EDT2010 Content Volume 1

Session 1: E-Health Networking, Digital Ecosystems and Technologies

Automatic Camshift tracking algorithm based on fuzzy inference background difference combining with twice searching
Xiao Gang, Chen Yong, Chen Jiu-jun, Gao fei ................................................................. 1

Innovation Performance of Insurance Businesses in China: Theoretical Model and Empirical Analysis
Zhang Jing, Tian Ling ........................................................................................................... 5

The Design of Mobile Robot Heading Control
Yu Jintao .......................................................................................................................... 9

Study on Therapeutic Effect of Music Therapy on Patients with Dental Anxiety of College Students
Pu Cheng, Rong Chen ...................................................................................................... 12

Real-time Human Heart Rate Monitoring Using a Wireless Sensor
Network Based on Stochastic Resonance
Guohua Hui ...................................................................................................................... 15

Research on Acquisition Policy under Some Special Cases
Xiaogang Cao, Hui Wen, Huosong Xia .............................................................................. 19

Study on the causes of hypertension with improved BP neural network
Xiuying Dong, Wang ping ................................................................................................. 21

Design of “Player Killing Mode” of Aerobics Teaching for Physical Education Major in Higher School
Li qin Yao ........................................................................................................................ 25

Simulation of spontaneous respiration nonlinear model driven by muscle pressure
He Zhonghai, Shan Fang, Sun Meirong ............................................................................ 29

Research of Physical Condition Monitoring System for The Elderly Based on ZigBee Wireless Network Technology
Lu Wang, Zhiliang Wang, Zhangzheng He, Xiaoliang Gao ..................................................... 32

The research of solid waste management system in Dongguan City based on GIS
Zhang Ruihong, Yu Zhichao .............................................................................................. 36

Artificial Immunity-based Model for Information System Security Risk Evaluation
Caiming Liu, Minhua Guo, Lingxi Peng, Jing Guo, Shu Yang, Jinquan Zeng ...................... 39

Fuzzy Synthetic Evaluation of Atmospheric Environment Quality based on Entropy Weight
Honghou Dai, Chenghua Shi, Xiaojing Zhou .................................................................. 43
Parameter Optimization of PID Controllers Based on Genetic Algorithm
Hong Zhang, Yuanhu Cai, Yuchun Chen ................................................................. 47

A New Way of Using Multimedia Screen to Display Dynamic Production Data
Yuanxiu Xing, Jiwu Yu .......................................................................................... 50

Study on Service-Oriented Forth Party Logistics Operation Mode
Wang Qifeng ......................................................................................................... 53

Application of Fuzzy AHM Based on Entropy Weight in Appraising Forwarding Agent of Third Party Logistics
Qing-kui Cao, Xue-mei Liu .................................................................................. 57

Credit Assessment for Listed Companies Based On GA-BP Model
Hong-lei Wang .................................................................................................... 61

A FAQ Online System Based on Wiki
Fu Jinwei, Sun Jianhong, Xiao Tianqing .............................................................. 66

The Research and Design of the Medical Expert System Based on the Service Soft Bus Architecture
Xiaoping LI, Jinghui CHEN, Xiaoxing LV, Yinxing LI, Lin ZHANG, Yan SHI .......... 69

Improvement of the Mobile E-health Wireless Networks Based on the IPv6 Protocol
Xiaoping LI, Liangliang JI, Yinxiang LI, Lin ZHANG, Shuaizong WANG, Xiaoxing LV ................................................................. 73

A research of high-speed Batcher’s odd-even merging network
Yang Jun Li, Na Ding Jun Guo Yixiong Tang Zuoxia ............................................ 77

FPGA-based multi-channel CRC generator implementation
Yang Jun Ding Jun Li Na Guo Yixiong Dong Yin .................................................. 81

GIS-based Dynamic Analysis of Land-use Change and Its Ecological Effects
Wan Li, Tian Ziqiang, Chen Youqi ....................................................................... 85

The Building of Cloud Computing Environment for E-Health
Lejiang Guo, Fangxin Chen, Li Chen, Xiao Tang .................................................. 89

The Research Of Event-Related Potentials In Working Memory Of The Juvenile Internet Addiction
Jianying Xiong, Leiyue Yao .................................................................................. 93

Approach to Congestion Pattern Analysis Based on Bayesian Network
Shaoqing Meng, Chunping Hou .......................................................................... 96

A Scheme’s Synchronization of Chua Chaotic System under the Impulsive Control
Yingkui Li .............................................................................................................. 99
The Impact on the Development of Sports Enterprises Making by the Combination of E-commerce and
NetworkMarketing
Zhongbin Yin, Binli Wang, Zhe Li.......................................................... 102

State Feedback Control of Networked Control System with Random Delay
Zeng Mingru, Qian Xin, You Wentang ...................................................... 105

Distributed Architecture for Delivery Simulators
Jun Hu, Peter Peters, Frank Delbressine, Loie Feijs .................................. 109

Based on Wireless Communication Module NRF905 Banking Queuing System Design
Meng zhiyong, An Guochen, Yu Guoqing.................................................. 113

Research on the Network Security of a Web-based Logistics Information Platform
Geng di, Guo libin .................................................................................. 117

The Development of Intelligent Pressure Transmitter based on HART Protocol
Zeng Mingru, You Wentang, Qian Xin ....................................................... 121

Model of Bed Arrangement Based on Priority Sort
Ji-xuan Han, Yuan-Biao Zhang, Xiao-long Liu, Jing-wei Li ......................... 125

The Stability of A New Lü Chaotic System with A Sort of Parameters
Zhiming Zhou ......................................................................................... 129

A New Scheme for Constructing Training Resources of Design Graphics
Sun Ying .................................................................................................... 132

Study on Underwater Image Segmentation Technique
Yan Cheng-xin .......................................................................................... 135

A New Scheme on Design Graphics Teaching Integrating Mental Health Education
Yan cheng-xin ............................................................................................ 138

Defect Recognition Algorithm Based on Curvelet Moment and Support Vector Machine
Fanzhi Kong, Hongsheng Ni ....................................................................... 142

Feature Extraction and Matching Location Algorithm Based on Wavelet Moment and Curvelet Transform
Fanzhi Kong............................................................................................. 146

Generation of Organ Texture with Perlin Noise
Liu Xuemei, Liu Huan, Yu Hui .................................................................... 150

Microscopic Dynamic Simulation Model for Pedestrian-Vehicle Mixed Traffic
WU Huixin, WU Wenhong .......................................................................... 153
Study of Feedback in Experiential Learning  
CAO Yonghui .......................................................... 157

Study of Variance-based Model of Organizational Learning  
CAO Yonghui ................................................................ 161

Study of Organizational Learning  
CAO Yonghui ................................................................ 165

Study of Antecedent and Consequences of Work Group Learning  
CAO Yonghui .......................................................... 168

Study of the Bayesian Networks  
CAO Yonghui .......................................................... 172

Study of RLT-enhancements for Minimax Optimization Problems  
CAO Yonghui .......................................................... 175

The Feedback and Adaptive Control Ability of the Decision Theoretic Intelligent Agent System  
CAO Yonghui .......................................................... 178

Chaotic Clonal Selection Algorithm for Function Optimization  
Hongwei Dai, Yu Yang, Cunhua Li .................................................. 181

Research on formation mechanism of enterprise IT outsourcing relationship  
Weihua Duan, Xinhua Bi, Cuiling Yu .................................................. 185

Application of HSMM on NC Machine’s State Recognition  
Huang Qiang, Ding Zhihua, Zhang Xiao ........................................... 189

Application of the Character Extraction with Mutative Scales on States Recognition  
Huang Qiang, Zhang Xiao, Ding Zhihua ........................................... 192

Face Recognition System to enhance E health  
S.Sumathi, R.RaniHema Malini .................................................. 195

Study of Communication between VFP and Mitsubishi FX Serial PLC  
Jinjiao Zhang, Binfang Wu .................................................. 199

Design of management System For Membership Supermarket Based On B/S  
Hailing Bo .................................................................................. 203

Gas Productivity Analysis of High Speed Non-Darcy Flow in Deformed Media Gas Reservoir  
Cui Chuan-zhi ........................................................................... 207

Fast Rotation Invariant Face Detection in Color Image Using Multi-Classifier Combination Method  
Yongqiu Tu, Faling Yi, Guohua Chen, Shizhong Jiang, Zhanpeng Huang .................................................. 211
Illumination Removal in Color Images Using Retinex Method Based on Advanced Adaptive Smoothing
Yongqiu Tu, Faling Yi ................................................................. 219

Research on Computer Immune System with Multilayer Recovery
Jiaomin Liu, Yongzheng Li, Zhenzhou Wang, Weina Zhang ......................................................... 224

An Algorithm for Checking Termination of Active XML Documents Materialization
HaiTao Ma, Yan Zhu ......................................................................... 228

An Intrusion Detection Method Based on Decision Tree
Yongjin Liu, Na Li, Leina Shi, Fangping Li ......................................................... 232

Comparison of Several Sensor Deployments in Wireless Sensor Networks
Xueqing Wang, Shuxue Zhang............................................................. 236

Finding the locations of offenders in serial crimes
Xiao-long Liu, Yuan-Biao Zhang, Ji-xuan Han, Sha Zhao ......................................................... 240

Agent-construction Government Investment Project Management New Mode
Fan Yuxiang, He Yabo ....................................................................... 244

The Construction Research on Rapid-Response Eco-Supply Chain of the Textile Industry Based on the Circular Economy
Lizhen Du, Lianqing Yu, Rao Cheng ..................................................... 248

Integrating Mobility, Multi-homing and Security in Universal Network
Lijuan Zheng, Zhen Han, Man Xu, Jiangang Qi ............................................. 252

On Multi-Agent Based Urban Rail Transport Ridership Forecast System
LIU Yi-song, LIU Hai-mei, ZHAO Jing-bo ............................................. 256

Overview of Data Dissemination Strategy in Wireless Sensor Networks
Fang hongping, Fang Kangling .............................................................. 260

An Application of Attribute Recognition Theory in Land Ecological Security Evaluation A case study on areas along the Changjiang River in Anhui Province
Jiulong Zhu ......................................................................................... 264

Study on the Detection and Correction of Software based on UML
Xue Qing ji ......................................................................................... 268

Application Research of 802.11-Based Wireless Network in the Library
ZHou Xunjie, Li chao, Liu pu ................................................................. 272

A New Half-overlap Filtered Multitone Modulation Based On CIC Filter in The Context of Cognitive Radio
Xugang Liu, Hao Liu ........................................................................... 276

An Improved Frame-Slot ALOHA Anti-collision Algorithm
Feng Shuo, Gao Fei, Xue Yanming, Li Heng ................................................................. 337

Research on the Evaluation of Enterprise’s Core Competence Based on AHP and Fuzzy Mathematics
Yao Ligen, Dong Zhenlin ............................................................................................... 341

Design of Road Tracing Navigation Control for Smart Car Use CCD Sensor
Zhaoxia Wang, Yongxin Liu ............................................................................................ 345

Fuzzy PID with Parameters Self-turning Used in the Belt Position Departure Control
Lili Li, Yongxin Liu .......................................................................................................... 349

The Building of Harmony Project Management Theoretical System
Zhao Wanhua .................................................................................................................. 353

A Fast Object Segmentation Approach Based on Integral Image in ALV System
Shenyi Qian, Xiaolei Chen, Yongquan Xia ................................................................. 357

Research of Formal Modelling Based on UML Package and B
Zhang Jianhui .................................................................................................................. 361

Digital Signature In The Application Of E-Commerce Security
Chen Tianhuang, Xu Xiaoguang ...................................................................................... 366

Design Patterns Application In A Distributed System
Chen Tianhuang, Huang Feifei ....................................................................................... 370

A Brief Analysis on Data Encryption’s Application in Electronic Business Transaction Security
Wenzhe Liu ...................................................................................................................... 373

The Application Research of Computational Intelligence in Content Video Retrieval Technology
Wenzhe Liu ...................................................................................................................... 377

Three-level Direct Torque Control of Salient Pole Synchronous Motor
Huang Yourui, Huang Jian ............................................................................................... 381

The Application of Morphology Analysis and RFFSVM to Intelligent Fault Diagnosis on the Bearing of Ships
Suhai Shen, Yulong Zhan, Qinming Tan ......................................................................... 386

Design and Implementation of an Improved RSA Algorithm
Yunfei Li, Qing Liu, Tong Li ............................................................................................ 390

The Application of Rough Set Theory in Remote Sensing Image Classification
Zheng Nan, Li Haiyu, Zhou Mai Yu .................................................................................. 394
Research on Regional Agricultural Structure Optimization based on Grey Situation Decision Model
Wang Chen, Zhou Tao, Fu Xiangtao, Liang Jinxiu ................................................................. 398

A Network Intrusion Detection Approach combined with Genetic Algorithm and Back Propagation Neural Network
XiaoHang Yao .......................................................................................................................... 402

A SAR Images Despeckling Method based on Adaptive Bandelet Thresholding
Hu Fang-fang Liu Jin-mang Zhang Jin-cheng ............................................................................. 406

A New Dynamic Routing Protocol based on Co-ordinate for Mobile Networks
Xi Ning ........................................................................................................................................ 409

Classification Model based on Ranganathan’s Facets Theory for Information Organization and Management
Zhigang Ji, Qingyu Sun, Gang Liu ............................................................................................. 413

Unstructured Information Organization based on Ontology
Zhigang Ji, Gang Liu, Qingyu Sun .............................................................................................. 417

A Comparison of the Four Evolutionary Programming Implementations used as Function Optimizers
Shaojun Luan, Xuedong Gao, Bing Qi ...................................................................................... 421

An Accumulated Method Based on Fractal for Automatic Terrain Generation
LI Kui-Ru, LEI Xiao-Feng ......................................................................................................... 426

Securing IEEE 802.11 based Hybrid Wireless Mesh Networks
Divya Bansal, Sanjeev Sofat ..................................................................................................... 431

A Design Model for Enterprise Asset Management System of Coal Preparation Plant
Chuancheng Ren ......................................................................................................................... 436

Study on Construction Process Management and Control of Cable Stayed Bridge Based on MIDAS
Gao Yongqiang, Wang Xiuhong ............................................................................................... 440

Research on Application of RFID System with 2nd-Generation ID Card Based on ZigBee Wireless Network
Shi Binbin, Dai Minli, Xu Fengliang .......................................................................................... 443

DTI White Matter Fiber Tractography using Bayesian Framework
Xi Wu .......................................................................................................................................... 447

A Polling MAC Scheme for Enhancing QoS Support in Bluetooth Technology
Zhijun Yang, Dongfeng Zhao .................................................................................................... 450

A Reliability Transmission Routing Metric Algorithm for Wireless Sensor Network
XU Baoshu, WANG Hui ............................................................................................................ 454
Form-finding Analysis and Implementation of Cable-reinforced Membrane Structure Based on ANSYS
Gao Yongqiang, Wang Xiu Hong, Liu Dongmei ................................................................. 458

Anti-interference performance of multi-path direct sequence spread spectrum wireless communication system
Cai jiao Xue ......................................................................................................................... 461

Sub-optimum Evaluation on Incomplete Network Information System
Zengtang Qu, Ping He, Lihua Duan .................................................................................. 465

Studies on Internet Real-name System and Network Action Surveillance System
Zengtang Qu, Ping He, Libo Hou ..................................................................................... 469

The Philosophical Thoughts of Measurement Information Theory and its Applications
Shuangbao Ma, Yong Xue .................................................................................................. 473

Analytical Hierarchy Process Model Applied to Port Logistics Efficiency Commentary
LI Ya, LI Chuanzhi ............................................................................................................ 476

The Influence Factor Research of Information Services Supply in Rural Areas — Based on Factor Analysis
Wu Xianfeng, Huang Jiali, Fu Di ....................................................................................... 480

The Research and Design of the General Teaching Integral Warehouse Online
LIU Tao, CAI Hua-Hui, Ying Dong-Lan ........................................................................... 485

Two Cases of Learning Bayesian Network from Observable Variables
Liu Hui, CAO Yonghui ........................................................................................................ 488

Research on the Network Security of a Web-based E-University System
Geng Di, Li Yonggang, Li Qingmei ................................................................. 51

RESEACH ON CREATIVE TALENTS CULTURE FOR MINERAL PROCESSING ENGINEERING
Youjun Tao, Yali Kuang, Yuemin Zhao .......................................................... 55

The Application of Multimedia Technology in Action-oriented Instruction of Volleyball Course of Sports Majors in Institutions of Higher Learning
Guishen Yu ....................................................................................................... 59

Analysis on the Self-estimation of Students' Learning Quality in Network Teaching
Zhao Xiaodan, Liu Jing .................................................................................... 62

Application of EWB in Teaching of Digital Electronic Technology Foundation
Hongli Zhu ......................................................................................................... 66

Tentative Idea of Reform on the Second Classroom for Electronic Specialty
Jian Xiang .......................................................................................................... 69

Study on the Open-Experimental Teaching Model for the Purpose of Cultivating Innovative Students
Qi Wang ............................................................................................................. 72

Target Hierarchy Methodology Applied in Mechatronical Engineering Bilingual Teaching
Zheng LI ............................................................................................................. 76

Research and Practice on Application-Oriented Computer Foundation Education
Ying Liu ............................................................................................................. 80

The Research of Training Model of CAX Comprehensive Ability for Mechanical Major
Xiao Qian, Zhou Xinjian .................................................................................. 83

Development of a Remote Laboratory for Process Control Experiments
GAO Hongyan ................................................................................................... 87

Discussion on the Method of Basic Computer Education in Characteristic University
Fang Wei ........................................................................................................... 91

A Study on the Major Factors Influencing Market Demand of China's Professional Basketball Competition
Gao Zhi, Lei xianliang, Weng Jianfeng ............................................................. 95

Survey and Analysis of the use of Social Software in Education
Zhang Haiyan, Wang Huanjing ......................................................................... 99

Analog Circuits Course Reform and Practice in the Teachers College of Technology
Lifang Zhai, Cheng Huang .............................................................................. 103
The Thinking of Multimedia Technology in Cognition Practice on Civil Engineering
Xueqing Wang, Renliang Shan ................................................................. 107

Integration Pattern Of Graduation Practice, Graduation Design and Employment Based on Web Management
Jing Lou, Qingyuan Zhou, Rui Guo, Tianxiao Gu ........................................ 110

The Construction of a New MCU Experiment Platform
Yulan Qi ................................................................................................. 114

On Courses Construction and Optimization of Engineering Majors in Vocational and Technical Institutions
Lin Shen, Liqin Wang ............................................................................... 117

New Teaching Reform Exploration of Detection Technology and Automation Instrumentation
zeng zhihui, lv hui .................................................................................... 121

The Security Risk Analysis of E-Commerce and Measure Research
Zhu Mingqiang, Liu Jingjing ................................................................. 125

Development of Embedded Experiment Platform on Robot Project-driven
Jiang Yifeng, Shen Lin ........................................................................... 129

Reform and practice on the course design of design of machinery
Lü Baozhan, TU Deyu ........................................................................... 133

Development of Verbal-Imagery Cognitive Style Test
Dun Niu, Wenwen Xie, Pengfei Wang, Yutian Huang .................................. 137

An on-line Teaching and Learning System For Electrical & Electronic Lab
Wang Dahu, Wang Fuzhong, Zhang Tong, Jiaolong Zhang ......................... 141

Design and Development of Mental Health Education System for University Students Based on B/S Structure
Zhang Xiaoxia, Liu Yongfu, Yao Xiaohong, Ma Bo, Zhao Xiongwei .............. 144

On Establishing Multi-dimension Monitoring System for Teaching Quality of Colleges and Universities
Han Hua, Liu Hui .................................................................................. 147

Classroom bilingual teaching quality based on Delphi method and AHP
Liping Zhang ......................................................................................... 152

A CDIO-based Teaching Quality Monitoring System for Computer Science and Technology Specialty at Private Universities
Haiyi Jin, Dejun Tang ............................................................................. 156

On the wrong area of CAI in industrial design teaching
Ying Zhu, Chunming Han, Ping Zhang, Xiaochen Yin, Jia Jing ................. 160
Analyse of American Academic Game Courses in Computer Science Education and Guidance for Domestic Universities
Qi Yue, Wang Shan ................................................................. 164

Reform and Research on Experimental Teaching for High Frequency Electronic
Xuanchang Zhou ........................................................................ 168

Probe into the University Multimedia Teaching Courseware Development Mode
Li Zhigang, Tang Meng ............................................................. 171

Research on Security of the WLAN Campus Network
Yong Yu, Qun Wang, Yan Jiang .................................................. 175

Discussion on Security for Campus Scientific Research Management System
Qun Wang, Yong Yu, Shaobing Wang .......................................... 179

Design of the Physical Chemistry Network Teaching System Based on Web
FENG Li, RUAN Jizheng, Liu Jiongtian ...................................... 183

Teaching Reform of Environmental Professional-Based and Research of Applied Practice
Yi Zhang .................................................................................... 187

Research of Educational Technology of Computer Networks
Song Wei, Zhou Qunyi, Lin Xuefen ............................................. 192

Research on the Integrity Monitoring of GPS Vehicle System
YANG WENQIANG, ZHANG JUNCAI ........................................... 196

The Study of Autonomous Learning in the Teaching of University Physical Education
Dongping Cao, Daping Wang, Junmei Liu ..................................... 200

Application of EDA Technology on Professional Teaching for Electronic Information Engineering
haibing qi .................................................................................. 203

A Novel Office Word Format Examination Educational Software Development
Zhou Qunyi .............................................................................. 207

Application of Information Technology in Chinese College Physical Education Teaching
Zheng Zhiqiang ......................................................................... 210

Network Teaching Resources Construction and Practice Discovery Based on "Teacher-guidance & Students-centered"
Huo hongying, Deng Guoli ...................................................... 214

Research on Reform of Teaching Contents and Methods of "Computer Network" to the Local University
Zeng-gang Xiong, Xue-min Zhang, Yun Xie, Jian-xin Chen ............. 218
A Novel Student-Centered Teaching Reform on Programming Courses
Zhou Qunyi .................................................................................................................. 221

A Web-based Platform for Inquiry Learning
Jie Wang ....................................................................................................................... 224

Research and Practice of Experimental Innovative Modes in the Control Class
zheying song, xueling song, chaoying liu ................................................................. 228

A Software Skill Self-Training Platform Based on Campus Network
Hong HE, Shengzhong YUAN .................................................................................... 232

An E-Learning Platform Design Based on Tree Structure
Zaiqing CHEN, Junsheng SHI, Zhiping LI, Jianbing CHEN ................................... 236

Innovation Capacity Teaching Platform Building of Electrical and Electronic Course Group
Yumei Wang, Fuzhong Wang ..................................................................................... 241

Application of Virtual Teaching Platform of Digital Design and Manufacturing in Innovative Teaching for Numerical Control Technology Specialty
Jianping Liu, Qing Yang, Bangyan Ye ..................................................................... 245

Innovation Teaching Method Researching on Embedded System Course Based on Robot Project-driven Idea
Jia Yu ........................................................................................................................... 249

Establishment of Platform of Ideological and Political Educational Work under the Network Environment

Research and Design of Teaching Case Database of Science of Navy Command
LI Dong, Chen Deng-an, Zhu ChaoChao, Liang Peng .................................................. 256

Mineral processing machinery curriculum reform
Ma Jiao, Jiao Hongguang, Pan Lanying, Zhang Chuanxiang .................................... 260

Reform on Experiment Teaching of Single-chip Microcomputer and Cultivation of Students’ Practical Ability
Wang Li, Su Bo, Wang Fuzhong .................................................................................. 263

The study of college physics teaching under the network circumstance
Jianqiang Liu, Donghong Liu, Chengju Zhang .............................................................. 267

Analysis and Application of Wireshark in TCP/IP Protocol Teaching
Shaoqiang Wang, DongSheng Xu, ShiLiang Yan .......................................................... 269

Exploring research of "Project-driven" teaching methods of Electronic Technology Courses
Hongwen Xu, Lin Zhang, Qizhi Zhang, Beibei Yu ...................................................... 273
Design and Implementation of Course Group Network Teaching Platform Based on Knowledge Points
Xiaoyong Sun, Weifeng Ma, Yunfa Lei ................................................................. 336

Experiential Teaching based on Living Lab: A study on the telecommunication service experience
Ying Peng, Zifang Lu, Jing Wang, Jianqin Xu, Hongwei Li ........................................... 340

Applying Computer Multimedia to All Teaching/Learning Links in the National Excellent Curriculum-Mineral processing Plant Design
Kuang Yali, Zhao Yuemin, Liu Jiongtian, He Yaqun ....................................................... 344

Personnel Training of Digital Publishing for Undergraduate Computer Courses Curriculum Recommendation
Chen Hejie, Qin Biyu .................................................................................................. 348

The Application of Feedback Learning Platform in C++ Course
Zheng Wei, Cong Zhao, Xing le MA, Jian jun Yang, Yong Wang ................................... 352

Research and design of open teaching and learning platform based on XML middleware
Yuelan Liu, Lu Yang, Yanqing Zheng ........................................................................... 356

Concept Learning Embedded in a Freshman Engineering Project on Energy Scavenging
Yanfei Liu, Carlos Pomalaza-Ráez ............................................................................. 360

Study on the lab teaching system construction of Information Management and Information System profession
Hua Jiang; Xiaofeng Zhao ............................................................................................ 364

Discussion on Teaching Methods of Innovative Education for Non-computer Professions in Engineering Colleges
Yubao LIANG, Qianli MA, Shaotang LIU ................................................................. 367

Integrating Computer Technologies into College English Teaching in China
Xian Tang .................................................................................................................... 371

Application of Proteus Virtual System Modelling (VSM) in Teaching of Microcontroller
Bo Su, Li Wang .......................................................................................................... 375

Educational Experience of Computer and Network Based Teaching Approach to Electrical Engineering Curriculums
Zheng LI ..................................................................................................................... 379

Research on the <Auto-control Theory> Education Innovation in the Information Age
Hui-wen Leng, Dong-xing Wang, Lin-ping Wang, Yue Li ............................................ 383

Using Yahoo! Pipes Building Information Warehouse of Intelligence
Bai Rujiang, Wang Xiaoyue ....................................................................................... 388
