# TABLE OF CONTENTS

## VOLUME 1

Transforming Engineering Education: Creating Interdisciplinary Skills for Complex Environments ........................................... 1
   Larry Hirst

Human Capital Reengineering in Service Science ................................................................................................................. 10
   Ionel Andrei, Adrian Caraj

The Emotional Rescue of Engineering Education .................................................................................................................. 30
   David E. Goldberg

### BUSINESS, ECONOMY AND LAW IN THE ENGINEERING CURRICULUM

Connections between Engineering and Law Synergies and Opportunities................................................................. 40
   Ladimer S. Nagurney

Engineering and Entrepreneurship: Creating Lasting Value from Engineering.......................................................... 44
   Eric M. Eisenstein

Imparting Business and Management Skills to Engineering Technologists through the Development of
   a Cross Disciplinary Program.............................................................................................................................................. 59
   Anoop Desai, Jean-Claude Thomassian

Inclusion of Business Expertise and Non-Technical Aspects of Projects in the Curriculum for
   Engineering Education.......................................................................................................................................................... 78
   M. Reha Yurdakul

Information Systems Development Course: Integrating Business, IT and IS Competencies.............................................. 86
   João Alvaro Carvalho, Rui Dinis Sousa, Jorge Oliveira Sá

Stimulating Learning in Engineering Students by Collaborative Entrepreneurship Training ........................................... 106
   A. Manuel De Oliveira Duarte, Ilidio Castro Oliveira, Inês Direito

### CASE STUDIES

A Case Study of Enhancing Learning Outcomes for Undergraduate Electronic/Computer
   Engineering Students through a Service Learning Based Project Module............................................................. 119
   Liam Kilmartin, Eleanor McCarrick

Internship in Engineering Design in Hi–Tech Industries: Theory and Practice ...................................................... 137
   Elena Trotskovsky, Nissim Sabag

Symbolic Scientific Software Skills for Engineering Students .......................................................................................... 153
   Pramod Abichandani, Richard Primerano, Moshe Kam

### COMMUNICATION SKILLS IN THE ENGINEERING CURRICULUM

A Strategy for the Development of Lifelong Learning and Personal Skills throughout an
   Undergraduate Engineering Programme ......................................................................................................................... 179
   Gavin Duffy, Brian Bowe

Curricular Tools for Professional Communication Skills Development of Engineering Students within
   University of Craiova ......................................................................................................................................................... 193
   Denisa Rusinaru, Daniela Popescu, Cristina Popa Nistorescu

Learning and Assessment of Student Communication Skills on Engineering Programs: Some
   Experiences ............................................................................................................................................................................ 214
   Aidan O’Dwyer

Widgets: Teaching Technical English, Innovation, and Ownership to Engineering Students .......................................... 227
   Liticia J. Salter

### COMPUTING AND SOFTWARE

Broadening the Education of Software Engineers – Some Lessons and Pointers ...................................................... 242
   Joe Griffin, Kevin Ryan
A Success Story in Inter-Disciplinary, Inter-Continental Engineering Education .......................................................... 574
Laurie Cuthbert, Na Yao, Bindu Chib, Yashu Ying, Yao Wang

Building a Foundation for Multidisciplinary Design Using Case Studies ................................................................. 591
Steve Lambert, Ocasta Nespoli

Evaluation of Methodology PBL Done by Students ........................................................................................................ 606
B. Amante, A. Lacayo, M. Piqué, S. Oliver, P. Ponsa, R. Vilanova

Experiences in Integrating Professional Studies into the Electrical & Electronic Engineering Syllabus .................. 627
Maeva Duffy

Linking Education and Research: A Strategy for Introducing and Sustaining Multi-Disciplinary Academic Programs .................................................. 641
Nancy Paris

Multidisciplinary Engineering Systems 2nd and 3rd Year College-Wide Courses .................................................. 659
Kevin Craig, Mark Nagurka

NEW INITIATIVES IN ENGINEERING EDUCATION

A Strategic Framework for Engineering Education and Practice .................................................................................. 674
Anthony J. Quayle

Connecting Campuses and Building International Competencies with Study Abroad Programs: The Texas A&M University at Qatar Experience ................................ 694
Shannon Kelly McNulty, Prasad Enjeti

Engineering Student Learning and Emotional Competencies .................................................................................. 718
M. F. Stewart, Colin Chisholm, Margaret Harris

From Student to Teacher: Transforming Industry Sponsored Student Projects into Relevant, Engaging, and Practical Curricular Materials .................................................. 743
Joe Bolinger, Kelly Yackovich, Rajiv Ramnath, Jayashree Ramanathan, Neelam Soundarajan

Context: NSF IUCRC Program ................................................................................................................................. 756
Jay Ramanathan, Rajiv Ramnath

Having Students See the Human Context of Their Work through Narrative .................................................. 770
Andrew Chen

Intentional, Integrated Learning for Engineering Students .................................................................................. 797
Ruth E. Davis

Lessons Learned from Introducing a Skills Line into a Systems Engineering Curriculum .................................. 815
Marijn Janssen, C. Els Van Daalen, Rien Elling, Jolien Ubacht, Ivo Bouwmans

Multidisciplinary Freshman Engineering .................................................................................................................. 835
Kevin Craig, Hyunjae Park

The Facilitator-Supported Online Method: Using Problem-Based Remote Learning Techniques for Engineering Students .................................................................................. 856
Wilson J. F. De Santana, Alexandre Mota, Lia Toledo Moreira Mota, Hans Kurt Edmund Liesenberg

OPERATING IN THE GLOBAL ENVIRONMENT

Adapting Engineering Education Curriculum for Global Competitiveness in Developing Countries ............... 830
Ibibia K. Dabipi, Joseph N. Dadoo, James B. Burrows-McElwain, Christopher Hartman

Embedding Communication and Electronic Engineering Studies in a Local and Global Society ................. 838
Carmen Bachiller, Juan Vicente Balbaste, Javier Oliver

Impact of Globalization and Industry on Engineering Education at Higher Learning Education in Malaysia .................................................................................. 854
Ruhani Ab Rahman, Md Mahfuz Md Zan, Husna Zainol Abidin, Murzah Kassim, Cik Ku Harosswati Che Ku Yahaya

The Successful Integration of Study Abroad and an Engineering Curriculum .................................................. 872
William Hornfeck, Ismail Jouny
PRE UNIVERSITY ENGINEERING EDUCATION

A Novel Approach to Engaging Minority K-12 Students in NASA STEM Programs for Careers in Engineering
Joseph N. D. Dodoo, Ibibia K. Dabipi, James B. Burrows-McElwain, Christopher Hartman

K-12 - University - Industry STEM Educational Partnerships
Kevin Craig, Jon Jensen

PREPARING ENGINEERING STUDENTS TO FUNCTION IN THE BUSINESS ENVIRONMENT

Interdisciplinary Experiential Education of Intellectual Property Concepts in an Engineering Context
Robert M. Henry, Susan M. Richey

Making Both Ends Meet: Teaching Non-Technical Skills to Engineers Using Both Content-Based Instruction and Interdisciplinary Project-Based Learning
Wael El-Sokkary, Lisa Ann Lamont, David Thomson, Lana El Chaar

Training Engineering Students for Intrapreneurship - Challenges and Dilemmas for Project Supervisors of Modern Engineers
Anders Paarup Nielsen, Jan Vang

PROGRESS IN ELECTRICAL AND COMPUTING ENGINEERING EDUCATION

A Curricular Reform Proposal for Egyptian Computer Engineering Education ECEE
May Salama, Tarek Thabet

Developing a Sustainable Engineering Education in the Middle East and North Africa Region
Sheerif Abu Al-Maati, Issam Damaj

Teaching Soft Skills to ECE Students
Ismail Jouny, William Hornfeck

SERVICE SCIENCE IN THE ENGINEERING CURRICULUM

Case Study: Complementing the Engineering Education with Entrepreneurial Program at Shoubra Faculty of Engineering, Bahna University, Egypt
May Salama

Developing a Pedagogical Framework for Engineering Professional Development within a Service Orientated Environment
S. A. McLaughlin, R. Paton, C. Cormack

Developing a Services Science Graduation Programme at the University of Twente
Vikram Sorathia, Luis Ferreira Pires, Marten Van Sinderen, Fons Wijnhoven

Engaging the SSME Challenge: Curriculum Development for the Engineering Faculty at Universiti Kebangsaan Malaysia
Yazrina Yahya, Riza Sulaiman, Muriati Mukhtar, Salha Abdullah, Norhamidi Muhamad

Services Science Curriculum: Design and Web-Based Delivery
Eamonn Ambrose

The Skills and Cultural Implications in Managing the Institutional Response to the Emergence of a Services Dominant Economy: A South African Perspective
R. V. Weeks, S. Benade

SOFTWARE SKILLS

Learning Written Communicative Skills in UOC Engineering Curricula: A Virtual University Initiative and Its Future Development
M. Jesús Marco-Galindo, Rafael Macau-Nadal, J. Antoni Pastor-Collado

Student Competitions Enhance the Learning of Nontechnical Skills for Large Cohorts of Freshman Engineers
Manuel A. Forero Rueda, Michael D. Gilchrist
THEORY AND PEDAGOGY

Global Engineering, Humanitarian Case Studies, and Pedagogies of Transformation ............................................. 1114
Annette Berndt, Carla Paterson

Implementing Cognitive Theory of Multimedia Learning in Existing Academic Programs ......................................... 1133
Gordan Djurovic, Marijana Zivic Djurovic

Non-Cognitive Influences on Trainee Learning within the Manufacturing Industry .................................................... 1140
Cornelia Connolly, Claire Gubbins, Eamonn Murphy

Author Index
