2010 Third International Symposium on Electronic Commerce and Security

(ISECS 2010)

Nanchang City, China
29-31 July 2010
# Table of Contents

**Message from the ISECS 2010 Symposium Chairs** ................................................................. xi
**Organizing Committee** ............................................................................................................... xii
**Program Committee Members** ................................................................................................. xiv
**Reviewers** ................................................................................................................................. xvii

---

**Third International Symposium on Electronic Commerce and Security - ISECS 2010**

Research on Short Text Classification Algorithm Based on Statistics and Rules ................................. 3  
*Zhou Faguo, Zhang Fan, Yang Bingru, and Yu Xingang*

The Image Method of Measuring Sand Content in Medium and Small River Water .............................. 8  
*Zhu Bing, Zhou Xu-yan, Tan Bin, Liu Yong, Xiao Ying, and Kang Xiu-Hong*

Research on Application of Internet of Things in Electronic Commerce .............................................. 13  
*Guicheng Shen and Bingwu Liu*

Authentication and Access Control in Satellite Network .................................................................... 17  
*Lin Qi and Li Zhi*

On Computer Science Reform of Curriculum Structure ....................................................................... 21  
*Dan Chen and Nian-feng Fu*

A Kind of New Type Intellectualized Examination System ................................................................. 25  
*Dan Chen, Wei-qing Guo, and Xiao-gang Wu*

A Noval Data Quality Controlling and Assessing Model Based on Rules ............................................ 29  
*Yuan Man, Liu Wei, Huang Gang, and Gao Juntao*

The Stage Differences of the First-line and Middle Manager IT Competence ....................................... 33  
*Manhui Huang and Chi-Sum Wong*

Computing and Modeling of Urban Railway Traction Transmission System ......................................... 37  
*Yao Hui-ming, Yang Jian, and Fang Yu*
A Data Transmission Strategy of P2P Live Streaming Media System ..................................................41
Zhixin Sun, Yadang Chen, and Zhixin Sun
Anomaly Traffic Detection Model Based on Dynamic Aggregation .......................................................46
Zhixin Sun and Jin Gong
Two Improved Algorithms Based on Character Encryption and Decryption ........................................51
Ze-mao Zhao and Meng-ting Li
A Proactive System for Real-time Safety Management in Civil Airport ..................................................55
Ming Cheng and Wenhuan Liang
The Use of GPS for the Measurement of Details in Different Areas ......................................................59
Wang Wei, Sun Baosheng, Zhou Kefa, Zhao Xia, and Wang Jinlin
Yi Liu and Congdong Li
A Comprehensive Security Protection System of Information Management under Network Environment in China ........................................................................................................68
Shaohua He and Hongtao Zhu
Feature Selection of Face Recognition Based on Improved Chaos Genetic Algorithm ...............................74
Ming Li, Wenxia Du, and Liuqing Yuan
Unscented Particle Filtering with Particle Swarm Optimization for Estimating Nonlinear System ........79
Ming Li, Liuqing Yuan, and Wenxia Du
Voice-Based Recognition System for Non-Semantics Information by Language and Gender ................84
Wei Li, Dong-Ju Kim, Chul-Hwan Kim, and Kwang-Seok Hong
Process Algebra with Goal Based Bisimulation .....................................................................................89
Guang Zheng, Miao Jiang, Gao Chen, Qinglin Zha, and Aiping Lu
The Business Model Innovation of Mobile Operators: A Case Study on ADC/MAS Model of China Mobile .................................................................96
Xiaobo Wu, Xiaochu Zhang, and Xiaoling Chen
An Extended Model for Group-Centric Secure Information Sharing .....................................................100
Li Pei-Wu
A Study on Safety Precautions in Consumption Online .................................................................104
Li TingChun
Study on Usability Evaluation of Fourth Party Logistics Platform .........................................................109
Zhai Lili, Lu Lu, and Zhang Yunlong
Multifeature Analysis in Motor Imagery EEG Classification ..................................................................114
Hu Jian-feng
SMS4 Algorithm Algebra Fault Attack .................................................................................................118
Hu Zhihua and Liao Xiaoyong
High Performance Remote Sensing Image Processing Using CUDA
Xiaoshu Si and Hong Zheng

Scalable Authenticated Dynamic Group Key Agreement Based on Multi-Tree
Zhu ZeQuan and Xu QiuLiang

The Research of Arrhythmia Algorithm Based on Fuzzy Neural Network
Yang Shan-xiao, Chen Cai-ming, Dai Yu-liang, and Yang Guang-ying

The Design of Group Decision Support System for Emergency Management
Deng Jingyi and Chen Xusheng

3D Presentation and 3D Model Retrieval for E-Commerce
Jun-Hui Wang and Zhang Zhi-yong

The Research and Application of Improved IP Trace Solutions in Advanced Packet Marking
Zhou Zhide

Flow Forecasting Model Based on Grey Neural Network and Self-adapting Network Filtration
Zhou Zhide

Universal Steganographic Detection in JPEG Image Using the Graph Laplacian Semi-supervised Kernel
Zhifeng Liu and Shangping Zhong

Darboux Transformations of Zakharov I Equation
Fang Li, Jinshun Zhang, and Yingqi Zhang

Negotiation Model Based on Neural Network and Case-based Reasoning
Shaobin Dong

Horizontal Dilution of Precision Analysis for Loran C/ Beidou Integrated Navigation System
Tong Haipeng and Xu Haigang

Fairness Analysis of Petri Synthesis Net
Chuanliang Xia

Group Key Agreement Scheme for Mobile Ad Hoc Networks Based on Threshold Secret Sharing
Chen Li-qing and Hu Rong-lin

Components Dependency Relativity Analysis in CBSA
Ping Lu, Tong Li, Zhongwen Xie, Fei Dai, Yong Yu, and Haifeng Wu

Research on Visualization of Electromagnetic Information in Virtual Environment
Guo Shuxia, Liu Weiyuan, Zhang Jinhui, and Gao Ying

Vehicle Color Recognition Using Vector Matching of Template
XiuZhi Li, Guangming Zhang, Jing Fang, Jian Wu, and Zhiming Cui

An Light-weight Algorithm for Unorganized Point Cloud
Zhang Jing, He Qiwei, and Feng Shaowei
Web-Based Class Management System Using E-commerce Technology .......................................................... 199
    Bin Zeng, Shaowei Feng, and Jing Zhang

Design of the Visualized Assistant for the Management of Proxy Server ....................................................... 204
    Shaowei Feng, Jing Zhang, and Bin Zeng

Behavior-based Attack Detection and Reporting in Wireless Sensor Networks .................................................. 209
    Yang Liu and Kai Han

3D Object Scanning System by Coded Structured Light .................................................................................. 213
    Fang-Hsuan Cheng, Chien-Te Lu, and Yea-Shuan Huang

AES Key Recovery Based on Switching Distance Model .................................................................................. 218
    Hongying Liu, Guoyu Qian, Satoshi Goto, and Yukiyasu Tsunoo

An Approach of Using Different Positions of Double Registers to Protect AES Hardware Structure from DPA ...................................................................................................................................................... 223
    Ying Zhou, Guoyu Qian, Yueying Xing, Hongying Liu, Satoshi Goto, and Yukiyasu Tsunoo

Clustering Algorithms Based on Mahalanobis Distances .............................................................................. 228
    Jeng-Ming Yih and Yuan-Horng Lin

Universal Steganographic Detection Algorithm in JPEG Image Using the Data-Dependent Kernel ............................................................................................................................................................................. 232
    Chen Qunjie and Zhong Shangping

A Reputation Based Attack Resistant Distributed Trust Management Model in P2P Networks ............................................................................................................................................................................. 237
    Jianli Hu, Xiaohua Li, Bin Zhou, and Yonghua Li

A Privacy-Preserving Integrity Measurement Architecture .............................................................................. 242
    Li Shang Jie and He Ye Ping

Developing Secure and Efficient Electronic Commerce Applications with eTRON Architecture .......................................................... 247
    M. Fahim Ferdous Khan, Ken Sakamura, Takeshi Yashiro, Masahiro Bessho, and Noboru Koshizuka

Load Balancing on Heterogeneous Biswapped Network .............................................................................. 253
    Wenhong Wei and Yong Li

A Semantic Based Information Retrieval Model for Blog ............................................................................ 257
    Ying Chen, Wenping Guo, and Xiaoming Zhao

Ontology-based Merchandise Evaluation and Search ...................................................................................... 261
    Lixin Zhou

An Audio CAPTCHA to Distinguish Humans from Computers ................................................................... 265
    Haichang Gao, Honggang Liu, Dan Yao, Xiyang Liu, and Uwe Aickelin

Study of Coordination Management Model between Supplier and Manufacturer .............................................. 270
    Chunling Liu, Jingyi Chen, and Cheng Chen

A Pricing Model and Sensitivity Analysis for MNO’s Investment Decision Making in 3G UMTS Networks .......................................................................................................................................................... 274
    Santi Pattanavichai, Nipat Jongsawat, and Wichian Premchaiswadi
An Attack against DES Based on the Relationship $L_{i+1} = R_i$ ................................................................. 280
Zhengjun Cao and Lihua Liu

An Approach for Dynamic Evolution of Component-based Software .......................................................... 284
Wang Wei and Li Tong

A Video Watermarking Algorithm Resistant to Copy Attack ........................................................................... 289
Yuanyu Ding, Xiaoshi Zheng, Yanling Zhao, and Guangqi Liu

Face Recognition Based on Fractal and Hidden Markov Model ..................................................................... 293
ZhiPeng Sun and Jinguang Sun

Face Recognition Method Based on FLPP ........................................................................................................... 298
Yang Liu and Jinguang Sun

Face Recognition Based on Gabor Feature Extraction and Fractal Coding .................................................. 302
Yuanbo Yang and Jinguang Sun

Study on Improved Genetic Algorithm for Multi-cargo Loading Problem .................................................. 307
Ren Chunyu and Wang Xiaobo

Influence of On-line Brand Experience on Purchase Intention: An Empirical Study of Non-standardized Commodity ......................................................................................................................... 311
Chen Pang and Xiaofen Ji

Performance Evaluation on Image Segmentation based on FD-weighed Grey Relational Analysis .................. 316
Miao Ma, Jiao He, Lingmei Ai, and Hualei Guo

Free or Free and Fee: Pricing Strategy of Information Goods on Mobile Internet ............................................. 321
Yanbin Liu and Ping Yuan

An SOA Based Enterprise Application Integration Approach .............................................................................. 324
Chunhua Gu and Xueqin Zhang

Research of Drowsiness in Driving Based on EEG ......................................................................................... 328
Derong Jiang and Jianfeng Hu

A Survey of Virtual Machine System: Current Technology and Future Trends ............................................. 332
Yunfa Li, Wanqing Li, and Congfeng Jiang

Design and Implementation of Load Balancing of Distributed-system-based Web Server ............................... 337
Yang Jiao and Wei Wang

Global Exponential Stability of a General Class of BAM Neural Networks with Impulsive and Delay ...... 343
Chaolong Zhang, Wensi Ding, Fengjian Yang, and Yanshan Zeng

Exponential Stability of Bidirectional Associative Memory Neural Networks with Distributed Delays on Time Scales ................................................................................................................. 347
Chaolong Zhang, Wensi Ding, Fengjian Yang, and Wei Li

Pareto-based Process Model of Target Selection for Textile Industrial Enterprise Mergers and Acquisitions ................................................................................................................................. 352
Hai-Feng Liu and Zhi-Hua Hu
