2010 Second International Conference on Computer and Network Technology

(ICCNT 2010)

Bangkok, Thailand
23-25 April 2010
# Second International Conference on Computer and Network Technology

## ICCNT 2010

### Table of Contents

<table>
<thead>
<tr>
<th>Section</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preface</td>
<td></td>
</tr>
<tr>
<td>Organizing Committees</td>
<td></td>
</tr>
<tr>
<td>Reviewers</td>
<td></td>
</tr>
<tr>
<td>Session 1: Computer and Network Technology</td>
<td></td>
</tr>
<tr>
<td>An Improvement in Apriori Algorithm Using Profit and Quantity</td>
<td>Parvinder S. Sandhu, Dalvinder S. Dhaliwal, S.N. Panda, and Atul Bisht</td>
</tr>
<tr>
<td>Performance Study on Location-Assisted and Bluetooth-Assisted Session</td>
<td></td>
</tr>
<tr>
<td>Transfer for VoIP Application</td>
<td>Khong Neng Choong, Cheng Suan Lee, Muhammad Norhadri Mohd Hilmi, So Gean Koh, and Chee Onn Chow</td>
</tr>
<tr>
<td>Sensor Placement for Heterogenous Point Coverage</td>
<td>Ravanbakhsh Akhlaghinia, Sattar Hashemi, and Bita Shadgar</td>
</tr>
<tr>
<td>Analysis of ICT Penetration in Iran and Middle East</td>
<td>Mohsen Gerami</td>
</tr>
<tr>
<td>A Performance Study on REAchability Protocol in Large Scale IPv6 Networks</td>
<td>Habib Naderi and Brian Carpenter</td>
</tr>
<tr>
<td>Challenges in the Deployment of Visuo-Haptic Virtual Environments on the Internet</td>
<td>Jonathan Norman and Felix G. Hamza-Lup</td>
</tr>
<tr>
<td>Communication Service Provider's Choice between OSPF and IS-IS Dynamic Routing Protocols and Implementation Criteria Using OPNET</td>
<td>Sheela Ganesh Thorenoor</td>
</tr>
</tbody>
</table>
A New Data-Conjugate Intercarrier (ICI) Self-Cancellation for ICI Reduction in Space Time Frequency Block Codes MIMO-OFDM System

Azlina Idris, Kaharudin Dimyati, and Sharifah Kamilah Syed Yusof

Dynamic Multiple Pattern Detection Algorithm

Chouvalit Khancome and Veera Boonjing

Performance Analysis of Cross-Layer MAC and Routing Protocols in MANETs

Manjul Walia and Rama Krishna Challa

Packet Scheduling Scheme for Multiple Services in Mobile WiMAX System

Eunyoung Lee and Hyung-Kun Park

Providing Time Based Fairness in Multi Rate Ad Hoc Network

Sunita Varma and Vrinda Tokekar

Session 2: Computer and Network Technology

A Compact 8-Bit AES Crypto-processor

F. Haghighizadeh, H. Attarzadeh, and M. Sharifkhani

WIFI-Based Indoor Positioning System

Arash Habibi Lashkari, Behrang Parhizkar, and Mike Ng Ah Ngan

A Framework for Performance Analysis of Client/Server Based SOA and P2P SOA

Piyali De, P. Chodhury, and S. Choudhury

Wireless Intrusion Detection System Using a Lightweight Agent

Fariba Haddadi and Mehdi A. Sarram

Towards Forecasting Low Network Traffic for Software Patch Downloads: An ARMA Model Forecast Using CRONOS

Ian K.T. Tan, Poo Kuan Hoong, and Chee Yik Keong

PICCO: Protocol Independent Congestion Control Method Using Mobile Relays for Ad-Hoc Networks

Yuvaraju B. N and Niranjan N. Chiplunkar

Research on Virtual Network for Virtual Mobile Network

Jong-Seo Lee and Il-Young Moon

Performance Evaluation of Routing Protocols Based on Wormhole Attack in Wireless Mesh Networks

Mani Arora, Rama Krishna Challa, and Divya Bansal

Advanced Networked Server Management and Operational Implementations

Song-Kyoo Kim

Mobility Management in Heterogeneous Wireless Access Network with IEEE 802.21 Services

Shaifizat Mansor and Tat-Chee Wan

Comparison of Attribute Selection Methods for Web Texts Categorization

Rizauddin Saian and Ku Ruhana Ku-Mahamud
Signal Strength Seeded Frequency Hopping ................................................................. 119
   Robert Kelley, Anup Kumar, Bin Xie, and Xianqian Liu
Research on Network Virtual Laboratory System .......................................................... 124
   He Wei

Session 3: Computer and Network Technology

Traffic Driven Handoff Management Scheme for Next Generation Cellular Networks (NGCN) ........................................................................................................ 131
   Azita Laily Yusof, Mahamod Ismail, and Norbahiah Misran
Analyzing and Simulating the Inverse and the Direct Dynamics of Parallel Robot Stewart Platform ........................................................................................................ 136
   Hamidreza Hajimirzaalian, Hasan Moosavi, and Mehdi Massah
Stream Switching Resilience in P2P Streaming ................................................................ 142
   Narges Zeighami, Javad Mirabedini, and Sam Jabbehdari
Auto-CQT Control and Management Protocol Design .................................................. 147
   Xiaowan Ke, Wenjing Li, Lanlan Rui, Xuesong Oiu, and Shaoyong Guo
Animal Situation Tracking Service Using RFID, GPS, and Sensors ................................ 153
   So-Hyeon Kim, Do-Hyeun Kim, and Hee-Dong Park
A Dynamic Algorithm for Stabilising LEDBAT Congestion Window ................................ 157
   Amuda James Abu and Steven Gordon
A High Speed-Based Vehicular Application for Wireless Network Mobility (NEMO) Environment ........................................................................................................ 162
   Chun-Shian Tsai
Channel Reservation Scheme Based on AODV Routing Protocol for Common Traffic in Wireless Mesh Network .................................................................................. 168
   Hassen Abd-Almotaleb Mogaibbel, Mohamed Othman, Shamala Subramaniam, and Nor Aslih Wati Abdul Hamid
Protection Optimization for MPLS Networks ................................................................ 175
   Rawya Rizk, Aliya Elmaghraby, and Mahmoud Mariee
Block-Level Data Migration in Tiered Storage System .................................................. 181
   Xiaonan Zhao, Zhanhuai Li, Xiao Zhang, and Leijie Zeng
TCP Performance Enhancement Using ECN and Snoop Protocol for Wi-Fi Network ......................................................................................................................... 186
   Manish Devendra Chawhan and Avichal R. Kapur
Dynamic Routing Protocol Implementation Decision between EIGRP, OSPF and RIP Based on Technical Background Using OPNET Modeler ........................................ 191
   Sheela Ganesh Thorenoor
ICT Exports of IRAN and Middle East Countries .......................................................... 196
   Mohsen Gerami
Session 4: Computer and Network Technology

A Study on Contents Lookup Protocol on P2P Multiple Overlay Network for Mobile IPTV Service ................................................................. 203
Yu-Doo Kim and Il-Young Moon

Grid Load Balancing Using Ant Colony Optimization ...................................................... 207
Husna Jamal Abdul Nasir and Ku Ruhana Ku-Mahamud

Key Pre-Distribution and the Average Distance in Wireless Sensor Networks .................. 212
Ssanyu Lawrence, Li Qiaoliang, Nsabagwa Mary, and Fujian Bo

Mathematical Modeling of Routing Protocol Selection for Optimal Performance of MANET ............................................................... 217
M. Ramakrishnan, S.B.M. Priya, and S. Shanmugavel

Jyotiprakash Sahoo, Subasish Mohapatra, and Radha Lath

Opportunistic Spectrum Access in OFDMA Systems ......................................................... 227
Shehzad Ahmad, Adnan Shahid, Rao Munzir Ahmad, Adeel Akram, and Muhammad Adnan Nasin

Approach of Workflow Services to Implementing Conference Management System ................................................................. 234
Pongsathorn Noimanee and Yachai Limpiyakorn

Location Dependent Query Processing – Issues, Challenges and Applications ............... 239
Kakhkashan Tabassum, Maniza Hijab, and A. Damodaram

Reactive Localization in Underwater Wireless Sensor Networks ........................................ 244
Mohamed K. Watfa, Tala Nsouli, Maya Al-Ayache, and Omar Ayyash

A PSO-Based UWB Pulse Waveform Design Method ................................................... 249
Seyed Noorodin Keshavarz, Mehdi Hamidi, and Hossein Khoshbin

JXPro: Environment for Java Program Composition Integrating Test-Driven Development with Life-Cycle Management ....................................... 254

An Innovative Approach of Data Grid Consistency Using Tree-Based Clustering .................. 258
Hosein Ebrahimi Ahangaran and Amir Masoud Rahmani

Intrusion Detection and Attack Classification Using Feed-Forward Neural Network ............... 262
Fariba Haddadi, Sara Khanchi, Mehran Shetabi, and Vali Derhami
Session 5: Computer and Network Technology

New Hierarchical Routing Protocol for WSNs .................................................................269
Ali Hosseinalipour, Davood KeyKhosravi, and Abbas Mirzaei Somarin

A Kernel Level VFS Logger for Building Efficient File System Intrusion Detection System .................................................................273
Md. Sarfaraj Alam Ansari, Arijit Chattopadhayay, and Suvrojit Das

Effect of Burst Assembly on Data Loss in OBS Network under Correlated Input Traffic ..................................................................................280
Gargi Chakraborty, S. Choudhury, and Md. Sarfaraj Alam Ansari

A Self-Optimizing Mobility Management Scheme Based on Cell ID Information in High Velocity Environment ......................................................285
Dongming Su, Xiangming Wen, Haijun Zhang, and Wei Zheng

Computer Controlled Intrusion-Detector and Automatic Firing-Unit for Border Security ..................................................................................289

Securing On-Demand Source Routing in MANETs .................................................................................................294
Kamal Kumar Chauhan, Amit Kumar Singh Sanger, and Virendra Singh Kushwah

Prioritized Quality of Service Support Medium Access Control for Real Time Flows ......................................................................................298
Jims Marchang, Sukumar Nandi, and Nityananda Sarma

Framework for FPGA–Based Floating Point Discrete-Wavelet Transform Computation Algorithm ........................................................................303
Punam U. Chati

Performance Analysis of MUSIC and ESPRIT DOA Estimation Algorithms for Adaptive Array Smart Antenna in Mobile Communication ..........308
T.B. Lavate, V.K. Kokate, and A.M. Sapkal

A High Speed FPGA Implementation of a 1024-Point Complex FFT Processor ...........................................................................................312
Zahra Haddad Derafshi, Javad Frounchi, and Hamed Taghipour

Investigation on the CCSRR Influences towards CSMA with Air Gap for HAPS .............................................................................................316
A.A.M. Ezanuddin, F. Malek, and P.J. Soh

Development of Semantic Based Information Retrieval Using Word-Net Approach ..........................................................................................320
P. Nithiya, V. Vidhya, and L. Ganesan

Optimizing the Path Loss of Wireless Indoor Propagation Models Using CSP Algorithms .............................................................................324
Nagendra Sah, Neelam Rup Prakash, Amit Kumar, Davendra Kumar, and Deepak Kumar

Session 7: Traffic and Logistic Engineering

The Effects of Network Size and Variables on Solution Approach in Hazmat Routing Problems ....................................................................................................................................................387
Seyed Mohammad Seyedhosseini and Abbas Mahmoudabadi

Comparison of Weighted and Simple Linear Regression and Artificial Neural Network Models in Freeway Accidents Prediction .............................................................................................................392
Abbas Mahmoudabadi

Peak Volume Characteristics of Urban Road Intersections: Case in Shanghai ..............................................397
Lianghui Qian and Xiaohong Chen

Application of GPRS Technique for Traffic Data Collection System Communication Software Development and System Evaluation ...........................................................................................................402
Wei Xu and Mark Phillips

Novel VNS Algorithms on Asymmetric Traveling Salesman Problems ........................................................407
Ittiporn Piriyaniti and Pisut Pongchairerks

A Proposed Model for Determining and Giving Priority to Accident Prone Zones (Black Spot) ..................................................................................................................................................................................410
Hasan Zoghi, Mojtaba Hajali, and Meisam Dirin

Optimization of Stochastic Cargo Container Loading Plans for Air Express Delivery .................................................................416
Ching-Hui Tang and Hsin-Wei Chang

Effect of Aggregate Shape on Skid Resistance of Compacted Hot Mix Asphalt (HMA) ..................................................................................................................................................................................421
Shahreena Melati Rhashudin Shah and Mohd Ezree Abdullah

Dynamic Air Route Management Based on Flight Demand .................................................................................426
Hong Lanshou and Dai Fuqing

Effects of Passage Restrictions for Heavy Vehicles on Tour Trips in Urban Networks .................................................430
Elnaz Irannezhad, Afshin Shariat Mohaymany, and Seyed Hossein Mousavi

Session 8: Systems Engineering and Modeling

Fingerprint Recognition by Euclidean Distance ..................................................................................................................437
Chomtip Pornpanomchaisai and Apirode Phaisitkulwitat

A Fuzzy Rules and Wavelet Neural Network Method for Mid-long-term Electric Load Forecasting ..................................................................................................................................................................442
Qian Zhang and Tongna Liu

Automatic Segmentation and Ventricular Border Detection of 2D Echocardiographic Images Combining K-Means Clustering and Active Contour Model .................................................................................................447
S. Nandagopal, B.S. Adiga, C. Dhanalakshmi, and N. Deepak

Comprehensive Evaluation of Maritime Emergency Capability ........................................................................452
Zhanghao, Xiaoyingjie, Yubin, and Yangxiaojun
A Model for Performance Measure of Industrial Robots .................................................................457
  B.B. Choudhury, A. Mishra, and B.B. Biswal
Modeling of Single Phase Inverter of Photovoltaic System Using System Identification .................................................................462
  N. Patcharaprapiti, K. Kirtikara, D. Chenvidhya, V. Monyakul, and B. Muenpinij
Best-Worst Ant Colony System Parameter Investigation by Using Experimental Design and Analysis for Course Timetabling Problem .................................................................467
  Thatchai Lutuksin and Pupong Pongcharoen
Performance Analysis of Y-Tree on Flash Drives ..........................................................................472
  Narong Boonyawat and Juggapong Natwichai
Answer Aggregation for Keyword Search over Relational Databases .................................................477
  Utharn Buranasaksee, Kriengkrai Porkaew, and Umaporn Supasitthimethee
Experimental Investigations of Input Shaping Schemes for Sway Control of a Gantry Crane System ..........................................................................................................................483
  M.A. Ahmad, Z. Zulkifely, and M.A. Zawawi
Membrane Computing Model for Software Requirement Engineering ..................................................487
  Velayutham Pavanash, Chandrasekaran Subramaniam, Thulukkanam Srinivasan, and Jitendra Kumar Jain D

Session 9: Systems Engineering and Modeling

Buddhist Amulet Recognition System (BARS) .......................................................................................495
  Chomtip Pornpanomchait, Juti Wongkorsub, Terapong Pornaudomdaj, and Pimluk Vessawasdi
A Framework for Personalized Information Retrieval Model ....................................................................500
  Fikadu Gemechu, Zhang Yu, and Liu Ting
A Bayesian Network Model for Decision Support ....................................................................................506
  Laping Han
An Approach to Verifying Interface Compatibility of Components with Component Dependency Graph .................................................................................................................................509
  Wantana Areeprayokij, Yachai Limpiyakorn, and Duangrat Gansawat
Ontology Description of Jade Computational Agents in OWL-DL .........................................................514
  Roman Neruda
E-Partner: Partnership Match for an Extended Enterprise ........................................................................519
  Harshit Kumar and Pil Seong Park
Recognizing and Filtering Web Documents with Using Ontology .............................................................524
  Reza Mohamadi Bahram Abadi, Mohammadi Hossein Yektaie, and Mashallah Abbasi
Breast Carcinoma Pigeonholing and Vaticination Using an Interspersed and Malleable Approach .................................................................................................................................531
  Hassan Mathkour and Muneer Ahmad
### Session 10: Systems Engineering and Modeling

**A Multiple Objective Stochastic Portfolio Selection Program with Partial Information on Probability Distribution** ................................................................. 536  
*Hatem Masri, Fouad Ben Abdelaziz, and Ines Meftahi*

**Simulation of Ships’ Routing System** .................................................................................................................. 540  
*Xiaoyingjie and Zhanghao*

**Energy Absorption of Thin-Walled Composite Tubes Subjected under Quasi-static Compression** ................................................................................................................................. 545  
*Haidar Fadhil Abbas Al-Qrimli, Hakim S. Sultan Aljibori, and Fadhil Abbas M.*

**Session 10: Systems Engineering and Modeling**

**On Energy Decay of Global Solutions for a Petrovsky System with Damping Term and Source Term** ........................................................................................................................................... 553  
*Yaojun Ye*

**Data Load Distribution by Semi Real Time Data Warehouse** ...................................................................................... 556  
*Muhammad Younus Javed and Asim Nawaz*

**Concept and Development of Modular VLIW Processor Based on FPGA** ................................................................. 561  
*Debyo Saptono, Vincent Brost, Fan Yang, and Eri Prasetyo Wibowo*

**Design of Fuzzy Immune PID Controller for Liquid Level Control System** ................................................................. 566  
*Rahul Kannan, P. Ananthachristhu Raj, and P. Poongodi*

**Application of AHP to Evaluation on Failure Causes Analysis for Lithography Machine** .................................................................................................................................................................................. 571  
*Po-Sheng Ko, Cheng-Chung Wu, Hsin-Hung Chen, and Chung-Wen Yang*

**Trait Factors Analysis Based on Cash Flow of Listed Companies** ................................................................................ 574  
*Na Liu and Chen Fei Xiao*

**Performance Study of Reorganization of the ST Company's Assets** ................................................................................ 578  
*Ming Can Sun and Xiao Jing Li*

**An Algorithm for Joint Multi-item Replenishment Problem under Trade Credits** .................................................................................................................................................................................. 582  
*Yu-Chung Tsao and Lu-Wen Liao*

**Real-Time Visual Feedback Enhances Tower of Hanoi Manipulation Task** ................................................................. 587  
*Faieza Abdul Aziz and On Chee Leong*

**Semantic Technology: An Efficient Approach to Monogenean Information Retrieval** ................................................................. 591  
*S. Alfred, A. Arpah, L.H.S. Lim, and K.K.S. Sarinder*

**Angle Prediction between Document Vector and Ontology Vector, Using Multiple Linear Regressions** .................................................................................................................................................................................. 595  
*Reza Mohamadi Bahram Abadi, Mohammadi Hossein Yektaie, and Mashallah Abbasi*

**Development of RPS Parallel Manipulators** .................................................................................................................. 600  
*S. Parasuraman and Philip Chan Jia Liang*
