# TABLE OF CONTENTS

## VOLUME 1

### FWI – ALBERT TARANTOLA MEMORIAL SESSION (EAGE)

| A017 | Geologically Constrained Full Waveform Inversion – Theory | .......................................................... 1 |
| A018 | Efficient Gauss-Newton Hessian for Full Waveform Inversion | .......................................................... 6 |
| A019 | Acoustic Waveform Inversion Applicability on Elastic Data | .......................................................... 11 |
| A020 | Application of an Impedance-based Full-waveform Inversion Method for Dual-sensor, Single-streamer Field Recordings | .......................................................... 16 |
| A021 | 2D Acoustic Full Waveform Inversion of a Land Seismic Line | .......................................................... 21 |
| A022 | 3D Elastic Wavefield Inversion in the Time Domain | .......................................................... 26 |
| A023 | Time-lapse Elastic Full Waveform Inversion using Injected Grid Method | .......................................................... 31 |
| A024 | Waveform Tomography by Correlation Optimisation | .......................................................... 37 |

### AVO (EAGE)

| A025 | Elastic Inversion of 3D Seismic Data – A Market Benchmark | .......................................................... 42 |
| A026 | Sensitivity of Time-lapse Changes in Pressure and Saturation to Seismic AVO and Time-shifts | .......................................................... 47 |
| A027 | 3D Pre-stack Inversion Workflow Integrating Reservoir Model Control and Lithology Supervised Classification | .......................................................... 52 |
| A028 | Ray Impedance Inversion on the Tight-sand Gas Reservoir | .......................................................... 57 |
| A029 | Statistical Rock Physics and Bayesian Classification – Are Marginal Distributions Important? | .......................................................... 62 |
| A030 | Applicability of AVO Inversion Based on Effective Reflection Coefficients to Long-offset Data from Curved Interfaces | .......................................................... 67 |
| A031 | A 3D Ray-based Pulse Estimation for Seismic Inversion of PSDM Data | .......................................................... 72 |
| A032 | Pilot Fracture Characterization Study Using Seismic Attributes Derived from Singular Value Decomposition of AVOAz Data | .......................................................... 77 |

### SEISMIC DATA PROCESSING 1 (EAGE)

| B001 | Simultaneous Sources – Processing and Applications | .......................................................... 82 |
| B002 | Iterative Method for the Separation of Blended Encoded Shot Records | .......................................................... 87 |
| B003 | High Quality Separation of Simultaneous Sources by Sparse Inversion | .......................................................... 92 |
| B004 | Separation of Blended Impulsive Sources using an Iterative Approach | .......................................................... 97 |
| B005 | Signal-to-noise Estimates of Time-reverse Images | .......................................................... 102 |
| B006 | Multichannel Matching Pursuit for Seismic Trace Decomposition | .......................................................... 107 |
| B007 | Fast Sparse Time-frequency Decomposition | .......................................................... 112 |
| B008 | Can Thin Beds Be Identified Through Statistical Phase Estimation? | .......................................................... 117 |
LAND ACQUISITION (EAGE)

B009 High Productivity without Compromise – The Relationship between Productivity Quality and Vibroseis
Group Size .......................................................................................................................................................... 122
P. B. Sabel, L. Fenstad, S. Darling
B010 On the Accuracy of Harmonic Estimation from Weighted-sum Ground Force .................................................. 127
T. Dean, P. Kristiansen, P. I. Vermeer
B011 Deharmonics, a Method for Harmonic Noise Removal on Vibroseis Data ........................................................... 132
F. D. Martin, P. A. Munoz
B012 Keeping the Data Quality of High Productivity Vibroseis Acquisitions Under Control ........................................... 137
C. Bagagni
B013 Harmonic Distortion Reduction of Seismic Vibrator Using Vibrator Control Electronics ........................................ 142
T. F. Phillips
B014 What if I...? – The Use of Vibroseis 'Energy Tests' as an Aid in Parameter Choice .................................................... 147
P. Kristiansen, J. Quigley, D. Holmes, T. Dean
B015 Low-frequency Generation Using Seismic Vibrators ................................................................................................. 152
B016 Directive Geophone .................................................................................................................................................. 157
M. A. Al-Judani

SEISMIC NOISE & MULTIPLE ATTENUATION (EAGE)

B017 Field Data Results of Elimination of Free-surface-related Events for Marine Over/Under Streamer Data .................. 162
M. Majdanski, C. Kostov, E. Kragh, I. Moore, M. Thompson, J. Mispel
B018 Surface Related Multiple Elimination for WATS Data ................................................................................................. 167
E. Karin, D. Lokshunov, H. K. Helgesen
B019 3D Predictive Deconvolution for Wide-azimuth Gathers ............................................................................................ 172
F. Hugonnet, J. L. Boeile, P. Herrmann, F. Praz, S. Navion
B020 2D Multiple Prediction in the Curvelet Domain ........................................................................................................... 177
D. Dono, H. Chautis, M. Noble
B021 Incorporating the Source Array into Primary Estimation ............................................................................................. 182
G. J. A. Van Groenestijn, D. J. Verschuur
B022 Stabilized Estimation of Primaries by Sparse Inversion ............................................................................................... 187
T. T. Y. Lin, F. J. Herrmann
B023 Surface Multiple Attenuation Through Sparse Inversion – Attenuation Results for Complex Synthetics and
Real Data ............................................................................................................................................................... 192
C. W. Hyslop, M. S. Diallo
B024 Energy Reassignment of an Image for Improved Picking of Velocity Dispersion Curves .............................................. 197
T. F. Phillips

MARINE ACQUISITION (EAGE)

B025 A Marine Broadband Case Study Offshore China ........................................................................................................... 202
T. J. Bunting, B. J. Lim, C. H. Lim, S. W. Pei, S. K. Yang, Z. B. Zhang, Y. H. Xie, L. Li
B026 First 3-D Dual-sensor Streamer Acquisition in the North Sea – An Example from the Luno Field ...................................... 207
B027 Mitigating the Environmental Footprint of Towed Streamer Seismic Surveys .......................................................... 212
D. J. Verschuur, F. J. Herrmann, C. P. Zickerman
B028 Recon 3D – A Fast and Cheap 3D Acquisition Approach to Large Scale Exploration .................................................. 217
M. D. Macnab, J. F. McNutt
B029 First Wide-azimuth Time-lapse Seismic Acquisition Using Ocean Bottom Seismic Nodes at Atlantis Field –
Gulf of Mexico ......................................................................................................................................................... 222
G. J. Beaudoin, M. D. Reasnor, M. Pfister, G. Openshaw
B030 A Case Study of a High Latitude Towed Streamer 3D Seismic Survey ........................................................................ 227
A. Ross, S. Hildebrand, S. Viceer
B031 Randomized Sampling Strategies ............................................................................................................................. 232
F. J. Herrmann
B032 Acquisition Design for Incoherent Shooting .................................................................................................................. 237
G. Blacquiere, A. J. Berkhout

TIME LAPSE SEISMIC (EAGE)

B033 Time-lapse Refraction Seismic Monitoring .................................................................................................................. 242
F. Hansteen, P. B. Wills, J. C. Hornman, L. Jin, S. J. Bourne
B034 Benefits of Hydrophones for Land Seismic Monitoring ............................................................................................... 247
E. Rebel, E. Forgues
B035 A New Approach to Efficient 4D Acquisition .................................................................................................................. 252
P. B. Sabel, L. Fenstad, S. Darling
B036 Time-lapse Acquisition With a Dual-sensor Streamer over a Conventional Baseline Survey .................................................................257
A. Day, M. Widmaier, T. Hoy, B. Ornes

B037 The Correlated Leakage Method – It’s Application to Better Quantify Timing Shifts on 4D Data ..........................................................262
P. Paramo, D. N. Whitcombe, N. Philip, A. Toomey, T. Redshaw, S. L. Ng

B038 Simultaneous Multi-vintage Multi-parameter Time-lapse Matching ........................................................................................................267
E. Zahnli, Nanini, H. Hoehrer, G. Poole, F. Beker, M. Van Schaeck

B039 Retrieving 4D Signal in Complex Media Using the Full Waveform Inversion Paradigm ........................................................................272
P. Thore, H. Alouiche, P. O. Lys, T. Tarass

B040 Time Lapse Monitoring of the Elgin HPHT Field ..........................................................................................................................277
A. Grandi, O. Rahmamov, V. Neillo, P. Bourgeois, C. Deplante, L. Ben-Brahim

WIDE AZIMUTH (EAGE)

B041 Coil Shooting on Tulip Discovery – Processing Challenges and Results ..........................................................................................282

B042 Multi-azimuth High-resolution Tomography – Application to Offshore Nile Delta.................................................................................287
D. W. Van Der Burg, S. Lin, C. Zhou, J. Jiao

B043 Exploring Oligocene Targets Using Multi-azimuth Acquisitions – Application of Non-linear Slope Tomography ........................................292

B044 The Benefits of Multi-azimuth Depth Migration over the Tidepole Field, North West Shelf, Australia ..................................................297
D. Dickinson, T. Ridgill-Smith

B045 Using High-density OBC Seismic to Optimise the Andrew Satellites Development ..............................................................................302
L. Padman, D. Davies, M. Davies, J. McGarrity

B046 5D Data Reconstruction Using the Anti-leakage Fourier Transform ...............................................................................................307
G. Poole

B047 Can We Correct for Azimuthal Variations of Residual Moveout in Land WAZ Context Using Depth Non-linear Slope Tomography? ..........312

B048 Analysis Methodology for Azimuthal Anisotropy ..............................................................................................................................317
K. Bishop, A. Osadchuk, M. Stanley

EM I (EAGE)

C001 Controlled-source Electromagnetic Modelling Studies – Utility of Auxiliary Potentials for Low-frequency Stabilization ........................................322
M. Wirianto, W. A. Mulder, E. C. Slob

C002 Exploiting the Airwave for Land CSEM Reservoir Monitoring ............................................................................................................327
M. Wirianto, W. A. Mulder, E. C. Slob

C003 Using CSEM to Monitor the Production of a Complex 3D Gas Reservoir – A Synthetic Case Study ......................................................332
D. L. Andreis, L. M. Maggiori

C004 Fast-track Marine CSEM Processing and 3D Inversion ......................................................................................................................337
J. P. Morten, A. K. Bjarke

C005 Comparison of Marine TEM and FEM Techniques – Offshore West Africa .........................................................................................342
M. Watts, G. Cairns

C006 The Value of CSEM Data in Exploration ........................................................................................................................................347
A. Buland, L. O. Losseth, T. Rosten

C007 Scalable Solutions for Nonlinear Inverse Uncertainty Using Model Reduction, Constraint Mapping, and Sparse Sampling ........................352
M. J. Tompkins, J. Fernandez Martinez

C008 Sensitivity Study of Multi-sources Receivers CSEM Data for T1-anisotropy Medium using 2.5D Forward and Inversion Algorithm ..........................357
A. Abubakar, J. Liu, M. Li, T. M. Habashy, K. Maclennan

MIGRATION THEORY (EAGE)

C009 Seismic Imaging with Multiple Scattering ........................................................................................................................................362
A. J. Berkhour, D. J. Verschuer

C010 Angle-dependent Least-squares Imaging of Incoherent Wavefields ..................................................................................................367
D. J. Verschuer, A. J. Berkhour

C011 Prestack Data Enhancement Using Local Traveltome Approximation ..........................................................................................372
Y. Buchakov, R. Bina, E. Landa

C012 3D Prestack Beam Migration with Compensation for Frequency Dependent Absorption and Dispersion ..................................................377
Y. Xie, C. Notfors, J. Sun, K. Xin, A. Biwal, M. Balasubramaniam

C013 Pure P-wave Propagators Versus Pseudo-acoustic Propagators for RTM in VTI Media ........................................................................382
X. Du, R. P. Fletcher, P. J. Fowler
C014 Angle Gathers by Reverse-time Migration
M. Vyas, E. Mobley, D. Nichols, J. Perdono

C015 Kirchhoff Beam Q Migration
J. Liu, G. Palacharla

C016 Impact of TTI Anisotropy on Elastic and Acoustic Reverse Time Migration
R. Lu, P. Tranyin, J. E. Anderson, T. Dickens

EM 2 (EAGE)

C017 Airborne TDEM by He-filled balloon
E. H. Stetler

C018 Shallow Water CSEM Using a Surface-towed Source
D. V. Shantsev, F. Rith, C. Twiez, A. Frenival, A. K. Nguyen

C019 Case Study – A Towed EM Test at the Peon Discovery in the North Sea
J. M. Mattsson, L. L. Lund, J. L. Lima, F. E. Engelmark, A. M. McKay

C021 3D Inversion of Transient EM Data – A Case Study From the Alveheim Field, North Sea
B. A. Hobbs, M. S. Zhdanov, A. Gribenko, A. Paterson, G. Wilson, C. Clarke

C022 Inversion of CSEM Data in the Presence of Shallow Resistive Inhomogeneities
M. Watts, L. Bornattt

C023 2D Anisotropic Inversion of Marine CSEM Survey Data – An Example from West Africa
C. J. Ramananajosa, L. M. Macgregor

C024 3D Iterative Migration of Marine Controlled-source Electromagnetic Data with Focusing Regularization
M. S. Zhdanov, M. Cuma, G. A. Wilson

VELOCITY MODEL BUILDING 1 (EAGE)

C025 Understanding Wave-equation Image-gathers – A Prerequisite for Advanced Post-processing and Velocity Model Building
J. Sirgue, P. Jousselín, F. Audébert

C026 On the Gradient of Wave-equation Migration Velocity Analysis
M. Vyas, Y. Tang

C027 Differential Semblance Wavefield Tomography Using Extended Images
T. Yang, P. C. Sava

C028 Local Plane Wave Tomography
D. Lokshinowo, J. K. Lotsberg, E. Kurin

C029 Acoustic Wave Equations for a Virtual Source Shift
T. Alkhalifah

C030 Velocity-independent "tau"-p Moveout in a Layered VTI Medium
L. Casavanta, S. Fomel

C031 Quantifying Structural Uncertainty in Anisotropic Depth Imaging – Gulf of Mexico Case Study
K. Ozygov, D. Nichols, Y. Yang, F. Qiao, M. O'Briain, O. Zdraveva

C032 Rapid Salt Model Scenario Testing with Fast Pre-stack Beam Migration
A. Osen, S. K. Foss, M. Rhodes, D. Michel, C. Lojewski, N. Estrich

VELOCITY MODEL BUILDING 2 (EAGE)

C033 Simultaneous Joint Inversion as a Salt Detector in South Gabon Land Exploration
M. Mantovanu, T. Dugoujard

C034 Gulf of Mexico Case Study of Localized Anisotropic Tomography with Checkshot
A. Y. Bakulin, Y. Liu, O. Zdraveva

C035 Introducing A Priori Information in Non-linear Slope Tomography as Applied to the Minagish Survey in Kuwait
P. Guillaume, D. Carotti, A. L. Al-Kandari, A. El-Emam, G. Lamanère

C036 Application of Isotropic PP/PS-stereotomography to a Gas Cloud Context – The Snohvit Gas Field
M. Alerine, P. Eliaussen, S. Nag, M. Buddensiek, C. Ravant

C037 Multi Directional Residual Curvature Analysis to Improve Seismic Anisotropy Estimations
S. Birds, L. Li

C038 Building Borehole-calibrated and Geologically Plausible Anisotropic Models Using Wells and Horizon-guided Interpolation
A. V. Bakulin, Y. Liu, O. Zdraveva

C039 Migration Velocity Analysis Aided by RTM
N. Biscari, C. Andreotti, R. Bragucha, F. Doniselli

C040 Complex-salt Model Building Using a Combination of Interactive Beam Migration and Layer-stripping
SEISMIC MODELLING (EAGE)

C041 Improved Ray-based Seismograms by Combining Modeling by Demigration with a Prestack Depth Migration Simulator ................................................................. 517
T. Kauschitz, J. Lecomte
C042 Travelt ime and Reflection Coefficients Accuracy of Staggered-grid Finite-difference Simulation of Seismic Waves ................................................................. 522
O. Podgornova, V. Listia, D. Vishnevsky
C043 Wave Equation Illumination ................................................................................................................................. 527
C. M. Lapilli, A. Gonzalez, D. Nichols, J. P. Perdomo
C044 Solving the Wave Equation Using Curvelets ........................................................................................................ 532
B. Sun, J. Ma, H. Chaurie, H. Yang
C045 Convolutional and Non-convolutional PMLs for High-order Schemes Optimized at Grazing Incidence for the Seismic Wave Equation .................................................................................. 537
R. Martin, D. Komatitsch, S. D. Gedney, E. Bruthauex
C046 2D Frequency-domain Seismic Wave Modeling in VTI Media Based on a Hp-adaptive Discontinuous Galerkin Method ........................................................................................................ 542
D007 PP–PS Joint Inversion Applied to 2D–3C High Resolution Seismic Data – A Case of Junggar Basin, Northwest China ................................................................................................................................. 547
A. C. Lesage, R. Aubry, G. Houzeaux, M. Araya Polo, J. M. Cela
C048 On the Accuracy of Ruger’s Approximations for PP Reflection Coefficients in HTI Media ................................................................................................................................. 552
A. Ali, M. Jakobsen

MULTI-COMPONENT (EAGE)

D001 Up-down Deconvolution in the Presence of Subsurface Structure ................................................................................................................................. 557
Y. Wang, S. Grion, R. Bale
D002 Efficient Elastic Wave-mode Separation in TTI Media ................................................................................................. 562
J. You, P. Sava
D003 WAZ Mirror Imaging with Nodes for Reservoir Monitoring – Dalia Pilot Test ................................................................................................................................. 567
D. Lecerf, J. L. Boelle, A. Lafraim, J. Cantillo
D004 High-precision Measurement of Split S-waves in OBS Data and its Application to Marine Slope Stability Assessment ................................................................................................................................. 572
R. Haacke, R. Esley, G. K. Westbrook
D005 PP/PS PSDM, AVO and Joint Inversion Applied to a Virgin Exploration Area in the North Sea ................................................................................................................................. 577
G. Ronholt, Ø. Korsmo, H. Hoeber, A. Smith, P. Hughes, M. Øygaren
D006 Extract Subsurface Density Information Using Converted Waves – Workflow and Case Study in the Gulf of Mexico ................................................................................................................................. 582
K. Zou, A. Koesoeadinata
D007 PP–PS Joint Inversion Applied to 2D–3C High Resolution Seismic Data – A Case of Junggar Basin, Northwest China ................................................................................................................................. 587
D008 Simultaneous Inversion for Elastic Parameters Using PP- and PS-waves Jointly in the Ray Parameter Domain ................................................................................................................................. 592
F. Zhang, Y. Wang

POTENTIAL FIELDS – THEORY (EAGE)

D009 A Comparison of Three Automatic Interpretation Techniques for Magnetic and Gravity Data ................................................................................................................................. 597
D. Gerovska, M. J. Araujo-Bravo, K. Whaler
D010 3D Gravity Inversion of a Faulted Basement Relief Using the Total Variation Regularization ................................................................................................................................. 602
V. C. F. Barbosa, C. M. Martins, W. A. Lima, J. B. C. Silva
D011 A Modified Tilt–depth Method for Kimberlite Exploration ................................................................................................................................. 607
G. B. J. Cooper
D012 Interpretation of 2-D Gravity Data using 2-D Continuous Wavelet Transform ................................................................................................................................. 612
F. Safaieghesh, A. Roshandel Kahao, H. R. Siahkoohi
D013 Exact Finitely Expanded Gravity Anomaly of Uniform Thin Polygonal Sheets ................................................................................................................................. 617
H. Holstein, C. Anastasiades
D014 Analysing Full Tensor Gravity Data with Intuitive Imaging Techniques ................................................................................................................................. 622
J. L. Dickinson, C. A. Murphy, J. W. Robinson
D015 Potential Field Searchlights ......................................................................................................................................... 627
M. Dronfield
D016 Gravi-magnetic Anomalies of Uniform Thin Polygonal Sheets ................................................................................................................................. 632
H. Holstein, D. Fitzgerald, C. Anastasiades
SEISMIC INTERPRETATION 1 (EAGE)

D017 Automatic Fault Detection Based on Seismic Data Correlation Analysis ......................................................... 639
N. L. Ivanova, A. G. Averbakh, E. B. Munevova

D018 Attributes Designed for Detection of Salt Diapirs Without Well Defined Boundaries ........................................ 644
A. Berthelot, A. S. Solberg, L. J. Gellis

D019 Re-binning Pre-stack Seismic Data for Fluid Contact Determination – AVO Screening and Visualisation ............. 650

D020 Nonstationary Phase Estimation for Analysis of Wavelet Character .................................................................. 655
M. A. Van Der Baan, M. Perz, S. Fomel

D021 Reservoir Properties and OGIP through Elastic Inversion and Multi-attribute Calibration – From Development to Exploration ................................................................................................................. 660
M. Galbiati, M. Fervari

D022 Cross-validation of Fault Enhancement and Elastic Dislocation Modelling ..................................................... 665
T Cheret, J. J. Long

D023 Interpretational Applications of Spectral Decomposition in Identifying Minor Faults ..................................... 670
X. D. Wei

D024 Using Azimuthal Curvature as a Method for Reducing Noise in Post Stack Curvature Volumes ....................... 675
R. E. Daher, T. H. Bae

SEISMIC INTERPRETATION & VELOCITY INDEPENDENT IMAGING (EAGE)

U. O. Anyiam, V. K. Niduka, A. I. Opara

D026 The Role of Geophysics in Well Planning and Execution – A Case Study in the SNS ....................................... 685
O. Estaba, K. Veenen, C. Faussin, J. Goudsward, M. Ligtenberg, R. Van Boom

D027 A Multi Scale Approach on Large Seismic Volumes – Tunisia Case Study .......................................................... 691
R. Lemaire, P. Pouget, S. Lasczat, T. Cheret, M. Mangue, C. Horno Kort

D028 Phase Residues for Stratigraphic Discontinuities Detection .............................................................................. 696
K. Zhang, M. Matos, O. Davogusto, K. Marfurt

D029 Migration without Velocity Model in Curvelet Domain ......................................................................................... 701
A. Bona, M. Almaghlouleh

D030 Dip-consistent Interpolation of Seismic Prestack and Poststack Data Into Mute Zones Using CRS Techniques ... 706
G. Gie,er, J. Prussmann, G. Etenberg-Klein, H. Trappe, M. Zehnder

D031 Common Scatter Point Data Mapping .................................................................................................................... 711
S. Dell, D. Gajewski, C. Vanelle

D032 Improving Prestack Migration with CRS Techniques–A Case Study ................................................................. 716
N. A. Mueller, M. Spinner

EM 3 (EAGE)

D033 Solution of the 3D EM Problems with Induced Polarization in the Time Domain Using Optimized Krylov Subspace Reduction ....................................................................................................................... 721
M. Y. Zaslavsky, V. L. Druskin

D034 Numerical Investigation of the Range of Validity of a Low-frequency Approximation for CSEM ........................................ 726
S. Baker, T. Mannseth

D035 Error Modelling in Bayesian CSEM Inversion ....................................................................................................... 731
J. Gunning, M. E. Glinsky

D036 1D Layered Resolution Analysis of Two Marine EM Exploration Methods ...................................................... 736
N. H. Cuevas, D. Alumbaugh, J. Chen

D037 The Use of CSEM Within an Integrated Exploration Project .................................................................................. 741
A. Lovatini, E. Medina, T. Campbell, K. Myers

D038 A Broadband Marine CSEM Demonstration Survey to Map the Uranus Salt Structure ................................... 746
M. Vige, A. A. Pfaffhuber, K. Hokstad, B. Folland

D039 CSEM Using Ocean Bottom Cables and Streamer ............................................................................................... 751
L. Engell-Sorensen, B. A. Farrelly, R. Henman, S. E. Johnstad, K. Kristiansen, I. Viken

D040 Feasibility of EM Monitoring – Acquisition and Inversion ................................................................................... 757
B. Rondeleux, S. Spitz

POTENTIAL FIELDS – CASE STUDIES & THEORY (EAGE)

D041 Salt Imaging with Gravity Gradiometry and Magnetic Data – Nordkapp Basin, Barents Sea ................................ 762
C. Staedler, C. Fichler, K. Hokstad, B. Folland, C. Gram, P. Hanssen, E. A. Myrland, S. Wiencke

D042 Using Geophysical Methods to Characterize a Fault Zone – A Case Study from the More-Trondelag Fault Complex, Mid-Norway ......................................................................................................... 767
A. Nanuti, J. Ebbing, C. Puscas, J. F. Tonnesen, E. Dalsøeg
D043 3D Gravity and Magnetic Model of a Triassic Large Igneous Province Vent, Central Alaska Range, Alaska
G. G. Commer, J. M. Gill, J. M. Schmidt ................................................................. 772
D044 South Atlantic Kinematics and The Evolution of Tristan da Cuhna Hotspot Tracks
D. E. Bird, S. A. Hall .................................................................................................. 777
D045 Generation of a New High Resolution Magnetic Database for Europe for Resource Evaluation – Progress
Report
K. M. U. Fletcher, J. D. Fairhead, K. Lei, A. S. K. Salem, C. Ayala, P. L. M. Cabanillas
D046 Extended Tilt Depth – A Fast Depth Imaging Method Using Local Wavenumbers of Magnetic Data
A. S. K. Salem, J. D. Fairhead, E. Aboud .................................................................. 787

VOLUME 2

D047 Some Remarks on Gravity Reduction by Vertical Field Continuation
P. L. Smilde, M. H. Krieger ....................................................................................... 792
D048 Interactive 3D Gravity and Magnetic Modelling in IGMAS+ and the Integration in the Depth Imaging
Workflow .................................................................................................................. 797

ACID GAS SEQUESTRATION / SUSTAINABLE DEVELOPMENT (EUROPEC)

E001 Evaluation of Petrophysical Properties of a Carbonate-rich Caprock for CO2 Geological Storage Purposes
(SPE-131525) ................................................................................................................. 802
D. Broseta, N. Tonent, G. Mouronval, P. Chiquet, J. Hy-Billot
E002 Capillary Trapping in Carbonate Rocks (SPE-130720) ........................................ 815
S. Eiplauer, C. Lamy, C. Penland, M. Blunt, G. Mainland
E003 Hydrate Formation – Considering the Effects of Pressure Temperature Composition and Water (SPE-131663)
J. Rajnauth, M. A. Barrufet, G. Falcone ........................................................................ 824
E004 Development and Sustainability of a Small Gas Based Economy (SPE - 131596) ................. 834
C. Boodoo
E005 Potential and Early Opportunity–analysis on CO2 Geo–sequestration in China (SPE-130358) ............. 842
Z. Xuan, C. Zhang
E006 Enhanced Gas Recovery – Challenges Shown at the Example of Three Gas Fields (SPE-130151) .......... 849
T. Clemens, S. Secklehner, K. Mantatizis, B. Jacobs
E007 Static and Dynamic Estimates of CO2 Storage Capacity in Saline Formations (SPE - 131609) ............... 867
M. Jin, E. Mackay, G. Pickup, A. Monaghan, M. Naylor
E008 Water/CO2 system at High Pressure and Temperature Conditions – Measurement and Modeling of Density
in Equilibrium Liquid and Vapor Phases (SPE-131636) .................................................. 880
F. Tabassinejad, Y. Barzin, R. Moore, S. Mehta, K. Van Fraassen, J. Rashing, K. Newsham

IOR STRATEGIES 1 (EUROPEC)

E009 Improved Oil Recovery in Chalk – Wettability Alteration or Something Else? (SPE-131300) ................. 895
A. Zahid, E. Stenby, A. Shapiro
E010 Effects of Oil Compressibility on Production Performance of Fractured Reservoirs Evaluated by Streamline
Dual–porosity Simulation (SPE-130397) ......................................................................... 906
S. Tanaka, N. Arirbua, M. Al-Marhoun
E011 A Review on Utilization of Crosslinked Polymer Gels for Improving Heavy Oil Recovery in Turkey (SPE -
131267) ...................................................................................................................... 922
N. Toguguer
E012 Effect of Gas Type on Foam Film Permeability and its Implications for Foam Flow in Porous Media (SPE-
131297) ...................................................................................................................... 934
R. Farazziadeh, R. M. Muruganathan, R. Krastev, W. Rossen
E013 Modelling Multiple–contact Condensation of Heat–transporting Fluids in Thermal Floods (SPE-130568) .......... 947
K. Lawal, Y. Vesovic
E014 Wettability Alteration During Water Flooding and Carbon Dioxide Flooding of Reservoir Chalk Rocks
(SPE-130992) .............................................................................................................. 960
I. Fjelde, S. M. Aten
E015 Phase Behavior of Steam with Solvent Co–injection under Steam Assisted Gravity Drainage (SAGD) Process
(SPE-130807) .............................................................................................................. 969
W. Li, D. Mamora
E016 Alkyl Polyglycoside/1–Naphthol Formulations with Ultra–low Interfacial Tensions against n-Octane for
Enhanced Oil Recovery (SPE-130404) ......................................................................... 983

RESERVOIR MONITORING AND MANAGEMENT (EAGE/EUROPEC)

L009 Business Impact of Frequent Time-lapse Observations Around Valhall Water Injection Well ..................................................................................3154

J. Van Gestel, G. Tjetland, M. J. Parikh, J. H. Kommedal, O. I. Barkved
VOLUME 5

L010 Experiences on Seafloor Gravimetric and Subsidence Monitoring Above Producing Reservoirs ................................................................. 3159
H. Alnes, T. Stenvold, O. Eilen

L011 4D Seismic Benefits to Development Drilling at Enfield – North–West Shelf – Australia ................................................................. 3164
G. P. Thomas, M. Smith

L012 Norne 4D and Reservoir Management – The Keys to Success ............................................................................................................ 3169
B. Ouad, T. Allos

L013 Production-induced Stress Change in and above a Reservoir Pierced by Two Salt Domes – Geomechanical Modeling and its Applications (SPE-131590) ............................................................................................................ 3174
H. Mahani, J. Snipes, P. Schajmens

L014 High-resolution Images and Formation Evaluation in Slim Holes from a New Logging–while-drilling Azimuthal Laterolog Device (SPE-131513) ............................................................................................................ 3199
L. Ortenzi, M. Allouche, J. Dsouba, S. Chow, R. Os

L015 Coupled Geomechanical and Micro-seismic Modeling of Secondary Faults (SPE-123383) ................................................................. 3210
A. Fouladvand, P. Bernard, A. Baroni, L. Cangemi, J. P. Deflandre

L016 Integration of Static and Dynamic Data to Investigate Interwell Communication – The Case of Module II of Espadarte Field, Campos Basin, Brazil (SPE-131569) ............................................................................................................ 3222
P. R. Pirre, E. Lira, A. Costa, P. Souza, E. Benjamin Jr.

IOR STRATEGIES (EAGE/EUROPEC)

L017 Modelling of the Steam Chamber Growth During SAGD – Effects of Reservoir Heterogeneities on 4D Seismic ................................................................. 3235
A. Baroni, O. Lerat, F. Adjemian, G. Etienne, G. Renard, E. Bathellier, J. Cotton, E. Forgues

L018 4D Seismic Monitoring using Horizontal Wells – A Synthetic Case Study from Troll ........................................................................ 3241
E. Janska, S. A. Petersen, G. Tosopoulos

L019 A Numerical Method to Investigate the Effect of Ultrasonic Waves on Capillary Imbibition ................................................................. 3246
B. Keshavarzi, R. Karimi, J. Najafi, C. Ghosh, M. Ghaedian

L020 Empirically Derived PVT Correlations for Murzuq Basin in Libya ............................................................................................................ 3251
M. A. Bentrewin, A. Gaaim, M. Samama, A. Naas

L021 Application of Ferrofluids for Enhanced Surfactant Flooding in IOR (SPE-131272) ........................................................................ 3256
N. Kothari, B. Raina, K. Chandak, V. Iyer, H. Mahajan

L022 Influence of Temperature on Water and CO2 Flooding of Asphaltenic Chalk Reservoirs – Experimental and Simulation Case Study (SPE-131190) ............................................................................................................ 3264
A. Hamouda, E. Chukwudeme, V. Alipour Tabrizy

L023 Brightwater B. Trial in Salema Field, Campos Basin, Brazil (SPE-131299) ......................................................................................... 3277
B. Roussennac

L024 Polymer Flooding – Flow Properties in Porous Media Versus Rheological Parameters (SPE-131103) ................................................................. 3291
A. Stavland, H. Jonsbroten, A. Lohne, A. Moen, N. Giske

RECOVERY OPTIMISATION CASE STUDIES (EAGE/EUROPEC)

L025 Integration of 3D Seismic and Reservoir Simulation for Exploitation of Remaining Oil in a Heavy Oil Field–A Case Study ............................................................................................................ 3307
X. Guo, X. R. Huang, Y. Ling, Y. T. Cai

L026 Hydraulic Fracturing Design and Investigation Cumulative Production in one of Iranian Gas Condensate Reservoirs ................................................................. 3312
H. Askari, E. Sahraei, A. Tahami

L028 Acoustic Impedance Inversion for Static and Dynamic Characterization of a CO2 EOR Project, Postle Field, Oklahoma ............................................................................................................ 3317
A. P. R. Robinson, T. L. D. Davis

L029 History Model for Sand Production during Depletion (SPE-131256) ......................................................................................... 3322
B. A. Aadnoy, E. Kaurstad

L030 Valhall – Pushing the Limits for Open Hole Zonal Isolation – Qualification and Field Trial of 10,000 Psi Oil Swelling Packers (SPE-130062) ............................................................................................................ 3330

L031 Multidisciplinary Workflow Applied to Multiple Stage Hydraulic Fracturing of Horizontal Wellbores – Evolving the Process in the Levada Field – Black Sea (SPE-130786) ............................................................................................................ 3348
B. Emmanuel, D. Perez, C. Weber, R. Cantagliari, R. Iosif, A. Dragomir

L032 Using Genetic Algorithm to Optimize Well Placement in Gas Condensate Reservoirs (SPE-130999) ............................................................................................................ 3361
H. Nurmubadi, T. Gibre, A. Morales, D. Zhu

MANAGING UNCERTAINTIES (EAGE/EUROPEC)

L033 Conceptual Uncertainty in Geological Interpretation of Borehole Image Logs ............................................................................................................ 3382
P. Zarzian, S. N. Dymock
L034 Bias in Geophysical Interpretation ................................................................. 3387
  P. S. Bowbotham, P. Kane, M. R. Bentley
L035 Assessing Geometric Uncertainties in Solid Earth Models .......................... 3392
  A. L. Tertois, J. L. Maillet, E. Gringarten, A. Haouesse
L036 Seeking a Common Resources Reporting Code – The Mapping Option ........ 3397
  J. R. Etherington
L037 Reserves Estimations under New SEC 2009 When Using Probabilistic Methods (SPE-131241) ............................................................ 3402
  R. Wheaton, C. Coll
L038 Bayesian Decision Networks for Optimal Placement of Horizontal Wells (SPE-129984) ............................................................... 3412
  M. A. Rajaie-yamcheh
L039 Managing Field Development Uncertainty in The Geologically Complex Stringer Sands in Offshore Saudi Arabia (SPE-129605) ............. 3426
  P. Warren, F. Al-Ghamdi
L040 Holistic Automated Workflows for Reservoir and Production Optimization (SPE-130205) ................................................................. 3436

INTEGRATED FIELD DEVELOPMENT (EAGE/EUROPEC)

L041 Applied Reservoir Management by Pseudo 3D Acoustic Impedance and Qualitative Geostatistic Analysis at SKM Field .................................................. 3449
  G. W. Agusselawan, A. F. Fathoni, D. A. H. Hastil
L042 Model Based Control Techniques for Control and Optimization of Oil Wells Segments – Example of Applications ........................................ 3458
  O. T. Taha, N. M. Nabil, M. R. Khan
L043 What Would Be the Minimum Subsurface Information Before Making Decision to Develop the Field – A Case Study from El Toor .................................. 3465
  M. M. Elmahdy, A. A. Mohamed
L044 Improved Well Delivery Using Advanced Technology and Integrated Processes in the Planning Phase ......................................................... 3470
  R. S. H. Petersen, R. Flachon, J. Kvernstrom, V. Ulen
L045 Development Planning for Multiple Fields Consisting of Stacked Sands and Containing Multiple Fluids, Jenein Sud, Tunisia (SPE-130109) ......................... 3475
  K. Mantatzis, Y. Boissee, J. Steckhan, P. Torres, T. Clemens
L046 Fulmar Sandstones – Correcting Some Received Wisdoms in the Greater Kittiwake Area, North Sea (SPE-130414) .......................................................... 3492
  G. Coghlan
L047 Optimal Reservoir Modelling Improves Development Decision Making for a Fractured UK Onshore Oil Field – A Case Study (SPE-130105) .................. 3502
  M. Bozorgzadeh, J. Brown, R. Bobolecki, D. Meehan, K. Bone, A. Rawlinson
L048 Integrated Log Interpretation Approach for Underground Gas Storage Characterization (SPE-131536) ................................................................. 3522
  F. Verga, S. Cantini, W. Klopf, R. Revelant

TIME LAPSE CASE STUDIES (EAGE)

M001 New Opportunities from 4D Seismic and Lithology Prediction at Ringhorne Field, Norwegian North Sea ............................................................ 3537
  D. H. Johnston, U. Tovari, B. P. Laugier
M002 Ekofisk Time-lapse Seismic – A Story of Continuous Improvement ................. 3542
  P. J. Smith, H. Haugvaldstad, B. Lyngnes, A. I. Thompson
M003 Seismic Monitoring of an Old Underground Blow-out – 20 Years Later ............ 3547
  M. Landro, M. Thompson, A. S. Pedersen, L. Amundsen
M004 4D Case Study in the Deep Water Gulf of Mexico – Hoover, Madison and Marshall ................................................................. 3552
M005 4D Fast Track Advanced Interpretation on Dalia Field, Block 17, Angola .......... 3557
  E. Brechet, H. Jorge, P. Turpin, S. Maulertz
M006 4D Seismic in Deep Water at the Dikanza Field, Offshore Angola, West Africa ...... 3562
M007 High Resolution Timelapse Imaging – Salt Creek Case Study .......................... 3567
M008 Towards Quantitative Evaluation of Gas Injection using Time-lapse Seismic ... 3572
  R. Fadushat, A. Shams, C. Macbeth

RESERVOIR CHARACTERISATION (EAGE)

M009 3D Geological and Seismic Modelling for Reservoir Characterization Workflow Optimization ................................................................. 3577
  S. Bardini, D. Grana, F. Maffioletti, E. Paparozi, L. Bavo, C. Sala, C. Tarchiani
M10 Application of Distance Based Random Field Models to History Match a North Sea Field ................................................................. 3582
  D. Kachuma
M011 Bilondo Oil Field – How To Deal with Sand Injections? Static and Dynamic Evidence, Modelling and Consequences ...........................................................3587
A. Malehmir, G. Bellefleur

M012 High Permeability Zones and Their Impact in Reservoir Model Simulation, Postle Field, Texas County, Oklahoma
C. Lopez, T. Davis .............................................................3592

M013 Predicting Net Pay by Pushing the Boundaries of Seismic and Rock Properties in Complex Lithologies Offshore Angola ...........................................................3597
J. J. Goorenbos

M014 West Athabasca Grand Rapids Formation – A New SAGD Play .........................................................3602
M. E. Connolly, L. M. Weston Bellman

M015 3D Oil Sands Reservoir Characterization for Exploration, Development and Monitoring ................3607
L. M. Weston Bellman

M016 Reservoir Characterization Using a Streamline-assisted Ensemble Kalman Filter ..................................3613
J. Choe, S. P. Jung, M. J. Yeon, H. Shin, W. Bae

TIME LAPSE METHODOLOGIES (EAGE)

M017 Stratigraphically Constrained Seismic 4D Inversion ........................................................................3618
M. Azchenberg, U. Theune

M018 Using 4D Seismic to Monitor and Characterize Marimba Field, Campos Basin, Offshore Brazil ........................3623
K. T. P. Lima, V. M. Reis, S. R. Malagutti

M019 How Compaction Causes Misaligned Multiples and False Time Shifts in Time-lapse Seismic ..............3628
G. C. Fehmers

M020 Correlation of Well Activity to Time-lapsed Signatures in the Valhall Field for Enhanced Dynamic Interpretation ................................................................................................................3633
Y. Huang, C. Macbeth, O. I. Barlow, J. P. Von Giestel

M021 The Dalia OBN Project ......................................................................................................................3638
E. Ceragolli, L. Bovet, J. Guilbot, S. Toint

M022 Seismic Data Interpretation Dilemmas in CO2 Injection Monitoring ..................................................3643
R. D. Benson, T. L. Davis

M023 A Derivative Free Optimization Method for Reservoir Characterization Inverse Problem ................3648
D. Sinoquet, H. Langouët, S. Da Veiga

M024 Time-lapse Seismic AVP Analysis on the Sleipner CO2 Storage Monitoring Data Using CFP Processing .................................................................3653
R. J. Arts, F. P. Neele

GEOPHYSICS FOR GEOHAZARDS / MINING AND GEOTHERMAL (EAGE)

M025 Landslide Prediction Using Geoelectrical Investigations .................................................................3658
C. Iacob, R. Orza

M026 Water Storage Mapping and Stability Analysis of Pyroclastic Covers Through Resistivity Measurements ..................................................................................3663
E. Piegarri, R. Di Mauro

M027 Surface-wave Profiling for Sinkhole Hazard Assessment Along the Eastern Dead Sea Shoreline, Ghor Al-Hadiitha, Jordan ........................................................................3668
L. Bocher, P. Y. Gallibert, A. Demaias, C. Camerlynek, A. Al-Zoubi

M028 Seismogenic Sources in the Lower Tagus Area Using Geophysical Data ............................................3673
C. C. Pinto, J. P. Carvalho, M. Costa, T. Babeh, P. Terrinha, H. Duarte, J. Borges, B. Caldeira, J. Cabral

M029 3D Seismic Survey for Deep Geothermal Exploration at Unterhaching, Munich, Germany ...............3678
E. Lauesch, M. Dussel, R. Thomas, R. Schulz

M030 3D Diffraction and Mode-converted Scattering Signatures of Base-metal Deposits – Bathurst Mining Camp, Canada ........................................................................................................3683
A. Malehmir, G. Bellefleur

M031 ThermoGIS – An Integrated Web-based Information System for Geothermal Exploration and Governmental Decision Support for M .........................................................................................3688
L. Kromers, J. D. A. M. Van Wees, H. F. Mijnlieff, R. A. Kronimus

M032 The Modern Heat Flow Database of Norway and its Implications for Geothermal Energy ..................3693
C. Pascal, H. Elvebakk, O. Olesen

ADVANCES IN NEAR SURFACE GEOPHYSICAL METHODS (EAGE)

M033 Closed-loop Frequency MET Geophone – Operating Principles and Parameters .................................3698
V. M. Afganov, E. I. Egorov, C. E. Rice

M034 3D Near Surface Imaging Thanks to Refraction Tomography and Delay Method ................................3703
J. L. O. Mari, M. Mendes

M035 High Resolution 3D Tunnel Seismic Reflection at Olkiluoto, Finland ................................................3708
C. Cosma, N. Enescu, M. Lahti, E. Heikkinnen, T. Ahokas

M036 In-situ Porosity and Permeability Estimation from the VSP Data Using Integrated Poroelastic Model .................................................................................................3713
A. Zhubayev, R. Ghose
M037 Joint Inversion of P-waves Refraction Traveltimes and Surface Waves Dispersion Curves .................................................. 3718
M038 Comparative Study on Damping and Smoothing Constraints for the Inversion of Surface Waves Data............................ 3723
G. S. Kritikakis, A. Vajidis
M039 Lateral Discontinuity Localization and Characterization by Means of Enhanced Statistical Phase Analysis of Surface Waves 3728
G. Vignoli, C. L. Strobbia, G. Cassiani, P. L. Vermeer
M040 Verification of Soil Profiles Obtained from Experimental Rayleigh-wave Dispersion Inversion Using Synthetic Microtremors ........................................................................................................... 3733
K. Tokeshi, L. V. Socco

NEAR SURFACE EFFECTS FOR E&P / CIVIL ENGINEERING APPLICATIONS (EAGE)

M041 Rayleigh Wave Inversion for the Near-surface Characterization of Shallow Targets in Kuwait .................................................. 3738
A. El-Emam, C. L. Strobbia, J. Al-Genai, J. Roth
M042 Near-surface Characterization Using Point Receiver Data ........................................................................................................... 3743
L. Velasco, C. Strobbia, A. Laake
M043 Estimation and Application of Full Waveform Redatuming Operators ......................................................................................... 3748
P. R. Haafinger, D. J. Verschoor
M044 Gabor Domain Analysis of Q in the Near-surface ................................................................................................................................. 3753
R. J. Ferguson, G. F. Margrave, K. W. Hall
M045 Shear Wave Velocity Model from Surface Wave Analysis – A Field Case Example ................................................................. 3758
D. Boiero, R. Wisén, M. Maraschini, L. V. Socco
M046 Surface and Borehole Refraction Surveys in Copenhagen, Denmark .......................................................................................... 3763
K. Martinez, J. A. Mendoza
M047 An Interesting Property of the Seismic Wavefield – Scale Properties for Waveform Matching ................................................... 3768
M. Maraschini, D. Boiero, S. Foti, L. V. Socco
M048 Rock Physical Interpretation of Geophysical Data for Soil Profiling .......................................................................................... 3773
T. Takahashi

HSE (EAGE)

P001 Using the EMS Approach to Minimise Environmental Impact of Seismic Operations ................................................................. 3778
J. Stone, E. Rainey, B. Taylor
P002 Distributed Vibration Measurements to Prevent Structural Damage – A Novel Application of Wireless Sensor Networks .................................................................................................................................................. 3783
M. Piuntanida, M. Veneziani, M. Fermi, S. Briga, T. Harvey
P003 Seismic Risk Analysis of Small Earthquakes Induced by Hydrocarbon Production in The Netherlands ........................................... 3788
B. B. T. Wassing, P. H. Waars, W. Ross, M. Nepveu, A. G. Muntendam-Box, T. Van Eck
P004 A Governance Framework for Sustainable Oil and Gas Business Transformation ............................................................................. 3794
B. Motoc
P005 Responsible Marine Seismic Exploration in an Area With a Piracy Risk – Indian Ocean Case Study .................................................... 3799
N. Millar, K. Carroll, A. Camerer, T. Ellis
P006 Carbon Challenges ........................................................................................................................................................................... 3804
E. T. Haynes
P007 Modernisation of Saudi Cadastre .................................................................................................................................................... 3806
M. Alrajhi, M. Hawarey
P008 Investigation on Origins of Hydrogen Sulfide Production in Sweet Gas Fields .................................................................................. 3811
E. Adibi Sedeh, M. Farrokhouz, M. R. Asef

MINING & GEOTHERMAL (EAGE)

P012 Exploration of the Deep Structure of the Central Greece Geothermal Field by Passive Seismic and Curie Depth Analysis .................................................................................................................................................. 3819
V. K. Karastathis, J. Papoulia, B. Di Fiore, J. Makris, A. Tsambas, A. Stampolidis, G. A. Papadopoulos
P013 Enhanced Velocity Modeling for a Geothermal Project in the Southern Vienna Basin – A Stacking Velocity Approach .................................................................................................................................................. 3824
C. G. Eichkitz, J. Antmann
P014 3-D Seismic Modelling of the Flin Flon VMS Mining Camp ........................................................................................................... 3829
M. Malinowski, D. White, E. Schetselaar
P015 Reflection Seismic Investigations in the Brunswick No. 6 Mining Area, Bathurst Mining Camp, Canada ............................................ 3834
S. Cheraghi, A. Malehmir, G. Bellefleur

P077 Geoelectric Structure of the Rybachy Peninsula from Data of Winter Amt Survey ..........................................................................................4074
A. K. Saraev, A. V. Nikiforov, N. E. Romanova, R. V. Denisov
P078 Capabilities and Results of Reservoir Studies via TEM in the Conditions of High-resistivity and Conductive Environments .......................................................................................................................... 4079
  Y. A. Agfemov, S. V. Kompaniets, A. V. Pospeev

EM 2 (EAGE)

P081 Using Seismic Full Waveform Inversion to Guide 1D Marine CSEM Inversions for Resolving Multiple Resistive Layers ............................................................................................................... 4084
  V. C. Brown, K. Key, S. Singh
P082 Fast Analytical Method for Frequency to Time Domain Conversion in CSEM Application .......................................................................................................................... 4089
  A. M. Tehranii, E. C. Slok
P083 Solving Spatial Sampling Problems in 2D-CSEM Interferometry using Elongated Sources .................................................................................................................. 4094
  J. W. Hancier, Y. Fan, E. C. Slok, K. Wapenaar, B. Seisler
P084 Modelling of Induced Polarization Effects Caused by Anomalous Pyrite Concentration above Hydrocarbon Accumulations ........................................................................................................ 4099
  E. O. Kudryavceva, P. C. H. Veeken, O. F. Putikov, P. Legedo, S. A. Ivanov

SEISMIC MODELLING 1 (EAGE)

P091 Caustics in a Periodically Layered VTI Medium .......................................................................................................................... 4104
  Y. V. Roganov, A. Stovas
P092 qP-wave Triplications in an Acoustic Transversely Isotropic Medium .................................................................................................................. 4109
  A. Stovas
P093 4D Seismic Modelling using the Tip-wave Superposition Method .......................................................................................................................... 4114
  M. Ayzenberg, A. Tantserev, A. M. Ayzenberg, U. Theune
P094 Feasible Green’s Function for a Domain with Shadow Zones .................................................................................................................. 4119
  M. Ayzenberg, A. Ayzenberg, A. M. Ayzenberg
P095 Wave Field Anomalies Caused by the Weak Boundaries .......................................................................................................................... 4124
  A. P. Krauklis, P. V. Krauklis
P096 Offset Dependant Anisotropy Effects in Orthorhombic Medium .......................................................................................................................... 4129
  H. Jedrzejowska-Tyczkowska, A. Pietu, T. Danek, A. Lesnisk
P097 Double Munk Channel Model to Underwater Acoustic Fluctuations in Presence of Mediterranean Eddies in the Southwest Coast of Portugal .................................................................................................................. 4134
  L. G. Guimaraes, C. E. Parente, S. M. M. Jesus, O. C. Rodrigues
P104 Finite Difference Modeling to Evaluate Acquisition and Processing Parameters on Resolution of Land Seisics .......................................................................................................................... 4139
  O. Adamovich, V. Epov, I. Korotkov, P. C. H. Veeken

SEISMIC MODELLING 2 (EAGE)

P105 The Potential of Discontinuous Galerkin Methods for Full Waveform Tomography .......................................................................................................................... 4144
  J. De La Puente, F. Sallarés, C. B. Banero
P106 Discontinuous Galerkin Method in Frequency-space Domain for Wave Propagation in 2D Heterogeneous Porous Media .......................................................................................................................... 4149
  B. Dupuy, L. De Barros, S. Garambois, J. Virieux
P107 Physical Modelling Studies of the Effect of Fracture Thickness on P-wave Attenuation .................................................................................................................. 4154
  A. M. Ekanem, J. Wei, X. Y. Li, M. Chapman, I. G. Main
P108 Effects of Fracture Spacing on Seismic Wave Propagation – A 3D Numerical Simulation Study on Discrete Fracture Models .......................................................................................................................... 4159
  Y. Xu, M. Chapman, X. Y. Li, I. G. Main

SEISMIC RESERVOIR CHARACTERIZATION (EAGE)

P111 Reservoir Porosity Estimation Using the Group Method of Data Handling (GMDH) .......................................................................................................................... 4164
  N. M. Albinshahsan, Y. H. Wang
P112 Volcanic Reservoir Interpretation on a VSP-driven Processed Full-azimuth Seismic Data .................................................................................................................. 4169
  D. S. Sun, Y. Ling, X. Y. Xi, J. M. Guo
P113 Seismic Facies Discrimination Using Truncated Gaussian Simulation at the Oritupano-leona Field, Venezuela .......................................................................................................................... 4174
  A. Levanti, M. Aldana
P114 Low Frequency Modelling and Uncertainty in Geostatistical Inversion .......................................................................................................................... 4179
  M. S. Sams, D. Sauschi
P115 A Step Beyond Empirical Approaches of Seismic Reservoir Characterization .................................................................................................................. 4184
  F. Pivot, D. Modin
P116 Carbonate Reservoir Characterization Based on Grey Prediction Theory .......................................................................................................................... 4190
  A. M. Almoqbel, Y. Wang
MULTI COMPONENT (EAGE)

P121 Near-surface S-wave Velocity Estimation from P-wave Polarization Analysis .................................................. 4201
P. Edme, E. Krogh

P122 Imaging of Gas Hydrates in the Northernmost South China Sea from Multi-component OBS Data ......................... 4206
T. K. Wang, C. S. Lee, C. S. Liu

P123 Node Technology and its Application in Sub-salt Mapping – An Example from the Barents Sea .............................. 4211
J. E. Papoulia, J. N. Makris

P124 Multicomponent Seismic Acquisition in the Arabian Gulf – Should We Take a New Look at the Acquisition Parameters .................................................................................................................. 4217
K. A. Bertelsen, Y. F. Sun

P125 Comparison of a Few Ocean Bottom Node Designs and the Fidelity of the Data They Record ................................. 4222
S. Ronen, P. Maxwell, B. Mattocks, T. Owen

P126 High Reliability Fibre-optic Sensor Architectures for Seismic Permanent Reservoir Monitoring ................................ 4227
P. Nash

P127 Single-station SVD-based Polarization Filtering – Theoretical and Synthetic Data Investigations .............................. 4232
O. Tiapkina, M. Landro, Y. Tyapkin

CO2 SEQUESTRATION (EAGE)

P201 Preliminary Results from a Repeat 3D Seismic Survey at the CO2SINK Injection Site, Ketzin, Germany .................. 4237

P202 Seismic Monitoring of CO2 Geosequestration in Otway Basin, Australia ................................................................. 4242
V. Shalakova, M. Urosevic, R. Peszner, A. Kepic

P203 Sensitivity of Seismic Modelling to Different Fluid Distributions for Carbon Capture and Storage ...................... 4247
C. Cairns, H. Jakubowicz, L. Lonergan, A. Muggeridge

P204 Integration of the Codes FLAC3D and TOUGHREACT for THMC Coupled Geo–process in Reservoirs ...................... 4252
M. Z. Hoss, Y. Gou, J. Rutqvist

P205 The Feasibility of Imaging the CO2 Plume at CO2SINK using 4D Seismics ................................................................. 4257
J. P. Verdon, X. Campman

P206 Reservoir Modeling, Rock Physics, and Seismic Simulation of CO2 Sequestration in Coal Beds ......................... 4262
D. Bevc, S. E. Zarantonello, J. M. Harris

P207 Timelapse Seismic Modelling of CO2 Fluid Substitution in the Redwater Leduc Reef, Alberta .............................. 4267
T. M. Sadagar, D. C. Lawton

RESERVOIR CHARACTERIZATION (EAGE)

P211 Application of Diamondoids Parameters to Distinguish Source Rock Facies in Llanos Orientales Basin, Colombia .................. 4272
M. V. S. Springer

P212 Reservoir Characterization Using Ensemble Kalman Filter and Drainage Area Localization ...................................... 4276
M. J. Yeo, S. P. Jung, H. Shin, W. Bae, K. S. Jeong, J. Choe

P214 An Integrated Study of Fracture Detection Using P-wave Seismic Data ................................................................. 4281
Y. Xu, Y. An, X. Y. Li, Z. Cao

P215 Utilization of Percolation Theory to Evaluate Conductivity of Fractured Reservoirs – Effect of Fracture Correlation Length on Universality ................................................................. 4286
M. Maziki, S. Ghorbani, A. Hassemi

P217 Dynamic Modeling and Optimization of Asphaltene Deposition in Reservoir Rocks Using Genetic Algorithm ....... 4291
R. Kharrat, M. B. Bagheri, V. Hemmatfar, C. Ghobti

P218 How a Conceptual Model from Core to Seismic Can Drive Reservoir Description – A Case Study from a Large Carbonate Brown Field ................................................................. 4296
A. Carrillat, M. Pratap, S. Sharma, K. Bora, B. L. Lohar, R. Bhanja, A. Saha, T. Friedel

ADVANCES IN NEAR SURFACE GEOPHYSICAL METHODS (EAGE)

P221 Water Leakage Detection in Dikes by Fiber Optic .................................................................................................. 4301
J. I. Mars, A. A. Khan, V. Vrabie, A. Girard, G. D’Urs

P222 Influence of Grain Size Distribution and Shape on GPR Waves – Study of Aeolian Dunes ...................................... 4306
J. Guillemeau, M. Bano

P223 Geostatistical Filtering of Refraction Data – Methods and Comparison of Acquisition Systems ............................... 4311
M. B. Bourges, J. M. Mari, J. D. Derazme

P224 Characteristics and Potential Use of Non-geometric PS Waves in Shallow Marine Environment ................................ 4316
N. El Anisouch, G. G. Drijikoningen
P225 Application of SNMR and VES for Ground Water Exploration – A Case of Iran ................................................................. 4321
M. Jamies, H. Sanavi Kamal
P226 Glauberite Formation Identification with Electrical Resistivity Tomography Technique ......................................................... 4326
A. Guineao, E. Playa, L. Rivera, J. M. Salvany, M. Himi
P227 Mapping Contamination from Waste Dump Site Using Radio Magnetotelluric Method ......................................................... 4331
B. Assarzadegan, M. Bastani, B. Oskooi
P228 Assessing the Degree of Fracturing and Weathered Layer Thickness Using Seismic and GPR Data ........................................ 4336
J. P. Carvalho, C. Pinto, J. V. Lisboa, R. Sardinha, A. Carapona, J. Borges, M. Tlemçanti

GEOPHYSICS FOR GEOHAZARDS (EAGE)

P231 Electric and Electromagnetic Investigation in the L’Aquila Basin ...................................................................................... 4341
S. Piscitelli, P. Gulli, A. Giocoli, E. Gouguen, V. Lapennu, G. Romano, A. Siniscalechi, A. Perrone, M. Votta
P232 P-cable High Resolution Seismic Imaging of Shallow Gas in the Barents Sea ................................................................. 4346
S. Planke, O. K. Erkisen, J. Miennert, S. Bänz, C. Berndt, J. E. Lie, F. N. Erkisen
P233 Complex Geophysical Researches of Nature and Technical Origin Hazards for City Territory ........................................ 4351
I. A. Sanfirov, A. G. Yroslavtsev, Y. I. Stepanov, Y. A. Bereznij, A. V. Chirkov
P234 Locating of Sinkhole Extension by Seismic Refraction Tomography and GPR Methods .................................................... 4356
S. M. Hanafi
P235 Pore Pressure Prediction Based on High Resolution Velocity Inversion in Carbonate Rocks, Offshore Sirte Basin, Libya .................. 4361
R. Gruenwald, J. Buitrago, J. Desseray, C. Diaz, H. Huffman, C. Moreno, J. M. Gonzalez Muñoz

ROCK PHYSICS 1 (EAGE)

P241 Quantitative Measurements of Streaming Potential and High–frequency Seismolectric Conversion in Berea Sandstone Sample .......................................................... 4366
Z. Zhu, X. Zhe, M. N. Toksöz
P242 The Seismic Response of a Single Fracture – Synthetic Modelling and Laboratory Measurements ........................................ 4371
C. Almagro Vidal, R. Ghose, J. van der Neut
P243 Relationship Between Thermal Conductivity and Compressional Wave Velocity of Igneous Rocks ........................................... 4376
N. Gegenhuber, J. H. Schoen
P244 Rock Physics Quantification of Diagenetic Cement .................................................................................................. 4381
I. L. Leshocki, P. A. Avseth
P245 Effect of Water on Subcritical Crack Growth Index and Long-term Strength for Rock ......................................................... 4386
Y. Nara, T. Igarashi, N. Hiyoshi, T. Yoneeda, K. Kateko
P246 Elastic Properties and Anisotropy of Shales Under Stress .......................................................................................... 4391
C. Delle Piane, D. Devishart, J. Sarout
P247 Effect of Heavy Oil Reservoir Rock Texture on the Vp/Vs Ratios Derived from Logs .......................................................... 4396
C. Dumitrescu, L. Lines
P248 Composition and Properties of Estonian Palaeozoic and Ediacaran Sedimentary Rocks ....................................................... 4401
A. Shogenova, A. Kleesment, K. Shogenov, A. Joelde, A. Poldvere

VELOCITY MODEL BUILDING 1 (EAGE)

P251 Well-seismic Tie in the Green Canyon, Deep-water Area in the Gulf of Mexico – A Valuable Indicator of Anisotropy .......................................................... 4406
H. Bai, P. Ng, D. Becker, J. Durrant, M. Smith
P252 Poststack Time Migration Velocity Analysis by CRS Diffraction Stacking ......................................................................... 4411
D. Dell, D. Gajewski
P253 Model Building for Tilted Transverse Anisotropic Depth Migration of the Crystal Gulf of Mexico – Wide Azimuth Survey ........................................................................ 4416
P254 Automated Building of Thin-layered Velocity Model Using Well-log and Seismic Exploration Data ........................................... 4421
K. Kolomiyets, O. Kolomiyets
P255 Stacking-velocity Tomography with Borehole Constraints for Tilted TI Media ................................................................. 4426
J. P. Montel, P. Guillaume, G. Lambare, O. Leblanc
P257 Non-linear Slope Tomography – Extension to MAZ and WAZ ......................................................................................... 4431
J. P. Montel, P. Guiillaume, G. Lambare, O. Leblanc
P258 Migration Velocity Analysis Using Multiple Realisation of Parallel RCGA ........................................................................... 4436
R. Rastogi, A. Srivastava, S. Ghosap, S. Majumder

VELOCITY MODEL BUILDING 2 & MIGRATION (EAGE)

P261 3D Fresnel Volume Migration ........................................................................................................................................... 4441
S. Buske
P262 Pre-stack Depth Migration with Frequency-dependent Varying-step Extrapolation Method .......................................................... 4446
   X. Wu

P263 True-amplitude Angle Migration in the Presence of Noise .......................................................... 4451

P264 Migration Velocity Analysis in TI Media ......................................................................................... 4456
   J. Panizzardi, C. Andreoli, N. Bieniai, L. Casananta

P265 Depth Migration and Model Building in HTI Media using an Equivalent VTI Approach .............. 4461
   X. Li, C. Zhang

P266 Enhancements to Structural 3D PreSDM Imaging in the Norwegian Offshore .................. 4466
   M. J. Sugrue, L. Saxton, P. Hughes, O. Fuglestad

MIGRATION THEORY (EAGE)

P271 Wave-equation Migration with Dithered Plane Waves .................................................................. 4471
   F. Perrone, P. C. Sava

P272 High-order Common-azimuth Depth Migration ........................................................................... 4476
   J. Bai, N. Chemingui, S. Crawley, S. Brandsberg-Dahl

P273 A New True-amplitude Imaging Condition for Shot-profile Migration ........................................ 4481
   B. Arnsen, E. Tantserev, L. Amundsen

P274 Kinematic Analysis of Different Phase-shift-type Migration Methods ............................................. 4486
   A. Duchekov

P275 Anisotropic Velocity Analysis in VTI Media by Duplex Wave Migration ....................................... 4491

P276 Multi-source Wave Equation Least-squares Migration with a Deburring Filter .............................. 4496
   G. T. Schuster, W. Dai

P277 Anisotropic Depth Migration and High-resolution Tomography in Gulf of Mexico – A Case History ................................................................ 4501
   G. Rodriguez, S. Yang, D. Yang, Q. Zhang, S. Hightover

P278 A Complete TTI Toolbox for Efficient Imaging of Wide-azimuth Seismic Data .......................... 4506
   N. Chemingui, S. Brandsberg-Dahl, S. Crawley, A. Valenciano, A. Sosa

VSP AND WELL (EAGE)

P281 Diffractor Imaging Using Cross-well Data for Mapping Reservoir Heterogeneities ....................... 4511
   A. Nikitikhenko, D. Kiyashchenko, L. Jin, B. Kashstan, V. Troyan

P282 Estimation of Anisotropy Parameters from Offset VSP Data ........................................................ 4516
   J. Jamali, M. Sadri

P283 Anisotropic Depth Velocity Model Estimation Above the Receiver Array in Walkaway and 3D VSP Data .......................................................... 4521
   E. Bliss

P284 Applicability of Zero-offset and Offset VSP for Time-lapse monitoring – CO2CRC Otway Project Case Study .................................................................. 4526
   R. L. Pevzner, M. Urosevic, S. Nakanishi

P285 Characterization of Gas Wells by Selective Inflow Performance and Production Logging ............. 4531
   A. S. Salnikov, A. V. Vershinin, A. V. Sagaydachny, A. N. Shmykov

P287 Exploring with the Bit .......................................................... 4536

SEISMIC ACQUISITION AND PROCESSING (EAGE)

P291 Optimizing the Weighted-sum Signal to Represent the Actual Force Output from the Vibrator .......................................................... 4541
   Z. Wei, M. Hall, T. Phillips

P292 Seismic Channel Basic Characteristics for Weak Signal Registration by Point Group of Geophones .................................................................. 4546
   O. M. Sagaydachny, A. S. Salnikov, A. V. Vershinin, A. V. Sagaydachny, A. N. Shmykov

P293 BP's (ISSTM) Technique for High-quality Fast Efficient 3D Vibroseis Acquisition .......................... 4551
   J. Stone, B. Taylor

P294 An Improved Survey Evaluation and Design Workflow ............................................................... 4556
   J. Zühlke, H. Gjøystdal, M. Brandt, A. H. Drotnning, E. Bergford, T. Rasmussen

P295 Reducing Infill – Real Time Application of Geophysically Based Coverage Specifications .......... 4561
   C. Strand, S. Campbell, P. E. Dhulie

P296 A Practical Approach to Compensate for the Azimuth Anisotropy in 3D PS Converted Wave Processing .................................................................. 4566
   H. C. Dai, X. Li, C. Yu, J. Wang

P297 Time-lapse Seismics in Crystalline Crust – Lessons Learned at the Continental Deep Drilling Site – KTB .......................................................... 4571
   S. Buske, T. Belleccke, K. Bram

AVO/AVA & STRAT INVERSION (EAGE)

P301 Seismic Data Conditioning of Partial Stacks for AVO – Using Well Offset Amplitude Balancing .......................... 4576
   M. Kemper, E. Efthymiou, H. Morris, J. D. Kerr
One of Iranian Gas Correction Algorithm...

Seismic Data Hydrocarbon Province P334 Correction for Shallow High-velocity Anomalies. 3D Seismic Survey Case Study from Poland

P333 Elastic Near-surface Attenuation Estimation for an Oman Seismic Data Set

P332 Appraisal of Joint Refraction and Reflection Travel-time Tomography in the Context of Weathering

P331 Statics Computation by Weathering Reflection Survey (WRS) – Mauritania and Libya Cases Studies

P330 Target Oriented Non-linear Inversion of Seismic Data

NEAR SURFACE EFFECTS FOR E&P (EAGE)

P334 Correction for Shallow High-velocity Anomalies. 3D Seismic Survey Case Study from Poland...

J. Rysz, A. Sinoracki, J. Gabor, T. Buszka, R. Gadubala

N. El Yadari, W. A. Mulder

A. Meléndez, J. De La Puente, V. Sallarès, C. R. Ranero

G. Marro, M. Almutairi, F. Martin, B. Blake

M. Wojdyla, M. Stefaniuk, T. Czerwinski, J. Pokorski

RESERVOIR MONITORING AND MANAGEMENT (EAGE)

P327 Waveform Inversion of 4D Seismic Data Using the Ray-born Approximation in the Frequency Domain

M. Jakobsen, H. Keers, B. O. Ruud, I. Psencik, A. Shahraini

P326 Effect of Formation Pressure Change on Reservoir Productivity

L. A. Anisimov, F. I. Teterin

P325 Continuous Reservoir Monitoring with Asynchronous Simultaneous-source Seismic Data

G. Ayeni, B. Biondi

P324 A Data-estimation Based Approach for Quasi-continuous Reservoir Monitoring using Sparse Surface Seismic Data

A. Arnaud, J. P. Xavier, G. Cooksley, P. Sedó

P323 Long–term Seasonal and Short–term Monitoring of Reservoir Surface Deformation using InSAR

A. Arnaud, J. P. Xavier, G. Cooksley, P. Sedó

P322 Automatic Adaptive Parameterization for History Matching of 3D Seismic Data

S. Da Veiga, V. Gervais

P321 Results of Surface Geochemical Survey Integrated with Results of Seismic Survey in the Drzonowo, Biala Area, NW Poland

H. Sechmann, M. Dzieniewicz, W. Gorecki, A. Nowicki, T. Wołunowski

P320 Imaging and Mapping of Hydrocarbon Traps in a Thrust Zone from Onshore Ukraine – A Case Study

O. M. Tiapkina, I. V. Solovyov, O. I. Polanin

P319 Imaging in Frontier Areas – A Case Study from Upper Assam Basin, India

D. S. Manral, B. A. Reddy, R. Dasgupta, K. K. Nath

P318 Sub–Zechstein Structures in the Light of MT Data Interpretation

M. Wojdyla, M. Stefaniuk, T. Czerwinski, J. Pokorski

P317 Petrophysical Properties of Tight Gas Reservoir Sandstones from the Southern North Sea

P316 Hydraulic Fracturing Design and Investigation of Hydraulic Fracture Effect on Cumulative Production in One of Iranian Gas

H. Askari

P315 Hydrocarbon Potential of the Mediterranean Black and Caspian Seas Regions

G. V. Georgiev, H. Rempel

P314 Imaging in Frontier Areas – A Case Study from Upper Assam Basin, India

D. S. Manral, B. A. Reddy, R. Dasgupta, K. K. Nath

P313 How Geophysical Techniques Coupled with Geological Insight Revealed New Prospectivity in a Mature Hydrocarbon Province

M. A. Acker, B. K. L. Bryn, P. A. Selfetson

P312 Imaging and Mapping of Hydrocarbon Traps in a Thrust Zone from Onshore Ukraine – A Case Study

O. M. Tiapkina, I. V. Solovyov, O. I. Polanin

P311 Results of Surface Geochemical Survey Integrated with Results of Seismic Survey in the Drzonowo, Biala Area, NW Poland

H. Sechmann, M. Dzieniewicz, W. Gorecki, A. Nowicki, T. Wołunowski

P310 Evaluation of Anisotropic Critical Angle in Frequency Domain

Z. Q. Guo

P309 A Quantitative Evaluation of Input Data Variables for Model-based PP Inversion Using Conjugate Gradient Algorithm

M. Pottorf, W. Yang, G. Yu

P308 Target Oriented Non-linear Inversion of Seismic Data

A. Gisolf, P. M. Van Den Berg

CASE STUDIES / EXPLORATION AND FIELD DEVELOPMENT (EAGE)

P307 AVO Analysis of Thin Layers – Application to CO2 Storage at Sleipner

Y. Qin, P. Ward

P306 New Parametrization for qPqP and qPqSV Reflection Coefficients in a Transversely Isotropic Medium

P. Godlewski, A. Stovas

P305 Evaluation of Anisotropic Critical Angle in Frequency Domain

Z. Q. Guo

P304 Crack Density Discrimination for Thin Layers Using Offset-dependent Spectrum Characteristics

Z. Q. Guo

P303 AVO Analysis of Thin Layers – Application to CO2 Storage at Sleipner

Y. Qin, P. Ward

P302 Comparison of Reflection-angle Estimation Methods – Accuracy and Sensitivity

Y. Qin, P. Ward
BASIN ANALYSIS AND PETROLEUM GEOCHEMISTRY (EAGE)

P341 Basin Modelling of the Yamal–Kara Petroleum Systems .......................................................... 4707
G. V. Ulyanov, T. A. Kiryukhina, A. V. Shupakova
P342 New Insight Into Petroleum Systems of Orenburg Region, Volgo–Ural Basin ................................. 4712
E. N. Polydetskina, N. P. Fadeeva
P343 Source-rock Evaluation and Basin Modelling in the Western Part of the Fore-sudetic Monocline, SW Poland .......................................................... 4717
P. Kosakowski, M. Wrobel
P344 A Large–scale Dynamic 3D Petroleum System Model of the Central European Basin ...................... 4722

   P. Jaiswal, C. A. Zelt, R. Dasgupta, K. K. Nath
P387 Imaging Below Gas Clouds Through Non-linear Full Waveform Inversion of the Reflection Response – The
   2D Case .........................................................................................................................................................4866
   A. R. Ghazali, D. J. Verschuur, A. Gisolf
P388 Improved Target-oriented Linear Full Waveform Inversion ..............................................................................4871
   X. R. Staal, D. J. Verschuur, A. Gisolf, T. Tonellot, R. Burnstad

SEISMIC DATA PROCESSING 1 (EAGE)

P391 Is Thin Turbiditic Sand Winning – A Case Study on High Resolution Processing and Interpretation? ..............4876
   J. Pierce, H. Poore, G. Yu, O. Claus, J. G. De Castilho, V. Zucconi
P392 Introducing a New Method in Velocity Analysis by using Focal Transform .....................................................4881
   S. Torabi, A. Javaherian
P393 Local Time Sloveness Adaptive Filter and Optimal Window Strategies ..........................................................4886
   S. Ventosa, C. Simon, M. Schimmel
P394 Estimating Non-stationary Wavelet Phase and Phase Error ............................................................................4891
   J. I. Selvage, J. A. Edgar
P395 Sparse Seismic Deconvolution by Method of Orthogonal Matching Pursuit ..................................................4896
   T. L. Tonellot, M. K. Broadhead
P396 CRS-based Seismic Imaging in Complex Marine Geology .................................................................................4901
   L. W. B. Leite, H. M. Lima, B. Z. Hellmann, J. Mann
P397 Choosing the Analyzing Wavelet for Seismic Data Filtration .........................................................................4906
P398 Improving the Seismic Image Quality in Semi-complex Structures in North East Iran by the CDS Stack
   Method .........................................................................................................................................................4911
   E. Adibi Sedeh, M. Soleimani, J. Mann, I. Piruz

SEISMIC DATA PROCESSING 2 (EAGE)

P401 Prestack Time Migration using the Kirchhoff Sum Along a New Approximation of the Reflection Travel
   Time Curve.........................................................................................................................................................4916
   S. Keydar, M. Mikenberg
P402 Assessing Velocity and Impedance Changes Due to CO2 Saturation Using Interferometry on Repeated
   Seismic Sources ............................................................................................................................................4921
   L. De Barros, G. S. O'Brien, C. J. Bean
P403 The Interferometric Fresnel Zone ..................................................................................................................4926
   S. Costagliola
P404 Numerical Testing of Virtual Source Method ..................................................................................................4931
   F. Alioto, B. Hartley, R. Pesner
P405 Scattered Interpolation with Multilevel B-splines for Seismic Reconstructions .............................................4936
   N. Zhang, Y. Wang
P406 Retrieving the Earth’s Reflection Response by Multi-dimensional Deconvolution of Ambient Seismic Noise ....4941
   J. Van Der Neut, E. Ruigrok, D. Draganov, K. Wapenaar

NOISE & MULTIPLE SUPPRESSION (EAGE)

P411 Phase Inversion Deconvolution in Seismic Data Processing .............................................................................4946
   A. Kiani, A. Javaherian
P413 SWIPER – Multi-mode Surface Wave Prediction and Removal by Waveform Matching ...............................4951
   C. E. Krohn
P542 Pre-drill Overpressures Prediction in the South Caspian Basin using Seismic Data
Y. A. Shykhaliev, A. A. Feyzullayev

P543 Using Curvature Attributes to Identify a Carbonate Paleokarst System in the Ordos Basin
Y. Duan, J. Tao, L. Zeng, M. Bi, B. Feng

P544 Seismic Facies Classification Using 2-D and 3-D Multi-attribute Hierarchical Clustering Algorithms
H. Saheti, A. Javaherian, B. Nadjar Araabi

P545 A New Quantitative Approach to Predicting Physical Property Changes During Diagenesis of Mudstones
R. C. Neagu, J. Cartwright, R. Davies

P546 Hydrocarbon Prospective of the North Scotian Fold Belt and the South Malvinas Basin
L. M. Anderson, I. Davison, P. Gorny, P. Nuttall

P547 Methods and Results of Studying the Paleozoic Petroleum Complex
V. L. Kuznetsov, A. S. Salmikov, B. A. Kanareykin, V. V. Titarenko

P548 Using Continuous Wavelet Transform to Detect Oil-filled Channel at one of the Iran Southeast Oil Fields
M. Nejati, H. R. Soleymani, M. A. Riyahi

SEISMIC INTERPRETATION 2 & CRS (EAGE)

P551 Near Surface Gas and Fluid Escape Features – Hydrocarbon and Hazard Potential, Offshore Gabon
S. Rassmen, R. Borusto, R. Findlay, J. Greenhalgh, H. Zs, M. Martin, M. R. Moussavou, F. F. Moakumbth

P552 The Use of Seismic Inversion to Revisit the Reservoir Mapping of a Large Carbonate Brown Field
S. Sharma, M. Pratap, A. Carrisfit, B. L. Lobar, R. Khanja, A. Saha, F. Friedel

P553 Interactive Static Corrections to Avoid Mis-interpretation of Seismic Data Due to Near-surface Velocity Changes
I. Korotkov, P. C. H. Veeken, V. Kazyroev

P554 Seismic Investigation of the Earth’s Crust in the Sub-shelf Zone of North-eastern Russia – Chukot Peninsula
V. L. Kuznetsov, A. S. Salmikov, V. V. Titarenko, V. M. Solosyeev

P555 Local Stretch Zeroing NMO Correction
N. Kazemi, H. R. Siahbooshi

P556 Applying the CRS Stack Method to Solve the Problem of Imaging of Complex Structures in the Zagros Overthrust, South West
E. Adib Sedehe, M. Soleimani, J. Mann, H. Shahsavani, I. Piruz

P557 Fourth Order Crs Stacking Method – Examples
P. Chira

P558 Partial 3D CRS Stack
D. Gajewski, M. Baykalev

MICROSEISMICITY (EAGE)

P561 Complexity of Hydraulic Fractures – The B-value
A. M. Baig, T. I. Urbancic, S. Bowman

P562 Microseismic Event Relocation Using Arrival Times and Cross-correlation Coefficients – A Synthetic Study
J. Kammerow, S. A. Shapiro

P563 Microseismic Imaging at KTB
A. Reshetnikov, J. Kammerow, S. Budke, S. A. Shapiro

P564 Quantitative Analysis of Diffusivity Estimates Obtained from Microseismicity Based on Nonlinear Diffusion
H. Husein, S. A. Shapiro

P565 Using Spectral Attributes to Detect Seismic Tremor Sources – A Synthetic Study
E. H. Saenger, M. A. Lambert, S. M. Schmalholz

P566 3D-imaging of 2D-time Reverse Modeling
B. Steiner, E. H. Saenger

P567 Time Reverse Characterization of Sources in Heterogeneous Media
E. H. Saenger

P568 Relating Acoustic Emission Sources to Rock Failure Around a Borehole
E. Aker, F. Cuisiat, M. Soldal, D. Kuehn

SEISMOLOGY (EAGE)

P571 Detailed Section of the Lithosphere in Angola Basin on the Seismic Refraction Data with Account of Earth Curvature
V. B. Piip

P572 Source Parameters and Epicentral Relocation of The 22 June 2002 Avaj Earthquake
N. Sarmadi, M. Gheitaanchi

P573 Source Characteristics of the 28th May 2004 Baladeh-Kojur Destructive Earthquake in Central Alborz
F. Golabi

P574 Fault-plane Identification by a Geometrical Method – Application to Moderate Earthquake Mw 5.1 Kerman, Iran
B. Hejrani, M. R. Hatami, S. Moussavi
POTENTIAL FIELDS (EAGE)

PS81 Anomalies of the Earth’s Magnetic Total Field in Germany – A New Homogenous, High-resolution Compilation .......................................................................................................................................................................................... 5215
S. M. Demianets, M. D. Dovbniack

PS82 Satellite and Ground Gravimetry – The Innovative Approaches in Studying the Earthquake Nature and Prognosis ............................................................................................................................................... 5220
S. M. Demianets, M. D. Dovbniack

PS83 Edge-preserved 2D Inversion of Magnetic Data – An Application to Makran Arc-trench Complex .......................................................... 5225
L. Namaki, A. Gholami, M. K. Hafizi

PS84 Geophysical Models of the Earth’s Crust Structure of the Northern Urals ........................................................................................................... 5230
P. S. Martyshko, N. P. Fedorova, V. V. Kolmgorova, I. V. Ladowski

PS85 Gravity Model of a Transect in the Southern Region of the Central Andes ............................................................................................................. 5235
A. Casas, M. P. Martínez, M. E. Giménez

PS86 3D Gravimetric Characterization of El Bierzo Carboniferous Basin and Ponferrada Granite, León, NW ........................................................ 5240

PS87 Magnetic Basement Study in the Barents Sea from Inversion and Forward Modelling ........................................................................................................... 5245
L. Marello, J. Ebbing, L. Gernigon

SEISMIC AND GPR DIFFRACTION MODELING AND IMAGING (EAGE)

PS91 A Brief Summary of Hessian Based Modelling in a Shared Earth Environment ........................................................................................................... 5250
G. Tosopoulos, J. W. Thorbecke

PS92 Multi-frequency Phase Coherent Super-resolution Imaging ............................................................................................................................. 5255
E. G. Asgedom, L. J. Gelius

PS93 Accurate Modeling of Fractured Reservoir Not Using Equivalent Medium Theory ............................................................................................. 5260
P. Thore, I. Tarrass

PS94 Modified Form of Reverse Time Migration Tuned to Multiple .............................................................................................................................. 5265
G. T. Schuster, G. Zhan, Y. Luo

STUDENT POSTER SESSION 01 - GEOPHYSICS

SP01 Time Lapse Analysis of a Pseudo-3D Surface Seismic Data at the CO2 SINK Project Site, Ketzin, Germany .......................................................... 5270
C. Yang, P. Bergmann, C. Juhlin, R. Giese, S. Luth, C. Cosma

SP02 Measurement of Frequency-dependent P and S Impedance from 2D Data ........................................................................................................... 5273
A. Alshangiti, M. Chapman, A. Wilson, R. Clark

SP03 Environmental Investigations in Fuka Area Northwestern Coast of Egypt ............................................................................................................. 5276
M. Tanfik, K. Gemall, S. Moua, K. Farag

SP04 Influence of Invading Phase Breakthrough on Acoustic Response in Multi-phase Saturated Austin Chalk ................................................................ 5279
M. K. Sorensen, I. L. Fabricius, T. Hansen

SP05 Sidescan Sonar Data Interpretation for Sediments Mapping in Kandalaksha Bay of the White Sea .............................................................. 5282
Y. E. Gubanova

SP06 Integrated Petrophysical Research of the Complex Reservoir Rocks of the Volyn-Podillia ........................................................................... 5285
I. V. Ustenko, S. A. Vyazhva, V. P. Bukovsky

SP07 Origin of Gas Hydrates Imaged from the Acoustic Basement in the Northernmost South China Sea by Using OBS .................................................. 5290
A. A. Hassan, S. Vega

SP08 The Effect of Carbonate Texture and Pore Types on the Pressure Dependence of Acoustic Velocities ............................................................ 5293
A. A. Hassan, S. Vega

STUDENT POSTER SESSION 02 - GEOLOGY

SP09 Impacting Factors on the Thermomechanical Behavior of Dolostones upon Calcination .................................................................................... 5296
A. Panaiotu, D. Ciobanete

SP10 Seismic Geomorphology: Tool for Imaging Elements of Depositional Systems ................................................................................................. 5300
S. Sengupta

SP11 Paleo-Mesozoic Development of the Reggane Basin, Southern Algeria ........................................................................................................... 5305
E. Lewandowski, R. Zühlke, H. Jäger, T. Bechstädt, T. Leythäuser, R. Ascha

SP12 Petrophysical Properties of Greensand as Predicted from NMR Measurements ................................................................................................. 5310
Z. Hossain, C. Grattoni, M. Solymar, I. L. Fabricius

SP13 Sorption of Magnesium and Sulfate Ions on Calcite ................................................................................................................................. 5313
R. Ahsan, I. L. Fabricius

SP14 3D Folding and Mud Diapirism in the South Caspian Basin ............................................................................................................................. 5316

SP15 Structure of Zagros Simply Folded Zone ......................................................................................................................................................... 5319
A. Chalabi, L. Gagala, J. Vergés, P. Keller, N. Bang

SP16 Rock Property Analysis of Malay Basin Mudrocks ........................................................................................................................................ 5322
L. M. Duffy, A. C. Aplin, M. J. Hoesni
STUDENT POSTER SESSION 03 – PETROLEUM EXPLORATION/CIVIL ENGINEERING

SP17 Multidisciplinary Approach - Breaking Paradigms in a Mature Oil Field .......................................................... 5325
N. James Villarreal, A. Ortiz-Fernandez, P. Villamarin

SP18 Fluid Circulation in the Llanos (Colombia) and Diagenese .............................................................................. 5330
F. Gonzalez, I. Moretti, X. Gauchet

SP19 Study of Stratigraphy, Biostratigraphy, Microfacies, Diagenesis, Sequence Stratigraphy and Reservoir Potential of the Fahliyan Formation in the Marun Oil Field, Zagros Basin, Southwest Iran ........................................................................ 5333
B. Habibnia, A. Feghhi, H. Amiri Bahktiar

SP20 Micro Tremors Energy Distribution before and after Stabilization of the Cave Risovaca in Serbia .................. 5338
M. Vanic

STUDENT POSTER SESSION 04 - GEOPHYSICS

SP21 Geoelectric Survey of a Roll-over Anticline (Austria) .......................................................................................... 5341
K. Keleretic, D. Raab, E. Dombradi, D. Spahic

SP22 Variation of the Crustal Structure Along the Juan de Fuca Ridge from Gravity and Seismic Data ................. 5344
M. Marjanovic, S. Carbotte, M. Nedimovic

SP23 Method of Electromagnetic Sounding on the Territory of the Ancient Bilar Settlement ...................................... 5347
A. Gomazov, B. Platov, A. Stepunov, Z. Stepak

SP24 Attenuation Mechanism of Seismic Wave in Chamoli Region of Garhwal-Kumaun Himalayas .................. 5350
S. Abdou, S. Mulhpadaidhang, E. Del-Pezzo

SP25 Crosswell Seismic Waveform Tomography for Monitoring the CO2 Injection at Ketzin Site, Germany - Synthetic Data Test .......................................................... 5355
F. J. Zhang, C. Juilin

SP26 Seismic Description of Eocene Depositional System, SW Barents Sea .............................................................. 5358
P. A. Safronova, K. Andreassen, J. S. Laberg, T. O. Vorren

SP27 An Integral Geometric Method for Automatic First Arrival Detection .............................................................. 5363
L. Yalcinoglu

SP28 High-resolution Reflection Seismic Imaging in the Kristineberg Mining Area, Northern Sweden ................. 5368
M. Dehghannejad, C. Juilin, A. Malehmir, P. Weiheh

STUDENT POSTER SESSION 05 – GEOLOGY

SP29 Seismic Stratigraphy and Numerical Analysis of the Southern Brazilian Margin ....................................................... 5372
J. Contreras, B. Zühle, S. Boman, T. Bechstädt

SP30 Environments of Sedimentation and Distribution of the Jurassic Strata ............................................................. 5377
A. A. Suslova, A. F. Stoupakova, Y. K. Burlin

SP31 3D Reservoir Model of the Sobrarbe Delta System (Eocene, Ainsa Basin, Pyrenees Foreland Basin) - SobraRes Project .................................................................................................................. 5382
A. Khan, B. Zühle, T. Bechstädt

SP32 PTT and Deformation Paths Derived from FIA, Pseudosections and Zoned Garnets and Their Significance ........ 5387
A. Shah

SP33 Sedimentary Response to the Evolution of Mobile Substrates: Examples from Offshore West Africa ............... 5393
A. P. Obahoye, R. L. Gawthorpe, M. Huwe, P. Hadler-Jacobsen

SP34 The Method of Stress State Estimation of Permeable Rock .............................................................................. 5396
V. A. Pavlov

SP35 Geological Controls on Gas Production: Wissey Field, UK SNS .......................................................... 5401
C. Duguid, J. R. Underhill

SP36 3D Integrated Reservoir Modelling for Upper Safa Gas Development in Obaiyed Field, Western Desert, Egypt .................................................................................................................................. 5406
M. Abdel-Fattah, W. Dominik, E. Shendi, M. Gadallah, M. Rashed

STUDENT POSTER SESSION 06 - GEOPHYSICS

SP37 3D Seismic AVO Data Established by the Wavelet Transform Modulus Maxima Lines to Characterize Reservoirs Heterogeneities ........................................................................................................ 5411
S. Ouadsfiel, J. Aliouane

SP38 Seismic Analysis of Gas Accumulation in the Italian Offshore ........................................................................ 5416
A. Mocnik, A. Del Ben, E. Forni, R. Geletti, M. Pipan

SP39 Variation of Seismic b-value in Central Alborz Mountains, Iran ........................................................................ 5419
A. Mostafanejad

SP40 Seismic Studies on the Messinian Rocks in the Onshore Nile Delta, Egypt ....................................................... 5422
M. Barakat, W. Dominik

SP41 Understanding Seismic Anisotropy of Ice in West Antarctic Ice Sheet .................................................................. 5427
B. W. Al-Rumaih, G. W. Stuart, G. E. Lloyd, D. A. Angus

SP42 Geomagnetic Measurements of Lazar’s Canyon (Eastern Serbia) ........................................................................... 5430
I. Mitrovic, M. C. Cukavac
SP43 Inversion of Electrical Resistivity Tomography and Cone Penetrometer Resistivity Data to Map Quick Clay in Norway .................................................................5435
S. K. Cornée, A. A. Pfeiffhuber

SP44 Creep of Highly Porous Chalk and Biot Critical Frequency .................................................................5438
K. A. Andreassen, I. L. Fabricius, N. N. Foged

STUDENT POSTER SESSION 07 - GEOPHYSICS

SP45 Crustal Structure Beneath Hudson Bay from Ambient-noise Tomography - Implications for basin formation .................................................................5441
A. E. Pawluk, D. W. Eaton

SP46 Velocity Models and Pre-stack Depth Migration of Gas Hydrates on Taiwan Accretionary Prism .................................................................5444
B. J. Yang, T. K. Wang, J. M. Deng, C. S. Liu

SP47 The Effects of Shear Properties of Heavy Oils on Seismic Response .................................................................5447
F. Vashaghani, L. R. Lince, J. Embleton

SP48 Complex Trace Transformation and its Application to Suppress Random Noise .................................................................5452
H. R. Soleymani, M. Nejati, S. M. Arabshahi, M. A. Biahi

SP49 Detection of Leaking Using Self-potential on Vidara Dam (Bosnia) .................................................................5457
D. Naamov

SP50 NMR as a Tool for Estimation of Excess Conductivity in Chalk .................................................................5460

SP51 Influence of Cementation Factor on Water Saturation in Carbonates of Main Dolomite in North-West Poland .................................................................5463
P. Krakowska, M. Niepsuj

SP52 Application of Artificial Neural Networks to the Evaluation of Formation Permeability .................................................................5466
P. Kurunik

STUDENT POSTER SESSION 08 – RESERVOIR / PETROLEUM ENGINEERING

SP53 Influence of N2/CO2 Injection to the Wettability Behavior of the Coal-water-gas System .................................................................5471
N. Shojaakaveh, E. S. J. Rudolph, S. N. Ashrafizadeh

SP54 Development of Reservoir Characterization Techniques and Production Models for Exploiting Naturally Fractured Reservoirs .................................................................5476
I. Oraki Kohshour, B. Habibnia, K. Dalvand

SP55 Could CO2 Storage Site Performance Be Compromised by Palaeo-Gas Migration Conduits in the Overburden? .................................................................5482

SP56 Fracture Characterizations from Well Testing Data Using Artificial Neural Networks .................................................................5484
M. M. Alam, A. K. Shaik, I. L. Fabricius

SP57 A Poroperm Function To Evaluate the Dynamic Pore Connectivity of Porous Media .................................................................5488
M. I. Al-Mossawy, B. Demiral

SP58 Reconciling Well-test and Production Data in Mapping Permeability-thickness Trends .................................................................5493
A. Petrov

SP59 Diffusion-to-telegraph Equation Conversion to Analyze Pressure Transient Behavior .................................................................5496
A. Mosaddel Haghighi, Y. Fallahzadeh

SP60 An Experimental Study to Minimize Capillary End Effect During Flooding in Porous Media .................................................................5498
M. Ahmed

STUDENT POSTER SESSION 09 - GEOPHYSICS

SP61 The Use of VSP and Well Data To Design De-multiple Techniques .................................................................5501
S. A. Alzahrani

SP62 3-D Seismic Ray Tracing on Irregular Tetrahedral Grid .................................................................5504
D. M. Molodtsov, Y. V. Raslov

SP63 Outcrop-seismic-core Plugs Correlation in a UAE Cretaceous Carbonate .................................................................5509

SP64 The Hough Transform for Seismic Profile Interpretation .................................................................5512
D. Wu, Y. Wang

SP65 Gravimetric Monitoring of the Base of the Mosque Kul Sharif .................................................................5517
A. Abdullin

SP66 First Time Arrivals Tomography .................................................................5520
N. Belayouni
