012041: Evolution of Dislocation Structure and Fatigue Crack Behavior in Fe-Si Alloys During Cyclic Bending Test ................. 190
  Kohsaka Ushioda, Shoji Goto, Yoshinari Komatsu, Akinori Hoshino, Shigeto Takebayashiki

012042: Low-Cycle Fatigue Behaviour and Microstructure of Copper and Alpha-Brass Under Biaxial Load Paths ........................... 194
  S Henkel, J Fischer, L Balogh, T Ungar, H Biermann

012043: Simulation of Fatigue Crack Growth Under Large Scale Yielding Conditions ......................................................... 198
  Christoph Schweitzer, Thomas Seifert, Hermann Riedel
HIGH TEMPERATURE DEFORMATION AND CREEP

012044: Ultrasonic Fatigue of a High Strength Steel
M Koster, G Wagner, D Eifler

012045: Cyclic Plasticity and Internal Dislocation Structure in Two-Phase Alloy
J Polák, M Petrenec, T Kruml, J Tobiáš

012046: Thermo-Mechanical Fatigue Behavior of the Intermetallic Gamma-TiAl Alloy TNB-V5 with Different Microstructures
M Roth, H Biermann

U Krupp, J Roth, H-J Christ, M Krüber, C-P Fritzen, W Skrotsky

012048: Cyclic Deformation of Extruded AM30 Magnesium Alloy in the Transverse Direction
D L Chen, A R Emami, A A Luo

012049: Fatigue Behavior and Microstructure of an Al-Mg-Sc Alloy at an Elevated Temperature
C Watanabe, R Monzen

012050: Effect of Hydrogen Cathodic Charging on Fatigue Fracture of Type 310S Stainless Steel
A Kishi, N Takano

012051: Influence of Grain Orientation on Evolution of Surface Features in Fatigued Polycrystalline Copper: A Comparison of Thermal and Uniaxial Mechanical Fatigue Results
Markus Aicheler

012052: Influences of the Manufacturing Process Chain Design on the Near Surface Condition and the Resulting Fatigue Behaviour of Quenched and Tempered SAE 4140
M Klein, D Eifler

012053: Surface Crack Nucleation and Propagation in Electrodeposited Nanocrystalline Ni-P Alloy During High Cycle Fatigue
Shigeaki Kobayashi, Akiyuki Kamata, Tadao Watanabe

012054: Extrusion and Intrusion Evolution in Cyclically Strained Cast Superalloy Inconel 738LC Using Confocal Laser Scanning Microscope and AFM
K Obrlík, M Juliš, J Man, T Podrábský, J Polák

012055: Fatigue Properties of an 1421 Aluminum Alloy Processed by ECAE
A Mogucheva, R Kailyshev

012056: Numerical Prediction of the Cyclic Behaviour of Metallic Polycrystals and Comparison with Experimental Data
M Szaszay, E Ferrié, A Steckmeyer

012057: Fatigue Properties of High Nb TiAl Alloy
T Kruml, A Dlouhy, M Petrenec, K Obrlik, J Polak

012058: Application of FIB Technique to Study of Early Fatigue Damage in Polycrystals
J Man, A Weidner, I Kubena, T Vystavel, W Skrotsky, J Polak

012059: Increasing the Fatigue Limit of a High-Strength Bearing Steel by a Deep Cryogenic Treatment
E Kerscher, K-H Lang

012060: Fatigue Crack Growth in Nodular Cast Iron – Influences of Graphite Spherical Size and Variable Amplitude Loading
T Mottitschka, G Pusch, H Biermann, L Zybll, M Kuna

012061: Microstructural Aspects of Duplex Steel During High Cycle and Very High Cycle Fatigue
H Knobbe, P Köster, U Krupp, H-J Christ, C-P Fritzen

012042: Effect of Thermal and Thermomechanical Ageing on the Microstructure and Mechanical Properties of a Ni-Cr Alloy
S Chomette, J M Gentzeltel, J Calapez, B Viguier

012066: Co-Re-Based Alloys for High Temperature Applications: Design Considerations and Strengthening Mechanisms
D Mukherji, J Köster
012067: The Influence of Creep Properties on Crack Propagation in Thermal Barrier Coatings ................................................................. 294
M Bäker

012068: Influence of Microstructure on Creep Strength of MRI 230D Mg Alloy .......................................................................................... 298
D Amberger, P Eisenlohr, M Göken

012069: FEM Simulation of TBC Failure in a Model System .................................................................................................................... 302
P Seiler, M Bäker, T Beck, M Schweda, J Köslcr

012070: Dynamic Polygonization in 9%Cr Heat Resistant Steel .............................................................................................................. 306
V Dudko, A Belyakov, Y Skorobogatykh, T Schenkova, R Kaibyshev

012071: High Temperature Properties of an Austenitic Stainless Steel .................................................................................................. 310
I Nikulin, R Kaibyshev, Y Skorobogatykh

012072: New Creep Region and Mechanism in Hexagonal Close-Packed Metals .................................................................................... 314
T Matsunaga, T Kameyama, S Ueda, E Sato

012073: Re-Examination of Creep Behaviour of High Purity Aluminium at Low Temperature ................................................................. 318
S Ueda, T Kameyama, T Matsunaga, K Kitazono, E Sato

012074: Development of an Experimental Setup for Testing the Properties of γ /γ' Superalloys .................................................................. 322
Siret Christophe, Viguier Bernard, Salahara Jean Claude, Andrieu Eric, Lesterlin Sandrine

012075: Hot Working of High Purity Fe-C Alloys in the α-Range ............................................................................................................. 326
F Montheillet, J Le Coze

012076: Morphology of the Creep Crack Tip in P92 Steel and Its Relation to Microstructure ................................................................. 330
V A Yardley, T Matsuzaki, R Sugiuara, A T Yokobori Jr, S Tsuekawa, Y Hasegawa

012077: Influence of Bondcoat Creep and Roughness on Damage and Lifetime of ZrO2 TBCs for Gas Turbines Under Thermocyclic Loads ................................................................................................................ 334
M Schweda, T Beck, L Singheiser

012078: Macroscopic Localization of Plastic Deformation in Single Crystals Ni3Ge with L12 Structure ........................................................................................... 338
V A Starenchenko, S V Starenchenko, Yu V Solov'Ev

012079: High Temperature Deformation Behavior of the Molybdenum Alloy TZM .............................................................................. 342
T Mroztek, U Martin, A Hoffmann

012080: Strains and Dislocation Densities Within a Rafted Superalloy: In Situ Investigation During Mechanical Testing at 1080°C ................................................................................................................... 346
L Dirand, A Jacques, J P Chateau, T Schenk, O Ferry, P Bastie

012081: Short-Range Ordering and Mechanical Properties of a Ni-20%Cr Alloy .................................................................................. 350
N R Dudova, R Kaibyshev

012082: Work Hardening and Kinetics of Dynamic Recrystallization in Hot Deformed Austenite ................................................................. 354
X Quelennec, E Martin, L Jiang, J J Jonas

012083: A Statistical Study on Tensile Characteristics of Stainless Steel at Elevated Temperatures ........................................................... 358
Park Sungho, Park Noseok, Kim JaeMoon

012084: High Temperature Creep Behaviour of Al-Rich Ti-Al Alloys ...................................................................................................... 362
D Sturm, M Heilmayer, H Saage, J Aguilar, G J Schmitz, A Drevermann, M Palm, P Stein, N Engberding, K Kelm, S Irsen

012085: Effect of Cr Content on the Thermal Stability of Tempered Lath Structures and Precipitates in Strength Enhanced Ferritic Steels .................................................................................................................. 366
H Ghassemi Armaki, R P Chen, S Kano, K Maruyama, M Igarashi

012086: Internal Stress Model for Pre-Primary Stage of Low-Stress Creep .............................................................................................. 370
L Kloc

012087: Influence of Processing on the Microstructure and Mechanical Behaviour of Mo-Si-B Alloys ........................................................................... 374
M Krüger, H Saage, M Heilmayer, M Böning, H Kestler

012088: Tensile Strength and Creep Behaviour of Austenitic Stainless Steel Type 18Cr – 12Ni with Niobium Additions at 700°C .......................................................................................................................... 378
V L Sordi, L O Bueno

012089: Phenomenological Approach to Precise Creep Life Prediction by Means of Quantitative Evaluation of Strain Rate Acceleration in Secondary Creep ......................................................................................... 382
Hiroyuki Sato, Takaya Miyano

012090: Compression Creep Studies of Mechanically Alloyed Nanostructured Fe-12Cr-2W-0.25Y2O3 ODS Alloy ................................................................................................................ 386
P Susila, D Sturm, M Heilmayer, B S Murty, V Subramanya Sarma

012091: Evolution of Microstructures During Creep in TiAl-Base Intermetallics with a Different Nb Content ......................................................................................................................... 390
A Dlouhý, A Orlová, K Kucharová

012092: A Fundamental Study of the High Temperature Deformation Mechanisms of Magnesium ................................................................................. 396
Adrien Chapuis, Julian Driver
MECHANICAL PROPERTIES RELATED TO PHASE TRANSFORMATIONS

012093: Mechanical Properties of an Undercooled Aluminium Alloy Al-0.6Mg-0.7Si .................................................. 400
O Kessler, M Reich

012094: Estimation and Correlation of Strengthening Components to the Evolution of Microstructure
Following Cold Work and Artificial Aging in AA6111 Aluminium ................................................................. 404
G K Quaino, S Yannacopoulos, C M Sargent

012095: Mechanical Properties of Low Carbon Steel Hardened by the Fe5SiTi Phase at High Volume
Fraction ......................................................................................................................................................... 408
M Perrier, O Bouaziz, Y Brechet, A Deschamps, P Donnadieu

012096: Understanding the Mechanical Properties of 2198 Al-Li-Cu Alloy in Relation with the Intra-
Granular and Inter-Granular Precipitate Microstructure .............................................................................. 412
B Decreuse, A Deschamps, P Donnadieu

012097: Model for the Solid State Phase Transformation and Transformation Plasticity During
Casting in Grey Cast Iron GJL350 ............................................................................................................. 416
V Rauser, J Hoffmeister, V Schulze

012098: The Influence of Martensitic Transformation on Mechanical Properties of Cast High Alloyed
CrMnNi-Steel Under Various Strain Rates and Temperatures ...................................................................... 420
L Krüger, S Wolfl, U Martin, S Martin, P R Scheller, A Jahn, A Weiß

Preparation and Mechanical Property of Polymer-Based Biomaterials

P Zhang, G Chen, X F Zheng

High Pressure Torsion of Cu-Based Metallic Glasses

S Hóbor, Zs Kovács, A P Zhiyaev, L K Varga, P J Szabó, Á Révész

Al-Based Metal Matrix Composites Reinforced with Nanocrystalline Al-Ti-Ni Particles

S Scudino, F Ali, K B Surreddi, K G Prashanth, M Sakaliyska, J Eckert

Production of High-Strength Al65Y8Ni5Co2 Bulk Alloy by Spark Plasma Sintering

K B Surreddi, V C Srivastava, S Scudino, M Sakaliyska, V Uhlenwinkel, J S Kim, J Eckert

A Statistical Physics Consideration About the Strength of Small Size Metallic Glass Pillars

Changqiang Chen, Yutao Pei, Jeff Th M De Hosson
MULTISCALE MODELLING AND EXPERIMENTAL VALIDATION

012157: Experimental Validation of Microstructure Evolution in Crystalline Materials ........................................ 653
   C Rehrl, S Kleber, T Antretter, R Pippan

012158: Numerical Verification of Three Point Bending Experiment of Magnetorheological Elastomer (MRE) in Magnetic Field ........................................................................................................ 657
   Danuta Miedzińska, Anna Boczkowska, Konrad Zubko

012159: Consideration of Pinning and Dissolution with Dividing Sites in Monte Carlo Simulation of Grain Growth ................................................................. 661
   C Sekkak, N Rouag, R Penelle

INSIGHT THROUGH NEW EXPERIMENTAL METHODS

012160: In Situ Measurements of X-Ray Peak Profile Asymmetry from Individual Grains ........................................ 665
   C Wejdemann, U Lienert, W Pantleon

012161: Texture Evolution During Tensile Necking of Copper Processed by Equal Channel Angular Extrusion ........................................................................................................ 669
   W Pantleon, S Richter, S Martin, J R Bowen

012162: Thermal Shock Behaviour of Ceramics Under Different Testing Conditions ............................................ 673
   R Pulz, B Rehmer

012163: Investigation of Mechanical Properties of Gold Thin Films Using a Bulge Test Technique .................... 677
   A Hémel, A Jacques, T Schenk, O Ferry, T Kruml

012164: Pulsed Low-Energy Positron Beams: A Useful Tool to Investigate Defect Structures in Deformed Metals and Alloys ........................................ 681
   W Egger, P Sperr, G Kögel, H-J Gudladt

OTHER NEW DEVELOPMENTS RELATED TO THE FIELD

012165: Research on Dynamic Wear Behavior at Elevated Temperature of HVOF Sprayed Nanostructured WC-17Co Coating ........................................................................................................ 687
   Yan Liu, Hui Chen, Guoqing Gou, Mingjiao Tu

012166: Residual Strength of GFR/POM As a Function of Damage ........................................................................ 691
   G Zachariev, H-V Rudolph, H Ivers

012167: Effect of an Applied Stress on Discontinuous Precipitation in a Cu-Ag Alloy ........................................ 695
   R Monzen, T Terazawa, C Watanabe

012168: Compressive Strength and Hardness of Metal Matrix Syntactic Foams ................................................. 699
   I N Orbulov, A Németh, J Dobravčínsky

012169: The Effects of Some Laser Parameters on the Surface and Near Surface Region of Laser Treated Cast Iron Cylinder Bore ........................................................................ 703
   K Májlínger, P J Szabó

012170: Effect of Yttrium Addition on Grain Growth of α, β and α+β Titanium Alloys ........................................ 707
   B Poorganj, A Kazahari, T Narushima, C Ouchi, T Furuhara
