</table>
A CRT-Based BCH Encoding and FPGA Implementation .......................................................... 164
Fengbo Liang, Liyang Pan

Steganography in Real-Time Video over Internat Protocol Systems .................................... 172
Weili Lai, Quincy Wu

Reliable Cooperative MAC Protocol in Ad Hoc Networks under Bad Wireless Channel Environments ...... 180
Jaeshin Jang, Sang Wu Kim

A New Group Key Management Protocol Using Code for Key Calculation: CKC ......................... 185
Melisa Hajyvahabzadeh, Elina Eslkhani, Seyed Anahita Mortazavi, Ali reza Nemane Pour

A Non Location Aware Version of Modified LEACH Algorithm Based on Giving Priority of Residual Energy or Number of Neighbors ............................................................ 191
Fatemeh Ayughi, Karim Faez, Zabra Eskandari

A Study on Improving Web Cache Server Performance Using Delayed Caching .......................... 196
Daesung Lee, Kuinam J. Kim

TRACK 3. MULTIMEDIA AND VISUALIZATION

Gabor Feature Selection and Improved Radial Basis Function Networks for Facial Expression Recognition .......................................................................................................................... 201
Chien-Cheng Lee, Cheng-Yuan Shih

Intuitive Fuzzy C-Means Algorithm for MRI Segmentation .................................................... 209
Dong-Chul Park

Detection of Image Fragments Related by Affine Transforms: Matching Triangles and Ellipses ............................................................................................................................. 216
Mariusz Paradowski, Andrzej Slazek

Classification of Audio Data Using a Centroid Neural Network .................................................. 224
Dong-Chul Park

Line-Based Recognition Using 3D Lines and Occlusion Query ................................................ 230
Jae-Kyu Lee, Seongjin Ahn, Jin Wook Chung

An Efficient Video Mosaic Panorama Algorithm ........................................................................... 238
Xi-Bo Zhao, Xiao-Chun Zou, Zhong Ma, Tan Feng

Person Tracking During Walking Using a Camera on a Moving Platform .................................... 243
Mahmoud Tarokh, Paulo Merloti, Malrey Lee, Zhao Xu

Robust Hybrid Foreground Detection and Adaptive Background Model ..................................... 250
Wessam R. Elhefnawy, Gamal Selim, Samy Ghoniemy

Low-Complexity Heterogeneous Video Transcoding by Motion Vector Clustering ...................... 258
Yoonjeong Shin, Namrye Son, Nguyen Dinh Toan, Gueesang Lee

Masking Based Segmentation of Diseased MRI Images ............................................................... 264
Arunava De, Rajih Lochan Das, Arup Kumar Bhattacharjee, Deepak Sharma

A Novel Image Retrieval Scheme Using DCT Filter-Bank of Weighted Color Components ................... 271
Yong-Ho Kim, Seok-Han Lee, Sangkeun Lee, Tae-Eun Kim, Jong-Soo Choi

CUDA-Based Linear Solvers for Stable Fluids ............................................................................. 279
G. Amador, A. Gomes

Oblique Multi-Planar Reformation Using Viewport Translation Technique on Visualization Toolkit Library .......................................................................................................................... 287
K. Koonsanit, S. S. Thongvigjitanee, W. Narkbuakaew, P. Yampri, W. Sinthupinyo

TRACK 4. MIDDLEWARE AND OPERATING SYSTEMS

Dynamic Thread Management for Scalable RFID Middleware .................................................. 293
Sungwoo Ahn, Wooseok Ryu, Bonghee Hong, Heungseok Chae, Junho Lee

A Design of Embedding Rewiring into Routing for FPGA Improvement ................................... 301
Yuetling Wong, Qiang Zhou, Jinian Bian

An Online Self-Optimizing QoS Control Framework in Middleware .......................................... 309
Dahai Li, David Levy

Design and Implementation of Scenario-Based Collaborative Framework: XCREAM ........................ 317
Kyunggeun Park, Jekuk Yun, Yanggon Kim, Juno Chang

Enabling Lego Robots to Communicate Routing .......................................................................... 325
Daesung Lee, Kuinam J. Kim
TRACK 5. SECURITY AND PRIVACY

Improved Related-Key Boomerang Cryptanalysis of AES-256 ....................................................................... 330
Hadi Soleimany, Alireza Sharifi, Mohammadreza Aref

Study on Prevention of the Leaking of Industrial Secret Based on LDAP ....................................................... 337
Do Hyeong Kim

Scalable, Privacy-Preserving Remote Attestation in and through Federated Identity Management Frameworks .................................................................................................................. 344
Tamleek Ali, Mohammad Nasman, Muhammad Amin, Masoom Alam

A Fingerprint-Based User Authentication Scheme Using Smart Cards in IPTV Environments ..................... 352
Eun-A Jun, Hyun Sook Bhee, Seok Won Jung, Dong Hoon Lee

Watermarking Techniques Applied to H264/AVC Video Standard .............................................................. 360
Samira Bouchnama, Hassina Aliane, Latifa Hamami

Website Forgery Prevention .......................................................................................................................... 367
Dmytro Iliev, Yong Bin Sun

A Goal-Oriented Approach for Modeling and Analyzing Attack Graph ......................................................... 375
Xuejiao Liu, Chengfang Fang, Debao Xiao, Hui Xu

Agent Attacks Using a TTL Transformation of Windows Registry .................................................................. 383
Won Hyung Park, Kwang Cheol Park, Keon Il Heo, Kwang Ho Kook

A Study on Risk Analysis and Assessment of Damages to Cyber Attack ..................................................... 390
Won Hyung Park

Real-Time Simulated Traffic Generation and Verification Methods Based on the Traffic Pattern Analysis ................................................................................................................................. 396
Hyunchool Kim, Wonhyuk Lee, Jeom Goo Kim

A Study on the Enhanced Security Techniques of BGP for DRDoS Attack .................................................... 401
Jaehoon Sun, Yong-Bin Sun

Identifying Rootkit Infections Using Data Mining ............................................................................................ 407
Desmond Lobo, Paul Watters, Xin-Wen Wu

Conceptualizing and Generalizing Access Control .......................................................................................... 414
Sabah S. Al-Fedaghi

Image Encryption Design Based on Multi-Dimensional Matrix Map and Partitioning Substitution and Diffusion-Integration Substitution Network Structure ............................................................................. 422
Liang Zhao, Di Xiao, Kouichi Sakurai

Data Encryption Using ECG Signals with Chaotic Henon Map ................................................................. 430
Ching-Kun Chen, Chun-Liang Lin, Yen-Ming Chiu

Security Analysis of Some Blind Proxy Signatures .......................................................................................... 435
Maryam Rajabzadeh, Mahmoud Salmasizadeh, Alireza Sharifi

Factors Influencing the Implementation of Information Systems Security Strategies in Organizations .......... 440
Sangseo Park, Atif Ahmad, Anthonie B. Raighaver

Semantic Remote Attestation for Security Policy ............................................................................................ 446
Qian Zhang, Yeping He, Ce Meng

Chaos Based Multimedia Data Encryption Scheme .......................................................................................... 454
Vikas Mittal, N. W. Nerurkar

Cryptanalysis of Four-Rounded DES Using Ant Colony Optimization ............................................................ 461
Sahabat Khan, Waseem Shahzad, Farrukh Aslam Khan

Detecting Method on Illegal Use Using PCA under HER Environment ..................................................... 468
Donghwi Lee, Byong Hun Kim, Kuanam J Kim

3D CAPTCHA: A Next Generation of the CAPTCHA .................................................................................. 474
Montree Innanyai, Suphakant Phimoltares

SERA: A Secure Energy and Reliability Aware Data Gathering for Sensor Networks ................................ 482
Sang Guun Yoo, Seung-Hoon Kang, Juho Kim

A Reproducible Performance Evaluation Method for Forged Fingerprint Detection Algorithm ................ 493
Yong-Nyuo Shin, Myung Geun Chun, Woosang Shin

Privacy-Aware Role Based Access Control Model: Revisited for Multi-Policy Conflict Detection .............. 501
Yoonjeong Kim, Eunjee Song

A Forensic Model on Deleted-File Verification for Securing Digital Evidence ............................................ 508
Yong-Ho Kim, Kunam J. Kim

Fraudulent Call Detection for Mobile Networks .............................................................................................. 516
Sameer Qayyum, Shaheer Mansoor, Adeel Khalid, Khushbakht, Zahid Halim, A. Rauf Baig
Track 6. Data Mining and Artificial Intelligence

Tree Reconstruction and Bottom-Up Evaluation of Tree Pattern Queries
Yangjun Chen, Yibin Chen .......................... 521

Cleansing Noisy City Names in Spatial Data Mining
Seungjin Lim ........................................... 529

Interactive Visual Data Mining of a Large Fire Detector Database
Seungjin Lim ........................................... 537

Determination of Water Content in Automobile Lubricant Using Near-Infrared Spectroscopy
Improved by Machine Learning Analysis
Yun Zhao, Xing Xu, Lu-Lu Jiang, Yu Zhang, Li-Hong Tan, Yong He ........................................... 545

Clustering Music Recordings Based on Genres
Wei-Ho Tsai, Duo-Fu Bao .......................... 553

Parallelized Local Volatility Estimation Using GP-GPU Hardware Acceleration
Craig C. Douglas, Hyoseop Lee, Dongwoo Sheen ........................................... 558

Adaptive Digital Watermarking of Images Using Genetic Algorithm
Bushra Sikander, Muhammad Ishaq, M. Arfan Jaffar, Muhammad Tariq, Anwar M. Mirza .................. 562

Extended k-dominant Skyline in High Dimensional Space
Anisuzzaman Siddique, Yasuhiro Morimoto ........................................... 570

BitApriori: An Apriori-Based Frequent Itemsets Mining Using Bit Streams
Thi Thanh Khan Le, Thi Thanh Thuy Nguyen, Tae Chong Chung ........................................... 578

A New Discrete PSO for Data Classification
Naveed Kazim Khan, A. Rauf Baig, Muhammad Amjad Iqbal ........................................... 584

Measures of Risk on Variability with Application in Stochastic Activity Networks
Yousry H. Abdelkar ........................................... 590

On the Evaluation of a Structural Information Metric for Syllabus Suitability
Anestis A. Toptsis, Jose Semidey ........................................... 600

Mean-Variance Models for International Portfolio Selection with Uncertain Exchange Rates and Security Returns
Xiaoxia Huang ........................................... 607

Intensifying the Performance of Nonlinearity Approximation by an Optimal Fuzzy System
Do-Thanh Sang, Ho-Hai Nguyen, Dong-Min Woo, Seung-Soo Han, Dong-Chul Park ........................................... 614

A Time Series Data Prediction Scheme Using Bilinear Recurrent Neural Network
Dong-Chul Park ........................................... 620

Improved Opposition-Based PSO for Feedforward Neural Network Training
Muhammad Rashid, Abdul Rauf Baig ........................................... 627

Hiding Frequent Patterns in the Updated Database
Bi-Ru Dai, Li-Hsiang Chiang ........................................... 633

Opposition Based Genetic Algorithm with Cauchy Mutation for Function Optimization
M. Amjad Iqbal, Naveed Kazim Khan, M. Arfan Jaffar, M. Ramezan, A. Rauf Baig ........................................... 641

Multiobjective Evolutionary Optimization of Training and Topology of Recurrent Neural Networks for Time-Series Prediction
Hideki Katagiri, Ichiro Nishizaki, Tomohiro Hayashida, Takanori Kudoma ........................................... 648

Track 7. Software Engineering

Modeling UML Sequence Diagrams Using Extended Petri Nets
Nianhua Yang, Huiqun Yu, Hua Sun, Zhilin Qian ........................................... 656

Efficient Web Service Composition and Intelligent Search Based on Relational Database
Cheng Zeng, Weijie Ou, Yi Zheng, Dong Han ........................................... 664

Software Maintenance Prediction Using Weighted Scenarios: An Architecture Perspective
Sajjad Anwar, Muhammad Ramzan, Abdul Rauf, Arshad Ali Shahid ........................................... 672

Architecture Based Ripple Effect Analysis: a Software Quality Maintenance Perspective
Sajjad Anwar, Fouzia Idris, Muhammad Ramzan, Arshad Ali Shahid, Abdul Rauf ........................................... 681

A Financial Tool for Software Risk Measurement
Masood Uzzafer ........................................... 689

A Profile Approach to Using UML Models for Rich Form Generation
Tomas Cerny, Eunjee Song ........................................... 695

Evaluation Framework for Ontology Modularization Approaches
Sunju Oh, Heon Y. Yeom ........................................... 703
A New Metric Model for Trustworthiness of Softwares .......................................................... 711
  Hongwei Tao, Yixiang Chen

On the Validation of System Dynamics Type Simulation Models ................................................ 719
  Hassan Qudrat-Ullah

Project Scheduling Conflict Identification and Resolution Using Genetic Algorithms .................. 726
  M. Ramzan, M. Amjad Iqbal, M. Arfan Jaffar, Abdul Rauf, Sajid Anwar, Arshad Ali Shahid

Multi Objective GUI Testing and Coverage Analysis .............................................................. 732
  Abdul Rauf, Shafiq Ur Rehman, M. Arfan Jaffer, Sajid Anwar, Arshad Ali Shahid

TRACK 8. WEB TECHNOLOGY

XML Based Format for Exchange of Plagiarism Detection Results ............................................ 738
  Nousheen Samuel, Naima Samuel, Sergey Butakov

Analyzing the Web Crawler as a Feed Forward Engine for an Efficient Solution to the Search
Problem in the Minimum Amount of Time through a Distributed Framework ............................. 744
  M. Atif Qureshi, Arjumand Younas, Francisco Rojas

How Can Culturally Specific Variables Increase the Effectiveness, Efficiency and Satisfaction of
Computing User .......................................................................................................................... 752
  Javed Anjum Sheikh, Bob Fields, Elke Duncker

TRACK 9. MEDICAL/HEALTH INFORMATICS

Graphic Visualization of the Co-Occurrence Analysis Network of Lung Cancer In-Patient Nursing
Record ......................................................................................................................................... 756
  Muneo Kushima, Kenji Araki, Muneou Suzuki, Sanae Araki, Terue Nikama

A Hybrid Method to Predict Angina Pectoris through Mining Emergency Data ......................... 764
  Sung Ho Ha, Zhen Yu Zhang, Eun Kyong Kwon

Development of a Wearable ECG Recorder for Measuring Daily Stress ..................................... 770
  Yoshiho Okada, Yi-Tsuyoshi Yoto, Taka-Aki Suzuki, Toshifumi Sugitrua, Satoshi Sakuragawa

Food Recommendation System Using Clustering Analysis for Diabetic Patients ......................... 775
  Maiyaporn Phanich, Phathrajarin Pholkul, Suphakant Phimoltares

Nutrition Counseling System and Food Menu Planning .............................................................. 783
  Yanisa Usthasopha, Suphakant Phimoltares, Nagul Cooharojananone

New Classes of UBIAS and E-UBIAS Cognitive Vision Systems ........................................... 791
  Marek R. Ogiela, Ryszard Tadeusiewicz, Lidia Ogiela

Prototype Design of Drug Usage Information Retrieval System ............................................... 797
  Byungrae Cha, Hagang Kim, Jongwon Kim

TRACK 10. BIOINFORMATICS AND SCIENTIFIC COMPUTING

Performance of Machine Learning Techniques in Protein Fold Recognition Problem ................. 803
  Muhammad Asif Khan, Muhammad A. Khan, Zahoor Jan, Hamid Ali, Anwar M. Mirza
