2010 International Conference on Intelligent Computation Technology and Automation

ICICTA 2010

Table of Contents
Volume - 1

Preface - Volume 1 ....................................................................................................................xxiv
Organizing Committee - Volume 1 ........................................................................................xxv
Program Committee - Volume 1 ............................................................................................xxvi
Reviewers - Volume 1 ...........................................................................................................xxvii

2010 International Conference on Intelligent Computation Technology and Automation—Volume 1

3-D Path Planning Using Neural Networks for a Robot Manipulator ........................................3
Wang Wei and Wei Shimin

3D Positioning for Mobile Robot Using Omnidirectional Vision ..................................................7
Ming Li, Kenji Imou, and Katsuhiro Wakabayashi

3D Visual Design for Mobile Search Result on 3G Mobile Phone ..............................................12
Yan Yan and Lin Kunhui

A Chaotic Theory Based on Customized Inertia Particle Swarm Optimization and Applications to PID Coefficient Design for the Automatic Voltage Regulator ..........................................................17
Hwan Il Kang, Min Woo Kwon, and Hwan Gil Bae

A Method of Continuous Wavelet Transform for QRS Wave Detection in ECG Signal ..................22
Qi Haibing, Liu Xiongfei, and Pan Chao

A New Method for Control Allocation Based on Second-Order Cone Program ..............................26
Yang Liu and Jin-wen An

A New Method for Eliminating Redundant Association Rules ..................................................32
Ye Xin, Wang Na, and Wang Chunyu
A New Method of Rural Road Network Layout Designing in the County: Generating Algorithm of Rectilinear Steiner Tree .................................................................37
Xiaohu Nie, Shunying Zhu, Hong Wang, and Fuxing Huang

A Tumbleweed-Mimicking Wind-Driven Rover for Planetary Exploration ..................................................42
Tian-yu Lu, Xiu-li Zhang, Zeng-yuan Liu, and Ze-nan Zhang

A Coloured Petri Net Based Formal Verification Methodology of MVB-TCN Device ...........................................................46
Zhang Guoyin, Liu Ming, and Yao Aihong

A Comprehensive Survey of Data Mining-Based Accounting-Fraud Detection Research ........................................................................................................50
Shiguo Wang

A Computation of Core for the Information System .....................................................................................54
Tian Shuxin, Wu Xiaoping, and Wang Hongxia

A Computing Mode Suitable for Medium and Small-Sized Enterprises Cloud Computing ..............................................57
Wei Liu, Liyan Zhang, Chunying Wu, Hongli Cai, and Lele Qin

A Decentralized Control Algorithm for Maintaining Communication Links in Mobile Sensor Networks .......................................................................................61
Wei Zhuang, Yingchao Zhang, and Huiqiang Tan

A Decision Support System with Ct_ACO Algorithm for the Hot Rolling Scheduling .................................................................65
Xiaoxia Zhang, Liwen Dong, and Qiuying Bai

A Delay Composition Approach to Stability Analysis of Neural Networks with Time-Varying Delay ...............................................................................69
Wenbin Cheng, Xunlin Zhu, and Yiqun Deng

A Design and Realization of 5B/6B CODEC in Audio Optical Terminal ..........................................................73
Zhang Changsen, Xu Qi, and Huang Dexin

A Digital Close-Range Photogrammetry System for Attitude Measurement of Aircraft Model in Wind Tunnel: A Preliminary Discussion ........................................................................76
Chen Jiechun, Zhao Liping, and Guo Ming

A Dynamic Operation Model for a Class of Closed-Loop Logistic System ......................................................80
Xu Jiawang, Zhu Yunlong, and Jiang Bo

An Efficient Algorithm for the Traffic Equilibrium Model with Elastic Demand ........................................................................................................84
Xizhen Hu, Chongchao Huang, and Aihua Luo

A Fast and Efficient Data Association of Passive Sensor Tracking ........................................................................88
Changning Tong, Yuesong Lin, Yunfei Guo, and Yan Zuo

A Fast L-curvature Estimation for Super-Resolution Image Restoration ........................................................92
Kai Xie

A Finding Less-Loaded Server Algorithm Based on MMOG and Analysis ..........................................................96
Jinzhong Wang and Zhigang Yue
A Framework of Dual Distribution Channel for Mass Customization .......................................................... 100

Yan-Hong Qin

A Fuzzy Control Algorithm for Collecting Main Pressure Controlling Using
Expert Control .................................................................................................................................................. 104

Hongjun Zhou, Wei Chen, and Kangling Fang

A General Module for the Detecting and Decoding of Serial Buses .............................................................. 108

Zhang Yan, Gao Lizhong, and He Bingjie

A GIS-Based Production Management System for General Cargo Terminal
and Realization of Visualization .................................................................................................................. 111

Fan Shu and Ziqi Xu

A Godunova-Type Inequality for Fuzzy Integrals .............................................................................................. 115

Li Xiao and Hu Yue

A Heuristics R and D Projects Portfolio Selection Decision System Based
on Data Mining and Fuzzy Logic .................................................................................................................. 118

Zhu Danmei, Wang Xingtong, and Ren Rongrong

A Hybrid Genetic Algorithm for Optimal Control Solving of Polymer
Flooding .......................................................................................................................................................... 122

Yang Lei, Shurong Li, Qiang Zhang, Xiaodong Zhang, and Lanlei Guo

A Hybrid PSO for Optimizing Locations of Booster Chlorination Stations
in Water Distribution Systems ..................................................................................................................... 126

Wang Hongxiang, Guo Wenxian, Xu Jianxin, and Gu Hongmei

A Kinetic Model Used to Predict the Rollover of High Temperature Ladle
Carrier Vehicles ............................................................................................................................................... 130

Wei-dong Zhang, Xiang-hua Li, and Hua Deng

A Lanchester Equation and its Solution Considering the Factor of Terrain .................................................. 134

Xiong Caiquan, Ma Lele, and Wu Minghu

A Linear Thermocouple Temperature Meter Based on Inverse Reference
Function .......................................................................................................................................................... 138

Liu Ximin

A Load-Balancing Dynamic Scheduling Algorithm under Machine Failure
Conditions ....................................................................................................................................................... 144

Wenmin Miao, Dongni Li, and Wei Zhang

A Many-Valued Approach to Fuzzy Rough Set ............................................................................................... 148

Qiu Jin, Lingqiang Li, Guangwu Meng, and Shou Bin Sun

A Method for Domain Conception Clustering with the Guidance of Domain
Ontology .......................................................................................................................................................... 151

Jun Dong, Suoping Wang, and Fanlun Xiong

A Method of Differential Median Calibration for the Temperature of Beer
Fermentation ................................................................................................................................................... 156

Yang Qingchuan, Sun Bo, and Chen Gang

</table>
A New Assessment Method for System Reliability Based on Dynamic Fault Tree 

_Duan Rongxing, Wan Guochun, and Dong Decun_ 

A New Compatible Thin Plate Rectangle Element 

_Li Limin and Zhang Guoxiang_ 

A New Data Model in a Large-Scaled Distributed Environment 

_Jun Zhang_ 

A New Epistemic Fluent within the Situation Calculus Using Linguistic Variables 

_Xiangyang Huang, Wenjun Wu, Ling Bai, and Xiao Xin_ 

A New Hybrid Path Relinking Algorithm for the Vehicle Routing Problem 

_Xiaoxia Zhang, Qiuying Bai, and Liwen Dong_ 

A New Iterative Learning Control Scheme with Global Convergence for MIMO Nonlinear Dynamic Systems 

_Jingli Kang_ 

A New Seismic Emergency Auto-Handling Instrument for the Lifeline Engineering: Low Cost Embedded System Solution 

_Fu Jihua, Wang Jianjun, Li Zhitao, Liu Xiaoxi, and Wu Ronghui_ 

A New Technique for Hanger Position Optimization of Vehicle Exhaust System 

_Wang Yansong, Wu Weiwei, and Liu Jianghua_ 

A New Trust Degree-Based Access Control Method for Semantic Web Services 

_Yang Xin, Shen Jianjing, and Si Zhigang_ 

A New Visualization Method for the Growth of Corn Leaf 

_Shuqiu Zhou and Xuyang Deng_ 

A Novel Control Method for Robotic Belt Grinding Based on SVM and PSO Algorithm 

_Wei Liang, Yixu Song, Hongbo Lv, Peifa Jia, Zhongxue Gan, and Lizhe Qi_ 

A Novel Hybrid Approach of Bayesian Theory and Neural Networks for Video Image Segmentation 

_Zhao Jianhui, Ling Weixin, He Mincong, Chen Zhuoming, and Ouyang Jingming_ 

A Novel Measurement of Scale for Images 

_Shukui Bo and Xinchao Han_ 

A Novel Method for Korotkoff Vibration Blood Pressure Measurement Based on Oscilometric 

_Danyang Yu, Mensun Yu, Haiyan Xiang, Yuqi Wang, Yanyong Liu, and Xiuyan Yang_ 

A Novel Palmprint Segmentation and Recognition Algorithm 

_Tian Qichuan, Li Ziliang, and Zhu Yanchun_ 

A P2P Based Web Service Grid Resources Management Model 

_Zhu Youchan and Bai Juanhua_
A P2P Traffic Identification Method Based on VFDT .................................................................281
    Meifeng Sun, Yun Zhang, Jingtao Chen, and Tingting Shi

A Palm Vein Recognition System ...............................................................................................285
    Huan Zhang and Dewen Hu

A Parameter Estimation Method for Moving Target in Stepped Frequency Radar .................289
    Lin Liu, Jin-jun Tian, and Zhao-hui Liu

A Peer Selection Algorithm with Consideration of Both Network Topology and Node Capability in P2P Network ..........................................................293
    Tao Guo, Xu Zhou, Hui Tang, and Zexu Wu

A Pipelining Hardware Implementation of H.264 Based on FPGA ........................................299
    Sun Song and Qi Haibing

A Real Time Algorithm for Scheduling Problem in Supply Chain Environment ................303
    Guijuan Chang

A Real-Time Capture and Transport System for High-Resolution Measure Image ..................306
    Feng Zhang, Qing-Zhang Wu, and Guo-Qiang Ren

A Repeated Game Analysis on Bank-Enterprise Credit Contract ........................................310
    Liu Jianbo, Wang Xianliang, Ren Rongrong, and Yang Jingfei

A Research of Intelligent Network Fault Diagnosis Base on Fuzzy Logic ...............................314
    Zhu Youchan and Zhang Xiaofang

A Research on I.C. Engine Misfire Fault Diagnosis Based on Rough Sets Theory and Neural Network ..........................................................318
    Yihu Wu, Biao Kuang, Hangyang Li, and Huanchun Gong

A Research on Mixed Stochastic User Equilibrium Model Based on Generalized Travel Disutility under ATIS .................................................................324
    A.W. Kuang and Z.X. Huang

A Research on Paper-Mediated Braille Automatic Extraction Method ................................328
    Huaxun Zhang, Jie Li, and Jia Yin

A Scheduling Algorithm for Aggregated Machining and Assembly System ..........................332
    Wenmin Miao, Dongni Li, and Yongjin Gao

A Semantic Analysis for Internet of Things ..............................................................................336
    Yinghui Huang and Guanyu Li

A Sigma-Delta Fractional-N Frequency Synthesizer Based on ADPLL .................................340
    Wei Sun, Hexiang Wen, and Lzhong Gao

A Signal Game Theory Based Reputation Model of Supply Chain of Medicine Retail Enterprises ......................................................................................343
    Yue Shumei, Guo Qijun, and Guo Weijie

A Simple Additive Weighting Vertical Handoff Algorithm Based on SINR and AHP for Heterogeneous Wireless Networks ...............................................347
    Sheng-mei Liu, Su Pan, Zheng-kun Mi, Qing-min Meng, and Ming-hai Xu
A Solution Algorithm for Network Equilibrium Models with Asymmetric User Costs ..........................................................................................................................................................................351

Xizhen Hu, Chongchao Huang, and Aihua Luo

Dong-sheng Wang and Wei-wei Pan

A Study on Chinese Agricultural Supply Chain under E-commerce .................................................................................................................................358

Xu Lei and Fu Xinhong

A Study on Constructing Index Systems of Construction Market Performance Appraisal .........................................................................................................................................................................361

Yang Wenan and Wang Mengjun

A Study on Lhasa Tibetan Prosodic Model Corpus Establishment ..................................................................................................................................................................................365

Qi Chen, Hongzhi Yu, Chen Chen, and Jing Shi

A Study on Mechanical Properties of High-Speed Rotor Plate Based on Finite Element Method (FEM) .........................................................................................................................................................................369

Chenglin Wang, Weiyi Wang, and Fan Chen

A Study on SPRT Termination Criteria’s Application in Computer Mastery Test Based on the Graded Response Model ........................................................................................................................................................................377

Dezhi Chen, Haiqi Dai, and Fenfang Li

A Study on the Mobility Level of Public Transit Based on the Transport Energy Consumption ..................................................................................................................................................................................381

Xu Yan

A Vibro-Acoustic Coupling Analysis of Bus Passenger Compartment Based on the Finite Element Method ..................................................................................................................................................................................386

Wang Yansong, Liu Xintian, and Li Yan

A Weighted Network Model Based on Triad Formation Mechanism ..................................................................................................................................................................................390

Bo Zhang, Yongcheng Xie, Xinxi Zhang, and Dan Wang

A New Approach to Absolute Stability for Lur’e Systems with Time-Varying Delay ..................................................................................................................................................................................393

Huimin Zhao and Zhiqiang Zuo

Accurate Distance Measurement Using an Eddy Current Sensor Based on an Analytical Model ..................................................................................................................................................................................397

Gu Jun and Yin Wuliang

Acoustic Detection of Crack in Aircraft Rivet Based on Entropy of Instantaneous Frequency ..................................................................................................................................................................................400

Chen Ling, Liang Jiahong, Li Zheng, and Wu Bing

Acoustic Modelling and Analysis of Vehicle Interior Noise Based on Numerical Calculation ..................................................................................................................................................................................404

Binxing Wang, Sifa Zheng, Lin Zhoul, Shengqiang Liu, Xiaomin Lian, and Keqiang Li

Acoustic-Vibratory Characteristics of SF480 Diesel Engine Block ..................................................................................................................................................................................408

Yumei Liu and Wenhua Yuan
Adaptive Appearance Tracking Model Using Subspace Learning Method ................................................... 413
  Gang Wu and Zhenmin Tang

Adaptive Detection of Idle State in Motor Imagery Based Brain Computer Interface ................................................................. 417
  Jun Lv

Adaptive Neutro-Fuzzy Inference System for Prediction of Blasting Vibration Velocity ........................................................... 421
  Zude Ding, Limin Peng, and Xiaodong Ai

Adaptive PID Speed Controller Based on RBF for Permanent Magnet Synchronous Motor System .................................................. 425
  Yuzeng Zhang, Jianxin Song, Shuhan Song, and Mingyin Yan

Adaptive Threshold for Fast Signal Detection in Multi-target Tracking .............................................................................. 429
  Haiying Shang, Jianping An, Weiya An, and Hangcheng Han

Adaptive Variable Structure Control for Matched Uncertain Markovian Jump Systems with Time-Delay ........................................... 433
  He Youguo, Zhao Lei, and Yan Minxiu

Aero Engine Rapid Response Collaborative Design and Manufacturing and its Key Technologies .................................................. 437
  Naijiang Yu, Xiaoguang Yang, Shan Li, and Jun Ji

Algorithm of Logistics Capability of Supply Chain Network ......................................................................................... 441
  Jiyun Jiang

Algorithms of Joint Failure Importance of Two Components ......................................................................................... 445
  Jianjun Chen and Weixing Bi

Allocation Model Construction and Empirical Research on Incremental Economic Capital of Credit Operations ...................... 449
  Houqing Fang, Jianmin He, Li Shen, and Houqing Fang

An Integrated Method to Generate a Cloud-Free Image Automatically Based on Landsat5 Data .................................................. 453
  Ying-zhao Ma, Wei-li Jiao, Gui-zhou Wang, Teng-fei Long, and Wei Wang

An Access Control Scheme for Mobile Agents System ......................................................................................... 457
  Dawei Xu and Jun Lv

An Adaptive Image Filter Based on Decimal Object Scale for Noise Reduction and Edge Detection .................................................. 461
  Xiaoliang Qian, Lei Guo, and Bo Yu

An Advanced Methodology for Rollover Warning of Heavy Duty Truck Based on Kalman Filter State Estimation ............................. 466
  Zhu Tianjun and Zong Changfu

An Algorithm Finding Multiple Roots of Polynomials Based on PID Neurons ................................................................. 470
  Guimei Li and Zhezhao Zeng

Analysis on the Influence of Parallelogram Mechanism to the Posture Error of Movable Platform in the Parallel Robot ........................................................................................................... 706
Jianye Guo, Jingkui Li, Jiashun Shi, and Yanli Zhang

Analytical Formulation of Coupling Effects Matrix Between Degrees of Freedom Motion of Parallel Robots ........................................................................................................... 711
Peter Ogbobe, Zhengmao Ye, Houzhuo Jiang, and Junwei Han

Analyze Overlapping Baker Square Wave Voltammograms Based on Data Mining ........................................................................................................... 715
Ling Gao and Shouxin Ren

ANN Models for Steam Turbine Power Output Toward Condenser Circulating Water Flux ........................................................................................................... 719
Jia Ruixuan and Xu Hong

Anti-cheating Monitoring System of the Electronic Truck Scale ................................................................................................. 722
Zhao Yanjun, Qu Bin, Gong Ruikun, and Pan Yifei
Application of Artificial Neural Networks and GIS in Urban Earthquake Disaster Mitigation ................................................................. 726
  
  Wang Junjie, Gao Huiying, and Xin Junfeng

Application of Assessment Model Based on Variable Fuzzy Set in Water Resources Carrying Capacity in Taohe River Basin ................................................................................................................. 730
  
  Jia Qi, Qiu Lin, Duan Chunqing, and Chen Xiaonan

Application of BP Artificial Neural Network in Structure Damage Identification ..................................................................................... 733
  
  Xiang-jun Chen, Zhan-feng Gao, and Wei Wang

Application of BP Network for Travel Behavior Analysis: Complexity Recognition of Trip Chaining ........................................................................ 738
  
  Dan Zhao, Chunfu Shao, Nuo Zhu, and Yinhong Liu

Application of Combined Model in Forecasting Logistic Volume of a Port ................................................................................................. 742
  
  Peihua Fu and Yajie Li

Application of D-InSAR Technique for the Bam Earthquake ....................................................................................................................... 746
  
  Peng Shurong, Wang Xueqin, and Liu Dan

Application of Fractional-order Model Reference Adaptive Control on Industry Boiler Burning System ..................................................................... 750
  
  YaLi He and RuiKun Gong

Application of Fuzzy Theory and Digraph Method in Security Assessment System ................................................................................................. 754
  
  Chengdong Xu, Chunsheng Hu, and Wei Nie

Application of Gray Relational Analysis for Course Evaluation ................................................................................................................ 758
  
  Chunna Zhao, Yingshun Li, Liming Luo, Yu Zhao, Yi Liu, and Hongmei Wang

Application of Hyperplane Real Coding Genetic Algorithm in Optimal Irrigation Schedule of Crop ................................................................. 762
  
  Qi Xinghui, Qiu Lin, and Chen Xiaonan

Application of Interval Extension Theory in Evaluating Bridge Condition ........................................................................................................... 766
  
  Yang Yaxun, Hao Xianwu, and Bai Xu

Application of PLC in Constant Air Pressure Control ................................................................................................................................. 771
  
  Jian-xiong Ye and Fa-yun Zhang

Application of RBF Neural Network in Assessment of Estuarine Wetland Health ................................................................................................. 774
  
  Zhiyi Lei and Shenbei Zhou

Application of the Superiority Evaluation Method in the Logistics Service Integrator Selection ................................................................................. 778

Reviewers - Volume 2 ..................................................................................................................................xxvii

2010 International Conference on Intelligent Computation Technology and Automation—Volume 2

Design of a Workpiece of 390 Diesel Engine Punching Dies Based on CAE ........................................3
   Li-jun Li, Jian Zhou, Shu-hui Ming, and Dai-yu Yang

Design of Belt Pulley Absorber in the Automobile Engine Based on the Dynamic Analysis ..............................7
   Jianye Guo, Lijie Zhao, Yanli Zhang, and Jingkui Li

Design of Control System of Brushless DC Motor Based on DSP .............................................................11
   Sun Chunxiang and Mo Bo

Design of Data Detection System Based on ARM Embedded System ............................................................15
   Zhang Lei and Wang Zhengfeng

Design of Dominant Pole Region Assignment with PID Controllers ..........................................................19
   Hwan Il Kang

Design of DSP-Based Digital Audio Processing System and Implementation of MPEG-1 Audio Layer III Decoding Algorithm .................................................................23
   Zhigang Dong, Guitao Cao, and Yan Wang

Design of Early Warning Indicator System for Enterprise Logistics Risks Based on Balanced Scorecard ............................27
   Liu Yongsheng and Ji Li
Design of Gas Flow Control System Based on ARM and Information Fusion ..................................................32
  Yongchun Liu, Xiaohong Yu, and Jing Yang
Design of Intelligence Low-Frequency Pulsed Magnetic-Field Therapeutic Instrument ..................................................36
  Xiao-Hui Wei and Hai-Yun Sheng
Design of Intelligent Transmitter Based on HART Protocol ........................................................................40
  An Guochen, Meng Zhiyong, Ma Hongtao, and Sui Bingdong
Design of Non-impact and Independent Exciting Chamber of Vibratory Roller ........................................44
  Jing Baode, Lin Dongbing, Liu Meiyu, and Zhu Xilin
Design of On-line Detection System for Apple Early Bruise Based on Thermal Properties Analysis ..................................47
  Zhou Jianmin, Zhou Qixian, Liu Juanjuan, and Xu Dongdong
Design of Quality Control System for Thickness Process of Thrust Washer ...............................................51
  Qian Jiawei, Qian Xiaoyao, and Yuan Jia
Design of Real-Time Monitoring System of Bridgman Single Crystal Growth Parameters ......................................55
  Dejie Song, Boxue Tan, and Juncheng Liu
Design on a DC Motor Speed Control ........................................................................................................59
  Zhu Haishui, Wang Dahu, Zhang Tong, and Huang Keming
Design on Vector Control System of AC Motor for Hybrid Electric Vehicles .............................................64
  Liying Wang and Zhenqi Yang
Design Solution of Scientific Research Achievements Management System Based on .NET Multi-layer Architecture .............................................68
  Sun Yigui and Xu Zhenqiang
Detection of Obstacle Based on Nocular Vision ...............................................................................................71
  Xiao-hua Wang, Wei-ping Fu, and Wei Chen
Detection of the Fabric Printing Quality Based on the Machine Vision ................................................................75
  Jing Junfeng, Kang Xuejuan, and Li Pengfei
Determination of Olefin Hydrocarbons in Gasoline by Partial Least-Squares ................................................79
  Gao Jun, Song Yandong, Ding Jibin, Zheng Bo, and Xu Jiangtao
Development and Application of a GIS-Based System for City Earthquake-Induced Hazard Estimate ..................82
  Wang Junjie, Gao Huaying, and Xin Junfeng
Development and Application of Teaching Evaluation and Feedback Information System Based on Multi-tiered Computing Paradigm .............................................86
  Lele Qin, Huixiao Zhang, and Yunchuan Xiao
Development of a Novel Large Capacity Charger for Aircraft Battery ......................................................90
  Tan Boxue, Wei Peiyu, and Zhang Housheng
Development of a Novel Portable Robotic Human Face Recognition System ...............................................94
  Li Meng and Dong Wei
Development of an Electromechanical Model for Piezo Actuated Common Rail Injectors

Liu Zhenming, Jiang Pei, Ouyang Guangyao, and Zhou Jiadong

Development of an Enhanced Obstacle Avoidance Algorithm for a Network-Based Autonomous Mobile Robot

Daewon Kim, Joomin Kim, Jongwoo Bae, and Youngsung Soh

Development on the Forming Principle and Control Model of Taper Leaf Spring

Liu Junying, Li Suling, and Gao Lei

Digital Meter Identify Based on Local Orientation

Guo Qingyu and Guo Yongfeng

Digital Watermarking and its Application in Image Copyright Protection

Jiang Xuehua

Digitalization Characters and Logics of Research on Low-Carbon Region

Yaoyu Lin, Yongxi Gong, Lei Yang, Jiaming Wu, and Guicai Li

Dim Target Detection Based on Image Features Analysis in Generalized S-transform Domain

Jie Zhang, Zhenming Peng, Qiheng Zhang, and Xiaoping Qi

Discrete Wavelet Soft Threshold Denoise Processing for ECG Signal

Qi Haibing, Liu Xiongfei, and Pan Chao

Discussion on Systematic Construction of Internal Control in China

Qiguo Huang

Discussion on the Evaluation Index and Methods for Reliability of Emergency Rescue System on Expressway

Zhi Wang and Dian-liang Xiao

Discussion on the Relation Between SVM Training Sample Size and Correct Forecast Ratio for Simulation Experiment Results

Shuguang Zhu, Fangzhou Zhu, Weibing Fan, Qian Mo, Zhiqiang Li, Xiaofeng Hu, and Guangya Si

Distribution Line Microprocessor Relay Protection System

Gaohua Liao and Jiebin Zhu

Do Equity-Based Incentives Improve the Corporate Performance?—The Empirical Evidence from the China Listed Companies after Equity Division Reform

Huihui Yang

Double Layer Micro-Surfacing Applied in the Maintenance of the Long-Span Bridge Layer on Highway

Tian Guohua

Double-Acting Cylinder PWM Pneumatic Servo System’s Analysis Method

Optimization of Furnace Combustion Control System Based on Double
Cross-Limiting Strategy ................................................................................................................858
  Liu Zenghuan, He Guangxiang, and Wang Lizhen
Optimization of the VRP with Single Depot Based on Vehicle Coordination Strategy ................................................................. 862

_Song Li and Ling-hui Chen_

Optimization of TT and C Carrier Tracking Loop in Dynamic Environments ......................................................... 866

_Zhu Chen, Yuan-qin Wang, Xiao-min Hou, and Wen-ge Yang_

Output Feedback L2 Disturbance Attenuation Control of Linear Parameter-Varying Singular Systems .................... 872

_Jianyong Li, Dezhen Wang, and Yanhong Liu_

Parameter Selection for Segmentation in Object-Oriented Classification of Remotely Sensed Imagery ......................... 876

_Shukui Bo and Xinchao Han_

Passenger-Sharing Rate Model of New Expressway under Integrated Passenger Transport Channel ................... 880

_Hong-li Gao, Yong Luo, Li-ying Gao, and Hui Li_

PD Control of Robot Manipulators with Uncertainties Based on Neural Network .................................................... 884

_Wenhui Zhang, Naiming Qi, and Hongliang Yin_

Pedestrian’s Critical Cross Gap and its Application in Conflict Simulation ............................................................... 889

_Wang Junhua_

Performance Evaluation Model Based on DEA with Worst Decision-Making Units .................................................. 893

_Gang Li, Shuang-hong Qu, and Jing-hua Jiang_

Perfusion-Style Semi-rigid Pavement Design and Construction of Materials ............................................................. 897

_Hongzhi Li and Jianlong Zheng_

PID Coefficient Designs for the Automatic Voltage Regulator Based on a Fourth Order Particle Swarm Optimization ................................................................. 900

_Hwan Il Kang, Min Woo Kwon, and Hwan Gil Bae_

PID Control and Simulation of the Automatic Correcting System for Lorry-mounted Crane Telescopic Boom .......... 905

_Xia Changgao, Zhu Zhongming, and Qiu Wenming_

PLC Based Test Platform for Wind Turbine Gearbox ......................................................................................... 909

_Zou Xinyu_

Port Throughput Analysis of China and Five Member Countries of ASEAN ......................................................... 914

_Lin Khin and Hualong Yang_

Predicting the Performance of Helico-Axial Multiphase Pump Using Neural Networks ....................................... 918

_Jinya Zhang, Hongwu Zhu, Huan Wei, Zhuowei Li, and Lei Xiong_

Prediction of Urban Short-Term Water Consumption in Zhengzhou City ................................................................. 922

_Jianhua Liu, Rui Zhang, and Lailing Wang_
Predictor-Corrector Smoothing Newton Method for Solving the Second-Order Cone Complementarity .................................................................927
Huali Zhao and Hongwei Liu

Prevention Strategy of Pseudo-human Capital from Knowledge Transfer Perspective ...........................................................................................................931
Fei-long Chen

Principle of Weight Dynamic Change Fuzzy-PID Integrated Control for the Displacement Ratio of Multi-range HMCVT ..........................................................935
Zhang Mingzhu, Zhou Zhili, and Xu Liyou

Principle-Agent Analysis and Risk Prevention of the Agent Construction System in Government Investment Project .................................................................939
Yang Wenan and Xu Tianhua

Promotion of Variable Precision Covering Rough Set Model .................................................................943
Dingjun Chen

Propagation Properties of Symmetric Boolean Functions .................................................................................947
Fu Li Shi and Hu Bin

PSO-BP Neural Network Model for Predicting Water Temperature in the Middle of the Yangtze River .........................................................................................951
Guo Wenxian, Wang Hongxiang, Xu Jianxin, and Dong Wensheng

QoS Control of Web Server Based on Active TCP Connection Management and Delay Prediction .................................................................955
Yu Guofang and Tan Xianglu

Quasi-dynamic Traffic Assignment Method Based on Traffic Control Strategy under Freeway Net.................................................................959
Wang Jianjun, Qiu Liping, He Qianqian, and Yang Fashun

Rainfall-Runoff Simulation Using Simulated Annealing Wavelet BP Neural Networks .................................................................963
Yuhui Wang, Yunzhong Jiang, Xiaohui Lei, and Wang Hao

RBF Neural Network Model Based on Improved PSO for Predicting River Runoff .................................................................968
Guo Wenxian, Wang Hongxiang, Xu Jianxin, and Zhang Yunfeng

Realization of the Asymmetrical 3x3 Optical Interferometer Accelerometer Demodulation Algorithm .................................................................................972
Tian Lei, Wang Jinhai, Zheng Yu, Wang Feng, and Tian Qianqian

Real-Time Hand Gesture Recognition for Service Robot .................................................................976
Wang Ke, Wang Li, Li Ruiyong, and Zhao Lijun

Reasonable Length of Acceleration Lane in Freeway Interchange Areas .................................................................980
Wenbin Zhang, Shunying Zhu, Bo Wang, and Zhigang Du

Recent Development of Forest Industrial Robot in China .................................................................984
Xiuli Guo and Huaimin Lu
Recognition of Wood-Floor Damages Based on Wavelet Transform and Neural Network Ensemble .............................. 988
Zhao Jian and Zhao Dong

Recognizing Characters Based on Gaussian-Hermite Moments and BP Neural Networks ........................................... 992
Youfu Wu, Yongwu Wu, Gang Zhou, and Jing Wu

Reconstructing Tree Trunks from Point Clouds Using PSO ..................................................................................... 996
Walter Chen and Pown Chen

Relational Embeddedness, Manufacturer-Supplier Collaboration and Performance Improvement: A Theoretical Model ................................................................. 1000
Yanchun Wan and Chunhua Chen

Reliability Research on Travel Time of Transportation Network ........................................................................ 1005
Qi Chao He and Luo Wang

Reliability-Based Design Optimization of Full-Floating Automobile Semiaxle Using Evidence Theory ......................... 1008
Huixin Guo, Shiming Hao, and Puhua Tang

Remote Monitoring Intelligent System Based on Fingerprint Door Lock .......................................................... 1012
Wu Ping, Wu Guichu, Xie Wenbin, Lu Jianguo, and Li Peng

Remote Monitoring System of Mine Vehicle Based on Wireless Sensor Network ...................................................... 1015
Hongmei Wu, Li Liu, and Xiurong Yuan

Removing Shadows and Ghosts with an Improved Background Mixture Model .................................... 1020
Zhenli Zhu and Yujing He

Research and Development of a Small Wheel-Pedrail Patrol Robot in Forest .................................................. 1024
Xiuli Guo, Huaimin Lu, and Peng Sun

Research and Development of Intelligent Auto-Leveling Controller ......................................................... 1028
Fengying Cui

Research and Development on Experimental Teaching Software for Digital Image Processing .................... 1032
Ling Lu, Wancheng Yi, and Lei Wang

Research and Implementation for the Distributed Bridge Structure Monitoring System Based on IEEE 1588 Protocol .................................................................................. 1035
Fang-liang Liu, Na Li, Liang-ping Feng, Zhi-qiang Liu, and Bing Zhou

Research and Implementation of the CMOS Camera Device Driver Based on S3C2440 ..................................................... 1039
Min Zhang, Jin-guang Sun, and Shi Wang

Research of Cooperative Diversity Applied in OFDM System ........................................................................ 1043
Weiwei Liu, Haixin Sun, Weijing Shen, and Yonghui Zhang

Research of Optimal Structural Design for Mechanical Products Based on Data Mining ........................................ 1047
Jing Tao, Niandong Yin, Shenghua Yan, and Qingming Wu
Research of Signal Control Strategy at Intersection Based on Pedestrian Priority After Earthquake ..........................................................................................................................................................................................1051
   Liu Jian, Luo Yong, and Chen Bin
Research of SOA Based on Automobile Industry Chain Collaboration Platform ..........................................................................................................................................................................................1055
   Fan Lilin, Zhang Lei, Liu Qian, and Yue Dongli
Research of University Employment Management System Based on CRM ..................................................................................................................................................................................................................................1059
   Bing Liu, Geng Zhao, and Yuan Su
Research of Vannamei Expert System Based on CBR and Grey AHP ..........................................................................................................................................................................................................................1065
   Hongchun Yuan, Zhuo Mao, and Bo Zhao
Research of Variable Structure Inverse System Method for Turbo-generator Valve Control ..........................................................................................................................................................................................................................................................1069
   Lingzhi Cao, Chunwen Li, Yujie Zhao, and Yuan Chang
Research on a Forestation Hole Digging Robot ........................................................................................................................................................................................................................................................................1073
   Du Danfeng, Ma Yan, Guo Xiurong, and Lu Huaimin
Research on a Novel Digital Photovoltaic Array Simulator ........................................................................................................................................................................................................................................................................1077
   Zhang Housheng and Zhao Yanlei
Research on Active Purchasing Strategy in the Context of Supply Chain ........................................................................................................................................................................................................................................................................1081
   Weifeng Yang and Xinyi Zheng
Research on Analytical Methods of Electric Load Based on Data Mining ........................................................................................................................................................................................................................................................................1085
   Yun Lu and Yinuo Huang
Research on Application of Enabling Technologies in Management System for Third-Party Logistics ........................................................................................................................................................................................................................................................................1089
   Pengshou Xie and Zhiyuan Rui
Research on Attraction Scope of Urban Rail Transit Station to the Conventional Bus Passenger Flow ........................................................................................................................................................................................................................................................................1094
   Ting Ting Tong and Li Qin Cheng
Research on Automobile ABS Detection Based on Alterable Adhesion Coefficient ........................................................................................................................................................................................................................................................................1098
   Zhang Libin, Su Jian, Shan Hongying, Su Lili, and Shan Hongmei
Research on Back Pressure of Exhaust Gases for CMWF DPF ........................................................................................................................................................................................................................................................................1102
   Bai Bing, Guo Xiurong, Wang Fenghu, and Hou Xuling
Research on Bond Graph Simulation for Dynamic Performance Analysis of MEMS ........................................................................................................................................................................................................................................................................1106
   Yang Liu, Futing Bao, and Qiang Cai
Research on Clustering Routing Algorithms in Wireless Sensor Networks ........................................................................................................................................................................................................................................................................1110
   Qing Bian, Yan Zhang, and Yanjuan Zhao
Research on Coal Logistics Warehousing Scheduling Management ........................................................................................................................................................................................................................................................................1114
   Litian Duan, Yongfeng Pang, Zhenxing Zhao, and Shi Qiu
Research on Composition and Formation Mechanism of Penetration Acceleration Signal ................................................................. 1118
   Bai Li, Liu Mingjie, Li Xiaofeng, and Wang Shihu

Research on Control Strategies of Steer-by-Wire System ................................................................. 1122
   Duan Jianmin, Wang Ran, and Yu Yongchuan

Research on Co-simulation Using ADAMS and MATLAB for Active Vibration Isolation System ................................................................. 1126
   Da-lin Zhu, Jin-yi Qin, Yi Zhang, Hu Zhang, and Min-min Xia

Research on Cutting Temperature Using FEM Method while Machining Titanium Alloy TC4 ................................................................. 1130
   Dong Liu, Wuyi Chen, and Rui Shi

Research on Data Mining of Public Transit IC Card and Application ................................................................. 1134
   Xiuhua Han, Jia Mao, and Ning Jin

Research on Decision Risk of Driving Behavior Based on Traffic Information Asymmetry Degree ................................................................. 1138
   Yuanyuan Ren, Xiansheng Li, and Hongfei Liu

Research on Detecting and Simulating of Deflective Angle of Axle Placed ................................................................. 1142
   Libin Zhang, Shubin Ge, Hongying Shan, Yongjun Tian, and Jiguang Hou

Research on Diversity Measure in Particle Filter ................................................................. 1146
   Jinxia Yu, Yongli Tang, and Wenjing Liu

Research on Dynamic Simulation of Remotely-Operated Weapon Stations Servo Control System ................................................................. 1150
   Bao-quan Mao, Jun-yan Zhao, Zhen-hui Xu, and Li Xu

Research on Electrostatic Micropump Pull-in Phenomena Based on Reduced Order Model ................................................................. 1154
   Wen-yao Liu

Research on Estimation of Dynamic Link Impedance Based on Information Fusion ................................................................. 1158
   Xueying Gao, Zhaosheng Yang, and Wei Yang

Research on Evolution of Chinese Telecommunication Industry System Based on Dissipative Structure Theory ................................................................. 1163
   Fei Chen and XiaoHang Zhang

Research on Framework of Distributive NC System Based on Field-Bus ................................................................. 1169
   Tao Wang, Qingjian Liu, and Liwen Wang

Research on Hierarchy of Urban Rail Transit Hub ................................................................. 1173
   Jia Wang and Wei Yu

Research on Integrated Technology of RC Active Filter Optimization ................................................................. 1177
   Zhang Sheng, Su Jishi, Yu Shuibao, and Chen Xi

## 2010 International Conference on Intelligent Computation Technology and Automation—Volume 3

Research on Inter-meshing Zones of Single Screw Compressor Based on Matlab .................................................. 3  
*Wang Ke, Shen Yang, Sun Xingwei, and Qi Yang*

Research on Layout of Airport Logistics Park Based on Graph Theory: An Empirical Study of Ningbo Airport Logistics Park ................................................................. 6  
*Changbing Jiang, Lijun Bai, and Wenwen Zheng*

Research on Load Balancing Based on Multi-agent in Ubiquitous Networks ............................................................ 10  
*Qing Jiang, Mei Xu, Lun Tang, and Qian-bin Chen*

Research on Membership Function of Ecological Water Level Based on Fuzzy Membership Degrees ..................................... 14  
*Zhang Lili, Yin Junxian, and Jiang Yunzhong*

Research on Mission Success Evaluation Model of the Combat Units .............................................................................. 18  
*Wei Liu and Yue Dong*

Research on Modeling and Simulation of Activated Sludge Process .................................................................................. 22  
*Wei Yao, Wu Li, and Qiao Junfei*

Research on Modeling Method Based on Graphic Description File .................................................................................. 28  
*Guimei Bai and Mingzhao Li*
Research on Molding Ambient Temperature Influencing to the Performance of Friction Materials ..................................................................................................................................................32
Qingwen Qu, Haoqian Zhang, Lan Zhou, and Chengjun Wang

Research on MPPT for Solar Cells Based on Flyback Converter .................................................................36
Zhang Housheng

Research on Multi-class CUSUM Algorithm for Anomaly Detection of WSN .................................................40
Yang Bo and Wang Xueyuan

Research on Network Safety Operation of Highway Segment ..............................................................................45
Zhi-bin Qin

Research on NOx Emissions of the Engine Fueled with M15 ...........................................................................49
Li Xinguang and Yu Jianguo

Research on Observer and Compensator for Noise Disturbances in CNC Servo System .......................................................................................................................53
Guoyong Zhao, Yugang Zhao, and Lili Zhang

Research on Operational Mode of Small and Medium-Sized Logistics Enterprises Symbiotic System .................................................................57
Xiao Zou, Zuo-yi Xiang, and Feng Zhao

Research on Optimization Algorithm for Spatial Position Control of Robotic Visual Servo System ..................61
Shi Yuqiu, Pan Shenghui, Ma Zhaomin, and Han Junfeng

Research on Performance Evaluation of Logistics Enterprises Based on the Balanced Scorecard ..........................65
Hu Mingming, Wang Xiong, Li Shun, Deng Yingliu, Yue Qingquan, and Tang Quanfu

Research on Predicting Fuel Spray Characteristics of Diesel Engine .................................................................69
Hu Mingjiang and Shen Chaoying

Research on Propagation of Attribute Uncertainty in GIS ..................................................................................73
Zhou Dimin

Research on QoS of IP-CME .................................................................................................................................77
Dongli Yue, Zimei Xie, Suilhua Wang, and Lilin Fan

Research on Radio Frequency Identification Auto-charging System for Superhighway ........................................81
Dejie Song and Boxue Tan

Research on Real-Time Network Security Risk Assessment and Forecast ..............................................................84
Niandong Liao, Feng Li, and Yun Song

Research on Reconfigurable HIS Platform .........................................................................................................88
Chunjiang Yao, Xiaohu Chen, Xuping Wang, and Yutao Zhou

Research on Remote Monitoring System for Flat Screen Printing Machine Based on Java ................................92
Jing Junfeng, Nie Luhua, and Li Pengfei

The Research on the WebGIS Application Based on the J2EE Framework and ArcGIS Server ..........................................................................................................................................................942
Han Lu, Wang Nihong, Wang Chang, and Chi Yujia

The Scale-Rate as a Novel Feature of Complexity for Digital Images ..........................................................................................946
Jipeng Du, Yanming Gao, Bo Wang, Li Zhang, and Meng Tan

The Sensitivity Analysis, Optimization and Uncertainty Assessment of the Land Surface Model Parameters ..........................................................................................................................................................950
Gaoli Su, Qinhuo Liu, Fangping Deng, and Xiaozhou Xin

The Simulation and Analysis of High-Power-Factor and Energy Feedback of Elevator Drive System on Matrix Rectifier .................................................................................................................................................................955
Wei Gong, Huihui Wang, and Lei Pan

The Sliding Variable Structure Control of Mixed Magnetic Bearing System ..........................................................................................................................................................959
Li Hua and Chen Xiaolong

The Spatial Allocation of Drivers’ Visual Attention During Driving in Traffic Environment ................................................................................................................................................................................963
Ru Ting Xia, Jiang Fan, and Zhengchu Wang

The Structure and Evolution of Incomplete Competitive System Based on a Random Choice Mechanism ..........................................................................................................................................................966
Chuan-feng Huang, De-fan Zeng, and Jun Chu

The Study Based on Cluster Analysis of Investment Value of Listed Companies in Growth Enterprise Board ................................................................................................................................................................................970
Gu Yu and He Zhiqiang
The Study for Algorithm of Linear Interpolation Based on Bipolar Coordinates ........................................977
W. Li, N. Fan, and C. Yang

The Study of Announcement Effect of Block Transfers: Evidence from China after Equity Splitting Reform .................................................................................................................................980
Li Peng and You-liang Li

The Study of DMC-PID Cascade Control of the Saccharification Temperature of Brewage ..........................................................985
Shang Jiliang and Wang Guangguang

The Study of Wireless Multimedia Sensor Network Multiple Description Coding for Coal Mine .................................................................................................................................989
Renke Sun, Enjie Ding, and Duan Zhao

The Study on an Intelligent General-Purpose Automated Software Testing Suite .................................................................................................................................993
Xiaojun Wu and Jinhua Sun

The Study on Applies of Knowledge Management in Enterprises .................................................................................................................................997
Gu Yu and Shi Jincai

The Study on Beforehand Emergency Optimal Model for a Kind of Dispatch Problem .................................................................................................................................1002
Zhang Yuefeng and He Jianmin

The Subsiding Predict of Soft Soil Ground Based on Immune Genetic Algorithm .................................................................................................1006
Jianlin Liang and Xingyan Cheng

The Sustainable Development Research of Copula System on Real Estate Project Operation Environment .................................................................................................1009
Zhang Jingmin, Chen Liwen, and Sun Weifeng

The Switch Time Simulation of a Kind of Jet Element and its Effect on Control Precision .................................................................................................................................1013
Wuju Ma, Xiaoxian Yao, and Jianwei Cheng

The System of Wireless Smart House Based on GSM and ZigBee .................................................................................................1017
Gao Mingming, Shao Liangshan, Hui Xiaowei, and Sun Qingwei

The Theoretical Return of Social Security Reform in China .................................................................................................................................1021
Wan Yina

The Thermal Insulation Properties for Wall Material with Various Water Contents.................................................................................................................................1025
Zhang Chuancheng and Lu Haijun

The Varying Rule on Internal Feature Points Strain and Stress of Pieces Rolled with Multi-wedges Cross Wedge Rolling .................................................................................................1028
Zhao Jing and Lu Liqun

The Warehouse Safekeeping Management System Based on Video Content Analysis Technology .................................................................................................................................1032
Yao Zhiying
The Water-Distribution Networks Waterpower Calculation Based on Immune
Genetic Algorithm .................................................................1036
  Quansheng Luo and Jing Tian
The Weak Orders on Pyramid Fuzzy Number Space ..........................................................1040
  Wang Guixiang, Li Yuqi, and Wang Tengfei
Three Dimensional Numerical Analysis and Construction Optimization of
a Super-Deep Vertical Shaft .........................................................................................1044
  Li Jingqi, Xu Wei, Duan Chaojing, and Dong Zhaohai
Three-Dimensional Reconstruction of Foot Based on Marching Cubes .........................1048
  Wang Hongjian, Tang Yuelin, and Luo Fen
Torque-Power-Speed Hybrid Control of Marine Electric Propulsion System ....................1052
  Guichen Zhang and Jie Ma
Track Irregularity Analysis Based on Empirical Mode Decomposition .............................1057
  Z.W. Li and S.L. Lian
Tracking Control of Nonlinear Systems with Uncertain Multiple Time Delays Based on Dynamic Adaptive Neural Network .................................................................1061
  Zhang Min and Hu Shousong
Traffic Adaptive Control Framework for Real Time Large-Scale Emergency Evacuation ....................................................................................................................1065
  Guiyan Jiang, Zhiqiang Meng, Zhengyan Wu, Qiao Li, and Chunqin Zhang
Traffic Congestion Identification Method Based on GPS Equipped Floating Car ................1069
  Ande Chang, Guiyan Jiang, and Shifeng Niu
Traffic Flow Combination Forecasting Based on Grey Model and GRNN ..........................1072
  Xianyan Kuang, Cuiqin Wu, Yanguo Huang, and Lunhui Xu
Traffic Incident Duration Prediction Based on Artificial Neural Network .........................1076
  Liping Guan, Weiming Liu, Xiangyuan Yin, and Laping Zhang
Traffic Observation and Analysis of Road Snow Hazard in China ..................................1080
  Lili Zheng, Tongqiang Ding, Xiuhua Han, and Jian Sun
Traffic-Induced Model ..................................................................................................1084
  Xin Zhang
Training Method of Support Vector Regression Based on Multi-dimensional
Feature and Research on Forecast Model of Vibration Time Series .................................1087
  Han Zhonghe, Zhu Xiaoxun, and Yang Xiaojing
Transfer Alignment Algorithm Based on Attitude Information .......................................1091
  Li Guangchun, Zhang Qintuo, and Gao Yanbin
Transformation of Chaos in Traffic Flow Based on Distance Headway ..........................1095
  Liu Lijun, Ma Hongxia, and Li Song
Trust Evaluation Model with Stakeholder-Centric in Grids ............................................1099
  Min Yang, Weifeng Shi, and Jiong Zheng
Turbine Vibration Fault Analysis and Processing Method Based on Envelope Analysis ...................................................................................................................................................................1102
Gao Hongbin, Sun Nan, Liu Mingfu, and Lu Gailin

UAV Path Planning Based on Bidirectional Sparse A* Search Algorithm .................................................................1106
Bo-bo Meng and Xiaoguang Gao

Urban Traffic Control Tentative Exploration in Vehicle-Infrastructure Integration Environment .......................................................................................................................................1110
Jiao Yao, Xiaoguang Yang, Di Wu, and Baiying Shi

Use of Adaptive Resonance Theory for Evaluating Intelligent Residential Communities in China .................................................................................................................................................................1114
Zhiye Huang

User-Based Query Network Design—Integration of Distributed Information Systems .........................................................................................................................................................................1118
Jun Zhang and Shu-Wang Li

Utilizing Subsection Arc Algorithm to Optimize the Path for a Complex Mobile Entity in a Strait Environment .........................................................................................................................................................................1122
Liu Yajie, Wang Hangyu, and Xie Jun

Vehicle Exhaust Monitoring System Based on ASM ...............................................................................................................1125
Chen Peijiang

Velocity Analysis for Continuous Viscosity Model under Thin Film Lubrication ................................................................................................................................................................................................................1129
Qu Qingwen, Zhang Haoqian, Zhou Lan, and Meng Lixia

Very Short-Term Load Forecasting Based on Neural Network and Rough Set .................................................................................................1132
Pang Qingle and Zhang Min

Virtual 3D Campus Design and Implementation ..................................................................................................................................................................................1136
Wu Fenghua and Chen Guangzhao

Vision-Based Guidance Line Detection in Row Crop Fields ..................................................................................................................1140
Xue Jinlin and Ju Weiping

Visualization Test for Spray Development Process in Diesel Engine ..................................................................................1144
Wenhua Yuan, Zhixia He, and Qian Wang

VMI Coordination Based on Price Subsidiary Mechanism under Exogenous Price .........................................................................................................................................................................................................................................1147
Peng-fei Liu, Pan-pan Yu, and Wen-zhong Xiao

War Design Engineering Based on Dynamic Bayesian Network and Blackboard Mechanism .........................................................................................................................................................................................................................................1151
Guopu Ma, Jichang Sha, and Chao Chen

Wavelet Analysis of Track Profile Irregularity for Beijing-Tianjin Intercity High Speed Railway on Bridge ..................................................................................................................................................1155
Zeng Zhiping, Liang Fei, and Zhang Yong

Web Object Block Mining Based on Tag Similarity ..................................................................................................................1159
Rui Liu, Rui Xiong, and Kun Gao
Web Page Clustering Based on Searching Keywords ................................................................. 1163
   Taoying Li and Yan Chen
