2010 IEEE International Conference on Software Science, Technology & Engineering

(SWSTE 2010)

Herzlia, Israel
15-16 June 2010
Welcome Address
Message from the Chair of the Israeli Chapter of the IEEE Computer Society
About ILTAM
Organizing Committee Members
Program Committee
Technical Sessions: Refereed Papers

Session 1.1: Modeling and Design
Integrating Domain-Specific Programming into Software Design

Uri Shani and Aviad Sela
Methodology of Discrete System Simulation Modeling with SimWiz

Moshe Asher Cohen
Round-Trip Modeling Using OPM/PL

Mayer Goldberg and Guy Wiener

Session 1.2: Algorithms
Dynamic Setup for Clusters with Multi-master Architecture

Kateřina Opočenská, Jakub Yaghob, and Filip Zavoral
A Pattern-Based Approach for Monitor Adaptation

Ricardo Contreras and Andrea Zisman
Distributed Event-Based System Features: Representation and Reasoning

Rolando Blanco and Paulo Alencar
Session 2.1: Methodologies

Agility in a Large-Scale System Engineering Project: A Case-Study of an Advanced Communication System Project

Amir Shatil, Orit Hazzan, and Yael Dubinsky

Reuse of Requirements Reduces Time to Market

Leah Goldin, Michal Matalon-Beck, and Judith Lapid-Maoz

Abstraction Level Hierarchy: The Model and its Significance for Software Engineering

Hanania T. Salzer

Session 2.2: Ethics in Software Engineering

Ethics Test Results Before and After Ethics Training: A Disturbing Experience

Daniel M. Berry and Brian Berenbach
