### 10th IEEE International Conference on Advanced Learning Technologies (ICALT 2010)

1. **3D Digital Simulations in Participative Design of the Boulevard in Putrajaya: Implications on Academic, Organizational, and Informal Learning** ................................................................. 1
   Rashidah Ab. Rahman

2. **A 3D Educational Mobile Game to Enhance Student’s Spatial Skills** .................................. 6
   Norena Martin-Dorta, Isabel Sanchez-Berriel, Miguel Bravo, Juan Hernandez, Jose Luis Saorin, and Manuel Contero

3. **A Chorus Learning Support System Based on the Tutoring Knowledge of the Chorus Leader** ......................................................... 11
   Mizue Kayama, Kazunori Itoh, Kazushi Asanuma, Masami Hashimoto, and Makoto Otani

4. **A Collaborative Mobile Virtual Campus System Based on Location-Based Dynamic Grouping** ................................................. 16
   Qing Tan, Kinshuk, Yu-Lin Jeng, and Yueh-Min Huang

5. **A Conceptual Framework of Learning through Agent Negotiation** .................................. 19
   K. Robert Lai and Chung-Hsien Lan

6. **A Design for Integration of Web 2.0 and an Online Learning Community: A Pilot Study for IWiLL 2.0** ........................................ 22
   I-Fan Liu, Meng Chang Chen, Yeali Sun, David Wible, and Chin-Hwa Kuo

7. **A Diversity-Enhanced Genetic Algorithm to Characterize the Questions of a Competitive e-Learning System** .................................. 25
   Elena Verdú, María Jesús Verdú, Luisa M. Regueras, and Juan Pablo de Castro

</table>
Analyzing Contextualized Attention Metadata with Rough Set Methodologies to Support Self-regulated Learning ...............................................................125
    Maren Scheffel, Martin Wolpers, and Frank Beer
Applying and Reusing Knowledge in a Repository ........................................................130
    I. Azevedo, A. Ortiz, C. Vaz de Carvalho, Rui Seiça, and E. Carrapatoso
AR_Dehaes: An Educational Toolkit Based on Augmented Reality Technology for Learning Engineering Graphics ..........................................................133
    Jorge Martín-Gutiérrez, Jose Luis Saorín, Manuel Contero, and Mariano Alcañiz
ASK-LOM-AP: A Web-Based Tool for Development and Management of IEEE LOM Application Profiles .................................................................................138
    George Chloros, Panagiotis Zervas, and Demetrios G. Sampson
Automarking: Automatic Assessment of Open Questions ..........................................................143
    Laurie Ane Cutrone and Maiga Chang
Bringing the Social Semantic Web to the Personal Learning Environment ................................148
    Vlad Posea and Stefan Trausan-Matu
Browsing E-Lecture Libraries on Mobile Devices: A Spatial Interaction Concept ...............................................................151
    Jochen Huber, Jürgen Steimle, Simon Olberding, Roman Lissermann, and Max Mühlhäuser
CARDS: A Metamodel Approach to Aggregate Outcomes of Learning Tools ..........................................................156
    Emilio Julio Lorenzo and Maria Felisa Verdejo
Case-Based Medical E-assessment System .................................................................................158
    Rozemary Scarlat, Liana Stanescu, Elvira Popescu, and Dumitru Dan Burdescu
Checking Semantic Consistency of SCORM like Learning Objects ..........................................................163
    Ramzi Farhat, Bruno Defude, and Mohamed Jemni
Children’s Interactive Behavior and Strategy in a Multi-robots’ Collaborative Environment ...............................................................168
    Wu-Yuin Hwang, Sheng-Yi Wu, and Te-Yuan Yang
Collaborative Development of an Augmented Reality Application for Digestive and Circulatory Systems Teaching ..........................................................173
    David Pérez-López, Manuel Contero, and Marianno Alcañiz
Combining Dialogue and Semantics for Learning and Knowledge Maturing: Developing Collaborative Understanding in the Web 2.0 Workplace ..........................................................176
    Andrew Ravenscroft, Simone Braun, and Tobias Nelkner
Communication Patterns in Component-Based Intelligent Tutoring Systems ..........................................................181
    Géraldine Ruddeck and Alke Martens
Comparing Social Virtual Worlds for Educational Purposes ..........................................................186
    Rosa Reis, Paula Escudeiro, and Nuno Escudeiro
Computerized Adaptive Testing Based on Decision Tree ..........................................................191
    Maomi Ueno and Pokpong Songmuang
Continuous Use of Authoring for Adaptive Educational Hypermedia: A Long-term Case Study ................................................................. 194

Jonathan G.K. Foss, Alexandra I. Cristea, and Maurice Hendrix

Course Ranking and Automated Suggestions through Web Mining ................................................................. 197

Stavros Valsamidis, Ioannis Kazanidis, Sotirios Kontogiannis, and Alexandros Karakos

Deeptink: A Second Life Environment for Part-time Research Students at a Distance ................................................................. 200

L. Rapanotti, L. Barroca, M. Vargas-Vera, and A.J. Reeves

Design and Evaluation of an Affective Interface of the E-learning Systems ......................................................... 202

Hui-Chun Chuang, Chin-Yeh Wang, Gwo-Dong Chen, Chen-Chung Liu, and Baw-Jhiune Liu

Design for Off-task Interaction - Rethinking Pedagogy in Technology Enhanced Learning ................................................................. 204

Agneta Gulz, Annika Silvervarg, and Björn Sjödén

Design Study of OER-CC Ontology - A Semantic Web Approach to Describe Open Educational Resources ................................................................. 207

Nelson Piedra, Janneth Chicaiza, Jorge López, Edmundo Tovar, and Oscar Martínez

Designing a Collaborative Learning Activity in Second Life - An Exploratory Study in Physics ................................................................. 210

Ioannis Vrellis, Nikiforos M. Papachristos, Joan Bellou, Nikolaos Avouris, and Tassos A. Mikropoulos

Designing Game-Based Learning Framework - A Motivation-Driven Approach ................................................................. 215

Kuo-chen Li, Jia-Chi Huang, Jia-Sheng Heh, Cheng-Ting Chen, Hui-Chih Wang, and Shiou-Wen Yeh

Designing Tutoring Activity - An Extension of Two EMLs, Based on an Organizational Model of Tutoring ................................................................. 217

Patricia Gounon and Pascal Leroux

Developing a Collaborative E-Learning Environment Based upon Semantic Wiki: From Design Models to Application Scenarios ................................................................. 222

Yanyan Li, Mingkai Dong, and Ronghuai Huang

Development and Evaluation of Learning Support System Based on Automatic Classification of Students’ Programs According to Difference from Standard Algorithm ................................................................. 227

Satoru Kogure, Hiroyasu Takatsu, Tatsuhiro Konishi, and Yukihiro Itah

Digital Design Learning Patterns in Ambient Learning Environments ................................................................. 229

Yacine Atif
dinsEditor: A Browser Extension for QTI-Compliant Assessment Item Authoring ................................................................. 231

Sungjae Han, Jinjoo Kim, Youngseok Lee, Jaehyuk Cha, and Byung-Uk Choi
Educational Tool Based on Topology and Evolution of Hyperlinks in the Wikipedia

Lauri Lahti

233

Educational Webportals Augmented by Mobile Devices with iFrimousse Architecture

Florent Carlier and Valérie Renault

236

Effects of Adaptive Reflection Teaching Strategies on Learners’ Reflection Levels in a Web-Based Learning Environment

Nian-Shing Chen, Chun-Wang Wei, and Chia-Chi Liu

241

E-learning Authoring with Docbook and SMIL

Alberto González Téllez

246

Emotional Strategies for Vocabulary Learning

Ramla Ghali and Claude Frasson

249

Enabling Communication and Feedback in Mass Lectures

Mostafa Akbari, Georg Böhm, and Ulrik Schroeder

254

Enabling the Use of Real World Objects to Improve Learning

Katja Niemann and Martin Wolpers

259

Engineering of Open Learning Scenarios - The Case of Hop3x Learning Scenarios

El Amine Ouraiba, Christophe Choquet, Philippe Cottier, Christophe Despres, and Pierre Jacoboni

264

Enhancing Educational Metadata with Mobile Assisted Language Learning Information

Panagiotis Zervas and Demetrios G. Sampson

269

Enhancing the Learning Experience by Addressing the Needs of the Learner Through Customization and Personalization in the Learning by Doing Methodology

Surya Kiran Reddy K. and Sandhya Kode

274

Evaluating a Brain-Computer Interface to Categorise Human Emotional Response

Katie Crowley, Aidan Sliney, Ian Pitt, and Dave Murphy

276

Evaluating Student Response Driven Feedback in a Programming Course

José Luis Fernández Alemán, Dominic Palmer-Brown, and Chrisina Draganova

279

Evaluating the Effectiveness and Motivational Impact of Replacing a Human Instructor by Mobile Devices for Teaching Network Services Configuration to Telecommunication Engineering Students

Mario Muñoz-Organero, Gustavo Ramirez-Gonzalez, Pedro J. Muñoz-Merino, and Carlos Delgado Kloos

284

Examining Learning Object Repositories from a Knowledge Management Perspective

Pavlos Kallonis and Demetrios G. Sampson

289
Examining the Effects of the Simultaneous Display of Students’ Responses Using a Digital Pen System on Class Activity - A Case Study of an Early Elementary School in Japan .......................... 294
Taro Sugihara, Takumi Miura, Motoki Miura, and Susumu Kunifuji

Exploiting Semantic and Social Technologies for Competency Management ........................................ 297
Giovanni Acampora, Matteo Gaeta, Francesco Orciuoli, and Pierluigi Ritrovato

Exploiting the Semantic Web for Interactive Relationship Discovery in Technology Enhanced Learning ................................................................. 302
Steffen Lohmann, Philipp Heim, and Paloma Diaz

Exploring the Development of Adaptable Learning Objects. A Practical Approach .......................................................... 307
Voula Gkatzidou and Elaine Pearson

Extending LMS with Collaborative Remote Lab Features ................................................................. 310
Mario A. Bochicchio and Antonella Longo

Extending Open Space Technology for Blended Learning .............................................................. 315
Isabel Pereira and Antonio Dias Figueiredo

Extending the IMS LD standard with Adaptability .............................................................. 320
Valérie Monfort, Maha Khemaja, and Slimane Hammoudi

Facilitating Learning Interests Through Mobile Information Visualization .................................................. 323
Yuan Xun Gu, Raymond Koon Chuan Koh, Vivian Hsueh-Hua Chen, and Henry Been-Lirn Duh

Fade-out and Peer Monitor Techniques in Tools for Scripted Argumentation: Evaluation Results from a Case Study .......................................................... 328
Yannis N. Bouyias, Stavros N. Demetriadis, and Anastasios Karakostas

From a Personal Learning Environment to an Adaptable Personal Learning Environment: Meeting the Needs and Preferences of Disabled Learners .......................... 333
Elaine Pearson, Voula Gkatzidou, and Steve Green

From Mini Rover Programs to Algebraic Expressions .............................................................. 336
G. Barbara Demo

Helping Students Understand Courses through Written Syntheses: An LSA-Based Online Advisor .......................................................... 341
Emmanuelle Villiot-Leclercq, Sonia Mandin, Philippe Dessus, and Virginie Zampa

How to Instrument a Community of Practice Dedicated to Project Based Pedagogy Tutors: A Solution Based on Case Based Reasoning .......................................................... 344
Céline Quénu-Joiron and Dominique Lecler

How to See Training Paths in Learning Management Systems? ........................................................ 349
Philippe Teutsch and Jean-Francois Bourdet

iCALT: Intelligent Context-Aware Learning and Teaching Environment .................................................. 352
Shonali Krishnaswamy, Selby Markham, John Hurst, Steven Cunningham, Cyrill Labbe, Behrang Saeedzadeh, and Brett Gillick
Identifying Animals with Dynamic Location-aware and Semantic Hierarchy-Based Image Browsing for Different Cognitive Style Learners 

Dunwei Wen, Ming-Chi Liu, Yueh-Min Huang, Kinshuk, and Pi-Hsia Hung

Implementation of a Remote Analog and Digital Communications Laboratory for e-Learning

Akram Abu-aisheh and Farid Farahmand

Implementation of Web-Based Dynamic Assessment System and its Application on Science Learning

Ah-Fur Lai, Chih-Hung Chen, and Horng-Yih Lai

Implementing Psychological Parameters in a Web-Based Appraisal System

Zacharias Lekkas, Nikos Tsianos, Costas Mourlas, Panagiotis Germanakos, and George Samaras

Improve the Output from a MCQ Test Item Generator Using Statistical NLP

Robert Michael Foster

Increasing Motivation in a Multicultural Learning Setting

S. Ortiz de Arri, M. Retegi, I. Calvo, A. Arruarte, J.A. Elorriaga, M. Larrañaga, and U. Rueda

Increasing Students In-Class Engagement through Public Commenting: An Exploratory Study

Honglu Du, Hao Jiang, Mary Beth Rosson, and John M. Carroll

Indicators for Supporting the Regulation Process of Learners’ Activities and the Teachers’ Self-regulation Process

Aina Lekira, Christophe Després, and Pierre Jacoboni

Injecting Pedagogical Constraints into Sequential Learning Pattern Mining

Mingming Zhou and Yabo Xu

Instant Seat Mapping for Student Note Sharing Process

Motoki Miura, Taro Sugihara, and Susumu Kunifuji

Integration of External Tools in Virtual Learning Environments: Main Design Issues and Alternatives

Carlos Alario-Hoyos, Juan I. Asensio-Pérez, Miguel L. Bote-Lorenzo, Eduardo Gómez-Sánchez, Guillermo Vega-Gorgojo, and Adolfo Ruiz-Calleja

Interactive Search Interfaces for Young Children - The PuppyIR Approach

Andreas Lingnau, Ian Ruthven, Monica Landoni, and Frans van der Sluis

Interactive Widgets for Regulation in Learning Games

Thibault Carron, Jean-Charles Marty, and Stéphane Talbot

Inter-University Co-operation by Using ViCaDiS Virtual Campus

Radu Vasiu and Diana Andone

Introducing Students to Aerospace Board Information Systems Using an Embedded Graphics System Simulator

Pavel Paces and Martin Šipos
