2010 5th International Conference on Critical Infrastructure

(CRIS 2010)

Beijing, China
20-22 September 2010
TABLE OF CONTENTS

A Novel Method for SVC Using Nonlinear Slope Reactance ................................................................. 1
Tang Niang, Xiao Xiang-Ning, Chen Zheng

An Adaptive Distance Protection Scheme for Distribution System with Distributed Generation ..................... 5
Jing Ma, Jinlong Li, Zengping Wang

Integration of Protection and Control Systems for Smart Substation ...................................................... 9
Jing Ma, Tong Wang, Je Wu, Zengping Wang

New Principle of Transformer Protection Based on Spectral Entropy Characteristics ............................ 14
Zhou Feifei, Xu Yan

Reliability Evaluation for Distribution System with Distributed Generators .............................................. 19
Yuqin Xu, Yingchao Wu

Communication Needs for Wide Area Measurement Applications ......................................................... 24
A. G. Phadke, J. S. Thorp

A Multi-Agent System for Distributed Energy Resources Control in Microgrid ........................................ 31
Wen-Di Zheng, Jin-Ding Cai

A Novel Method for Determining Minimum Break Point Set Based on Network Reduction and Relays Incidence Matrix ........................................................................................................ 36
Donghua Ye, Jing Ma, Zengping Wang

Study of a Novel Fault Current Limiter on the Basis of High Speed Switch and Triggered Vacuum Switch ...................................................................................................................... 41
Chun Zhao, Jiacheng Lu, Chen Fang, Bo Li, Zhenglong Jiang

The Influence of the Distributed Trapped Charge on VFTO ................................................................. 46
Hongyang Yu, Binxian Lu

Photoelectric Controlled Modular Intelligent Vacuum Switch with Phase Selection Function ...................... 50
Yan He, Xuanhu Chen, Fei Liu, Hu Zhong, Jing Xu, Jin Qiu

Economic Loss Evaluation and Selective Treatment of Power Quality ..................................................... 54
Ding Zejun, Zhu Yongqiang, Xu Yu

Research on New Reliability Indices of Wind Farms .............................................................................. 58
Xu Yu, Zhu Yong-Qiang, Chen Cai-Hong

Study on the Low-carbon Generation Scheduling of Distribution Network Containing Microgrid .............. 63
Mingyong Cui, Xin Ai, Zhili Lei

A Novel Assessment Method for Harmonic Environment in Microgrid .................................................. 67
Xin Ai, Zhili Lei, Mingyong Cui

A Simulation Model of Cyber Threats for Energy Metering Devices in a Secondary Distribution Network .............................................................................................................................. 74
Yin Hong Cheng, Panida Jirutitijaroen, Chee-Wooi Ten

The Study of Complex Torque Coefficient Approach’s Realization Based on PSCAD/EMTDC .................. 81
Wang Jin, Guo Chunlin, Xiao Xiangning, Zheng Rui

Study on Faraday Magneto-Optical Effect Optical Current Transducer Based on Double Closed-Loop Self-Tuning System ....................................................................................................... 85
Li Yansong, Ji Yaoyao, Meng Lu, Liu Jun, Yu Qingqin

Electromagnetic Transient Characteristic of 1000kV Half-Wavelength AC Transmission Lines ................ 90
Xinya Xiang, Lei Qi, Xiang Cui

Research of Faraday Magneto-Optical Effect DC Optical Sensing Method Based on Modulation and Demodulation ......................................................................................................................... 94
Liu Jun, Meng Lu, Ji Yaoyao, Li Yansong, Wang Qian

Compound Control Algorithm Based on a Novel Topology of Current Compensation Apparatus .............. 99
Liu Yukun, Guo Chunlin, Xiao Xiangning, Lei Xiao, Wang Xiangxu, Wang Jiu

Research on the Framework of Planning Model for the Photovoltaic Generation Integration in China .... 104
Jianhua Zhang, Bo Zeng, Jun Dong

Transient Electromagnetic Wave Analysis Method Based on Complex Domain Projection ......................... 109
Chao Pan, Zechong Wang, Kangliang Shang, Bo Dong, Jingtao Fang

Power System Operation Risk Assessment Based on Possibility Prioritization Search Strategy of Cascading Outage .................................................................................................................. 114
Lu Zhao, Jin Ma, Zhi-Li Lei

Stability Studies of Offshore Wind Farms ................................................................................................. 124
H. Guo, K. Rudion, C. Heyde, Z. A. Styczynski

Dominant Mode Identification for Low Frequency Oscillations of Power Systems based on Prony Algorithm ................................................................. 271
Lan Ding, Ancheng Xue, Fuxun Han, Jin Li, Maohai Wang, Tianshu Bi, Jinping Wang
A Combined Prediction Method of Wind Farm Power ................................................................. 277
Chen Ye, Gengyin Li, Ming Zhou
Wind Speed Forecasting of Genetic Neural Model Based on Rough Set Theory ......................... 282
Shifan Guo, Yansong Li, Sheng Xiao
Bid-Scheduling of Demand Side Reserve Based on Demand Response Considering Carbon Emission Trading in Smart Grid ................................................................. 288
Xin Ai, Xia Liu, Wen-Jie Qiu, Yang Wang
Research on Fault Line Detection Device in Digital Substation of Non-Effectively Grounded System ................................................................. 294
Qi Zheng, Rui Ruanxian, Yang Yihan
Communication Overlays and Agents for Dependable Smart Power Grids ......................................... 298
Geert Deconinck, Wouter Laheen, Stijn Vandael, Hakem Beillahi, Klaus De Craemer, Rui Duan, Zhifeng Qiu, Parvathy Chittur Ramaswamy, Bert Vande Meerssche, Isabelle Vervenne, Ronnie Belmans
Study on Method of Single-phase-to-earth Fault Section Location in Neutral Point Resonant Grounded System ................................................................. 305
Qi Zheng, Zheng Zhao, Yang Yihan
A Methodology for Power Quality Evaluation in Distribution Network with Distributed Generation ................................................................. 309
Gengyin Li, Zhe Zhang, Xiang Li, Song Wang, Ming Zhou
Research of Analysis Method of Power System Real-time Digital Simulation Error ................................. 315
Wang Xiangxu, Guo Chunlin, Xiao Xiangming, Zhao Chengyong
Battery Energy Storage Research of Photovoltaic Power Generation System in Micro-grid ................................................................. 321
Qiaoyun Zhao, Zhongdong Yin
Investigation of PMU Performance under TVE Criterion ................................................................. 325
G. Y. Yang, K. E. Martin, J. Otsergaard
Experimenting with Infrastructures ................................................................. 332
Bjorn Stahl, Luong Le Thanh, Raphael Caire, Rune Gustavsson
Energy Storage Control for the Photovoltaic Generation System in a Micro-grid ................................................................. 339
Zhongqiu Wang, Xi Li, Gengyin Li, Ming Zhou, K. L. Lo
Research on Probabilistic Power Flow of the Distribution System with Wind Energy System ................................................................. 344
Shujian Yao, Yan Wang, Minxiao Hang, Xiaona Liu
Improvement of Stability Assessment of VSC-HVDC Transmission Systems ................................................................. 350
M. C. Nguyen, K. Rudion, Z. A. Styczynski
Emergency Energy Resource Management in SmartGrids ................................................................. 357
Z. Vale, H. Movais, P. Faria, J. Fereira
Luigi Coppolino, Salvatore D’Antonio, Luigi Romano, Gianluigi Spagnuolo
An Adaptive Single Phase Reclosing Algorithm Based on the Mathematical Morphology ................................................................. 373
Tao. Zheng, Min. Liu, Gary Preston, V. V. Terzija
Stochastic Parallel Algorithm Based Evaluation of Available Transfer Capability ................................................................. 377
Junqiang Wei, Gengyin Li, Ming Zhou, K. L. Lo
Study and Simulation of VSC-HVDC under AC Power System Faults ................................................................. 382
Wei Yue, Chengyong Zhao, Yi Lu, Gang Li
Monte Carlo Simulation Based Assessment of Available Transfer Capability in AC-DC Hybrid Systems ................................................................. 388
Junqiang Wei, Gengyin Li, Ming Zhou, K. L. Lo
Reactive Power Optimization Based on An Improved Quantum Discrete PSO Algorithm ................................................................. 394
Shaqi Li, Dongmei Zhao, Xu Zhang, Chao Wang
Vision of a Strong and Smart Grid to Accommodate the 10 GW-level Jiuquan Wind Power ................................................................. 399
Shien He, Jiale Suonan
The Implement of Carrier based Islanding Protection ................................................................. 404
Shuxian Fan, Bingxin Xu
IP-based Communication Systems for Wide-area Frequency Stability Predictive Control ................................................................. 409
Xueyuan Dong, Kenneth Hopkinson, Xiaoyang Tong, Xiaoru Wang, James Thorp
A New Substation Configuration Algorithm Based on the Graphic Characteristic of the Main Electrical Connection ................................................................. 416
Jinfang Zhang, Zengping Wang, Yagang Zhang
A Power System Analysis Model with Consideration of Environmental Factors ................................................................. 421
Anjia Mao, Jing Wen, Shasha Luo
