Workshop on Cognitive Modeling and Computational Linguistics 2010

(CMCL 2010)

Held at ACL 2010

Uppsala, Sweden
15 July 2010

Some format issues inherent in the e-media version may also appear in this print version.
# Table of Contents

*Using Sentence Type Information for Syntactic Category Acquisition*
  Stella Frank, Sharon Goldwater and Frank Keller ................................. 1

*Did Social Networks Shape Language Evolution? A Multi-Agent Cognitive Simulation*
  David Reitter and Christian Lebiere ................................................. 9

*Syntactic Adaptation in Language Comprehension*
  Alex Fine, Ting Qian, T. Florian Jaeger and Robert Jacobs ...................... 18

*HHMM Parsing with Limited Parallelism*
  Tim Miller and William Schuler ......................................................... 27

*The Role of Memory in Superiority Violation Gradience*
  Marisa Ferrara Boston ........................................................................... 36

*Close = Relevant? The Role of Context in Efficient Language Production*
  Ting Qian and T. Florian Jaeger .......................................................... 45

*Predicting Cognitively Salient Modifiers of the Constitutive Parts of Concepts*
  Gerhard Kremer and Marco Baroni ....................................................... 54

*Towards a Data-Driven Model of Eye Movement Control in Reading*
  Mattias Nilsson and Joakim Nivre ....................................................... 63

*Modeling the Noun Phrase versus Sentence Coordination Ambiguity in Dutch: Evidence from Surprisal Theory*
  Harm Brouwer, Hartmut Fitz and John Hoeks ........................................ 72

*Uncertainty Reduction as a Measure of Cognitive Processing Effort*
  Stefan Frank ......................................................................................... 81
