Some format issues inherent in the e-media version may also appear in this print version.
# TABLE OF CONTENTS

## PLENARY W-B-P1

Collaborative Unmanned Systems for Maritime and Port Security Operations ................................................................. 1  
*Anthony J. Healey, D. P. Horner, S. P. Kragelund, B. Wring, A. Monarrez*

## MARITIME SECURITY & MINE COUNTER-MEASURES W-H-01

Automatic Mine Counter-measure Mission Control for AUV Systems ................................................................. 7  
*Julien Ferrand, Jean-Philippe Malkasse, Naig Le Bouffant, Franck Florin*

An Underwater System for the Threat Material Detection ............................................................................................. 13  
*Vladivoj Valkovic, Davorin Sudac, Dario Matika, Robert Kollar*

Recent Developments for an Obstacle Avoidance System for a Small AUV .............................................................. 19  
*Douglas Horner, Oleg Yakimenko*

## PATH FOLLOWING & OBSTACLE AVOIDANCE W-K-01

Path-Following Control of Fully-Actuated Surface Vessels in the Presence of Ocean Currents .................................. 26  
*João Almeida, Carlos Silvestre, António Pascoal*

Comparison of Two Observers for Marine Vessels in Ocean Current ............................................................................. 32  
*Jon Erling Refsnes, Asgier J. Sørensen*

High-Level Autonomy for Autonomous Underwater Vehicles ...................................................................................... 38  
*Hans-Ulrich Kobialka, Walter Nowak*

## ROLL STABILIZATION W-V-01

Adaptive Nonlinear Control for Vessel Roll Stabilization ............................................................................................... 44  
*Matteo Cavalletti, Gianluca Ippoliti, Sauro Longhi*

On the Feasibility of Stabilizing Parametric Roll with Active Bifurcation Control .................................................. 50  
*Roberto Galeazzi, Mogens Blanke*

Frequency-Motivated Observer Design for the Prediction of Parametric Roll Resonance ....................................... 57  
*Christian Holden, Tristan Perez, Thor I. Fossen*

## MULTIPLE UNDERWATER VESSELS W-H-02

Networked Decentralized MPC for Formation Control of Underwater Glider Fleets ................................................ 63  
*Massimo Vaccarini, Sauro Longhi*

Autonomous Control of Clusters of UUVs ....................................................................................................................... 69  
*Jonas Balderud, Leo Giovannini, Reza Katebi*

Nonlinear Motion Control of Multiple Autonomous Underwater Vehicles ............................................................. 75  
*Francesco Vanni, A. Pedro Aguilar, Antonio Pascoal*

## PATH-FOLLOWING W-K-02

Path-following Algorithms and Experiments for an Autonomous Surface Vehicle ................................................... 81  
*Marco Bibuli, Massimo Caccia, Lionel Lapierre*

Linear Path Following Guidance Control for Underactuated Ocean Vehicles ....................................................... 87  
*Giovanni Indiveri, Alessandro Antonio Zizzari, Valentina Giovanna Mazzotta*

Ship Track-keeping via Nonlinear Adaptive Control Synthesis .................................................................................... 93  
*Zenon Zwierzewicz*

A Robust Nonlinear Control Design for Path Following of an Under-actuated Marine Surface Vessel ........................ 99  
*Zhen Li, Jing Sun, Soryeok Oh*
### PLENARY W-B-P2

Collaborative Control of Underwater Vehicles under Severely Limited Communications

John S. Baras

---

### UNDERWATER NAVIGATION 1 W-H-03

Sigma Point Kalman Filter for Underwater Terrain-Based Navigation

Kjetil Bergh Ånonsen, Oddvar Hallingsdal

Vehicle Dynamics Aiding Technique for USBL/INS Underwater Navigation System

Marco Morgado, Paulo Oliveira, Carlos Silvestre, José F. Vasconcelos

Geophysical Navigation of Autonomous Underwater Vehicles

Francisco Teixeira, António Pascoal

---

### MISSION CONTROL & PATH PLANNING W-K-03

MCL: A Mission Control Language for AUVs

Narcís Palomeras, Pere Ridao, Marc Carreras, Joan Batlle

Event Handling Towards Mission Control for Unmanned Marine Vehicles

Marco Bibuli, Riccardo Bono, Gabriele Bruzzone, Massimo Caccia

AUV Formations Achieved By Virtual Potentials Trajectory Planning In A Simulated Environment

Matko Barišić, Zoran Vukic, Nikola Miškovic, Boris Tovornik

---

### SHIP CONTROL & HIGH SPEED CRAFTS W-V-03

A Robust QFT-Eigenstructure Assignment Control Method for the Coupled Dynamics in High Speed Crafts

Rocio Muñoz-Mansilla, Joaquin Aranda, Jose Manuel Diaz, S. Dormido-Canto, D. Chaos

Passivation-Based Integrated Guidance and Control of Underactuated Marine Craft

Kai-Yew Lum, Zi-Jun Zhang, Eng-Kwee Png

Ship Monitoring and Control

Antonio Tiano, Zoran Lajic, Antonio Zirilli

---

### UNDERWATER NAVIGATION 2 T-H-01

Diffusion Based Trajectory Observers with Variance Constraints

Alex Alcocer, Jerome Jouffroy, Paulo Oliveira, Antonio Pascoal

Nonlinear Observers for Tracking and Navigation of Marine Systems: Design Based on Motion Linearization

Paulo Oliveira

A Model-Based Ocean Current Observer for 6DOF Underwater Vehicles

Even Barthaug, Luca Pivano, Kristin Y. Pettersen, Tor Arne Johansen

---

### AUV IDENTIFICATION, LOCALIZATION AND DESIGN T-K-01

ROV Autonomization – Yaw Identification and Automarine Module Architecture

Marin Stipanov, Nikola Miškovic, Zoran Vukic, Matko Barišić

AUV identification by Use of Self-oscillations

Nikola Miškovic, Zoran Vukic, Matko Barišić, Philip P. Soucacos

A Global Localization System for Structured Environments Using an Imaging Sonar

Guillermo García De Marina, David Ribas, Pere Ridao

---

### OFFSHORE SYSTEMS & DP T-V-01

Modelling and Performance of an Active Heave Compensator for Offshore Operations

Tristan Perez, Paul Steinmann
Supervisory Switched Control of Marine Risers ................................................................. 199
Anne Marthe Rustad, Asgeir J. Sorensen, Carl M. Larsen

Integrator Reset Anti-Spin for Marine Thrusters Operating in Four-Quadrants and Extreme Sea Conditions .................................................................................................................. 205
Jostein Bakkeheim, Luca Pivano, Tor A. Johansen, Øyvind N. Smogeli

MODELLING AND SIMULATION T-H-02

On Modeling of Marine Thrusters for Underwater Vehicles .................................................. 211
Nadia Aït-Ahmed, Matthieu Vonnet, Luc Loron, Cédric Guibert

Preliminary Simulation Studies of a New Four-Quadrant Propeller Thrust Controller Applied to Underwater Vehicles ......................................................................................................................... 217
Luca Pivano, Louis L. Whitcomb, Tor Arne Johansen, Thor Inge Fossen

Discrete Event Based Approach to the Simulation of a Continuous Naval System ................. 223
Dictino Chaos, Joaquín Aranda, Rocio Muñoz, José Manuel Diaz, Jesús M. De La Cruz

MARINE VESSELS’ MATHEMATICAL MODELS T-K-02

A Novel Maneuvering Model Based on Low-Aspect-Ratio Lift Theory and Lagrangian Mechanics ................................................................................................................................. 229
Andrew Ross, Perez Tristan, Thor I. Fossen

MIMO and SISO Identification of Radiation Force Terms for Models of Marine Structures in Waves ................................................................................................................................. 235
Kari Unneland, Tristan Perez, Olav Egeland

An Algorithm for Consistent Linearization of Ship Maneuvering Mathematical Models .......... 243
Serge Sutulo, Carlos Guedes Soares

CONTROLLER SYNTHESIS T-V-02

Symbolic Synthesis of Control Laws for Underwater Vehicle and Robot Manipulator ................ 249
Alexander Dyda, Evgeny Lubimov, Andrey Sheykhot

Exponential Tracking Control of an Servo Motor Used for Ships .......................................... 254
Jasmina Lozanovic, Dragan Lazic, Aleksandar Sedmak

Parametric Design of Optimal Digital Controllers on the Basis of Global Optimization Algorithms ................................................................................................................................. 260
K. Y. Polyakov, Efim N. Rosenwasser, H. Korte, Bernhard P. Lampe

AUTONOMOUS SURFACE VEHICLES T-H-03

Control System Performance of an Unmanned Wind-Propelled Catamaran ............................. 265
C. O. Lee Boyce Jr., Gabriel Hugh Elkaim

Experimental Aerodynamic Performance of a Self-Trimming Wing-Sail for Autonomous Surface Vehicles ................................................................................................................................. 271
Gabriel Hugh Elkaim, C. O. Lee Boyce Jr.

Identification and Control Experimentation with a Remote Platform of Autonomous In-Scale Fast-Ferry Model ......................................................................................................................... 277
Francisco J. Velasco, Elias Revestido, Eloy López, E. Moyano

FAULT TOLERANT CONTROL AND FAULT HANDLING FOR MARINE SYSTEMS T-K-03

Data Driven Method for Fault Detection and Isolation in Nonlinear Uncertain Systems ............ 283
Alexey Shumsky

Diagnosis and Fault-Tolerant Control for Thruster-Assisted Position Mooring .......................... 287
Dong Trong Nguyen, Mogens Blanke, Asgeir J. Sorensen

An Actuator Fault Tolerant Approach for Underwater Remotely Operated Vehicles ................ 293
Maria Letizia Corradini, Sauro Longhi, Andrea Monteriü, Giuseppe Orlando
