## HPCS 2010 TECHNICAL PAPERS

### Invited Paper

**Practical Distribution of Random Streams for Stochastic High Performance Computing**

*David R.C. Hill*

(CNRS UMR 6158 - Université Blaise Pascal and Clermont Université, France)

### Full Papers

**An Efficient Multicore Implementation of Planted Motif Problem**

*Naga Shailaja Dasari, Ranjan Desh, M. Zubair*

(Old Dominion University, Virginia, USA)

**Integrated Accelerator Architecture for DNA Sequences Alignment with Enhanced Traceback Phase**

*Nuno Sebastião, Tiago Dias, Nuno Roma, Paulo Flores*

(INESC-ID / IST-TU Lisbon, Lisbon, Portugal)

**CuHMMer: A Load-Balanced CPU-GPU Cooperative Bioinformatics Application**

*Ping Yao, Hong An, Mu Xu, Gu Liu, Xiaojing Li, Yaobin Wang, Wenting Han*

(University of Science and Technology of China (USTC), Hefei; Key Laboratory of Computer System and Architecture, Chinese Academy of Sciences, Beijing, China)

**GPU Acceleration of the Dynamics Routine in the HIRLAM Weather Forecast Model**

*Van Thieu Vu, Gerard Cats, and Lex Wolters*

(Leiden University; Royal Netherlands Meteorological Institute, The Netherlands)

**Parallel Computing of Catchment Basins of Rivers in Large Digital Elevation Models**

*Hiep-Thuan Do, Sébastien Limet, and Emmanuel Melin*

(LIFO--Université d’Orléans, Orléans, France)
Low Level Metrics to High Level SLAs - LoM2HiS Framework: Bridging the Gap Between Monitored Metrics and SLA Parameters in Cloud Environments ........................................ Vincent C. Emeakaroha, Ivona Brandic, Michael Maurer, Schahram Dustdar
(Vienna University of Technology (TUWIEN), Vienna, Austria)                          48

Declarative Task Delegation in OpenMOLE ........................................................................ Romain Reuillon, Florent Chuffart, Mathieu Leclaire, Thierry Faure, Nicolas Dumoulin, David Hill
(Institut des Systèmes Complexes, Paris; Cemagref, Aubière; LIMOS, Aubière; Laboratoire de l’Informatique du Parallélisme, Lyon, France) 55

A New Resource Mapping Technique for Grid Workflows in Advance Reservation Environments J awad Ashraf, Thomas Erlebach
(University of Leicester, U.K.) ........................................................................................................ 63

Resilient Workflows for High-Performance Simulation Platforms ........................................ Toân Nguyên, Laurentiu Trifan, Jean-Antoine Désidéri
(INRIA, Saint-Ismier, France) ........................................................................................................ 71

FAFNER2: A Comparison Between the Grid and the MPI Versions of the Code ................... Manuel Rodríguez-Pascual, Francisco Castejón, Antonio Juan Rubio-Montero, Rafael Mayo García, Ignacio Martín Llorente
(CIEMAT, Madrid; DSA-Research.org, Universidad Complutense de Madrid, Madrid, Spain) 78

Performance Evaluation of Virtual Machines in a Service-Oriented Grid Testbed ................ Carlos R. Senna, Luiz F. Bittencourt, Edmundo R.M. Madeira
(UNICAMP - University of Campinas, São Paulo, Brazil) ............................................................. 85

Using libPcap for Monitoring Distributed Applications ....................................................... Vitor Duarte, Nuno Farruca
(CITI/DI-FCT/Universidade Nova de Lisboa, Caparica, Portugal) .................................................. 92

Towards Microsecond Biological Molecular Dynamics Simulations on Hybrid Processors .... Scott Hampton, Pratul K. Agarwal, Sadaf R. Alam, Paul S. Crozier
(Oak Ridge National Laboratory, Tennessee, USA; Swiss National Supercomputing Center, Manno, Switzerland; Sandia National Laboratories, New Mexico, USA) 98

Novel Performance Optimization of Large-Scale Discrete-Event Simulation on the Cell Broadband Engine Qi Liu, Gabriel Wainer, Ligang Lu, Michael Perrone
(Carleton University, Ontario, Canada; IBM T. J. Watson Research Center, New York, USA) ........................................................................................................ 108

Extending the Educational Scope of a Particle-Based Simulation Framework Through Parallelization T. Francis Chen, Gladimir V.G. Baranoski
(University of Waterloo, Ontario, Canada) .................................................................................... 115
Using Replication and Checkpointing for Reliable Task Management in Computational Grids .................................................. 125
Sangho Yi, Derrick Kondo, Bongjae Kim, Geunyoung Park, Yookun Cho
(INRIA, Grenoble, France; Seoul National University, Korea)

Task-Block Identification and Movement for Layer-Based Scheduling Algorithms ......................................................... 132
Raphael Kunis, Gudula Rünger
(Chemnitz University of Technology, Chemnitz, Germany)

Strategy of Resource Brokering for Efficient Parallelization of MLP Training ......................................................... 140
Volodymyr Turchenko, Lucio Grandinetti
(DEIS, University of Calabria, Rende(CS), Italy)

An Experimental Study of Greedy Routing Algorithms .................................................................................................. 150
Stavros Athanassopoulos, Christos Kaklamanis, Ilias Laftsidis, Evi Papaioannou
(RACTI - University of Patras, Rion, Greece)

Pseudo-Stabilizing Causal Ordering ................................................................................................................................. 157
Diganta Goswami, Shirish Surti
(Indian Institute of Technology - Guwahati, Assam, India)

Transactional Memory: How to Perform Load Adaption in a Simple and Distributed Manner ......................................... 163
David Hasenfratz, Johannes Schneider, Roger Wattenhofer
(ETH Zürich, Zürich, Switzerland)

Reducing Memory Requirements of Stream Programs by Graph Transformations .................................................. 171
Pablo de Oliveira Castro, Stéphane Louise, Denis Barthou
(CEA, LIST, Gif-Sur-Yvette; University of Bordeaux - Labri / INRIA, Talence, France)

Workshops and Special Sessions

Nano-Technology Aware Investigations on Fault-Masking Techniques in the Presence of High Fault Probabilities ........................................................................................................... 181
Matthias Sand, Volkmar Sieh, Dietmar Fey
(Friedrich-Alexander-Universität Erlangen-Nurnberg, Erlangen, Germany)

The Many Java Core Processor (MANJAC) (Invited) ........................................................................................................... 188
Sascha Uhrig
(University of Augsburg, Augsburg, Germany)

Deployment Models: Towards Eliminating Security Concerns from Cloud Computing ................................................ 189
Gansen Zhao, Chunming Rong, Martin Gilje Jaatun, Frode Eika Sandnes
(South China Normal University, China; University of Stavanger, Norway; SINTEF ICT, Norway; Oslo University College, Norway)

Service Migration Within the Cloud: Code Mobility in SP2A ............................................................................................ 196
Michele Amoretti, Maria Chiara Laghi, Fabio Tassoni, Francesco Zanichelli
(University of Parma, Parma, Italy)
Junqiu Feng, Peiran Wen, Jinbo Liu, Hui Li
(Always Online Technologies Co., Ltd.; Topway Video Com. Inc.; Peking University, China)

An Efficient Approach to Intelligent Real-time Monitoring Using Ontologies and Hadoop ...... 209
Tomasz Wiktor Wlodarczyk, Chunming Rong, Csongor I. Nyulas, Mark A. Musen
(University of Stavanger, Norway; Stanford University, California, USA)

A Dynamic Energy-Aware Model for Scheduling Computationally Intensive Bioinformatics Applications ............................................................. 216
Sachin Pawaskar, Hesham H. Ali
(University of Nebraska at Omaha, Nebraska, USA)

rCUDA: Reducing the Number of GPU-Based Accelerators in High Performance Clusters ...... 224
José Duato, Antonio J. Peña, Federico Silla, Rafael Mayo, Enrique S. Quintana-Orti
(Universidad Politécnica de Valencia, Valencia, Spain; Universidad Jaume I, Castellon, Spain)

Energy Efficiency in Automotive Networks: Assessment and Concepts ........................................ 232
Christoph Schmutzler, Andreas Krüger, Fred Schuster, Martin Simons
(Daimler AG, HPC: 050/G007, 71059 Sindelfingen, Germany)

A Cellular Genetic Algorithm for Scheduling Applications and Energy-Aware Communication Optimization .............................................................. 241
Mateusz Guzek, Johantan E. Pecero, Bernabé Dorronsoro, Pascal Bouvry, Samee U. Khan
(University of Luxembourg, Luxembourg; North Dakota State University (NDSU), North Dakota, USA)

Enhanced Distance Based Broadcasting Protocol with Reduced Energy Consumption ............... 249
Patricia Ruiz, Pascal Bouvry
(University of Luxembourg, Luxembourg)

Securing Cryptographic Key with Fuzzy Vault Based on a new Chaff Generation Method ...... 259
Mohamed Khalil-Hani, Rabia Bakhteri
(University Teknologi Malaysia, Johor, Malaysia)

Fast Learning For Multibiometrics Systems Using Genetic Algorithms ............................................. 266
Romain Giot, Mohamad El-Abed, Christophe Rosenberger
(GREYC Laboratory, ENSICAEN - Université de Caen Basse-Normandie, Caen, France)

Timed Protocols Insecurity Problem is NP-Complete ................................................................. 274
Massimo Benerecetti, Nicola Cuomo, Adriano Peron
(University of Napoli “Federico II”, Napoli, Italy)

Semantic Model Checking Security Requirements for Web Services ......................................... 283
Lorenzo Boaro, Emanuele Glorio, Francesco Pagliarecci, Luca Spalazzi
(Università Politecnica delle Marche, Ancona, Italy)

</table>
Parallel Computing in a Quantitative Trading Firm (Invited) ................................................................. 376
Tuan Nguyen
(Arbitragis Trading, Boulogne-Billancourt, France)

Interacting Particle Algorithms for Multiname Portfolios (Invited) ...................................................... 377
Frédéric Patras
(Université de Nice et CNRS, Sophia Antipolis, France)

Object Classification Based on Graph Kernels ......................................................................................... 385
Amal Mahboubi, Luc Brun, François-Xavier Dupé
(GREYC UMR CNRS 6072, ENSICAEN, France)

A Top-Down Construction of Class Decision Trees with Selected Features and Classifiers .......... 390
Kazuaki Aoki, Mineichi Kudo
(Hokkaido University, Sapporo, Japan)

Arrhythmias Classification Using the Fractal Behavior of the Power Spectrum Density of the QRS Complex and ANN ........................................................................................................ 399
Mohamed Lamine Talbi, Abdelfateh Charef, Philip Ravier
(Centre Universitaire Bordj Bou-Arrérédj, Algeria; Université Mentouri de Constantine, Algeria; Polytech’Orléans/Institut PRISME, Orléans, France)

High Speed, Multi-Scale Tracing of Curvilinear Features with Automated Scale Selection and Enhanced Orientation Computation ................................................................. 410
R. D. Wedowski, A. R. Farooq, L. N. Smith, M. L. Smith
(University of the West of England, Bristol, U.K.)

Algorithms for Radar Image Identification and Classification ................................................................. 418
Vesna Zeljkovic, Claude Tameze, Robert Vincelette
(Prince Mohammad Bin Fahd University, Saudi Arabia; Lincoln University, Pennsylvania, USA; Delaware State University, Delaware, USA)

Texture Feature Representation in Dynamic Environments .................................................................... 425
Kyeong Deok Woo, Sung Gook Kim, Sung Wook Baik
(Sejong University, Seoul, Republic of Korea)

An Efficient Method for Face Recognition under Illumination Variations .............................................. 432
A. Nabatchian, E. Abdel-Raheem, M. Ahmadi
(University of Windsor, Ontario, Canada)
Hardware Acceleration of Scatter Search ................................................................. 436
Maxwell Walton, Gary Grewal, Gerarda Darlington (University of Guelph, Ontario, Canada)

Retargeting PLAPACK to Clusters with Hardware Accelerators .................................. 444
Manuel Fogué, Francisco D. Igual, Enrique S. Quintana-Ortí, Robert A. van de Geijn (Universidad Jaume I, Castellón, Spain; The University of Texas at Austin, Texas, USA)

Hardware Discrete Channel Emulator ........................................................................ 452
Emmanuel Boutillon, Yangyang Tang, Cédric Marchand, Pierre Bomel (Université Européenne de Bretagne, Lab-STICCNRS, France)

Scalable Instruction Set Simulator for Thousand-core Architectures Running on GPGPUs ...... 459
Shivani Raghav, Martino Ruggiero, David Atienza, Christian Pinto, Andrea Marongiu, Luca Benini (Embedded Systems Laboratory (ESL) – EPFL, Lausanne, Switzerland; DEIS – University of Bologna, Bologna, Italy)

Dynamic Load Balancing on Heterogeneous Multicore/MultiGPU Systems ...................... 467
Alejandro Acosta, Robert Corujo, Vicente Blanco, Francisco Almeida (Universidad de La Laguna, La Laguna, Spain)

Uniform Partitioning of Monte Carlo Radiosity on GPUs .............................................. 477
J. R. Sanjurjo, M. Amor, E. J. Padrón, R. Doallo, M. Bóo (University of A Coruña, A Coruña; University of Santiago de Compostela, Spain)

Performance Analysis Toolset for Wireless Intrusion Detection Systems ....................... 484
Samer Fayssal, Byoung Uk Kim (Euclidia Technologies, Beirut, Lebanon; Ridgetop Group Inc., Arizona, USA)

Towards a Bio-Inspired Architecture for Autonomic Network-on-Chip .......................... 491
Mohamed Bakhouya (Universite de Technologie de Belfort Montbéliard, France)

Security, Trust and Risk in Digital Rights Management Ecosystem ................................ 498
Zhiyong Zhang (Henan University of Science and Technology, China)

XPSoC: A Reconfigurable Solution for Multimedia Contents Protection ........................ 504
Linfeng Ye, Jean-Philippe Diguet, Guy Gogniat (Lab-STICCNRS - European University of Brittany/UBS, France)

A Novel Data Communication Approach in Wireless Sensor Networks .......................... 509
Yulong Shen, Qingqi Pei, Qijian Xu, Hailin Feng, Jianfeng Ma (Institute of China Electronic System Engineering Corporation, Beijing; Xidian University, Xi’an, China)
Robust Lossless Data Hiding: Analysis and Evaluation
Lingling An, Xinbo Gao, Cheng Deng, and Feng Ji
(Xidian University, Xi’an, China)

A Digital Rights Management Scheme based on Rational Share Content
Guojun Ma, Li Jian, Qingqi Pei, Jianfeng Ma
(Xidian University, Xi’an, China)

Discovering Closed Frequent Itemsets on Multicore: Parallelizing Computations and Optimizing Memory Accesses
Benjamin Negrevergne, Alexandre Termier, Jean-François Méhaut, Takeaki Uno
(Laboratoire d’Informatique de Grenoble, France; National Institute of Informatics, Japan)

Scalable Parallel Co-Clustering Over Multiple Heterogeneous Data Types
Francesco Folino, Gianluigi Greco, Antonella Guzzo, Luigi Pontieri
(ICAR-CNR, University of Calabria; University of Calabria, Italy)

Using Social Network and Semantic Overlay Network Approaches to Share Knowledge in Distributed Data Mining Scenarios
Sahar Saberi, Paolo Trunfio, Domenico Talia, Mehdi N. Fesharaki, Kambiz Badie
(Islamic Azad University, Tehran, Iran; DEIS, University of Calabria, Rende (CS), Italy; Iran Telecommunication Research Center, Tehran, Iran)

A Circularly Polarized Decagonal Slot Antenna
(American University of Beirut, Beirut, Lebanon)

A Simple Dual-Port Antenna System for Cognitive Radio Applications
Mohammed Al-Husseini, Ali El-Hajj, Karim Y. Kabalan, Youssef Tawk, Christos G. Christodoulou
(American University of Beirut, Beirut, Lebanon; University of New Mexico - Albuquerque, New Mexico, USA)

Opportunistic Beamforming for Uplink OFDMA Scheduling in Severe Interference Conditions
Elias Yaacoub, Zaher Dawy, Ali El-Hajj, Karim Y. Kabalan
(American University of Beirut, Beirut, Lebanon)

Ultrawideband Antennas with Switchable Band Notch Using Complementary Split-Ring Resonators
(American University of Beirut, Beirut, Lebanon; University of New Mexico - Albuquerque, New Mexico, USA)

Computation with Competing Patterns in Life-like Automaton (Invited)
Genaro Juarez Martinez, Andrew Adamatzky, Kenichi Morita, Maurice Margenstern
(National Autonomous University of Mexico, Mexico; University of the West of England, U.K.)
An FPGA Design for the Stochastic Greenberg-Hastings Cellular Automata ................................................................. 565
    Nikolaos Vlassopoulos, Nazim Fatès, Hugues Berry, Bernard Girau
    (INRIA Nancy Grand-Est; INRIA Rhône-Alpes, Université de Lyon, LIRIS;
    Université Henry Poincaré Nancy 1, France)

A New Optimum-Time Firing Squad Synchronization Algorithm for Two-Dimensional
Rectangle Arrays – Freezing-Thawing Technique based ................................................................. 575
    Hiroshi Umeo, Takuya Yamawaki, Kinuo Nishide
    (University of Osaka Electro-Communication, Osaka, Japan)

Routing in the Triangular Grid with Evolved Agents ................................................................. 582
    Patrick Ediger, Rolf Hoffmann, Dominique Désérable
    (Technische Universität Darmstadt, Darmstadt, Germany; Institut National
des Sciences Appliquées, Universitaire de Beaulieu, Rennes, France)

Application-Driven Architecture Synthesis of On-Chip Multiprocessor Systems ......................... 591
    Christophe Bobda, Philipp Mahr, Benjamin Andres, Harold Ishebabi
    (University of Potsdam, Potsdam, Germany)

FPGA-Based Three-Body Molecular Dynamics Simulator ................................................................. 599
    Robin Pottathuparambil, Ron Sass
    (University of North Carolina at Charlotte, North Carolina, USA)

Reconfigurable Computing in the Heterogeneous Manycore Era .................................................. 606
    David Andrews
    (University of Arkansas, Arkansas, USA)

FPGA Design Security with Time Division Multiplexed PUFs .................................................. 608
    Sezer Gören, H. Fatih Ugurdag, Abdullah Yildiz, Özgür Özkurt
    (Bahçeşehir University, Istanbul, Turkey)

Analytical Modeling and Evaluation of Network-on-Chip Architectures ......................................... 615
    Suboh Suboh, Mohamed Bakhouya, Jaafar Gaber, Tarek El-Ghazawi
    (The George Washington University, USA; Université de Technologie de
    Belfort Montbéliard, Belfort, France)

Poster Papers and Posters Abstracts

A Hypercube-Based NoC Routing Algorithm for Efficient All-to-All Communications in
Embedded Image and Signal Processing Applications ................................................................. 623
    Majed Chatti, Sami Yehia, Claude Timsit, Soraya Zertal
    (Thales Research and Technology, Palaiseau; University of Versailles, Versailles, France)

Experimental Results of a Coarse-Grained Parallel Algorithm for
Spanning Tree and Connected Components ................................................................. 631
    Edson Norberto Cáceres, Henrique Mongelli, Christiane Nishibe, Siang Wun Song
    (Universidade Federal de Mato Grosso do Sul, Campo Grande – MS; Universidade Federal do ABC,
    Santo André - SP, University of São Paulo - SP, Brazil)
An Intercept Driven Approach for Monitoring of Grid Applications ........................................... 638
Syed Alam, Norlaily Yaacob, Anthony Godwin
( Coventry University, Coventry, U.K.)

Modular Implementation of Dense Matrix Operations in a High-Level BSP Language .............. 643
Sovanna Tan, Frédéric Gava
(Laboratory of Algorithms, Complexity and Logic (LACL), University of Paris-East, France)

Calculating the Impact Factor of Neural Networks on Optimization
Algorithm for Sensor Selection ................................................................. 650
Abdolhossein Alipoor, Touraj Banirostam, Mehdi N. Fesharaki
(Islamic Azad University, Tehran; Maleke Ashtar University Tehran, Iran)

Fault-Aware Scheduling in Grid Environment Based on Linear Programming ......................... 656
Mehdi Sarikhani, Bahman Javadi, Askari Parichehre
(Islamic Azad University of Qazvin, Fars, Iran)

Preliminary Results for Atmospheric Remote Sensing
Data Processing through Grid Computing ........................................... 666
Lorenzo Mossucca, Olivier Terzo, Maurizio Molinaro, Giovanni Perona,
Manuela Cucca, Riccardo Notarpietro
(Istituto Superiore Mario Boella, Torino; Politecnico di Torino, Torino, Italy)

An Enhanced Virtual Object Management Scheme for Personalized Ubiquitous
Computing Services at Peer-to-Peer ..................................................... 672
Cheong Ghil Kim, Dong Wook Kim, Choong Pyo Hong, and Shin Dug Kim
(Namseoul University, Choongnam; Yonsei University, Seoul, Korea)

Efficient Security Transmission Protocol with Identity-Based Encryption in
Wireless Mesh Networks ................................................................. 679
Yahui Li, Xining Cui, Linping Hu, Yulong Shen
(Aeronautics Computing Technique Research Institute, Xi’an; Xidian University, Xi’an, China)

Power Estimation of 1-d Cellular Automata Circuits ..................................................... 691
Georgios Ch. Sirakoulis, Ioannis Karafyllidis
(Democritus University of Thrace, Xanthi, Greece)

HPCS 2010 Author Index ........................................................................ 699
