Table of Contents ................................................................. i

Volume 1

Introduction .................................................................................. 1

Organizing Committee ................................................................. 3

Program Committee ...................................................................... 4

Awards ......................................................................................... 5

Sponsors ....................................................................................... 7

Invited Plenary Presentations ....................................................... 8

Symposia ...................................................................................... 9

Tutorials and Workshops ............................................................... 13

Foundations: Steps to Unification

*Wild Systems Theory: Overcoming the Computational-Ecological Divide* ................................................. 15  
Jerome Scott Jordan

*Framing and Resource Activation: Bridging the Cognitive-Situative Divide Using a Dynamic Unit of Cognitive Analysis* ................................................................. 19  
Luke Conlin, Ayush Gupta, David Hammer

Karl Fua, William Revelle, Andrew Ortony

*Understanding the Brain as an Endogenously Active Mechanism* ............................................................. 31  
William Bechtel, Adele Abrahamsen

Language: Novel Approaches

*Likability-Based Genres: Analysis and Evaluation of the Netflix Dataset* ..................................................... 37  
Andrew Olney

*Constructing Typing-Time Corpora: A New Way to Answer Old Questions* ................................................. 43  
Uriel Cohen Priva

*Large-Scale Acquisition of Feature-Based Conceptual Representations from Textual Corpora* ............. 49  
Barry Devereux, Nicholas Pilkington, Thierry Poibeau, Anna Korhonen

*Are Random Representations Accurate Approximations of Lexical Semantics?* ..................................... 55  
Brendan Johns, Michael Jones

Induction: Basic Processes

*A Neural Model of Rule Generation in Inductive Reasoning* ................................................................. 61  
Daniel Rasmussen, Chris Eliasmith

Decision Making: Sequential Choices

Are People Successful at Learning Sequential Decisions on a Perceptual Matching Task? ........ 156
Reiko Yakushijin, Robert Jacobs

The Impact of Perceptual Aliasing on Exploration and Learning in a Dynamic Decision Making Task .............................................................. 162
Lisa Zaval, Todd Gureckis

Human foraging behavior: A virtual reality investigation on area restricted search in humans .... 168
Christopher Kalff, Thomas Hills, Jan Malte Wiener

Learning in Multiple-cue Judgment Tasks .................................................. 174
Bettina von Helversen, Joerg Rieskamp

Symposium: Success in Theory of Mind

Success in Theory of Mind ................................................................. 180
Rose Scott, Adam Petrashek, Noah Goodman, Rebecca Saxe, Renee Baillargeon, Ori Friedman

Foundations: Representation

Disentangling Representation from Conceptualisation .................................... 182
Nancy Salay

Thought, Language and Mental Representation ........................................... 188
Jonathan Trigg, Michael Kalish

What Is Domain Specificity (and Why Does It Matter)? .............................. 194
Muhammad Ali Khalidi

Cognition for action: an architectural account for ”grounded interaction” .......... 200
Anthony Harrison, J. Gregory Trafton

Language: Role of Syntax

The avoidance of ambiguity during conversation: More than mere priming or mimicry? ........ 206
Jennifer M. Roche, Rick Dale, Roger J. Kreuz

Syntax Drives Phonological Choice - Even Independently of Word Choice ............. 212
Marie Nilsenova, Marije van Amelsvoort

Corpus Evidence for Age Effects on Priming in Child Language ....................... 218
Jeffrey Gerard, Frank Keller, Themis Palpanas

Understanding acceptability judgments: Additivity and working memory effects ........ 224
Laura Staum Casasanto, Philip Hofmeister, Ivan Sag

Induction: Facilitating Factors

The Role of Linguistic Labels in Categorization ........................................ 230
Sophia Deng, Vladimir Sloutsky

The Price is Right: A High Information Access Cost Facilitates Category Learning ........ 236
Michael Wood, Michael Fry, Mark Blair
Effects of generative and discriminative learning on use of category variability .................. 242
Anne Hsu, Thomas Griffiths

Category Learning Through Active Sampling ................................................................. 248
Doug Markant, Todd Gureckis

Cognitive Architecture: Encoding & Retrieval

SARKAE - Modeling the Co-Evolution of Event Memory and Knowledge .......................... 254
Angela Nelson, Richard Shiffrin

Looking at Nothing Indicates Memory Search in Multiattribute Decision Making .............. 260
Frank Renkewitz, Georg Jahn

Motor Simulation in a Memory Task: Evidence from Rock Climbing ............................... 266
Giovanni Pezzulo, Laura Barca, Alessandro Lamberti Bocconi, Anna M. Borghi

Social Cognition: Joint Attention

Enactive Social Cognition .................................................. 272
Tobias Schlicht

Building a Model of Infant Social Interaction .............................................................. 278
Joshua Lewis, Gedeon Deák, Hector Jasso, Jochen Triesch

The Emergence of Referential Gaze and Perspective-taking in Infants ............................ 284
R. Joanne Jao, Marybel Robledo, Gedeon O. Deák

Joint perception: gaze and beliefs about social context .............................................. 290
Daniel Richardson, Chris Street, Joanne Tan

Education: Meta-Cognitive Aspects

Teaching Students Self-Assessment and Task-Selection Skills with Video-Based Modeling  Examples ............................................................... 296
Tamara van Gog, Danny Kostons, Fred Paas

Confidence without Competence in the Evaluation of Scientific Claims ........................... 302
Andrew Shtulman

Individual Differences as Predictors of Learning and Engagement .............................. 308
Sidney D'Mello, Claire Williams, Patrick Hays, Andrew Olney

Do Tutors’ Content Knowledge and Beliefs About Learning Influence Their Assessment of Tutees’ Understanding? .................................................. 314
Stephanie Herppich, Jörg Wittwer, Matthias Nückles, Alexander Renkl

Decision Making: Risk

Risk attitude in decision making: A clash of three approaches .................................. 320
Eldad Yechiam, Eyal Ert

Making Assessments While Taking Sequential Risks ..................................................... 326
Avishai Wershbale, Timothy Pleskac

Testing Two Explanations for the Disjunction Effect in Prisoner’s Dilemma Games: Complexity and Quasi-Magical Thinking ........................................... 332
Evgenia Hristova, Maurice Grinberg
Mentalizing in games: A subtractive behavioral study of Prisoner’s Dilemma .......................... 338
Antonio Napoli, Danilo Fum

Symposium: Prospective Perception

Prospective Perception ............................................................................................................ 344
Jerome Scott Jordan, Jessica Witt, Michael Riley

Conceptual Spaces: Examples and Methods

Constructing Spatial Concepts from Universal Primitives ................................................. 346
Yang Xu, Charles Kemp

Replicating Color Term Universals through Human Iterated Learning .............................. 352
Jing Xu, Thomas Griffiths, Mike Downman

Similarity judgments reflect both language and cross-language tendencies: Evidence from two semantic domains ................................................................. 358
Naveen Khetarpal, Asifa Majid, Barbara Malt, Steven Sloman, Terry Regier

Language: Speech Perception

Adults’ self-directed learning of an artificial lexicon: The dynamics of neighborhood reorganization .......................................................... 364
Neil Bardhan, Richard Aslin, Michael Tanenhaus

Perceptual Advantage from Generalized Linguistic Knowledge ........................................ 369
Bozena Pajak

A rational account of perceptual compensation for coarticulation .................................... 375
Morgan Sonderegger, Alan Yu

Effects of Pragmatic Inference on Phoneme Identification ................................................. 381
Hannah Rohde, Marc Ettlinger

Induction: Differential Factors

Individual Differences in Attention During Category Learning ........................................ 387
Michael Lee, Ruud Wetzels

Categorisation, Deferece and Cognitive Style ................................................................. 393
Nick Braisby, Sharon Hanlon

When Comparison Helps: The Role of Language, Prior Knowledge and Similarity in Categorizing Novel Objects .................................................. 399
Clare Sims, Eliana Colunga

Category Learning and Adaptive Benefits of Aging ........................................................ 405
Angela Merritt, Linnea Karlsson, Edward Cokely

Cognitive Architecture: Higher-Order Structure

Encoding higher-order structure in visual working memory: A probabilistic model ............. 411
Timothy Brady, Joshua Tenenbaum
Expertise in Visual Art is Associated with Altered Perceptual Strategies Within and Across Domains: Evidence from Eye Tracking ................................................................. 417
Kuba Glazek, Robert Weisberg

Melody Recognition: Effects of Articulation Format .................................................. 423
Stephen Wee Hun Lim, Winston D. Goh

On the Relationship Between Entropy and Meaning in Music: An Exploration with Recurrent Neural Networks ................................................................. 429
Greg Cox

Social Cognition: Human-Robot Interaction

Simulating Cognitive Coping Strategies for Intelligent Support Agents ...................... 435
Azizi Ab Aziz, Jan Treur, Michel Klein

An Adaptive Integrative Ambient Agent Model to Intervene in the Dynamics of Beliefs and Emotions ................................................................. 441
Zulfiqar Ali Memon, Jan Treur

Proposing Artificial Subtle Expressions as an Intuitive Notification Methodology for Artificial Agents’ Internal States ................................................................. 447
Takanori Komatsu, Seiji Yamada, Kazuki Kobayashi, Kotaro Funakoshi, Mikio Nakano

Experiments for Assessing Floating Reinstatement in Argument-based Reasoning ............ 453
Iyad Rahwan, Jean-Francois Bonnefon, Mohammed Iqbal Madakhatel, Ruqiyabi Naz Awan, Sherief Abdallah

Education: Transfer

Optimizing Learning Environments: An Individual Difference Approach to Learning and Transfer 459
Daniel Belenky, Timothy Nokes

The Effects of Similarity and Individual Differences on Comparison and Transfer ............ 465
Samuel Day, Robert L. Goldstone, Thomas Hills

Seeing Language Learning Inside the Math: Cognitive Analysis Yields Transfer .............. 471
Ken Koedinger, Elizabeth McLaughlin

Initial Evidence of the Effects of Linguistic Framing on Transfer .................................. 477
Randi A. Engle, Adam Mendelson, Phi D. Nguyen

Decision Making: Non-Optimality

Impatience as Intertemporal Egoism ................................................................. 483
Daniel Bartels, Oleg Urminsky

WIN!! vs. win: Impact of “Outcome” Salience on Illusion of Control ......................... 489
Stefania Mereu, Alejandro Lleras

Signs of Non-Linearity in Base-Rate Neglect .......................................................... 495
Christopher Erb, Heidi Kloos

Mathematically Modeling Anchoring Effects .......................................................... 501
Jessica Choplin, Mark Tawney
Symposium: The Philosophy of Affective Neuroscience

The Philosophy of Affective Neuroscience ....................................................... 507
  Rami Gabriel, Jaak Panksepp, Stephen Asma, Glennon Curran

Poster Session 1

Response Choice When Telling Lies .............................................................. 509
  Emma Williams, Lewis Bott, Michael Lewis, John Patrick

Does Practice Narrow the Radius of Spatial Interference in Mental Images? ............. 510
  Don Lyon

A Sense of Order: Numerical ordering ability predicts complex mental arithmetic performance .. 511
  Ian Lyons, Sian Beilock

Imaginary affordances shape children’s preference judgments ............................ 512
  Tania Henetz, Daniel Casasanto

Testing fMRI predictions of a Cognitive Model of the Problem State Multitasking Bottleneck ..... 513
  Jelmer Borst, Niels Taatgen, Hedderik Van Rijn, Andrea Stocco

Grounded Congruency Effects Between Vertical Meaning and Vertical Responding: Not Replicated 514
  Lauren McDonough, Christine Wilson-Mendenhall, Lawrence Barsalou

MIReR: Media Integration Reflection Resource ................................................ 515
  Andreea Danielescu, Ellen Campana

Social Influences on the, um, Use of, uh, Fillers ........................................... 516
  Esther Walker, Evan Risko, Alan Kingstone

Probability estimation by mice in an interval timing task .................................... 517
  Aaron Kheifets, C. Randy Gallistel

The Specificity of Non-Arbitrary Sound-to-Meaning Correspondences in Spoken Language ...... 518
  Christina Y. Tzeng, Lynne C. Nygaard, Laura L. Namy

Pattern Recognition Principle Theoretical Model of Mind-Brain Functioning ............... 519
  Gilberto de Paiva

Individual Differences in Explaining Noisy Data ............................................. 520
  Daniel R. Little, Richard M. Shiffrin

Making a good impression (formation model): a more complete account of processing ........ 521
  Tei Laine, Swati Gupta, Brian M. Monroe

The representation of idiom words in the mental lexicon .................................... 522
  Simone Sprenger, Hedderik van Rijn

Assessing the Effectiveness of Wayfinding Directions ...................................... 523
  Alycia Hund, Amanda Padgitt

How Agent Placement Can Influence Perceived Boss/Co-worker Agreement in a Simulated Work Environment ................................................................. 524
  Justin L. Matthews, Teenie Matlock
