</table>
31  Modeling Vehicle and Rail Vibrations caused by High Speed Trains using a Coupled Finite Element Methodology
L.A. Matthews, J.C. Caicedo and D.C. Rizos

32  An Explicit Domain Coupling Procedure for Vibration Analysis of High Speed Rail Systems
J. Mulliken, D.C. Rizos and J.M. Caicedo

33  Implementation of a Three-Dimensional Time Domain Formulation for the Prediction of Vehicle Induced Vibrations
N. Correia dos Santos, J. Barbosa, R. Calçada, A. Azevedo and R. Delgado

34  Induced Vibrations because of High-Speed Train Passage on Ballast and Non-Ballast Tracks
P. Galvín, A. Romero and J. Domínguez

35  Potential of Inter-vehicle Lateral Damper for Improving Riding Comfort of High-speed Train
K. Tanifuji and T. Toshimitsu

36  Critical Velocity obtained using Simplified Models of the Railway Track: Viability and Applicability
Z. Dimitrovová and A.F.S. Rodrigues

37  Generalized Beam Theory Dynamic Analysis of a Two-Track High-Speed Railway Bridge Deck
R. Bebiano, N. Silvestre and D. Camotim

38  Interaction of a Beam and Supporting Continuum under a Moving Periodic Load
J. Náprstek and C. Fischer

39  The Free Vibration Response of Elastically Supported Beams traversed by Moving Loads and its Application to Railway Bridges
M.D. Martínez-Rodrigo, E. Moliner and J. Nasarre

40  Effects of the Variability on the Dynamic Certification Criteria: Application to Contact Variability
C. Funfschilling, G. Perrin, T.M. Nguyen and P.E. Gautier

41  A Novel Approach to Extract Reference Trajectories from Measured Data Sets of Urban Light-Rail Systems
M. Tiefenbacher and M. Kozek

42  Prediction of Forced Self-Sustained Oscillations using Anticipating Synchronization
T. Pyragiené

43  Evaluation of the Dynamic Behaviour of Very High-Speed Railway Tracks and their Vibration
P.A. Ferreira and A. López-Pita

**Damage Identification Methods**

Special session organised by J.V. Araujo dos Santos and H.M.R. Lopes

44  An Advanced Genetic Algorithm for Structural Damage Detection
J.D. Villalba and J.E. Laier

45  Multiple Crack Identification in a Beam using a Genetic Algorithm
K. Kumar, A. Dutta and S.K. Deb

46  Parameter Identification using Discrete Wavelet Transform
T. Ohkami and S. Koyama

</table>
79 A Physically Motivated and Layer-based Fatigue Concept for Fiber-Reinforced Plastics
   H. Krüger and R. Rolfes

80 A Predictive Model for In-Plane Shear Behaviour of Fiber-Reinforced Cementitious Composites

81 Modelling and Testing of the Properties of Recovered Composite Material

82 On the Enhanced Impact Resistance of Damped Composites
   C. Toscano and F. Lenzi

83 Assessment of a Layerwise Mixed Least-Squares Model for Analysis of Multilayered Piezoelectric
   Composite Plates
   F. Moleiro, C.M. Mota Soares, C.A. Mota Soares and J.N. Reddy

84 Determination of Stochastic Properties of Carbon Nanotube-Epoxy Composites
   M.M. Shokrieh and R. Rafiee

85 Reliability Assessment of Composite Structures with Multiple Failure Modes
   C.A. Conceição António and L.N. Hoffbauer

86 Using the Finite Element Method to Analyze Asymmetric Double Cantilever Beam Specimens
   V. Mollón, J. Bonhomme, A. Argüelles and J. Viña

87 Damage Assessment in Carbon Fibre Reinforced Polymer Plates based on Dynamic Measurements with Fibre
   Bragg Grating Sensors
   J. Frieden, J. Cugnoni, J. Botsis and Th. Gmür

88 A Preliminary Study on Flutter Suppression Concepts for Aeronautical Components
   L.D. Paulo, A.P. Pereira, P.V. Gamboa and J.M.A. Silva

89 Multiphysics Analysis of a Functionally Graded Material Conductor with Spatial Variation of Material
   Properties
   J. Murín, V. Kutiš and J. Paulech

**Modelling and Analysis of Concrete Structures**

Special session organised by I. Paya-Zaforrteza and J. Turmo-Coderque

90 Trends and Perspectives in Non-Linear Analysis of Concrete Structures under Complex Three-Dimensional
   Load Combinations
   J.M. Bairán, S. Mohr and A.R. Marí

91 A General Analytical Integration of Reinforced Concrete Sections subject to Axial Force and Biaxial
   Bending
   Z.G. Guan and J.Z. Li

92 Equilibrium Models for Lower Bound Limit Analyses of Reinforced Concrete Slabs
   E.A.W. Maunder and A.C.A. Ramsay

93 Shear-Transfer Capacity of Reinforced Concrete
   K.N. Rahal
Analysis and Design of Steel and Composite Structures
Special session organised by L.F. Costa Neves

107 Computational Modelling of Beams Curved In-Plan 1626
R.E. Erkmen and M.A. Bradford

108 Analytical Evaluation for Local and Overall Buckling Behaviour of Square Steel Tube Truss Members 1644
T. Ohtsuka and S. Motoyui

109 Material Composition of Bucket Foundation Transition Pieces for Offshore Wind Turbines 1655
A. Nezhentseva, L. Andersen, L.B. Ibsen and E.V. Sørensen

110 Tests and Ratings of Short-Span Railway Composite Bridges 1672
J. Benčát and D. Papán
Towards an Optimized Layout of Steel and Concrete Composite Building Structures
C. Costa, L.F. Costa-Neves, L.R.O. de Lima and J.G.S. da Silva

Dynamic Analysis of Building Composite Floors Subjected to Human Walking

Vibration Analysis of a Production Platform induced by Mechanical Equipment

Distortional Buckling of Stiffened Cold-Formed Steel Channel Sections
H.R. Naderian, M. Azhari and H.R. Ronagh

Computational Simulation of a Composite Flooring System under Fire Loading
R.Y. Xiao, Z.W. Gong and C.S. Chin

A Finite Element Formulation to Account for Shear-Lag Effects in Composite Bridges with Complex Structural Arrangements
M. Mursi, F. Gara, G. Ranzi and G. Leoni

Connections in Steel and Composite Structures
Special session organised by L.F. Costa Neves

Structural Behavior of Composite Beams Considering the Bond-Slip Effect
H.G. Kwak and J.W. Hwang

Application of Model Updating to Determine the Stiffness of a Bolted Joint and its Validation using Dynamic Testing

Introducing a Method to Enhance a Poor Rigid Connection
M.A. Barkhordari, M. Foroughi, S.M. Aqaee and H. Varaee

Determination of Bending Stiffness in Bolted Joints by the Finite Element Method and Experimental Validation

Advanced Steel Moment Connection Calculation using MS Excel and the Eurocode 3 Component Method
L. Borges, M. Thomann and S. Bouron

An Approximate Method for the Ultimate Strength of Horizontally Curved Composite Plate Girders
M. Basher, N.E. Shanmugam and A.R. Khalim

Non-Gradient Methods in Optimization
Special session organised by J.F. Aguilar Madeira and H. Pina

Pseudo-Adaptive Penalization to Handle Constraints in Particle Swarm Optimizers
M.S. Innocente and J. Sienz

Global Optimization using Particle Swarm Optimization and a Comparison with Evolutionary Algorithms and an Artificial Immune System
M. Szczepanik, A. Poteralski, W. Kuś and T. Burczyński

Analysis of the Traffic Induced Vibrations on a 19th Century Heritage Chapel using Finite Element Modelling
P. Tamvakou, M.M. Paredes and R.C. Barros

Modelling Progressive Collapse of Structures
D. O’Dwyer and V. Janssens

Strong Ground Motion Variability Effects in the Seismic Response of an Urban Bridge Design
J.Z. Ramírez, J.M. Mayoral and F.A. Flores

Evaluation of Residual Strength of Pipelines Containing Corrosion Defects
J.E. Abdalla Filho, R.D. Machado, R.J. Bertin and M.D. Valentini

On the Numerical Simulation of Impacts for the Investigation of Earthquake-Induced Pounding of Buildings
P. Polycarpou and P. Komodromos

Damage Assessment of a Self-Weight Metallic Roof with Skylights using the Finite Element Method
J.J. Del Coz Diaz, F.P. Álvarez Rabanal, P.J. García Nieto and A. Lozano Martínez-Luengas

Assessment of the Resistance of Steel K-joints between Rectangular Hollow Sections with Galvanizing Holes using the Finite Element Method
J.J. Del Coz Diaz, C. López-Colina Pérez, M.A. Serrano López and F.P. Álvarez Rabanal

Investigation of the Gyroscopic Effect on a Wind Turbine Model with ANSYS
X. Liu, K.R. Leimbach and D. Hartmann

Assessment of Masonry Arch Behaviour through Photogrammetric Models and the Finite Element Method
J.C. Caamaño, A. Álvarez, J. Armesto and B. Riveiro

A New Damage Detection Method for Bridge Condition Assessment
A. Miyamoto and Z.H. Yan

Computational Structural Stability
Special session organised by H.A. Mang

First Order Solutions of Cracked Timoshenko Columns
G. Vadillo, J.A. Loya and J. Fernández-Sáez

Numerical Wrinkling Prediction of Thin Hyperelastic Structures by Direct Energy Minimization
Y. Lecieux and R. Bouzidi

Implementation of a Direct Procedure for Critical Point Computations
J. Mäkinen, R. Kouhia, A. Fedoroff and H. Marjamäki

Computational Probabilistic Design of Time-Dependent Stability of Steel Beams
A. Kudzys, O. Lukoševičienė and A.K. Kvedaras

Optimisation of Stability-Constrained Geometrically Nonlinear Shallow Trusses using a Higher Order Path-Following Method
A. Csébfalvi

Elastic-Plastic Buckling of Cones under Combined Loading
J. Blachut
156 Compressional Stability Analysis of Composite Plates with Multiple Through-the-Width Delaminations by using Higher Order Shear Deformation Theory
M. Kharazi, M. Taghizadeh and H.R. Ovesy

157 Criterion for Elastic Buckling Analysis
R. Adman and M. Saidani

158 Post-Buckling Analysis of Composite Plates Containing Embedded Delaminations by using Higher Order Shear Deformation Theory
H.R. Ovesy, M. Kharazi and M. Taghizadeh

159 A Semi Energy Finite Strip Method for Post-Buckling Analysis of Relatively Thick Laminates
H.R. Ovesy, M. Hajikazemi and H. Assaee

160 Dynamic Stability of Functionally Graded Material Cylindrical Shells based on Higher-Order Theory using the Finite Strip Method
H.R. Ovesy and J. Fazilati

161 A Dual Energy Criterion for the Stability Analysis of Geometrically Exact Three-Dimensional Frames
H.A.F.A. Santos

Control of Vibration in Civil Engineering
Special session organised by R.C. Barros and A. Baratta

162 Analysis of Displacement Vibration Isolation of Nonlinearly Damped Multi-Storey Building Structures using an Output Frequency Response Function
P.F. Guo, Z.Q. Lang and Z.K. Peng

163 Development of a Displacement-Dependent Damper for Base Isolated Structures
M. Ikenaga, K. Ikago and N. Inoue

164 Optimum Seismic Response Control of Multiple Degree of Freedom Structures using Tuned Viscous Mass Dampers
K. Ikago, Y. Sugimura, K. Saito and N. Inoue

165 Suppression of Plate Vibrations by using Attachments
K.A. Alsaif and M.A. Foda

166 Semi-Active Control of Structures using a Combined Genetic Algorithm - Neural Network - Fuzzy Controller
H. Ghaffarzadeh and V. Hamedi

167 Optimum Design of Active and Passive Cable Stayed Footbridges
F.L.S. Ferreira and L.M.C. Simoes

168 Numerical Investigation of Potential Usage of Rubber-Soil Mixtures as a Distributed Seismic Isolation Approach
E. Mavronicola, P. Komodromos and D.C. Charmpis

169 Semi-Active Vibration Control of a Three Degree-of-Freedom Scaled Frame with a Magneto-Rheological Damper
M.B. Cesar and R.C. Barros

170 Optimization of Viscoelastic Dampers as described by the Fractional Rheological Model
Z. Pawlak and R. Lewandowski
Probabilistic Approaches to Structural Mechanics
Special session organised by A. Elhami
172 Numerical Modelling of Structures involving Random Spatial Variability
D.L. Allaix and V.I. Carbone
173 Statistics of Uncertain Dynamical Systems
R. Croquet and E. Souza de Cursi
174 Propagation of Uncertainties using the Method of Moments
M. Beckers and U. Naumann
175 Reliability-Based Design Optimization under Eigen-Frequency Constraints using a System Reliability Approach
Y. Aoues and A. El-Hami
176 Reliability-based Design Optimization of Soil Tillage Machines while considering Fatigue Life Performance
A. Abo Al-Kheer, Y. Aoues, A. El-Hami and M. Eid
177 Integration of Economical Requirements into the Probabilistic Approach for the Design of Soil Tillage Machines
A. Abo Al-kheer, Y. Aoues and A. El-Hami
178 Optimization of the Tube Hydroforming Process using Probabilistic Constraints on Failure Modes
A. Ben Abdessalem, A. El Hami and A. Cherouat
179 A Vector-Space Approach for Stochastic Finite Element Analysis
S. Adhikari
180 Reliability Based Geometry and Topology Optimization of Truss Structures
A.J. Torii, R.H. Lopez, F. Biondini and A. El-Hami
181 A Bilevel Approach to treat the Decomposed Topology Optimization Problem
A. Makrizi, B. Radi and A. El Hami

Eigenvalues of Continuous Systems
Special session organised by S. Ilanko
182 Eigenvalues of Continuous Systems
S. Ilanko
183 Free Vibration of Beams Carrying Spring-Mass Systems: A Dynamic Stiffness Approach
J.R. Banerjee
184 Karhunen-Loéve Decomposition and Model Order Reduction applied to the Non-Linear Dynamics of an Extensible Cable
M.R. Escalante, C.P. Filipich and M.B. Rosales
185 Buckling in Corrugated Paperboard Structures by Analytical and Numerical Methods
C. Kueh, N. Navaranjan and M. Duke
186 Theory and Compact Program for the Sturm-Liouville Problem on Homogeneous Trees  
W.P. Howson and A. Watson

Discrete Element Methods

257 Discrete Elements in the Evaluation of the Cracking Process in Concrete Beams 3976
M.A.M. Shzu and G. Doz

258 The Distinct Element Method Simulation of Trap Performance of Check Dams used for Wood Contained
Debris Flow 3993
S. Katsuki and H. Shibuya

Graph Techniques

259 Canonical Forms and Graph Theory for Calculating the Eigenfrequencies of Symmetric Space Frames 4013
A. Kaveh and L. Shahryari

260 Regular Graphs Factorization for Partitioning 4037
M. Mahdavinia and Y. Navabzadeh Esmaeely

261 Eigensolution of Locally Modified Regular Structures using the Shifted Inverse Iteration Method 4050
A. Kaveh and H. Fazli

Augmented Lagrangian Method

262 An Augmented Lagrange Method to Solve Large Deformation Three-Dimensional Contact Problems 4065
M. Tur, J. Albelda, E. Giner and J.E. Tarancón

Microstructures

263 Hybrid Computing Model for Decomposed Partial Differential Equation Systems arising from
Microstructural Three-Dimensional Problems 4077
K. Schrader and C. Könke

Nanotechnology

264 Numerical Analysis of Complex Systems Evolution with Phase Transformations at Different Spatial
Scales 4092

265 Electrospun Nanofiber Structures for Advanced Nanocomposites 4104
L.Yu. Kossovich and Y. Salkovskiy

Modelling Discontinuities

266 Two Fields Formulations for the Implementation of an Extrinsic Cohesive Law 4113
F. Cazes, M. Coret and A. Combescure

267 Progress in the Formulation of Finite Elements with Embedded Discontinuities to Model Failure in
Solids 4132
F. Armero and J. Kim

Concrete Modelling

268 Mesh Size Dependency and Related Aspects of Lattice Models 4143
M. Vořechovský and J. Eliáš
269 Crack Prediction in Local and Non-Local Finite Element Models for Reinforced Concrete
S. Chan, A.D. Jefferson and R.J. Lark

270 Multi-Scale Modelling of Concrete Degradation such as Efflorescence and Laitance
L. Jendele, I. Smid and J. Cervenka

Composites: Damage

271 Discrete Element Method Simulation of the Damage Evolution in Cross-Ply Laminate under Tensile Loading
D.M. Yang, J.Q. Ye, Y.Q. Tan and Y. Sheng

272 Simulating the Effect of Porosities on Stiffness and Strength of Composite Materials
R. Rolfes, S. Czichon, M. Vogler and E. Jansen

Composite Materials

273 On Selected Cost Functionals for Laminated Composites
P. Procházka and Š. Pešková

274 The Development of a Program to Aid the Design of Composite Structures
A. Ramsaroop and K. Kanny

275 Numerical Analysis and Optimisation of Tubular Adhesive Joints under Tensile Loading
J.Y. Cognard, H. Devaux and L. Sohier

Modelling of Foam Composites

276 Evaluation of the Stress State in Aluminium Foam Sandwiches
F. Palano, V. Dattoma, R. Nobile and F.W. Panella

Composite Plates

277 Dynamic Response of a Laminated Composite Plate with Viscoelastic Stiffeners subject to Blast Load
O. Acar Ezer, D. Kececi Balkan, H.S. Türkmen and Z. Mecitoğlu

278 Dynamic Behaviour of the Laminated Sandwich Plate with a Stepwise Graded Viscoelastic Core
E. Tengiz, D.K. Balkan, H.S. Türkmen and Z. Mecitoğlu

279 An Analysis of Buckling Delamination of Composite Rectangular Thick Plates with an Inner Rectangular Crack
S.D. Akbarov, N. Yahnioglu and E.E. Karatas

Non-Linear Materials

280 Explicit Nonlinear Formulation of Bridge Bearings with the Mullins Effect
M.H.B.M. Shariff

Layered, Functionally Graded and Piezoelectric Composite Laminates

281 A Reduced Order Model for Structural-Acoustic Internal Problems with Piezoelectric Shunt Damping
W. Larbi, J.-F. Deü and R. Ohayon
282 Some Finite Element Approaches with Symmetric Matrices for Modelling of Porous Piezocomposite Devices subject to Acoustic and Electric Loads
G. Iovane and A. Nasedkin

286 Dynamic Equations for an Orthotropic Piezoelectric Plate
K. Mauritsson and P.D. Folkow

285 A Theoretical Investigation on the Free Vibration of Functionally Graded Beams
N. Wattanasakulpong, B.G. Prusty, D.W. Kelly and M. Hoffman

288 A New Accurate yet Simple Shear Flexible Triangular Plate Element with Linear Bending Strains
L. Damkilde and R.R. Pedersen

287 A Higher-Order Exact Geometry Solid-Shell Element undergoing Finite Rotations
S.V. Plotnikova and G.M. Kulikov

283 The Effects of Aspect Ratio on Postbuckling Behavior of Rectangular Plates of Functionally Graded Materials
H. Assaee, H.R. Ovesy, M. Hajikazemi and M.H. Sadr Lahidjani

289 Cross-Stiffened Circular Plates: An Elasto-Plastic Large Deflection Analysis
G.J. Turvey and M. Salehi

286 Thermal Buckling Analysis of Functionally Graded Plates using the Finite Strip Method
S.A.M. Ghannadpour, H.R. Ovesy and M. Nassiuma

290 Dynamic Behaviour of Tapered Plates subjected to Blast Loading
S. Susler, Z. Kazancı and H.S. Turkmen

291 Geometrical and Material Non-Linear Analyses of Model Submarine Pressure Hulls
C.T.F. Ross, C. Bull, M. Al-Enezi and A.P.F. Little

Plate and Shell Structures

288 A New Accurate yet Simple Shear Flexible Triangular Plate Element with Linear Bending Strains
L. Damkilde and R.R. Pedersen

290 Dynamic Behaviour of Tapered Plates subjected to Blast Loading
S. Susler, Z. Kazancı and H.S. Turkmen

291 Geometrical and Material Non-Linear Analyses of Model Submarine Pressure Hulls
C.T.F. Ross, C. Bull, M. Al-Enezi and A.P.F. Little

Metal Forming

292 The Stress in Thickness Direction in Simulations with Shell Elements
St. Kugler, P.A. Fotiu and J. Murin

293 An Experimental and Numerical Study of Ductile Damage for Cold Metal Forming Applications
P.O. Bouchard, S. Fanini and U. Ziarso

Boundary Element Method

294 Inelastic Nonuniform Torsion of Bars using the Boundary Element Method
E.J. Sapountzakis and V.J. Tsipiras

295 Sound Emission from a Three-Dimensional Enclosure with an Opening using a Boundary Element Method

296 Boundary Element Formulation for Contact Analysis using a Tangent Operator
E.D. Leonel and W.S. Venturini

xx
297 Nonlinear Analysis of Timoshenko Beams on a Tensionless Three-Parameter Foundation
E.J. Sapountzakis and A.E. Kampitsis

Boundary Integral Methods

M.Y. Antes, Y.S. Karinski and D.Z. Yankelevsky

Hybrid Element Methods

299 Hybrid-Trefftz Displacement Elements for Incompressible Biphasic Media
J.A. Teixeira de Freitas and M. Toma

300 Hybrid-Mixed Stress Finite Element Models for the Dynamic Analysis of Reinforced Concrete Frame Structures
M.R.T. Arruda and L.M.S.S. Castro

301 Hybrid Computational Modelling of Heterogeneous Materials
J. Novák, L. Kaczmarczyk, P. Grassl and C.J. Pearce

302 A Hybrid Finite Element-Scaled Boundary Finite Element Method for Multiple Cohesive Crack Propagation
E.T. Ooi and Z.J. Yang

303 Time Integration Procedures with Hybrid-Mixed Stress Finite Elements
M.R.T. Arruda and L.M.S.S. Castro

304 A Hybrid Finite Element-Scaled Boundary Finite Element Method for Reinforced Concrete Modelling
E.T. Ooi and Z.J. Yang

305 Hybrid Displacement Finite Element Models for the Physically Nonlinear Analysis of Three-Dimensional Concrete Structures
J.M.A. Martins and L.M.S.S. Castro

306 Hybrid-Mixed Stress Finite Element Models for the Physically Non-Linear Analysis of Concrete Three-Dimensional Structures
C.S.R. Garrido and L.M.S.S. Castro

Elasto-Plasticity Problems

307 Consistently Linearized Implicit Algorithm for Orthotropic Elasto-Plasticity with Mixed Hardening
M.A. Caminero and F.J. Montáns

308 Mixed Finite Elements with Enhanced Plastic Behavior
A. Bilotta, G. Garcea and L. Leonetti

309 Strategies for the Analysis of the Non-Linear Behaviour of an Adhesive in Bonded Assemblies
R. Créac’hcadec and J.Y. Cognard

310 The Finite Cell Method for Elasto-Plastic Problems
A. Abedian, J. Parvizian, A. Düster, H. Khademyzadeh and E. Rank

Structural Design

311 Design of Submarine Pressure Hulls under External Hydrostatic Pressure
C.T.F. Ross, T. Whittaker and A.P.F. Little

Re-Analysis of Structures
312 Reanalysis of Nonlinear Structures using a Reduction Method of Combined Approximations
M. Guedri, T. Weisser and N. Bouhaddi

Structural Optimization
313 A Bi-level Method for Shape and Member Sizing Optimization of Frame Structures
F. Flager, A. Adya and M. Fischer
314 Efficient Global Optimization of a Structural Frame
B. Horowitz, L.J.N. Guimarães and S.M.B. Afonso
315 Cost Optimum Design of Reinforced Concrete Simply Supported One-way Slabs
I. Merta and S. Kravanja

Topology Optimization
316 Topology Optimization for Chiral Elastic Bodies
D. Veber and A. Taliercio
317 Conceptual Layouts and Angles of DiaGrid for Building Frames using Topological Optimization
318 A Consistent and Efficient Unconstrained Multicriterion Approach for Topology Optimization
Y.-H. Chou and C.-Y. Lin
319 Reliability-Based Topology Optimisation of Space Structures using Ant Colony Optimisation
M.J. Fadaee, E. Salajegheh, J. Salajegheh and M. Mashayekhi
320 Heuristic Features of the Co-SIMP Algorithm in Topology Optimization: Numerical Examples
V. Pomezanski

Crashworthiness
321 The Dynamic Simulation of Crashworthy Landing Gear
T.U. Kim, S.C. Kim and I.H. Hwang

Vehicle Safety
322 Safety Requirements and Crashworthiness for an Unbelted Occupant
B. Alzahabi
323 Optimum Design of a Rack and Pinion Gear Pair using the Taguchi Method
W.S. Chung, D.H. Jung, H.S. Song and Y.K. Seo

Uncertainties in Stochastic Systems
324 Frequency Response of Stochastic Dynamic Systems: A Modal Approach
S. Adhikari and B. Pascual
325  Stochastic System Identification using Kalman Filtering  
    S. Eftekhar Azam and S. Mariani

Seismic Engineering

326  Corrected Ground Motion Functions in the Case of a Near-Fault Earthquake  
    J. Györgyi

327  Impact of Seismic Design Criteria on Progressive Collapse Investigation  
    O.A. Mohamed, A.N. Najmal and O.F. Abbas

328  Inelastic Time History Analysis of Steel Moment Frames subjected to Pulse-like Ground Motions  
    S. Yaghmaei-Sabegh

329  Evaluation of the Seismic Behaviour of Steel Transmission Towers with Different Boundary Conditions  
    T. Mazda, M. Matsumoto, N. Oka and N. Ishida

330  Probabilistic Study of the Seismic Behaviour of Structures  
    A. Yazdani

331  Numerical Analysis of Panel Buildings subject to Seismic Loading  
    J. Brozovsky and A. Materna

332  Implementing Modal Analysis Software on Multi-Core Computers: With Application to Seismic Analysis of Space Trusses  
    R.I. Mackie

Dynamics: General

333  Using a Rotational Periodicity Method for the Calculation of the Natural Vibration of a Turbine Blade of Progressive Design  
    P. Polach

334  The Finite Strip as a Spectral Element for Moving Load Analysis  
    I. Kožar, N. Torić and Ž. Jeričević

Non-Linear Dynamics

335  Positional Finite Elements for Geometrical Non-Linear Dynamics of Shells  
    H.B. Coda

336  Nonlinear Dynamics of a Support Excited Portal Frame Structure  
    R.M. Brasil and L.M. Orbolato

Dynamics: Human Motion

337  A Topology Design of a Composite Dance Hall Roof  
    P. Rosko

338  A Spectral Method for Predicting Floor Vibration Produced by Rhythmic Crowd Loads  
    T. Ji and T. Zheng

xxiv
A Numerical Study of Non Structural Masonry Walls with Bed Joint Reinforcement subject to Flexure  
E.A. Oliveira, R.M. Silva and P.B. Lourenço

Structural Mechanics

An Improved Third-Order Mass Matrix for Timoshenko’s Flexural Wave Propagation  
J.-E. Laier

Estimation of the Critical Flutter Load of a Non-uniform Double-beam subjected to a Follower Force  
I. Takahashi

An Innovative Timoshenko Beam Element  
M. Memari and R. Attarnejad

Cable, Truss and Space Structures

Dynamic Analysis of Cable Roofs under Turbulent Wind using a Frequency Domain Approach  
S.A. Ghafari Oskoei, G. McClure and I. Mahmoudzadeh Kani

Seismic Reliability of Double-Layer Grid Space Structures  
E. Salajegheh and I. Mansouri

Influence of Joint-Rigidity on the Behaviour of Single-Layer Square Plan Structures  
A.M. Altuna, A.L. Arancibia and I. Puente

Complex Nonlinear Analysis of a Cable Roof Structure based on Diagnostics and Tests  
S. Kmet and M. Tomko

The Behaviour of Cable Structures subject to Supporting System Deformation  
V. Kulbach and J. Idnurm

A Modular Truss System for Pedestrian Traffic and a Computer Implementation of an Algorithm for Creating the Truss Structure  
M. Zawidzki

Tall Buildings

Dynamic Analysis of Non-Planar Coupled Shear Walls with Stiffeners using a Continuous Connection Method  
C.D. Turkozer, O. Aksogan, E. Emsen and R. Resatoglu

Symbolic Computing

Software Supported Implementation of Efficient Solid-Shell Finite Elements  
S. Mattern and K. Schweizerhof
