2010 10th International Conference on Quality Software
(QSIC 2010)

Zhangjiajie, China
14 – 15 July 2010
2010 10th International Conference on Quality Software

QSIC 2010

Table of Contents

Message from the Program Chairs..........................................................................................................xi
Message from the Steering Committee Chair..................................................................................xii
Committees..........................................................................................................................................................xiii
Program Committee........................................................................................................................................xiv
Reviewers..............................................................................................................................................................xvi
Workshop Committees...........................................................................................................................................xvii
Message from the Workshop Chairs of The First International Workshop on Program Debugging in China......................................................xix
Message from the Workshop Chairs of the International Workshop on Quality of Service-Based Systems..........................................................................xx
Message from the Workshop Chairs of the Workshop on Embedded System Software Development and Quality Assurance.................................................................xxi

Keynote Addresses

Assessing Dependability for Mobile and Ubiquitous Systems: Is there a Role for Software Architectures?..................................................................................................................1
  Paola Inverardi

Knowledge Sharing in Software Development .................................................................................................2
  Hans van Vliet

QSIC 2010 Full Papers

Automated Conformance Verification of Hybrid Systems ..................................................................................3
  Harald Brandl, Martin Weiglhofer, and Bernhard K. Aichernig

A Grouping-Based Strategy to Improve the Effectiveness of Fault Localization
  Techniques..............................................................................................................................................................13
  Vidroha Debroy, W. Eric Wong, Xiaofeng Xu, and Byoungju Choi
On the Impact of Design Flaws on Software Defects ................................................................. 23
Marco D'Ambros, Alberto Bacchelli, and Michele Lanza
Mining Performance Regression Testing Repositories for Automated
Performance Analysis ................................................................................................................. 32
King Chun Foo, Zhen Ming Jiang, Bram Adams, Ahmed E. Hassan, Ying Zou,
and Parminder Flora
Prioritizing Tests for Software Fault Localization ................................................................. 42
Alberto Gonzalez-Sanchez, Eric Piel, Hans-Gerhard Gross, and Arjan J.C. van Gemund
Scenarios-Based Testing of Systems with Distributed Ports ................................................. 52
Robert M. Hierons, Mercedes G. Merayo, and Manuel Núñez
Regression Testing Process Improvement for Specification Evolution
of Real-World Protocol Software ......................................................................................... 62
Bo Jiang, T.H. Tse, Wolfgang Grieskamp, Nicolas Kicillof, Yiming Cao, and Xiang Li
A Simulation Study on Some Search Algorithms for Regression Test Case
Prioritization .......................................................................................................................... 72
Sihan Li, Naiwen Bian, Zhenyu Chen, Dongjiang You, and Yuchen He
Software Quality Prediction Models Compared ................................................................. 82
Rüdiger Lincke, Tobias Gutzmann, and Welf Löwe
Adaptive Random Testing by Exclusion through Test Profile ............................................. 92
Huai Liu, Xiaodong Xie, Jing Yang, Yansheng Lu, and Tsong Yueh Chen
Specification-Based Testing of Intrusion Detection Engines Using Logical
Expression Testing Criteria ............................................................................................... 102
Frédéric Massicotte and Yvan Labiche
Factors for Effective Use of Deployed Design Patterns ...................................................... 112
T.H. Ng, Y.T. Yu, and S.C. Cheung
Test Sequence Generation from Communicating UML State Charts: An
Industrial Application of Symbolic Transition Systems .................................................. 122
Christian Schwarzl and Bernhard Peischl
Prioritizing Unit Test Creation for Test-Driven Maintenance of Legacy
Systems .................................................................................................................................. 132
Emad Shihab, Zhen Ming Jiang, Bram Adams, Ahmed E. Hassan, and Robert Bowerman
Secure Information Flow in Java via Reachability Analysis of Pushdown
System .................................................................................................................................. 142
Cong Sun, Liyong Tang, and Zhong Chen
Correlating Context-Awareness and Mutation Analysis for Pervasive
Computing Systems ............................................................................................................ 151
Huai Wang, Ke Zhai, and T.H. Tse
Fault Localization Based on Dynamic Slicing and Hitting-Set Computation ...................... 161
Franz Wotawa

</table>
Towards an Empirical Reuse Approach for the Software Evolution: A Case Study
Ziyou Wang, Minghui Zhou, and Hong Mei

Implementing Self-Adaptive Software Architecture by Reflective Component Model and Dynamic AOP: A Case Study
Yuankai Wu, Yijian Wu, Xin Peng, and Wenyun Zhao

Performance Prediction of WS-CDL Based Service Composition
Yunni Xia, Hongchao Xue, and Xiuwu Wang

Automated Program Verification Using Generation of Invariants
Jianying Xing, Mengjun Li, and Zhoujun Li

Visualized Scenario Classification Method
Yusaku Yoshida and Atsushi Ohnishi

A Fault-Tolerant Strategy for Improving the Reliability of Service Composition
Huiqun Yu, Guisheng Fan, Liqiong Chen, and Dongmei Liu

Active Monitoring for Control Systems under Anticipatory Semantics
Changzhi Zhao, Wei Dong, and Zhichang Qi

Event Handler-Based Coverage for GUI Testing
Lei Zhao and Kai-Yuan Cai

QSIC 2010 Emerging Track Papers

Evaluating Web Site Quality: A Statistical Approach
Isabella Biscoglio, Alessandro Coco, Fabrizio Fabbrini, Mario Fusani, Giuseppe Lami, and Gianluca Trentanni

Testing Long-Lived Web Services Transactions Using a Risk-Based Approach
Ruben Casado, Javier Tuya, and Muhammad Younas

Requirement Checking: Generating Uses Cases out of Navigational Logs in Web Applications
Zuohua Ding, Mingyue Jiang, Geguang Pu, and Jing Liu

Good Practices as a Quality-Oriented Modeling Assistant
Vincent Le Gloahec, Regis Fleurquin, and Salah Sadou

Control and Data Complexity Metrics for Web Service Compositions
Chengying Mao

Designing Test Coverage for Grey Box Analysis
Faizah Omar and Suhaimi Ibrahim

An Integrated Support for Attributed Goal-Oriented Requirements Analysis Method and its Implementation
Motoshi Saeki, Shinpei Hayashi, and Haruhiko Kaiya

A Refinement-Based Validation Method for Programmable Logic Controllers
Hai Wan, Xiaoyu Song, Gang Chen, and Ming Gu
Towards Runtime Plug-and-Play Software .........................................................................................................365
    Tao Wang, Xiaowei Zhou, Jun Wei, and Wenbo Zhang

Mapping UML Activity Diagrams to Analyzable Petri Net Models .................................................................369
    Nianhua Yang, Huiqun Yu, Hua Sun, and Zhilin Qian

An MDE Based Approach for Generating Software Architecture Models from Formal Specifications ....................................................................................................................................373
    Yi Zhu, Zhiqiu Huang, Zining Cao, Hang Zhou, and Min Yuan

IWPDC 2010 Full Papers

On the Integration of Test Adequacy, Test Case Prioritization, and Statistical Fault Localization ...........................................................377
    Bo Jiang and W.K. Chan

Isolating Suspiciousness from Spectrum-Based Fault Localization Techniques .................................................385
    Xiaoyuan Xie, Tsong Yueh Chen, and Baowen Xu

IWPDC 2010 Short Papers

A Debugging Approach for Java Runtime Exceptions Based on Program Slicing ...................................................393
    Shujuan Jiang, Hongchang Zhang, Qingtan Wang, and Yanmei Zhang

A Novel Approach to Automatic Test Case Generation for Web Applications ..................................................399
    Yuan-Hsin Tung, Shian-Shyong Tseng, Tsung-Ju Lee, and Jui-Feng Weng

QSBS 2010

An Executable Concurrent Model for OWL-S Process Models .............................................................................405
    Zhenhua Duan and Cong Tian

NPE—A Conceptual Model and Language for the Representation of Norms .........................................................414
    Andrew Kevin Douglas, Robert John Walters, and Gary Brian Wills

Web Service Security Analysis Model Based on Program Slicing ......................................................................422
    Xiaohong Li, Yan Cao, Zhiyong Feng, and Ran Liu

Develop Web Services for Reliable Cross-Platform Web Applications ..............................................................429
    Jiang B. Liu, Nithya Vasudevan Praveen, and Kumar Macherla

Design of BDI Agent for Adaptive Performance Testing of Web Services .........................................................435
    Bo Ma, Bin Chen, Xiaoying Bai, and Junfei Huang

A Probabilistic QoS Model-Checking for Dynamic Routing Protocol .................................................................441
    Hongli Yang, Liang Zhou, Kang He, Chen Deng, Xiangpeng Zhao, and Zongyan Qiu

Point-of-Interest Aware Test Case Prioritization: Methods and Experiments ....................................................449
    Ke Zhai and W.K. Chan

Algebraic Specification of Web Services ..............................................................................................................457
    Hong Zhu and Bo Yu
WESQA 2010

Building Multi-kernel Embedded System on PAC Multi-core Platform ................................................................. 465
   Jing Chen, Chung-Ping Young, Da-Wei Chang, Guan-Ying Huang, Chung-Yuan Ke,
   Shih-Tun Yen, and Tsang-Shuo Kuo

Leveraging Performance and Power Savings for Embedded Systems Using
Multiple Target Deadlines ........................................................................................................................................ 473
   Edward Y.Y. Kan, W.K. Chan, and T.H. Tse

Supporting Tool for Embedded Software Testing .................................................................................................... 481
   Chorng-Shiuh Koong, Hung-Jui Lai, Chih-Hung Chang, William C. Chu,
   Nien-Lin Hsueh, Pao-Ann Hsiung, Chihhsiong Shih, and Chao-Tung Yang

From Applications, to Models and to Embedded System Code: A Modeling
Approach in Action ................................................................................................................................................. 488
   Hsin-Yu Tung, Chih-Hung Chang, Chih-Wei Lu, William C. Chu, and Hongji Yang

Adaptive Interaction Fault Location Based on Combinatorial Testing ................................................................. 495
   Ziyuan Wang, Baowen Xu, Lin Chen, and Lei Xu

Modeling and Analysis of the Behavior of uCOS Kernel Based on CSP .............................................................. 503
   ZhenHong Xu

Author Index ................................................................................................................................................................. 510
