American Water Resources Association
Summer Specialty Conference 2010

Tropical Hydrology and Sustainable Water Resources in a Changing Climate

San Juan, Puerto Rico, USA
30 August – 1 September 2010

ISBN: 978-1-61738-963-4
TABLE OF CONTENTS

CONFERENCE OPENING PLENARY SESSION

Global Change and Water Resources in the Next 100 Years ................................................................. 1
  Matthew C. Larsen

SESSION 1: GROUNDWATER QUALITY
  Moderator: Juan Amador

The In-situ Measurement of Temperature and Specific Conductance of Ground Water in Puerto Rico .... 8
  Ronald T. Richards

Effects of Changes in Irrigation Practices and Aquifer Development on the South Coast Aquifer, Puerto Rico ................................................................. 13
  Eve Kuniansky, Fernando Gómez-Gómez, Jose M. Rodriguez, Sigfredo Torres-González

Spatial and Temporal Variation in Isotopic Composition of Precipitation and Groundwater in Contrastng Precipitation Regions in Puerto Rico, an Island Located in Northeastern Caribbean .......... 14
  Yogani Govender, E. Cuevas, L. Sternberg

Groundwater Quality Conditions and Trends in the South Coast Aquifer of Puerto Rico .......................... 15
  Jose M. Rodriguez

SESSION 2: COMPUTER MODELING
  Moderator: Felix Lopez

Development of Decision Support Systems for Estimating Salinity Intrusion Effects Due to Climate Change on the South Carolina and Georgia Coast ................................................................. 21
  Paul Conrads, Edwin Roehl, Daniel Tufford, Greg Carbone, Kirstin Dow

Evaluation of Upscaling Parameters and Their Influence on Hydrologic Predictability in Upland Tropical Areas .................................................................................................................... 22
  Alejandra Rojas González, Eric W. Harmsen, Sandra Cruz Pol, Yaritza De Jesús Arce

Simulations of Variations in $\delta^{18}O$ and Net Export of Major Ions from the Rio Blanco Using Several Climate Change Scenarios ................................................................. 28
  Richard Webb, Martha Scholl, Heather Buss

Two Dimensional Hydraulic Model for Grande De Anasco River in Puerto Rico ..................................... 29
  Alejandra Rojas Gonzalez, Walter Silva Araya, Jorge Rivera Santos

SESSION 3: HYDROMETEROROLOGY
  Moderator: Pedro Garcia

Calibration and Validation of Casa Radar Rainfall Estimation ................................................................. 30
  Sionel A. Arocho-Meaux, Ariel Mercado-Vargas, Gianni A. Pablos-Vega, Eric W. Harmsen, Sandra Cruz-Pol, José Colom Ustáriz

Rainfall Estimation Over Puerto Rico Using a Classification System and Ann (Artificial Neural Networks) ................................................................. 36
  Melvin J. Cardona-Soto, Nazario D. Ramirez-Beltran, Eric W. Harmsen

Estimating Evapotranspiration in the Caribbean Region Using Satellite Remote Sensing ..................... 42
  Eric W. Harmsen, John Mecikalski, Ariel Mercado, Pedro Tosado Cruz

Cloud Seeding Technology, a Feasible Alternative Water Source for the Caribbean? ............................. 48
  Don A. Griffith

SESSION 4: WATER MANAGEMENT
  Moderator: David Watt

Tropical Hydrology Under a Changing Land Use Dynamics: Development of Sustainable Watershed Conservation Scenarios in the Reo Cobre Watershed, Jamaica ......................................................... 55
  Shimelis Setegn, Assefa M. Melesse, Michael E. McClain, Xixi Wang
Sustainable Financial Planning for Water Quality Improvement and Management .................................................... 56
   Stacey Isaac Berahzer, Lauren Patterson
Heritage Rivers of Puerto Rico.................................................................................................................................. 60
   Marianela Torres-Rodriguez, Eliot Hernández-González
Water Resource Management Challenges in Wet-dry Tropical Savannas: a Century of Lessons Learned in Peninsular Florida.................................................................................................................................. 61
   Darina Palacio, John H. Kiefer, William R. Wise, Joann Mossa

SESSION 5: FLOOD WARNING SYSTEMS
Moderator: Felix Lopez

A Flood Forecast Alarm System for Western Puerto Rico............................................................... 62
   Luz Estela Torres, Eric W. Harmsen, Nazario Ramirez, Alejandro Rojas González, Sandra Cruz-Pol
Real Time Flood Alert System (RTFAS) for Puerto Rico ............................................................................................... 63
   Dianne Lopez
Flashiness Indices for Urban and Rural Streams in Puerto Rico .................................................................................. 64
   C.B. Phillips, F.N. Scatena
Tropical Flooding Disasters: Fema's Response to American Samoa........................................................................... 69
   Mary Theresa Flynn

SESSION 6: SURFACE WATER RUNOFF MODELING
Moderator: Patrick Victor

Modeling Tropical Cyclone Induced Inland Flooding at Tar Pamlico River Basin of North Carolina.......................... 70
   Qianhong Tang, Lian Xie
Modeling Stormwater Conveyance in Barbados to Support Marine Water Quality .................................................. 71
   Mark S Riedel, Amanda G Stone, Kevin J MacIntosh
Verification of the Duval County Master Plan Models During Tropical Storm Fay .......................................................... 77
   Jose Guzman, Bill Joyce, Patrick Victor

SESSION 7: MANAGING THE ENVIRONMENT
Moderator: Juan Amador

Animal Waste Management and Water Quality Protection in Puerto Rico .................................................. 78
   Rafael F. Dávila
Partnering to Restore Guanica Bay/ Rio Loco Watershed by Addressing Nutrient and Sediment Sources and Restoring Ecosystem Services ........................................................................ 83
   Paul Sturm, Roberto Viquiera, Tom Moore
Predicting Erosion from Unpaved Roads in Tropical Watersheds: Comparison of Models .......................................... 84
   Conrad Heatwole, Marissa J. Duff, Marco Aurélio C. Caiado
The Hydrologic Prescription of the Environmental Flow Regime for the Conservation of Riparian Ecosystems: An Example for a Sub-tropical River of Northern Mexico .................................................. 85
   Jose Navar

SESSION 8: FLOODING AND STORMWATER MANAGEMENT
Moderator: Jose Miranda

Sinkholes Receiving Urban Drainage, North Coast of Puerto Rico........................................................................... 86
   Luan M. Esteban, Gregory Morris, Jose D. Miranda
A Statistical Model for Reliability Analysis of Stormwater Detention Systems .......................................................... 92
   Rafael Segarra
Storm Water Management System Improvement Project .................................................................................. 98
   Noel Marrero
Adapting Stormwater BMPs for Tropical Watersheds and Coral Reef Protection .................................................. 99
   David Hirschman, Kelly Collins
SESSION 9: RIO DE LA PLATA FLOOD CONTROL PROJECT
Moderator: John Hashtak

Rainfall-runoff Modeling for Rio De La Plata Flood Protection Project................................................................. 107
Maurice Vaughan, Hyun-Min Shin

Hydraulic Modeling for Design of Flood Control Features for Rio De La Plata Flood Protection Project................................................................. 108
Eric Holand, David Weston, John Hashtak, Thomas Spencer

2D Hydrodynamic Model of Rio De La Plata Drainage Basin.................................................................................. 109
Ashley Naimaster, Michael Kabiling

Impact of and Mitigation for a Coastal Plain Flood Control Project on Rio De La Plata............................................. 110
David Stites, Javier Ruiz Bunker, Chris Ellis

SESSION 10: HYDROLOGIC PROCESSES
Moderator: Jose Guzman

Selected Hydrologic, Water-quality, Biological, and Sedimentation Characteristics of Laguna Grande ............ 111
Luis R. Soler-López

Hydrological Response of Watershed Systems to Combined Land Use and Climate Changes in the in
Rio Haina Basin, Dominica Republic .................................................................................................................. 117
Shimelis Setegn, Assefa M. Melesse, Michael E. McClain, Xixi Wang

The Hydrogeology and Hydrology of Punta Cabullón in Southern Puerto Rico: A Saline to
Hypersaline Setting in a Highly Dynamic Coast .................................................................................................. 118
Jesús Rodríguez

Nekesha B. Williams, Barnali Dixon, Ashanti Johnson

SESSION 11: WATER RESOURCES IN A CHANGING CLIMATE
Moderator: Juan Amador

Impact of Climate Changes on the Water Recourses Variability in Rio Grande De Manati and Plata
River Basins, Puerto Rico, USA.......................................................................................................................... 127
Shimelis Setegn, Assefa M. Melesse

Long-term Sustainable Mosquito Vector Management Plan for Haiti ........................................................................ 128
Marcia L. Anderson

Losing Connections: Wetland Characteristics in a Sub-tropical, Sub-sea Level, Hurricane-impacted,
Ditched, Pumped and Levee'd Pasture and Implications for the Future ................................................................. 136
Jane Offringa Rowan, Agaha Yure' Brass

SESSION 12: WATERSHED MODELING
Moderator: Jose Miranda

Runoff and Soil Loss Estimation Using N-SPECT in the Rio Grande De Anasco Watershed (PR) .................................. 145
Matilde Duque, Assefa M. Melesse

Panama Canal Watershed Experiment-Agua Salud Project ......................................................................................... 151
Fred L. Ogden, Robert F. Stallard, Helmut Elsenbeer, Jefferson Hall

Using WARMF for Water Resources Management and Adaption to Change in Island Watersheds: A
Case Study in the Waimanalo Watershed, Oahu, Hawaii ......................................................................................... 158
Kathryn van Werkhoven, Joel Herr, Scott Sheeder, Randall Wakimoto

Modeling Annual Discharge for Eleven Sub-tropical Rivers of Northern Mexico ......................................................... 159
Jose Navar

SESSION 13: SUSTAINABLE WATER RESOURCES
Moderator: Les Lampa

Applying the Thorthwaite Water Budget in Tropical Climates ..................................................................................... 160
William C. Rense

Puerto Rico River Management Guidelines ............................................................................................................ 163
Gregory Morris, Juan Portalatin
Parameters for Regional Analysis of Minimum Flow in Tropical Watersheds
José Antonio Tosta dos Reis, Michelli Moscon, Jéssica F. Barbosa, Marco Aurélio C. Caiado, Conrad Heatwole

“Green Means Go” – Using Sustainability Approaches to Facilitate Project Support
Les Lampe, Peter Binney

SESSION 14: WATER DISTRIBUTION MANAGEMENT
Moderator: Adamaris Quinones

Situation of Water Resources in Puerto Rico
Carl-Axel Soderberg

PRASA Automation Program: Putting Theory Into Practice
Godofredo Canino

Waterhammer Analysis of the Puerto Rico North Coast Super Aqueduct Before September 1999
Walter Silva-Araya

District Metered Areas Challenges in a Complex Water Distribution System
Mauricio Olaya, José F. Ortiz Vázquez, Alberto M. Lázaro

SESSION 16: WATER SUPPLY PLANNING
Moderator: Adamaris Quinones

Offstream Reservoirs for Sustainable Water Supply in Puerto Rico
Gregory Morris

New Strategies for the Design of Raw Water River Intakes for Potable Water in Puerto Rico
Pully A. Torres, Gregory Morris, Rafael Rosa

Conjunctive Use to Augment Water Supply from a Small Caribbean Aquifer: Yauco, PR
Juan Portalatin, Gregory Morris

Groundwater Supply and Empowerment for the Embera Indians, Southern Darién Province, Panama
Michael E. Campana

SESSION 17: COASTAL IMPACTS FROM DEVELOPMENT
Moderator: Juan Amador

Minimizing Development Impacts on Coastal and Marine Resources in U.S. Caribbean
Lisamarie Carrubba, Aitzu Pabón

Background Fluorescence in Groundwater from a Tropical Island-Karst Aquifer
S. Michelle Hoffman, John W. Jenson, David C. Moran, Gary R.W. Denton

Reducing Dock Construction Impacts in Shallow Water Seagrass Beds
Lisamarie Carrubba, Jocelyn Karazsia

Author Index
