maine, US)
Ali Abedi (University of Maine, US)

Coding Theory I

Outage Probability Analysis of Physical-Layer Network Coding in
Bidirectional Relay Networks ........................................................................................... 130
Peng Liu (Queen’s University, CA)
Il-Min Kim (Queen’s University, CA)

Rateless Code based Multimedia Multicasting with Outage Probability Constraints ............ 134
Wei Sheng (Queen’s University, CA)
Wai-Yip Chan (Queen’s University, CA)
Steven D. Blostein (Queen’s University, CA)

New Transmission-Decoding Schemes based on Reed-Solomon Codes .......................... 139
Farnaz Shayegh (Concordia University, CA)
M. Reza Soleymani (Concordia University, CA)

Cross-Layer Optimization of Rateless Coding Over Wireless Fading Channels ................ 144
Yu Cao (Queen’s University, CA)
Steven D. Blostein (Queen’s University, CA)
Relay and Cooperative Communications I

High-Rate BICM-ID with Superposition Modulation over Amplify-and-Forward Relay Channels ................................................................. 150
Leonardo Jiménez Rodríguez (McGill University, CA)
Nghi H. Tran (McGill University, CA)
Tho Le-Ngoc (McGill University, CA)

Energy-Aware Power Allocation for Lifetime Maximization in Single-Source Relay Cooperation ......................................................... 155
Mahdi Hajaghayi (University of Toronto, CA)
Min Dong (University of Ontario Institute of Technology, CA)
Ben Liang (University of Toronto, CA)

Near-Optimal Non-uniform Constellation Rearrangement for Cooperative Relaying ............................................................... 159
Akram Bin Sediq (Carleton University, CA)
Petar Djukic (Carleton University, CA)
Halim Yanikomeroglu (Carleton University, CA)
Jietao Zhang (Huawei Technologies Co., Ltd., CN)

Design and Performance Analysis of Distributed Relay Selection Techniques in Wireless Networks .................................................. 163
Md. Sahabul Alam (Université du Québec, CA)
Keyvan Zarifi (Université du Québec, CA)
Sofiene Affes (Université du Québec, CA)
Ali Ghrayeb (Concordia University, CA)

Wireless Sensor Networks II

Xueying Zhang (Memorial University of Newfoundland, CA)
Howard M. Heys (Memorial University of Newfoundland, CA)
Cheng Li (Memorial University of Newfoundland, CA)

Power Saving in a Biomechanical Sensor Network using Activity Detection ...................................................... 173
Scott E.T. Hadley (York University, CA)
Andrew W. Eckford (York University, CA)
William H. Gage (York University, CA)

Cognitive Approaches in Wireless Sensor Networks: A Survey .............................................................. 177
Gayathri Vijay (Queen’s University, CA)
Elyes Bdira (Queen’s University, CA)
Mohamed Ibnkahla (Queen’s University, CA)

Optimization of Multiple Overlapping Queries for Energy Efficient Sensor Communication .......... 181
Afshin Behzadan (Ryerson University, CA)
Alagan Anpalagan (Ryerson University, CA)
Utility Driven Balanced Communication (UDBC) Algorithm for Data Routing in Wireless Sensor Networks ................................................................. 187
Afshin Behzadan (Ryerson University, CA)
Alagan Anpalagan (Ryerson University, CA)
Bobby Ma (Ryerson University, CA)

Communication Systems

Error Correction Codes for Secure Chaos-Based Communication System ........................................... 193
Georges Kaddoum (LaCIME Laboratory, CA)
François Gagnon (LaCIME Laboratory, CA)

Iterative ICI Estimation and Cancellation for Mobile OFDM Systems ........................................................ 197
Liang Zhang (Communications Research Centre, CA)
Zhihong Hong (Communications Research Centre Canada, CA)
Louis Thibault (Communications Research Centre, CA)

An Exact Formula for the Probability Density of the Phase Error of a Digital Interferometer ........ 201
Sichun Wang (Defence R&D Canada–Ottawa, CA)
Robert Inkol (Defence R&D Canada–Ottawa, CA)
Sreeraman Rajan (Defence R&D Canada–Ottawa, CA)
François Patenaude (Communications Research Centre, CA)

Bounds on Timing Jitter Estimation in Cooperative Networks ................................................................. 205
Hani Mehrpouyan (Queens University, CA)
Steven Blostein (Queen’s University, CA)

Channel Estimation for High Capacity CI/MC-CDMA System with Variable Data Rate ............ 209
Santi P. Maity (Bengal Engineering & Science University, IN)
Subhalaxmi Chakraborty (Bengal Engineering & Science University, IN)
Monalisha Bhattacharaya (Bengal Engineering & Science University, IN)

Optical Communications and Devices I

SLA-Aware Protection Switching in Optical WDM Networks .............................................................. 213
Burak Kantarci (University of Ottawa, CA)
Hussein T. Mouftah (University of Ottawa, CA)

Coherent Free-Space Optical Transmission with Diversity Combining for Gamma-Gamma Atmospheric Turbulence .................................. 217
Mingbo Niu (University of British Columbia, CA)
Julian Cheng (University of British Columbia, CA)
Jonathan F. Holzman (University of British Columbia, CA)
Robert Schober (University of British Columbia, CA)

Cognitive Networks

Efficient Wireless Network Deployment by Cognitive Transceivers with Multimodal Pilot-Use Modems ................................................................. 255
Sofiène Affes (INRS-EMT, CA)
Imen Mrissa (INRS-EMT, CA)
Karim Cheikhrouhou (INRS-EMT, CA)
Alex Stéphenne (INRS-EMT, CA)

Interference and Outage Analysis in a Cognitive Radio Network with Beacon ......................... 261
Mahsa Derakhshani (McGill University, CA)
Tho Le-Ngoc (McGill University, CA)
Mai Vu (McGill University, CA)

On Distribution of Aggregate Interference in Cognitive Radio Networks ................................. 265
Yaobin Wen (University of Ottawa, CA)
Sergey Loyka (University of Ottawa, CA)
Abbas Yongacoglu (University of Ottawa, CA)

Cognitive Mesh Network Resource Adaptations using Reinforcement Learning ...................... 269
Ayoub Alsarhan (Concordia University, CA)
Anjali Agarwal (Concordia University, CA)

Effect of Sensing Errors on Wideband Cognitive OFDM Radio Networks .............................. 273
Lamiaa Khalid (Ryerson University, CA)
Alagan Anpalagan (Ryerson University, CA)

Communication Theory II

A Hybrid Signalling Scheme for Cellular Mobile Networks over Flat Fading ........................... 278
Hassan A. Abou Saleh (Queen’s University, CA)
Steven D. Blostein (Queen’s University, CA)

A Power Series Expansion for the Truncated Lognormal Characteristic Function .................... 284
Norman C. Beaulieu (University of Alberta, CA)

Transmit Selection Algorithms for Imperfect Threshold-Based Receive MRC in the Presence of Co-Channel Interference ........................................... 288
Redha M. Radaydeh (King Abdullah University of Science and Technology, SA)
Mohamed-Slim Alouini (King Abdullah University of Science and Technology, SA)

Relay Selection with Analog Network Coding in Bidirectional Networks ............................... 293
MinChul Ju (Queen’s University, CA)
Il-Min Kim (Queen’s University, CA)
Wireless Sensor and Cognitive Networks

New Stopping Criteria for Fountain Decoders ................................................................. 297
Vivian Lucia Orozco (Queen’s University, CA)
Shahram Yousefi (Queen’s University, CA)

LDPC Coded Two-Way MIMO Relay Networks with Physical Layer Network Coding ........... 301
Zhiyong He (Laval University, CA)
Sébastien Roy (Laval University, CA)

A Practical Scheduling Approach to Network Coding for Wireless Local Repair .................... 305
Juma Ben Saleh (Concordia University, CA)
Ahmed K. Elhakeem (Concordia University, CA)

A Survey of Physical-Layer Network Coding in Wireless Networks .................................. 311
Peng Huang (Queen’s University, CA)
Mohamed Ibnkahla (Queen’s University, CA)

Signal Processing for Communications II

Opportunistic Routing for Enhanced Source-Location Privacy in Wireless Sensor Networks ....... 315
Petros Spachos (University of Toronto, CA)
Liang Song (University of Toronto, CA)
Dimitrios Hatzinakos (University of Toronto, CA)

Spatio-Temporal Algorithms for Wireless Sensor Networks .............................................. 319
Anahit Martirosyan (University of Ottawa, CA)
Azzedine Boukerche (University of Ottawa, CA)

Hind Alwan (Concordia University, CA)
Anjali Agarwal (Concordia University, CA)

On the Convergence of Iterative Non-Cooperative Centralized Power Controllers for Multiple Adjacent Asynchronous Cellular Networks ......................................................... 327
Nasim Moallemi (Shiraz University, IR)
Mehrzad Biguesh (Queen’s University, CA)
Saeed Gazor (Queen’s University, CA)

Performance of Sensing-after-Transmission Policy in Cognitive Personal Area Networks ........ 331
Vojislav B. Mišić (Ryerson University, CA)
Jelena Mišić (Ryerson University, CA)
Coding Theory II

An Algebraic Characterization of q-ary Images of qn-ary Codes Invariant under a Permutation .......... 335
Isaac Woungang (Ryerson University, CA)
Han-Chieh Chao (National I-lan University, TW)
Mieso K. Denko (University of Guelph, CA)
Fay Huang (National I-lan University, TW)

Two Stage Quantization of Noisy Hyperspectral Images ................................................................. 340
Sayed Masoud Hashemi (Ryerson University, CA)
Soosan Beheshti (Ryerson University, CA)
Masoud Farzam (Ryerson University, CA)

Two-Dimensional Barcodes for Mobile Phones ................................................................................ 344
Sarah Lyons (University of Toronto, CA)
Frank R. Kschischang (University of Toronto, CA)

Probability Density Function of Logarithmic Ratio of Arithmetic Mean to Geometric Mean for Nakagami-m Fading Power ................................................................. 348
Julian Cheng (University of British Columbia, CA)
Ning Wang (The University of British Columbia – Okanagan, CA)
Chintha Tellambura (University of Alberta, CA)

Information Theory II

SMSE Precoder Design in a Multiuser MISO System with Limited Feedback ............................ 352
Muhammad Nazmul Islam (University of Toronto, CA)
Raviraj Adve (University of Toronto, CA)

Lower Bounds on the Capacity of Discrete-Time Poisson Channels with Dark Current ............ 357
Jihai Cao (McMaster University, CA)
Steve Hranilovic (McMaster University, CA)
Jun Chen (McMaster University, CA)

Capacity of Selection Cooperation with Channel Estimation Errors ...................................... 361
Mehdi Seyfi (Simon Fraser University, CA)
Sami Muhaidat (Simon Fraser University, CA)
Jie Liang (Simon Fraser University, CA)

Coding for MPPM-Like Systems ..................................................................................................... 365
Siyu Liu (University of Toronto, CA)
Frank R. Kschischang (University of Toronto, CA)
Ad-Hoc and Vehicular Networks

Exploiting Packet Distribution for Tuning RTS Threshold in IEEE 802.11 ........................................ 369
S.M. Rifat Ashan (Bangladesh University of Engineering & Technology, BD)
Mohammad Saiful Islam (Bangladesh University of Engineering & Technology, BD)
Naeemul Hassan (Bangladesh University of Engineering & Technology, CA)
Ashikur Rahman (Bangladesh University of Engineering & Technology, BD)

Impact of Imperfect Channel Estimation on the Performance of Inter-Vehicular Cooperative Networks ............................................................... 373
Hadi Hadizadeh (Simon Fraser University, CA)
Sami Muhaidat (Simon Fraser University, CA)
Ivan V. Bajić (Simon Fraser University, CA)

Achieving Fair Cooperation for Multi-Hop Ad Hoc Networks ................................................................. 377
Mojtaba Zokaei Ashtiani (Concordia University, CA)
Dongyu Qiu (Concordia University, CA)

Beamforming and Multi-Antenna Systems I

On the Lower Performance Bounds for DOA Estimators from Linearly-Modulated Signals ........ 381
Faouzi Bellili (INRS-EMT, CA)
Sofiène Affes (INRS-EMT, CA)
Alex Stéphenne (INRS-EMT, CA)

Compact Size Ultra Wideband Hexagonal Fractal Antenna ........................................................................ 387
A.A. Lotfi-Neyestanak (Islamic Azad University, IR)
M.R. Azadi (Islamic Azad University, IR)
A. Emami-Forooshani (University British Columbia, CA)

On the First and Second Order Statistics of Sparse MIMO Channels .................................................. 391
Dan J. Dechene (The University of Western Ontario, CA)
Serguei Primak (The University of Western Ontario, CA)
Abdallah Shami (The University of Western Ontario, CA)

Fairness Maximization in Multi-Antenna Broadcast Channels using Random Beamforming ........ 395
Alireza Borhani (Shahed University, IR)
Soroush Akhlaghi (Shahed University, IR)

Beamforming and Multi-Antenna Systems II

Performance Analysis of a Decode-and-Forward Cooperative Relaying Scheme for MIMO Systems .......................................................... 400
Ho Van Khoung (McGill University, CA)
Tho Le-Ngoc (McGill University, CA)
An Approach to Distributed Implementation of Cooperative Amplify-and-Forward Beamforming in Wireless Sensor Networks ................................................................. 404
  Slim Zaidi (Université du Québec, CA)
  Keyvan Zarifi (Université du Québec, CA)
  Sofiene Affes (Université du Québec, CA)
  Ali Ghrayeb (Concordia University, CA)

Joint Beamforming and Power Control in a Spatial Cooperative Multiplexing Network with Multiple Source-Destination Pairs ..................................................... 408
  Banafsheh Lashkari (Shiraz University, IR)
  Mehrzad Biguesh (Queen’s University, CA)
  Saeed Gazor (Queen’s University, CA)

Improvement of MIMO Channel Estimation using Signal Space of Communication Data .......... 412
  M.H. Shariat (Shiraz University, IR)
  M. Biguesh (Queen’s University, CA)
  S. Gazor (Queen’s University, CA)

Communication Theory III

A Two Stage PAPR Reduction Method on Frequency Redundant OFDM System .................. 416
  Weihua Gao (Syracuse University, US)
  Yanjun Yan (Syracuse University, US)
  Lisa Osadciw (Syracuse University, US)
  Chunjie Duan (Mitsubishi Electric Research Labs, US)
  Cheng Li (Memorial University of Newfoundland, CA)

Linear Dual Diversity Combining on Nakagami-0.5 Fading Channels .................................. 421
  Norman C. Beaulieu (University of Alberta, CA)

Switching Rate of Dual Selection Diversity in Non-Isotropic IID Fading Channels ................. 425
  Xin Wang (University of Alberta, CA)
  Norman C. Beaulieu (University of Alberta, CA)

SNR-Based vs. BER-Based Power Allocation for an Amplify-and-Forward Single-Relay Wireless System with MRC at Destination ................................................. 429
  Hamed Rasouli (Ryerson University, CA)
  Alagan Anpalagan (Ryerson University, CA)

Relay an Cooperative Communications II

Optimal Switching Adaptive M-QAM for Opportunistic Amplify-and-Forward Networks .......... 433
  Vo Nguyen Quoc Bao (University of Ulsan, KR)
  Hyung Yun Kong (University of Ulsan, KR)
  Asaduzzaman (University of Ulsan, KR)
  Tran Thanh Truc (University of Ulsan, KR)
  Ji-Hwan Park (University of Ulsan, KR)
Outage Performance of an Energy-Efficient Relaying Protocol over Nakagami Fading Channels ................................................................................................................................................... 439
Viet-Anh Le (Queen’s University, CA)
Taneli Riihonen (Helsinki University of Technology, FI)
Risto Wichman (Helsinki University of Technology, FI)
Steven Blostein (Queen’s University, CA)

Performance of Turbo Coded Cooperative Asynchronous DS-CDMA in Frequency-Selective Fading Channels .......................................................................................................................... 444
Ali Mehemed (Concordia University, CA)
Walaa Hamouda (Concordia University, CA)

Asymptotic BER Bounds of BICM-ID based Cooperative Network over Nakagami-m Fading Channels ...................................................................................................................... 448
Shujaat Ali Khan Tanoli (Asian Institute of Technology, TH)
Imran Khan (Asian Institute of Technology, TH)
Nandana Rajatheva (Asian Institute of Technology, TH)

Wireless Networks II

The Optimum Power Allocation Strategy for Multi-Bands Decentralized Wireless Networks ...... 452
Soroush Akhlaghi (Shahed University, IR)
Mohammad Akbari (Shahed University, IR)
Mandana Rezaee (Rai Corp, IR)

On Code Design in Joint MAC Scheduling and Wireless Network Coding ........................................ 456
Raheleh Niati (Carleton University, CA)
Amir H. Banihashemi (Carleton University, CA)
Thomas Kunz (Carleton University, CA)

A Performance Modeling of WiMedia UWB MAC ................................................................................... 461
Chunxiao Ma (Concordia University, CA)
M. Mehmet-Ali (Concordia University, CA)

A Dynamic Policy for Resource Management in Next Generation Networks ........................................ 467
Mahmoud Pirhadi (Islamic Azad University, IR)
Mojtaba Yaghobi Waskasi (University of Tehran, IR)
Seyed Mostafa Safavi Hemami (Amirkabir University of Technology, IR)
