Annual Conference of the Dynamic Positioning Committee 2008

Houston, Texas, USA
7-8 October 2008

# TABLE OF CONTENTS

## DP INNOVATION

**Automatic Tuning of a DP Vessel**

John Leavitt, Benjamin I. Triplett, Alan C. Herold

**A Novel Solution to Common Mode Failures in DP Class 2 Power Plant**

Steven Cargill

**Dynamic Positioning of Underwater Vehicles – Tethered or Not**

Jonathan Davis, Ioseba Tena

## NEW APPLICATIONS

**From Auto Control of Vessels Designed for Offshore Conditions to Auto Control of Large Barge Convoys in a River/Canal – Lessons Learned**

Anselmo Pontes, Edsom Mesquita Dos Santos

**A Tighter Watch Circle at Higher Speeds**

Gregory Hughes, Rick Harris, Frans Quadvlieg

**Dynamic Positioning for Heavy Lift Applications**

John Flint, Richard Stephens

## OPERATIONS

**Using GIS to Understand Hurricane Windfields in the Gulf of Mexico**

Jill F. Hasling, Maureen T. Maiuri

**On the Use of Safety Moorings in DP Operations**

Nils Albert Jenssen

**Revisions to the Guidelines for Safe Operations of Dynamically Positioned Offshore Vessels**

Ian Giddings

## RISK, FMEA & RELIABILITY

**Crossing the Salt Barrier by Using a Reliable DP Vessel**

Gilberto Beduhn Machado, Afonso André Pallaoro

**An FMEA is for Life**

Ian Harper

**Machinery Systems for DP Vessels with Increased Efficiency and Reliability**

Terje Nordtun

## SENSORS – DAY 1

**Integrating Other GNSS with GPS and its Implications for Dynamic Positioning**

David Russell

**Field Applications and Environmental Challenges in the Use of Radascan**

Dominic Pearce

**Redundancy in Hydroacoustical Systems for DP Applications**

Torger Torgersen

## SENSORS – DAY 2

**Integration of an Inertial Navigation System and Dynamic Positioning**

Richard Stephens, François Crétollier, Pierre-Yves Morvan, Andrew Chamberlain

**INS-GNSS Integration Based on MEM Technology**

Arne Rinnan, Andrew Robertsen, Marit Sigmond, Edgar Johansen, Asgeir Kvam
Redundancy in Dynamic Positioning Based on Satellite Navigation ................................................................. 687  
Ole Ørpen, Tor Egil Melgård, Arne Norum

THRUSTERS

Reliability Prediction of Steerable Thruster Systems Based on Condition Measurements .......................... 711  
Daniël Soute, Teus Van Beek, Jeroen Van Keep

Design of Reliable Steerable Thrusters by Enhanced Numerical Methods and Full Scale Optimization  
of Thruster- Hull Interaction Using CFD ........................................................................................................ 735  
Dick Jürgens, Michael Palm, Andreas Amelang, Torsten Moltrecht

Optimal Thrust Allocation in Dynamic Position Systems ............................................................................. 819  
John Leavitt

TRAINING

The Nautical Institute’s Dynamic Positioning Training Executive Group ....................................................... 843  
Mark A. Pointon

Advanced Training for DP Operators ............................................................................................................. 859  
Doug Olson

FMEA

Accepting and Correcting Failure Consequences Early in the Design .......................................................... 890  
Ron Carlson
