2010 7th International Conference on the European Energy Market

(EEM 2010)

Madrid, Spain
23 – 25 June 2010
# TABLE OF CONTENTS

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Polish Electric Power Market from the Point of View of Development</td>
<td>1</td>
</tr>
<tr>
<td>J.R. Tchorzewski</td>
<td></td>
</tr>
<tr>
<td>Alternative Pricing Approach for the Lumpy Electricity Markets</td>
<td>7</td>
</tr>
<tr>
<td>V. Araoz-Castillo, K. Jornsten</td>
<td></td>
</tr>
<tr>
<td>Short-term Forecasting of Day-ahead Electricity Market Price</td>
<td>13</td>
</tr>
<tr>
<td>D. Menniti, N. Scordino, N. Sorrentino, A. Violi</td>
<td></td>
</tr>
<tr>
<td>Economic Evaluation of Wind Generation Projects in Electricity Markets</td>
<td>18</td>
</tr>
<tr>
<td>A.J.C. Pereira, J.T. Saraiva</td>
<td></td>
</tr>
<tr>
<td>Evaluation of Transmission Reinforcement Strategies using Risk Indices in the Presence of Uncertainties</td>
<td>26</td>
</tr>
<tr>
<td>B.A. Gomes, J.T. Saraiva</td>
<td></td>
</tr>
<tr>
<td>Network-Dependent Congestion Analysis in PJM Day-Ahead Model using Null Space</td>
<td>32</td>
</tr>
<tr>
<td>J. Liu, D. Chevez-Gonzalez</td>
<td></td>
</tr>
<tr>
<td>Long-Term Hydro-Thermal Scheduling Including Network Constraints</td>
<td>39</td>
</tr>
<tr>
<td>A. Helseth, G. Wurland, B. Mo</td>
<td></td>
</tr>
<tr>
<td>Location-Dependent Valuation of Energy Hubs with Storage in Multi-Carrier Energy Systems</td>
<td>45</td>
</tr>
<tr>
<td>F. Kienzle, G. Andersson</td>
<td></td>
</tr>
<tr>
<td>Measures to Influence the Properties of DG Clusters for the Adjustment to Electricity Market Demand</td>
<td>51</td>
</tr>
<tr>
<td>G. Romanovsky, T. Erge</td>
<td></td>
</tr>
<tr>
<td>D. Waniek, C. Rehtanz, E. Handschin</td>
<td></td>
</tr>
<tr>
<td>Transmission Planning Under Uncertainty: A Two-Stage Stochastic Modelling Approach</td>
<td>62</td>
</tr>
<tr>
<td>A.H. Van Der Weijde, B.F. Hobbs</td>
<td></td>
</tr>
<tr>
<td>Strategies for Demand Load Control to Reduce Balancing Costs</td>
<td>68</td>
</tr>
<tr>
<td>A. Berard, N. Veillerboe, M. Hemhebel, Y. Phulpin</td>
<td></td>
</tr>
<tr>
<td>Is Load-Based Carbon Trading Less Costly than Source-Based Trading?</td>
<td>74</td>
</tr>
<tr>
<td>B.F. Hobbs, J. Bushnell, F.A. Wolak</td>
<td></td>
</tr>
<tr>
<td>The Facilitation of Mini and Small Hydropower in Switzerland through Institutional Mechanisms</td>
<td>80</td>
</tr>
<tr>
<td>N. Crettenand, M. Finger</td>
<td></td>
</tr>
<tr>
<td>Facilitating Emission Trade within Power Exchange: Development of Conceptual Platform</td>
<td>86</td>
</tr>
<tr>
<td>R. Gajbhiye, S.A. Soman</td>
<td></td>
</tr>
<tr>
<td>Provision of Some Ancillary Services by Microgrid Agents</td>
<td>92</td>
</tr>
<tr>
<td>J.T. Saraiva, M.H. Gomes</td>
<td></td>
</tr>
<tr>
<td>A Qualitative Analysis of Main Cross-border Balancing Arrangements</td>
<td>100</td>
</tr>
<tr>
<td>R.A.C. Van Der Veen, A. Abbasy, R.A. Hakvoort</td>
<td></td>
</tr>
<tr>
<td>Long-term Energetic Analysis for Electric Expansion Planning Under High Wind Power Penetration Scenarios in Colombia and Neighboring Countries</td>
<td>106</td>
</tr>
<tr>
<td>I.A. Isaac, J.M. Areiza, J.W. Gonzalez, H. Biechl</td>
<td></td>
</tr>
<tr>
<td>Modeling Electricity Markets as Two-Stage Capacity Constrained Price Competition Games under Uncertainty</td>
<td>113</td>
</tr>
<tr>
<td>K. Sakellaris</td>
<td></td>
</tr>
<tr>
<td>Analysis of the Price Efficiency in the Iberian Power Forward Contracting Mechanisms</td>
<td>120</td>
</tr>
<tr>
<td>A.C. Herrutz, C.R. Monroy</td>
<td></td>
</tr>
<tr>
<td>Economic Effect of Demand Response Programs on Coupled Active/Reactive Market Prices in Deregulated Electricity Markets</td>
<td>126</td>
</tr>
<tr>
<td>M. Peikherfesh, M.K. Sheikh-El-Eslami, H. Seifi, A. Namdari</td>
<td></td>
</tr>
<tr>
<td>Optimal Allocation of FACTS Devices for Provision of Voltage Control Ancillary Services</td>
<td>132</td>
</tr>
<tr>
<td>M. Peikherfesh, M. Abagour, M.P. Moghaddam, A. Namdari</td>
<td></td>
</tr>
<tr>
<td>Market Integration and Price Dispersion in the European Electricity Market</td>
<td>137</td>
</tr>
<tr>
<td>F. Kalantzis, N.T. Milonas</td>
<td></td>
</tr>
<tr>
<td>Determinants for European Energy Markets Intra-day Volatility using Dynamic Panel Data Models and GMM-type Estimators</td>
<td>143</td>
</tr>
<tr>
<td>P.B. Solbakke, T. Arethun, O. Oklevik</td>
<td></td>
</tr>
<tr>
<td>Market Power in a Power Market with Transmission Constraints</td>
<td>149</td>
</tr>
<tr>
<td>M. Bjorndal, V. Gribkovskaja, K. Jornsten</td>
<td></td>
</tr>

</table>
A Scenario Analysis of a Pan-European Electricity Market: Effects of a Gas Shortage in Italy ........................................ 155
A. Zani, A. Grassi, M. Benini

Optimization of Decentralized Energy Supply Systems ................................................................. 161
S. Proaszch, C. Breuer, A. Moser

Dynamic and Static Hedging in Electricity: Where Do We Stand? .................................................. 167
M. Madaleno, C. Pinho

Comparison of Methods for Battery Capacity Design in Renewable Energy systems for Constant Demand and Uncertain Supply ............................................................... 178
K. Ponnambalam, Y.E. Saad, M. Mahootchi, A.W. Heemink

Stochastic Analysis of a Local Distribution Company Voltage Profile Under Uncertain Energy Supply from a Photovoltaic System .................................................... 183
Y.E. Saad, K. Ponnambalam, R.A. El-Shatshat

Extracting Relevant Features to Explain Electricity Price Variations ................................................ 190
F. Saard, S. Goutier, D. Mercier

The Expansion of "Non Conventional" Production of Natural Gas (Tight Gas, Gas Shale and Coal Bed Methane). A Silent Revolution .................................................. 196
A. Alonso, M. Mingo

RES-E Integration in Germany using the Example of EnBW TSO .................................................. 204
D. Graeber, A. Sennig, A. Kleine, A. Weber

Modeling the Impact of the Weather Factors on the Electrical Energy Consumption in One of the Regions in the Southern Poland .................................................. 211
A. Wlodarczyk, M. Zawada

Will More Competition at the Retail Level of the European Natural Gas Industry Necessarily Drive Down Prices for Final Consumers? .................................................. 217
B. Charmaison

Supply Function Equilibrium with Generation Constraints Solved through Mixed-Integer Programming .................................................. 223
S. El Khatib, F.D. Galiana

Integrating Non-dispatchable Producers in Electricity Markets .................................................. 230
A.J. Conejo, J.M. Morales

A. Roque, D.M. Sousa, C. Casimiro

Technical and Economic Analysis of a Micro Hydro Plant - A Case Study .................................. 238
A. Roque, D.M. Sousa, C. Casimiro, E. Margato

Integration of Renewable Energy in the European Power Grid: Market Mechanism for Congestion Management .................................................. 244
A. Vergnol, V. Rious, J. Sprooten, B. Robyns, J. Deuse

Wheeling & Dealing - Scenarios for Understanding the European Energy Future .................. 250
F.A. Lagergren, H. Blomgren

Possible Impact of Electric Cars on Electricity Spot Prices .................................................. 262
A. Tirez, P. Luickx, X. He, V. Rious

Reserve Requirements and Price Spikes in Multinational Power Markets .................................. 268
G.L. Doorman, O.S. Grande

Use of Demand Response in Electricity Markets: An Overview and Key Issues .................. 274
S.N. Singh, J. Ostergaard

Assessment of National Energy Policies and its Influence on the Development of Windpower in Specific Countries .................................................. 280

Setting Greenhouse Gas Emission Target for a Generation Mix Expansion Model .................. 287
M. Momen, F.D. Galiana

Price Spreads in Electricity Markets: What are Fundamental Drivers? .................................. 293
M. Genoese, F. Genoese, D. Most, W. Fichtner

TARX Models for Spikes and Antispikes in Electricity Markets .................................................. 299
C. Lucheroni

Analysis of Grid Alternatives for North Sea Offshore Wind Farms Using a Flow-based Market Model .................................................. 305
D. Huertas-Hernando, H.G. Svendsen, L. Warland, T. Trotscher, M. Korpas

Transmission System Operator’s Market Functions Implementation Based on Service Oriented Architecture and Business Process Management .................................................. 311
I. Janes, T. Plavsic

Estimating Marginal Costs and Market Power in the Italian Electricity Auctions .................. 316
B. Bosco, L. Parisio, M. Pelagatti
A Critical Analysis of CDM Projects Concerning Sustainability: The Use of Fuzzy Logic for CDM
Project Selection ................................................................. 322
   A. Barin, L.N. Canha, A.R. Abadie, K.F. Moguno

The Eight Regional Electricity Market in Europe – The SEE REM ........................................ 327
   R. Karova

Agent-Based Simulator for the German Electricity Wholesale Market Including Wind Power
Generation and Widescale PHEV Adoption ................................................................. 334
   L.A. Wehinger, M.D. Galan, G. Andersson

Customized Solution for Real and Reactive Power Compensation for Small Distribution Systems ........................................ 340
   A. Singh, B. Singh, S. Singh

Economic Impact of 2020 Renewable Energy Scenarios on the Spanish Electricity Market ........................................ 346
   P. Frias, T. Gomez, P. Linares

A Long-Term Prospective for the Spanish Electricity System ......................................... 351
   C. Fernandes, P. Frias, L. Olmos, A. Ramos, T. Gomez

Optimal Day-Ahead Bidding in the MIBEL’s Multimarket Energy Production System ................. 357
   C. Corchero, F. Heredia

On the Pricing and Hedging of Combined Cycle Power Plants Using Option Pricing Theory ........................................ 363
   M. Casanovas, M.C. Escuela

The Impact of the Iberian Electricity Market on the Competitive Behavior of Generating Companies
using a Conjectural Variations Approach ................................................................. 369
   J. Lagarto, J. De Sousa, A. Martins

Optimization of Time-Based Rates in Forward Energy Markets ........................................ 378
   J. Wang, S. Kennedy, J. Kirtley

Probabilistic Short-term Transmission-loss Forecasting Based on a Two-Point Estimate Method ........................................ 385
   M. Rejc, M. Pantos

On Application of the Cooperative Game Theory to Energy Supply System Planning ........................................ 391
   M. Zima-Bockarjova, A. Sauhats, G. Vempers, I. Tereskina

Optimal Management of MicroGrid Using Differential Evolution Approach ........................................ 397
   H. Vahedi, R. Noroozian, S.H. Hosseini

Bacterial Foraging Algorithm for Security Constrained Optimal Power Flow ........................................ 403
   H. Vahedi, S.H. Hosseini, R. Noroozian

Optimal Short-term Operation and Sizing of Pumped-Storage Power Plants in Systems with High
Penetration of Wind Energy ......................................................................................... 409
   J.I. Perez-Diaz, A. Perea, J.R. Wilhelm

Bid Analysis of the Italian Electricity Market for the Identification of Players’ Strategic Behavior ........................................ 415
   A. Berizzi, C. Bovo, G. Tiburzio

Strategies for the Integration of Wind Energy into the Grid: An Application to the Portuguese Power System ........................................ 421
   S. Faias, J. De Sousa, R. Castro

Generation & Transmission Planning and Electricity Market: the Role of TSO ........................................ 428
   M.C. Falvo

Reduced Risks and Improved Economic Operation of Ancillary Services ........................................ 434
   P.P.J. Van Den Bosch, A. Jokic, R.M. Herrmans, J. Frunt, W.L. King, F. Nobel, P. Boonekamp, W. De Boer I

Occurrence of Negative Prices on the German Spot Market for Electricity and Their Influence on
Balancing Power Markets ......................................................................................... 440
   F. Genoese, M. Genoese, M. Wietschel

Modeling of Generation and Supply Competitiveness in Regional Cross-Border Electricity Trading ........................................ 446
   I. Androvec, T. Jakasa, S. Krajcar

A Risk Management Model for Trading Electricity in the Spot Market and through Bilateral
Contracts ................................................................................................................ 452
   L. Ramos, J. De Sousa, T. Silva, J. Rui, J.A. Lima

Transmission Expansion Planning in Deregulated Electricity Markets for Increased Wind Power
Penetration ............................................................................................................. 459

Drivers of Imbalance Cost of Wind Power: A Comparative Analysis ........................................ 466
   C. Obersteiner, T. Siewierski, A.N. Andersen

Impacts of Plug-in Electric Vehicles on Germany’s Power Plant Portfolio - A Model Based Approach ........................................ 475
   H.U. Gerbracht, D. Most, W. Fichtner

Recovery Mechanisms in a Joint Energy/Reserve Day-Ahead Electricity Market with Non-
Convexities ........................................................................................................... 482
   P. Andrianesis, G. Liberopoulos, G. Kozanidis, A.D. Papalexopoulos
Recent Developments in Common Distribution Network Pricing in Great Britain .................................................. 488
F. Li
A New Perspective to Account for Renewables Impacts in Portugal ............................................................. 493
F. Amorim, M. V.M. Martins, P.F. Da Silva
A Decision Support System for Energy Trading and Portfolio Optimization .................................................. 499
EM Estimation of Multivariate Dynamic Models for Predicting Electricity Prices ........................................ 505
D. Lopez, J. Juan, J. Carpio
Impacts of Large Penetration of Wind in Electricity Systems. Probabilistic Analysis on Spanish Market ....................... 511
J. Contreras, J.B. Krawczyk, J. Zuccollo
Impacts of a Significant Share of Renewable Energies on the European Power Generation System ................. 524
T. Mirbach, S. Ohrem, S. Schild, A. Moser
Impact of Wind Power on Natural Gas Markets: Inter Market Flexibility ...................................................... 530
A.H. Miranda, C.M. Villar
Analysis of an Electricity Market Equilibrium Model with Large-Scale Penetration of Wind Energy ............. 536
A. Delgalillo, P. Duenas, J. Reneses, J. Barquin
Modelling Day Ahead Nord Pool Forward Price Volatility: Realized Volatility versus GARCH Models ........ 542
E. Haugom, S. Westgaard, P.B. Solbakke, G. Lien
Covariance Estimation using High-Frequency Data: Analysis of Nord Pool Electricity Forward Data ........... 551
G. Lien, E. Haugom, S. Westgaard, P.B. Solbakke
Optimal Yearly Scheduling of Generation and Pumping for a Price-Maker Hydro Producer ......................... 559
C.G. Baslis, A.G. Bakirtzis
Effect of Increased RES Penetration on the System Marginal Price of the Greek Electricity Market ............... 565
C.K. Simoglou, P.N. Biskas, A.G. Bakirtzis
Auction of Financial Transmission Rights in Electricity Market Environment ................................................. 571
P. Ermida, J. Ferreira, Z. Vale, T. Sousa
Impact of Design Variables on Balancing Markets .................................................................................. 577
Integration of Sustainability into Overall Energy Policy – New Slovenian National Energy Program ........ 583
B. Sicic, A. URBANCIC, S. Merse, D. Stancic, M. Cesn
Assessment of the Smart Grids applied in Reducing the Cost of Distribution System Losses ............................ 589
A.R. Abaide, L.N. Canha, A. Barin, G. Cassel
Energy and Transmission Allocation in Overlapping Electricity Markets: Incorporating N-1 Security and Accounting for Losses .............................................................................. 595
A. Marinakis, T. Van Catsen
From Regional Markets to a Single European Market ............................................................................... 601
J. Argueso
A Scenario Analysis for a Challenging Energy Policy in Italy .................................................................. 607
F. Lanati, A. Gelmini, M. Borgarello
Investigating the Role of the Clean Development Mechanism within the Global Green Energy Market: The Case of Wind Energy .......................................................... 613
O. Pechak, G. Mavrotas, D. Diakoulaki
F. Careri, C. Genesi, P. Marannino, M. Montagna, S. Rossi, I. Siviero
Definition of a Zonal Reactive Power Market Based on the Adoption of a Hierarchical Voltage Control ....................... 626
F. Careri, C. Genesi, P. Marannino, M. Montagna, S. Rossi, I. Siviero
Measuring the “Smartness” of the Electricity Grid .................................................................................. 632
B. Dupont, I. Meeus, R. Belmans
Volatility Structures of the Italian Electricity Market: An Analysis of Leverage and Volume Effects ............ 638
A. Gianfreda, L. Grossi, D. Olivieri
Limitations in the Design of Ancillary Service Markets Imposed by Communication Network Delays ........ 644
R.M. Hermans, A. Jokic, P.P.J. Van Den Bosch, J. Frunt, I.G. Kamphuis, C.J. Warmer
Financial Implications of Imbalance Settlement Exemptions for Wind Power Generators ........................... 650
K. De Vos, J. Driesen, R. Belmans
Mitigating the Impact of Distributed Generation on Distribution Network Costs through Advanced Response Options .............................................................................. 656
R. Cossent, L. Olmos, T. Gomez, C. Mateo, P. Frias
Participation of DFIG Wind Turbines in Frequency Control Ancillary Service by Optimized Rotational Kinetic Energy
A. Zertek, G. Verbic, M. Pantos
