14th Conference on Computational Natural Language Learning 2010

(CoNLL 2010: Shared Task)

Co-Located with ACL 2010

Uppsala, Sweden
15-16 July 2010

# Table of Contents

*The CoNLL-2010 Shared Task: Learning to Detect Hedges and their Scope in Natural Language Text*
  Richárd Farkas, Veronika Vincze, György Móra, János Csirik and György Szarvas ............ 1

*A Cascade Method for Detecting Hedges and their Scope in Natural Language Text*
  Buzhou Tang, Xiaolong Wang, Xuan Wang, Bo Yuan and Shixi Fan ................................. 13

*Detecting Speculative Language Using Syntactic Dependencies and Logistic Regression*
  Andreas Vlachos and Mark Craven ................................................................................. 18

*A Hedgehop over a Max-Margin Framework Using Hedge Cues*
  Maria Georgescul ........................................................................................................... 26

*Detecting Hedge Cues and their Scopes with Average Perceptron*
  Feng Ji, Xipeng Qiu and Xuanjing Huang ....................................................................... 32

*Memory-Based Resolution of In-Sentence Scopes of Hedge Cues*
  Roser Morante, Vincent Van Asch and Walter Daelemans ........................................... 40

*Resolving Speculation: MaxEnt Cue Classification and Dependency-Based Scope Rules*
  Erik Velldal, Lilja Øvrelid and Stephan Oepen ............................................................. 48

*Combining Manual Rules and Supervised Learning for Hedge Cue and Scope Detection*
  Marek Rei and Ted Briscoe ............................................................................................ 56

*Hedge Detection Using the RelHunter Approach*
  Eraldo Fernandes, Carlos Crestana and Ruy Milidiú ...................................................... 64

*A High-Precision Approach to Detecting Hedges and their Scopes*
  Halil Kilicoglu and Sabine Bergler .................................................................................. 70

*Exploiting Rich Features for Detecting Hedges and their Scope*
  Xinxin Li, Jianping Shen, Xiang Gao and Xuan Wang ..................................................... 78

*Uncertainty Detection as Approximate Max-Margin Sequence Labelling*
  Oscar Täckström, Sumithra Velupillai, Martin Hassel, Gunnar Eriksson, Hercules Dalianis and Jussi Karlsgren ................................................................. 84

*Hedge Detection and Scope Finding by Sequence Labeling with Procedural Feature Selection*
  Shaodian Zhang, Hai Zhao, Guodong Zhou and Bao-liang Lu ........................................ 92

*Learning to Detect Hedges and their Scope Using CRF*
  Qi Zhao, Chengjie Sun, Bingquan Liu and Yong Cheng .................................................. 100

*Exploiting Multi-Features to Detect Hedges and their Scope in Biomedical Texts*
  Huiwei Zhou, Xiaoyan Li, Degen Huang, Zehong Li and Yuansheng Yang ........................... 106

*A Lucene and Maximum Entropy Model Based Hedge Detection System*
  Lin Chen and Barbara Di Eugenio .................................................................................... 114

*HedgeHunter: A System for Hedge Detection and Uncertainty Classification*
  David Clausen .................................................................................................................. 120
Exploiting CCG Structures with Tree Kernels for Speculation Detection
Liliana Mamani Sánchez, Baoli Li and Carl Vogel .................................................. 126

Uncertainty Learning Using SVMs and CRFs
Vinodkumar Prabhakaran ......................................................................................... 132

Features for Detecting Hedge Cues
Nobuyuki Shimizu and Hiroshi Nakagawa .............................................................. 138

A Simple Ensemble Method for Hedge Identification
Ferenc Szidarovszky, Illés Solt and Domonkos Tikk .................................................. 144

A Baseline Approach for Detecting Sentences Containing Uncertainty
Erik Tjong Kim Sang .................................................................................................. 148

Hedge Classification with Syntactic Dependency Features Based on an Ensemble Classifier
Yi Zheng, Qifeng Dai, Qiming Luo and Enhong Chen ............................................... 151
