2010 4th IEEE International Symposium on Theoretical Aspects of Software Engineering

(TASE 2010)

Taipei, Taiwan
25-27 August 2010
# Table of Contents

## Foreword

## Organizing and Program Committees

## Reviewers

## Session I: Invited Papers

*Automated Test Case Generation of Self-Managing Policies for NASA Prototype Missions Developed with ASSL*  
Emil Vassev, Mike Hinchey, and Paddy Nixon  

*The Art of Developing Autonomic Systems - The ASSL Approach*  
Mike Hinchey and Emil Vassev

## Session II

*A Formal Model for Service Choreography with Exception Handling and Finalization*  
Yongxin Zhao, Zheng Wang, Geguang Pu, and Huibiao Zhu  

*A Guarded Workflow Language and Its Formal Semantics*  
Chen-Wei Wang, Jim Davies, and James Welch  

*Proving Model Transformations*  
Hung Ledang and Hubert Dubois

## Session III

*A Certifying Compiler for Clike Subset of C Language*  
Zhaopeng Li, Zhong Zhuang, Yiyun Chen, Simin Yang, Zhenting Zhang, and Dawei Fan  

*Stack Bound Inference for Abstract Java Bytecode*  
Shengyi Wang, Zongyan Qiu, Shengchao Qin, and Wei-Ngan Chin
An Improved Algorithm for Building the Characterizing Set .................................................. 67
   Huaikou Miao, Pan Liu, and Jia Mei

Session IV

Runtime Verification with Multi-valued Formula Rewriting .................................................. 77
   Lin Zhao, Tao Tang, Jinzhao Wu, and Tianhua Xu
Axiomatic Temporal Logic Programs Verification ................................................................. 87
   Xiaoxiao Yang and Zhenhua Duan
On the Theoretical Foundation of Meta-Modelling in Graphically Extended
BNF and First Order Logic ..................................................................................................... 95
   Hong Zhu

Session V

Modeling and Analysis of Reconfigurable Systems Using Flexible Petri Nets ....................... 107
   Laïd Kahloul, Alloua Chaoui, and Karim Djouani
Property Checking for 1-Place-Unbounded Petri Nets ......................................................... 117
   Yunhe Wang, Bo Jiang, and Li Jiao
Model Checking Rectangular Hybrid Systems with Timed Computation Tree
Logic ......................................................................................................................................... 126
   Hai-bin Zhang, Zhenhua Duan, Bohu Huang, Xiaobing Wang, and Long Zhang

Session VI

Bisimulations for Open Processes in Higher Order $\pi$-Calculus ............................................. 135
   Zining Cao
Specification, Verification and Implementation of Business Processes Using
CSP ............................................................................................................................................ 145
   Moritz Kleine and Thomas Göthel

Session VII

Incremental Invariant Generation for Compositional Design ................................................ 157
   Saddek Bensalem, Axel Legay, Thanh-Hung Nguyen, Joseph Sifakis, and Rongjie Yan
Compositional Abstraction Refinement for Timed Systems .................................................. 168
   Fei He, He Zhu, William N.N. Hung, Xiaoyu Song, and Ming Gu

Session VIII

Parameterized Specification and Verification of PLC Systems in Coq .................................... 179
   Hai Wan, Xiaoyu Song, and Ming Gu
Lazy Decision Diagrams for Word-Level Model Manipulation in Software
Verification ............................................................................................................................... 183
   Farn Wang
From Dynamic Condition Response Structures to Büchi Automata ..................................... 187
   Raghava Rao Mukkamala and Thomas T. Hildebrandt
Session IX

Probabilistic Model of System Survivability .................................................................193
   Yongxin Zhao, Yanhong Huang, Jianwen Li, and Huibiao Zhu

Estimating the Soft Error Vulnerability of Register Files via Interprocedural Data Flow Analysis .................................................................201
   Jianjun Xu, Qingping Tan, and Wanwei Liu

Towards Practical Modeling of Web Applications and Generating Tests ..........................209
   Shengbo Chen, Huaikou Miao, Bo Song, and Yihai Chen

Author Index ..................................................................................................................218
