IFAC Workshop on Control Applications of Optimization 2009

Jyvaskyla, Finland
6-8 May 2009

Editors:

Kaisa Miettinen Pekka Neittaanmaki

ISBN: 978-1-61738-781-4
## CONTENTS

### Keynote papers

**Hamiltonian Potential Functions for Differential Game**  
Davide Dragone, Luca Lambertini, George Leitmann, Arsen Palestini  

Page: 1

**Algorithms for Solving Stochastic Discrete Control Problems with Finite Time Horizon**  
Dmitrii Lozovanu, Stefan Pickl  

Page: 9

### Robust control and stabilisation 1

**Robust approximate tracking of matched disturbance non - control affine systems**  
P. Ortner, E. Gruenbacher, L. del Re  

Page: 17

**Smooth stabilization and optimal H2 design**  
Joris Vanbiervliet, Wim Michiels, Stefan Vandewalle  

Page: 23

**Robust control optimization for thermo-energetic installations**  
Tudor-Bogdan Airimfioatea, Dumitru Popescu, Catâlin Dimon, Grigore Stamatescu  

Page: 29

### Numerical methods in optimization

**Novel method to control linear systems of acceleration constrained dynamics**  
Josef Shinar, Valery Y. Glizer, Vladimir Turetsky  

Page: 35

**A reduction type penalty algorithm for nonlinear semi-infinite programming**  
Alzira Mota, A. Ismael F. Vaz  

Page: 40

**Using particle swarm optimization for reduced order H∞ synthesis**  
G. Sandou, G. Duc  

Page: 46

**A multi-quantile approach for open-loop stochastic dynamic programming problems**  
Rodrigo T. N. Cardoso, Ricardo H. C. Takahashi, Frederico R. B. Cruz, Carlos M. Fonseca  

Page: 52

### Applications in environmental sciences, economics and management 1

**Economic growth with political lobbying and wage bargaining**  
Tapio Palokangas  

Page: 58

**Model of quality competition with a non-uniform consumer distribution**  
Margarita A. Gladkova, Nikolay A. Zenkevich  

Page: 64

**High-precision algorithms for constructing optimal trajectories via solving Hamiltonian systems**  
Andrey A. Krasovskii, Alexander M. Tarasyev  

Page: 70

**Regulating environmental externalities through public firms: A differential game**  
Davide Dragone, Luca Lambertini, Arsen Palestini  

Page: 76

**On turnpike solutions of some optimal growth problems**  
Amos Zemel, Ben Gurion  

Page: 82
Optimal PDE control 1

A posteriori error estimates for optimal control problems
Sergey I. Repin

Model-predictive control

Nonlinear model predictive control of a diesel engine airpath
P. Ortner, R. Bergmann, H. J. Ferreau, L. del Re

Model predictive control for linear parameter varying systems using path-dependent Lyapunov functions
Marc Jungers, Rodrigo P. Caun, Ricardo C. L. F. Oliveira, Pedro L. D. Peres

Stochastic optimization

A moving horizon approach to a chance constrained nonlinear dynamic optimization problem
Abebe Geletu, Michael Klöppel, Pu Li, Armin Hoffmann

Regulator design using a multiobjective genetic algorithm
Fredrik Östman, Frank Pettersson, Hannu T. Toivonen

Optimal PDE control 2

An advanced criterion for optimal actuator and sensor placement on complex flexible structures
Christian Westermayer, Alexander Schirrer, Mark Hemedi, Martin Kozek

Error estimates for the solution of a control constrained optimal control problem with interior penalties
Felipe Álvarez, Jérome Bolte, J. Frédéric Bonnans, Francisco J. Silva

Finite and infinite transmission zeros for infinite-dimensional systems
Petteri Laakkonen, Seppo Pohjolainen

A less problem dependent approach for optimal trajectories with singular arcs:
Application to space launchers
P. Martinon, F. Bonnans, E. Trélat

Differential games 1

On the notion of stability defect in game control problems
Vladimir N. Ushakov, Yaroslav A. Latushkin

On the value function of a differential game with simple dynamics and piecewise linear data
Lyubov G. Shagalova

Matrix block formulation for closed-loop memoryless discrete-time Nash solution
Marc Jungers, Hisham Abou-Kandil

Open-loop Stackelberg strategy for linear quadratic games via matrix pencil approach
Marc Jungers, Hisham Abou-Kandil, Cristian Oara, Radu Stefan

Applications in environmental sciences, economics and management 2

Non-renewable resources and the sustainability of the economic growth under bilateral trade
Francisco Cabo, Guiomar Martin-Herrán, Maria Pilar Martínez-García
Multistage dynamics of international environmental agreements: free-riding from membership and compliance

Yulia Pavlova

The compleat fish wars with changing area for fishery

Vladimir V. Mazalov, Anna N. Rettieva

Optimal dynamics of functionality development in open innovation

C. Watanabe, J. Shin, J. Heikkinen, A. Tarasyev

Robust control and stabilisation

Power generation/distribution control systems topology selection based on robustness evaluation

Jozef B. Lewoc, Antoni Izworski, Sławomir Skowronski, Antonina Kieleczawa, Georgi Dimitrovski

Delay-dependent stability analysis of neutral systems using positive polynomials optimization

Bogdan Dumitrescu, Bogdan C. Șicleru, Radu Ștefan

Differential games

0035 Extension of a problem of the game control

A.G. Chentsov, Ju.V. Shapar

0036 A numerical construction algorithm of Nash and Stackelberg solutions for two-person non-zero sum linear positional differential games

Anatoli F. Kleimenov, Sergei I. Osipov, Dmitry R. Kavshinov

Reconstruction of differential games with Bolza payoff

Yurii Averboukh

A necessary and sufficient condition for the existence of value for positional differential game

Sergei Chistyakov, Fedor Nikitin

Adaptive control

A new exterior-point approach to a fixed-order output feedback controller design

Yasushi Kami, Eitaku Nobuyama

A simulator for infinite-dimensional systems with a self-tuning controller

Markku Åkerblom, Timo Hämäläinen, Seppo Pohjolainen

NPP APCS diagnostics implementation as a routine task of APCS

V.G. Promyslov, S.I. Masolkin

Optimal control

Optimization of certain mobile robotic systems

Felix L. Chernousko

The synthesis of optimal control system by the network operator method

Askhat I. Diveev, Elena A. Sofronova
Optimization methods

Dynamic equilibrium model for spatial auction markets
Elisabetta Allevi, Brescia University, Adriana Gnudi, Igor V. Konnov 238

Direct fire target selection in Sandis combat simulation
Esa Lappi, Risto Bruun, Kosti Jokinen 242

Optimization problems for distribution of resources in spatial systems
Igor V. Konnov, Olga A. Kashina, Erkki Laitinen 246

Applications in environmental sciences, economics and management 3

Nonlinear stabilizers of economic growth under exhausting energy resources
Robert U. Ayres, Andrey A. Krasovskii, Alexander M. Tarasyev 251

Closed loop dynamic optimization of a petroleum refinery process

Optimization of the pulp mill economical efficiency; Study on the behavior effect of the economically significant variables
A. Zakharov, S.-L. Jämsä-Jounela 263

Optimal control 2

Receding horizon optimal control of Wiener systems by application of an asymmetric cost function
Daniel Alberer, Harald Kirchsteiger, Luigi del Re, Hans Joachim Ferreau, Moritz Diehl 269

An algorithm for solving discrete optimal control problems with Infinite time horizon - Determining the minimal mean cost cycles in a directed graph
Dmitrii Lozovanu, Stefan Pickl 275

Multiobjective optimization I

An open-loop invariant-set approach for multiobjective dynamic programming problems
Rodrigo T. N. Cardoso, Ricardo H. C. Takahashi, Carlos M. Fonseca 278

Multi-objective design with a stochastic validation of vaccination campaigns
André R. da Cruz, Rodrigo T. N. Cardoso, Ricardo H. C. Takahashi 284

Multiple objective optimisation of cyclic chemical systems with distributed parameters
Filip Logist, Jan F. Van Impe 290

Optimization with uncertainties

Viscosity solutions to hereditary dynamical optimization
Nikolay Yu. Lukoyanov 296

On the optimal risk function for the system under dynamic disturbances
Dmitry A. Serkov 302

Recursive state estimation for linear non-causal descriptor systems with uncertain parameters
Sergiy M. Zhuk, Taras Shevchenko 305
Optimal control 3

The method of characteristics in solving of optimal control problems with terminal cost
N. Subbotina, E. Kolpakova 310

Optimal guidance law: impact angle & terminal lateral acceleration control
Chang-Kyung Ryoo, H. Jin Kim, Min-Jea Tahk, Jin-Ik Lee 316

Multiobjective optimization 2

Stability analysis for a parameterized multicriteria Boolean linear programming problem
Yury Nikulin, Marko M. Mäkelä 321

Multistage optimisation strategy for solving production planning problems
R. Küttner, J. Majak 327

Towards understanding evolutionary bilevel multi-objective optimization algorithm
Ankur Sinha, Kalyanmoy Deb 333

Consistency and pole assignment in linear systems with incomplete feedback
Vasili A. Zaitsev 339
