Kennedy Jr., Jeff LeBlanc, John Luka, David McPherson, Martin McCabe, Souheil Nasr, Larry Petroff, Richard
Rowell, George Rucht, Angelica Sagrero, Mike Saltikov, Walt Schwarz, Dennis Shumard, Russell Snow, Richard
Turkopp, Robert Walker, William Whidden

Trenchless Crossing of the South Platte River: A Case Study in Risk Management .......................... 518

Aaron T. Burns, Andrew B. Lockman, J. Russell Snow

Understanding Pipe Standard Specifications and Their Applications ............................................. 528

Bill Chavez, Linda Peters, Xiangquan Li, Steve Chavez

INFRASTRUCTURE ASSESSMENT/MONITORING 1

Advances in CCTV Technology for In-Service Water Mains ......................................................... 538

Brian youngpyo Jo, Kevin Laven, Benjamin Jacob

Prestressed Concrete Cylinder Pipe Decay ..................................................................................... 548

John Marshall, Paul S. Fisk

An Unexpected Christmas Present - Failure Of A 48-Inch Waterline ............................................ 558

James M. Crook, Greg Henry

Asset Management of a Failing 36” Ductile Iron Sewage Force Main ............................................. 566

Paul Noran, Patrick Obenauf

Condition Assessment of Pressure Water Mains - Is it Worth Doing? ............................................ 577

Philip Ferguson

Considerations for Selecting Conveyance System Performance Measures ..................................... 591

Reggie Rowe

Innovative Inspection of Critical Large Diameter PCCP Pipelines Without Completely De-watering
and Under a River Crossing for Dallas Water Utilities ................................................................. 601

Randall Payton, Michael Larsen, Juan Arredondo

Detecting Wire Breaks from the Outside of PCC .......................................................................... 611

Allison Biggar

Establishing an Evaluation Matrix for Condition Assessment of Water Mains ............................... 620

Andrew C. Hunt, Callie Patton

Evaluating the Functionality of Water Distribution Networks in the Aftermath of Big Earthquakes
Based on Nonlinear Modeling of Pipes Connections ....................................................................... 628

Mahmood Hosseini, Samira Jalili, Omid Azizpour, Mohammadreza Alikhani

Causes of Etiwanda Pipeline Mortar Lining Failure ....................................................................... 638

M. McReynolds, Tao Peng, Andrew Romer

Forensic Analysis of Oxidation Embrittlement in Failed HDPE Potable Water Pipes ...................... 648

Donald E. Duvall, Dale B. Edwards

Implementation of a Risk Based Asset Management Program; Aurora Water's Story ..................... 663

Gregory R. Chol

Measuring the Energy Efficiency of Water Utilities ..................................................................... 669

Leon F. Gay, S. Sinha

Metropolitan Water District of Southern California PCCP Condition Assessment and Comparison
and Blind Test of RFTC and P-Wave ......................................................................................... 681

Pamela J. Harren, M. McReynolds

New Design Methods for Structural Rehabilitation of Rigid Pipes ............................................. 691

George McAlpine

PCCP Damage during Depressurization/Pressurization Cycles ..................................................... 701

Allison Stroebele, Graham E. C. Bell, Peter Paulson

Pipe Wall Evaluation Using Acoustic Pulses .................................................................................... 711

Peter Paulson, Vinh Nguyen

Polyethylene Encasement for External Corrosion Control for Iron Pipelines - A Fifty Year History ............................................................... 719

Allen H. Cox, Paul H. Hanson

Predictability and Preventability Indices for PCCP Water Mains .................................................. 730

R. Kola, S. Sinha

Process for Evaluating Sanitary Sewer Pipe and Manhole Condition Assessment Data ................ 743

Richard Nelson, Reggie Rowe, Vinta Varghese

Research and Development Needs for the Inspection of Pressure Pipelines ................................ 753

Henry R. (Kelly) Derr

Trenchless Water Main Rehabilitation Design Considerations ....................................................... 764

V. Firat Sever, Reda M. Bakeer
Update on the U.S. - China Collaborative Research Directions on Trenchless Technology and Critical Underground Infrastructure Issues ................................................................. 775
Michael T. Stift, Mohammad Najafi, Baosong Ma, Mustafa Kanchwala

VOLUME 2

Use of Surface Potential and Other Electrical Measurements for Corrosion Assessments of Large Diameter Transmission Pipes ................................................................. 793
Steven R. Fox

When to Intervene? Using Rates of Failure to Determine the Time to Shut Down Your PCCP Line ................................................................. 803
Mike Wrigglesworth, Michael S. Higgins

INFRASTRUCTURE ASSESSMENT/MONITORING 2

Acoustic Based Condition Assessment of Asbestos Cement Water Transmission Laterals ................................................................. 815
Marc Bracken, Dave Johnston, Matthew Coleman

Acoustic Wall Thickness Assessment of Large Diameter Mains ................................................................. 826
Angie Wu, Kevin Laven, Marc Bracken, David Johnston

Alternatives for Condition Assessment of Small Diameter Sewage Force Mains................................................................. 836
David Lippman, Dan Ellison, Andrew Romer

Application of Decision Support Models in Asset Management of Sewer Networks: Framework and Case Study ................................................................. 846
H. D. Tran, D. Marlow, R. May

Classifying Structural Condition of Deteriorating Stormwater Pipes Using Support Vector Machine ................................................................. 857
H. D. Tran, A.W.M. Ng

Condition Assessment Methods for AC Pipe and Current Practices ................................................................. 867
Yafei Hu, Dunling Wang, Rudaba Chowdhury

Condition Assessment of 108-Miles of Water Transmission Laterals ................................................................. 878
A. Ratliff, M. Russo

Condition Assessment of a Pre-Stressed Concrete Cylinder Pipe While in Service ................................................................. 890
Larry McDaniel, Gary Dreighton, Mari Garza-Bird, Mike Larsen, Cameron White

 Condition Assessment of In-Service Ferous Mains ................................................................. 899
Kevin Laven, Xiangjie Kong, Rasko Ojdrovic

Damage Identification Based on Vibration Response of Prestressed Concrete Pipes ................................................................. 909
Ali Alavinasab, Edward Paidowski III, Mark Holley, Ratneshwar Jha, Goodarz Ahmadi

Detecting Deteriorating Thinning PCCP Pipe Mortar Coating ................................................................. 920
Paul S. Fisk, John Marshall

Emergency Action Plan for Failed Pipelines: A Proactive Solution ................................................................. 925
Arthur Morris, Greg Henry, Alisa Gruber

Head to Head Comparison of Large Diameter Leak Detection Methods in Denver, CO. ................................................................. 934
Matt S. Turney

Interactive GIS Tools for Sewer Assessment, Sewer Rehabilitation and I/I Reduction ID - 215 ................................................................. 944
John P. Schroeder, C. Timothy Fallarsa

Laboratory Investigations of Corrosion Mechanisms and Control for Ductile Iron Pipe in Simulated Polyethylene Encasement (AWWA C105) ................................................................. 954
Julie Bell, Cliff Moore, Leo Solis

Large-Diameter RCP Condition Assessment Program - A Progressive Approach ................................................................. 979
Mark G. Wade, Daniel Buonadonna

Leading the Way: The Washington Suburban Sanitary Commission's Comprehensive PCCP Management Program ................................................................. 989
Gregory Fick, Travis B. Wagner

Lessons Learned from Goleta West Rehabilitation Program ................................................................. 998
Bruce J. Corwin, Mark Nation

Live Inspection of Large Diameter PCCP Using a Free-swimming Tool ................................................................. 1006
Xiangjie Kong, Xinlu Tang, Dave Humphrey, Brian Mergelas, Roberto Mascarenhas

Measurement and Analysis of PCCP Wire Breaks, Slips and Delaminations ................................................................. 1016
Graham E. C. Bell, Peter Paulison

Operations, Maintenance and Capacity Improvements to the Papillion Creek Interceptor Sewer; Omaha, Nebraska ................................................................. 1025
Kyle L. Tonjes, Tamara J. Lorenzen, Takuya J. Inoue, Ned Tramp
NEW AND EMERGING TECHNOLOGIES

A Study on the Effects of Surface Transverse Waves on Buried Steel Pipelines Considering the
Nonlinear Behavior of Soil and Pipes
Mahmood Hosseini, Mehrzad Tahamouni Roudsari

Advancements in FRP Repair of PCCP
Rudy Loera

Alignment Geohazard Evaluations Using Interactive GIS
Matthew Francis, Susan Olig, Doug Bausch, Ivan Wong, Ari Menitove, Jason Nilson, Renmet DeGroot

An Assessment of the Performance of Corrugated HDPE Pipe in Shallow Fills under Railroads
Michael Pluimer, Joseph LoPresti

Analysis of Interaction Mechanism between Slips and Drill Rod
Biao Sha, Baosong Ma, Haisuo Lan

Carbon Fiber Reinforced Polymer (CFRP) As a Long Term Repair Solution
Bill Sleeper, Scott Arnold, Anna Pridmore, Heath Carr

Critical Factors to Consider in Designing and Implementing Effective Carbon Fiber Repairs of
Pressure Pipelines
Mark Geraghty, Julio Sanchez, Jason Alexander, Anna Pridmore

Emergency Repair of a Mile Long Cast in Place Reinforced Concrete Penstock Using Fiber
Reinforced Polymer (FRP) Technology
Mo Ehsani, Carlos Peña

Experimental Investigation of Pipe Soil Friction Coefficients for Direct Buried PVC Pipes
Shaurav Alam, E.N. Allouche

Experimental Research on Ductile Iron Pipes with Rubber Gasketed Joints
Han Yang, Song Hongling, Zhang Lei, Duan Junfeng

Field Demonstration of Emerging Pipe Wall Integrity Assessment Technologies for Large Cast Iron
Water Mains
J.B. Nestleroth, S.A. Flamberg, L. Wang, A. Chen, M. Royer, A.F. Williams

Field Demonstration of Innovative Leak Detection/location Technologies in Conjunction with Pipe
Wall Thickness Testing for Water Mains
L. Wang, A. Chen, S.A. Flamberg, J.B. Nestleroth, M. Royer, A.F. Williams

GIS Asset Management of New Capital Projects
Brian Foredyce, Jeff Hemmerle

HDD Crossing of Lake Austin Generates Data and New Model for Calculating Pull Force for Ductile
Iron Pipe
Brian Dorwart, Ralph Carpenter

Improved Flexible-Expansion Joint Design Simplifies Pipeline Protection
Dennis Shumard, James Teter

Innovative Application of Leak Detection Technology on a Combined Sewer System
Bryan Livingston, Jon Sprague, Mike Garaci

Performance of 120-Inch PressureCast™ Steel Pipe Under 120° Sand-Bearing and Installed
Condition
David Tantalean

Lateral Loading Experiment on Buried Pipe Using Liquefied Stabilized Soil As Backfill Material for
Thrust Restraint
Toshinori Kawabata, Ayumu Kashihara, Yutaka Sawaiwa, Satoshi Okuno, Hoe I. Ling, Toshiyuki Mohri

No-Dig Solution to Major Sewer Line in St. Louis
Ron Moore, William E. Shook

Numerical Modeling of Flow Around Pipeline in Currents
Abolghasem Pilechi, Peyman Badiei
Rehabilitation of High Pressure Pipelines by an Innovative New Self Monitoring Internal Reinforcement Technology ................................................................................................................. 1270

Steve Catha, Kyle Bethel, Robin McIntoo, Aron Ekeland, Mel Kanninen

SuperLaminate: The Next Generation of Carbon FRP Products for Repair of Pipelines .......................................................................................................................... 1280

Mo Ehsani

Targeted HDD Design Under Critical Structures to reduce the Potential for Hydraulic Fracture .......................................................... 1290
Andrew E. Sparks, Alan P. Snider, David P. Sauls

Testing and Evaluation of a New Potable Water Pipe Renewal Product ............................................................................................................................... 1300
Trupti Kulkarni, Mustafa Kanchwalla, Mohammad Najafi, Gary Natvig, Mario Perez

The Rehabilitation of a Crude Oil Cased Crossing by the Insertion of a Self-Monitoring Layered Thermoplastic Composite Pipe with High Pressure Capability: A Case Study ......................................................................................... 1311
Kyle Bethel, Aron Ekeland, Justin Reed, Randy Stonesifer, Mel Kanninen

Transient Pressure Monitoring Program - Nacimiento Water Project ............................................................................................................................... 1321
Will Worthington, John R. Hollenbeck

PLANNING

How Do You Spell Rehabilitation Success? - SSERP (A Program Approach to Comprehensive Wastewater Collection System Rehabilitation) ......................................................................................................................................................... 1328

Richard Dressel, William Landin, Christopher Michalos

A Successful Strategy for Environmental Permitting of an Aggressively Scheduled Major Water Supply Project ........................................................................................................................................................................ 1338

Steve Dougherty, Sadie Russo, Deborah Freeman

Adfreeze Behavior between Chilled Gas Pipeline and Surrounding Frost Bulb ......................................................................................... 1350
Shunji Kanie, Motohiro Sato, Satoshi Akagawa

Applicability of Restrained Joint PVC Pipe in Horizontal Directional Drilling ............................................................................................. 1360
Jwala Raj Sharma, Mohammad Najafi, Craig Fisher, Abhay Jain, Abhinav Huli, Vijay Kumar Shivaji Rao

Baton Rouge, Louisiana Sanitary Sewer Overflow Program Conveyance Design Requirements ........................................................................................................ 1371
C. Douglas Jenkins, Amy Schulze

City of Modesto Takes a Proactive Approach to Avoid Sanitary Sewer Spill in Dry Creek Constructing the Dry Creek / El Rio Sewer System ........................................................................................................................................................................ 1381

William S. Wong, Pete Kambel, Larry G. Tolby

Current Issues in the Trenchless Rehabilitation of Water Mains ............................................................................................................................. 1392

Saumil Maniar, S. Sinha

Design and Construction of the Lake Fork Pipeline .................................................................................................................................................................................. 1401

Jennifer Cottingham, Rogers Thomas, Albert C. Petrasek Jr.

Dynamic Simulation for Optimal Facility Sizing as Part of the Eastern New Mexico Rural Water Supply Project .................................................................................................................................................................................. 1411

W. Christofferson, S. Verhines, G. Gates, E. Ford

Emergency Assessment and Repair of a Sanitary Sewer ........................................................................................................................................................................ 1421

Liam Conlon, Chad Simmons, Juan Felipe Pulido

Establishing an Evaluation Matrix for Water Main Rehab ........................................................................................................................................................................ 1430

Rafael Ortega, Joshua G. Metcalf

Evaluation, Inspection, and Rehabilitation of a Major Storm Sewer in the City of Aurora, Colorado ................................................................................................................................. 1440

Joe Kleiner, Craig Jacobson

Extending the Life of Iron Pipe in Corrosive Soils ........................................................................................................................................................................ 1451

Dale Lindemuth, Rich Bloch, Daniel Crabtree, Susan Grant, Jim Laplander, Mark Raffenberg

How Reclaimed Water Makes Cents ........................................................................................................................................................................ 1461

Stephen F. Crumb, Clete Martin

Hydraulic Transient Modeling and Mitigation for a 100 Well, 146-Million- Gallon-per-Day Aquifer Storage and Recovery System ........................................................................................................................................................................ 1471

Thomas J. Charles, Christopher Ott, Vasudevan Ravisangar

Innovative Design of Large Diameter Fittings for the Lake Fork Interconnect Vault ........................................................................................................................................................................ 1481

Robert Card

Integrated Decision-Support Framework for Municipal Infrastructure Asset ........................................................................................................................................................................ 1492

Khaleed Shukla, Tarek Zayed

Landfill Gas Pipeline Project Requires Aggressive Schedule to Achieve Significant Energy Savings for Milorganite® Production ........................................................................................................................................................................ 1503

Clay M. Tappan, Greg Olson

Managing Project Budget Expectations Through the Monitoring and Reporting of Pipeline Material Costs ........................................................................................................................................................................ 1514

Troy Matsuura, Steve Duling, Bruce Spiller, Gerald Simpson
Plan, Finance, Design, and Deliver: How to Implement a Citywide Sanitary Sewer Improvement Program ............................................................... 1523
  Khanh Chu, Robert Carley, Ulysses Fandino
Planning, Design and Construction of the Central Utah Water Conservancy District Water Development Project - CWP Pipeline ............................................................... 1535
  Stanley Postma, K.C. Shaw
Sanitary Sewer Rehabilitation Using Cured in Place Pipe (CIPP) in the City of Aurora: A Municipal Owner’s Perspective ............................................................... 1545
  Ronald Degenhart, Joseph W. Barsoom
The Logistics of Large Diameter Waterline Shutdowns ............................................................... 1554
  Melissa C. Henderson, Lisa K. Latto, Srivalli Sukuru
Understanding Your Manholes - Translating Inspection Data to Design ............................................................... 1564
  Vinta Varghese, Richard Nelson
