
Held at the 47th Conference of Metallurgists (COM) 2008

Winnipeg, Manitoba, Canada
24-27 August 2008

# Table of Contents

**Advanced Characterization Techniques Applied to Minerals, Metals and Materials**

- **Analysis of Modular Titanium Alloy Hip Stems that Failed in Service** .......................................................... 3  
  *P. Nayar, E. Bohm, J.R. Cahoon, W. Caley and M. Petrak*

- **Epma and SEM in Characterization of Inorganic Compounds in Blast Furnace Coke** ................................. 11  
  *S.S. Gornostayev and J.J. Härkki*

- **Characterisation and Biocompatibility Study of a Thin Titanium Film Obtained by PVD on AiSi 316l Stainless Steel** ........................................................................................................... 19  
  *Y. Khelfaoui, H. Sedjal, M. Kerkar, A. Bali and F. Dalard*

- **A Method of Measuring Secondary Dendrite Arm Spacing (SDAS) using Automatic Image Analysis** ........................................................................................................ 35  
  *Y.J. Huang, S.Z. Lu and Y.L. Zhu*

- **Characterization of Coatings on Hot-dip Galvanized CMNSI TRIP Steel** .................................................... 47  
  *N. Gao, Y.H. Liu and R.B. Park*

- **Characterization of Residual Stress and Microstructure of Multiphase Steels by Means of Barkhausen Noise Measurements** ................................................................................................ 59  
  *X. Kleber, J. Merlin and A. Vincent*

- **Electrokinetics and Flocculation Studies of Coal** ................................................................................................. 67  
  *N. Dhawan*

- **Technology of Preparation for Sponge Copper Powder by Leaching –Electrowinning from the Complex Multi-metal and Low Metal Grade Ores** ................................................................. 77  
  *Y-Y. Liu, B-Z. Chen, X-Y. Yang, X-L. Sun and X-Y. Zhou*

- **Author Index** ....................................................................................................................................................... 87
