2010 Fourth International Conference on Secure Software Integration and Reliability Improvement

(SSIRI 2010)

Singapore
9 – 11 June 2010
2010 Fourth International Conference on Secure Software Integration and Reliability Improvement

SSIRI 2010

Table of Contents

Message from Steering Committee Chairs .......................................................................................viii
Message from General Chair .......................................................................................................................ix
Message from Program Chairs ....................................................................................................................x
Organizing Committee ..............................................................................................................................xi
Program Committee .........................................................................................................................................xii
Steering Committee ..........................................................................................................................................xv
Additional Reviewers .......................................................................................................................................xvi
Keynote Abstracts ........................................................................................................................................xvii

Invited Keynote Paper

Modelling and Implementing Complex Systems with Timebands .................................................................1

Jim Woodcock, Marcel Oliveira, Alan Burns, and Kun Wei

Session 1A: Safety & Anomaly Detection

Recent Catastrophic Accidents: Investigating How Software was Responsible ..............................................14

W. Eric Wong, Vidroha Debroy, Adithya Surampudi, HyeonJeong Kim,
and Michael F. Siok

Luu Anh Tuan, Man Chun Zheng, and Quan Thanh Tho

Discovering Anomalies in Semantic Web Rules .........................................................................................33

Yuzhang Feng, Yang Liu, Yuan-Fang Li, and Daqing Zhang
Session 1B: Model Checking and Verification

Model Checking a Lazy Concurrent List-Based Set Algorithm .............................................................. 43
  Shao Jie Zhang and Yang Liu

YAWL2DVE: An Automated Translator for Workflow Verification .......................................................... 53
  Fazle Rabbi, Hao Wang, and Wendy MacCaull

Scalable V&V Effort Estimation for Ultra-Large-Scale Systems .............................................................. 60
  Christof J. Budnik, Rajesh Subramanyan, and Raj Tanikella

Session 1C: Security Requirements (Invited Session)

Aligning Security Requirements and Security Assurance Using the Common Criteria ...................................................... 69
  Kenji Taguchi, Nobukazu Yoshioka, Takayuki Tobita, and Hiroyuki Kaneko

An Agent-Based System to Support Assurance of Security Requirements .................................................. 78
  Moussa Ouedraogo, Haralambos Mouratidis, Djamel Khadraoui, and Eric Dubois

Model-Based Argument Analysis for Evolving Security Requirements ...................................................... 88
  Thein Than Tun, Yijun Yu, Charles Haley, and Bashar Nuseibeh

Session 2A: Software Reliability

Failure Type-Aware Reliability Assessment with Component Failure Dependency ...................................................... 98
  Atef Mohamed and Mohammad Zulkernine

Software Reliability Modeling with Integrated Test Coverage ........................................................................ 106
  Jinxia An and Jihong Zhu

Sensitivity of Two Coverage-Based Software Reliability Models to Variations in the Operational Profile ........................................ 113
  Odair Jacinto da Silva, Adalberto Nobiatto Crespo, Marcos Lordello Chaim, and Mario Jino

Session 2B: Software Testing I

A Formal Framework for Mutation Testing .............................................................................................. 121
  Fevzi Belli and Mutlu Beyazit

An Industrial Case Study on Speeding Up User Acceptance Testing by Mining Execution Logs ........................................ 131
  Zhen Ming Jiang, Alberto Avritzer, Emad Shihab, Ahmed E. Hassan, and Parminder Flora

Testing Effort Dependent Software FDP and FCP Models with Consideration of Imperfect Debugging ........................................ 141
  R. Peng, Q.P. Hu, S.H. Ng, and M. Xie

A Decompositional Approach to Automatic Test Case Generation Based on Formal Specifications ........................................ 147
  Shaoying Liu and Shin Nakajima
Session 2C: Quality Improvement

Availability Improvement in Virtualized Multiple Servers with Software Rejuvenation and Virtualization ................................................................. 156
  May Tar Hla Myint and Thandar Thein
Traceability Enhancement Technique through the Integration of Software Configuration Management and Individual Working Environment ........................................ 163
  Dae-Yeob Kim and Cheong Youn
Recoverability of Erasure Codes Based and Intensively Written Storage Systems ........................................................................................................ 173
  Xiangyu Luo and Yun Wang
Towards a New Understanding of Advice Interference .......................................................... 180
  Kun Tian, Kendra Cooper, Kang Zhang, and Siyuan Liu

Session 3A: Software Testing II

Self-Checked Metamorphic Testing of an Image Processing Program ........................................ 190
  Junhua Ding, Tong Wu, Jun Q. Lu, and Xin-Hua Hu
PhishTester: Automatic Testing of Phishing Attacks ................................................................ 198
  Hossain Shahriar and Mohammad Zulkernine
Towards Scalable Robustness Testing ................................................................................... 208
  Fevzi Belli, Axel Hollmann, and W. Eric Wong

Session 3B: Modeling & Analysis

Modeling and Analyzing Timed Security Protocols Using Extended Timed CSP ................................................................. 217
  Xian Zhang, Yang Liu, and Mikhail Auguston
Modeling Uncertainties in the Estimation of Software Reliability – A Pragmatic Approach .................................................................................. 227
  Senthil Kumar Chandran, Aleksandar Dimov, and Sasikumar Punnekkat
The 'Best' Valid Safe Protocol Converter ................................................................................ 237
  Jing Cao and Albert Nymeyer

Author Index .................................................................................................................................. 244
