## TABLE OF CONTENTS

### TECHNICAL PAPERS

**Volume 1**

**Paper #1: Structure-Property Relationship of Linear Low Density Polyethylene and Poly Dimethyl Siloxane Rubber Blends on Electron Beam Irradiation**

Radhashyam Giri, K. Naskar, Golok Nando

**Paper #5: Peridynamic Modeling of Fracture in Elastomers and Composites**

Stewart A. Silling, Abe Askari

**Paper #6: Driving Green...It’s Our DNA**

David Rohweder

**Paper #7: Thermoplastic Rubbers from Recycled Rubbers Made in the Course Recycling**

Hari Chandra, Chandrasekaran R. Pillai

**Paper #9: New High Performance DOTG Replacement Cure Systems for Acrylic Elastomers**

Jennifer Forgue

**Paper #10: Material Handling Solutions for NORDEL™ IP EPDM Polymers in Pellet Form**

Arnis Paeglis, Shrikant Dhodapkar, Todd Wilson

**Paper #11: New Chlorosulfonated Polyethylene Manufactured Without the Use of Organic Solvents**

Vince Cremona, ShAWN Xu

**Paper #12: The Enhancement of Interfacial Adhesion in EPDM-Based Adhesives, Sealants & Coatings with MAH-Grafted Trilene® Copolymer**

J. P. Krug, Jorge Soto, Wasif Khan, Harold Young, Nikita Petrovyan, Liz Lissy

**Paper #13: Use of Pottery Stone as Reinforcing Filler in Natural Rubber**

K. Boonkerd, S. Chuaayujit, D. Abdulraman, W. Jaranrangsup

**Paper #14: Processing Made Easy with Innovative Low-Viscosity HNBR Polymers**

Mark Jones, Andy Anderson

**Paper #15: Next Generation of Heat Resistant Acrylic Rubbers**

Konstantin Zoumis, Tamotsu Yoshida, Hans-Martin Issel

**Paper #17: Fluoroelastomer Characterization: Approaches and Considerations**

Paul Tuckner

**Paper #18: Real World Value: Complete Part & Mold Evaluation with Polymer System Simulation**

Matt Proske, Kaushik A. Manek

**Paper #19: Characterization of Splits in Rubber Parts – Cryogenic Versus Melt Flow-Fronts**

Donald Madda, Van T. Walworth

**Paper #20: A Comparison of the Transient Stress-Strain Response of Rubber to Its Linear Dynamic Behavior**

P. H. Mott, J. N. Twigg, Kenneth Nugent, T. E. Hogan, C. G. Robertson

**Paper #21: Biaxial Fatigue Investigations on Polychloroprene Rubber**

J. L. Poisson, F. Lacroix, S. Meo, G. Berton, N. Ranganathan

**Paper #23: Modeling Strongly Shear-Thinning Materials in Abaqus**

O. H. Yeoh

Hamid Ahmadi, Jan Kiok Chye Har, Alan Muhr, Khee Woon Wong

**Paper #26: Unraveling the Mystery of Natural Rubber Biosynthesis I. Investigation of the Composition and Growth of in Vitro Natural Rubber Using High Resolution Size Exclusion Chromatography**

Chengching K. Chiang, Wenshuang Xie, Colleen McMahan, Judit E. Puskas

**Paper #29: Improving the Properties of the Biopolymer Poly(lactic Acid)**

Leonard H. Pulyk, Zuzanna T. Cygan

**Paper #30: Electro-spun Bio - Polymeric New Fibers As Valuable Scaffolds for Tissue Engineering and Reinforcing Materials in Nanocomposites**

Ulrike Wangenheim, Nina Eggers, R. H. Schuster

**Paper #31: Polyepichlorohydrin Rubber Compounds for Service in Ethanol-Containing Fuel Applications**

Samuel C. Harber

Paper #88: Floculation, Reinforcement and Glass Transition Effects in Silica-Filled Styrene-Butadiene Rubber
   C. G. Robertson, C. J. Lin, R. B. Bogoslovov, M. Rackaitis, P. Sadhukhan, J. D. Quinn, C. M. Roland

Volume 3

Paper #90: A Low Field 1H NMR Investigation of Plasticizer and Filler Effects in EPDM ...................................................... 1430
   Richard J. Patur, D. Lee, F. J. Walker, Maxim Kasai

Paper #91: Structure-Property Analysis of Unfilled Polyisoprene Vulcanizates Characterized by Mechanical and Rheological Measurements ...................................................... 1457
   William M. Boye, Edward Tervill

Paper #92A: Conducting a Failure Analysis on a Fuel Hose .................................................. 1482
   Niles Stenmark

Paper #93: A Case Study Review of Common Analytical Techniques Used in the Investigation of Seal Failures ................................. 1500
   Mary Kosarzyczyki

Paper #94: The Use of Resorcinol and Resorcinol-Formaldehyde Resins to Promote Bonding of Rubber to Metal and Textile Reinforcements ...................................................... 1516
   Terry D. Dee, Mike Walkup, Dave McNaughton

Paper #95: The Effect of Antiozonants on Rubber-to-Metal Adhesion ...................................................... 1543
   James R. Halladay, Patrick A. Warren

Paper #96: Better Rubber to Substrate Adhesion Via Better Interfacial Chemistry ...................................................... 1558
   Jing Jin, Roger A. Cassell, Michael A. Pacholski

Paper #98: Characterization of Rubber-to-Metal Adhesives by Thermal Analysis ...................................................... 1577
   Michael J. Moore, Swapnil Bondre

Paper #99: Overcoming Incompatibility Problems in Elastomer Blends by Tailored Surface Properties of Rubber Additives ...................................................... 1600

Paper #101: An Approach to Indoor Wear Testing ...................................................... 1655
   James A. Popio, Douglas E. Rice

Paper #102: High cis-1,4-BRs and SBRs to Meet Current and Future Tire Demands ...................................................... 1674
   Judy Douglas, Heike Krippenbarg, David Hardy, Thomas Groff, Norbert Steinhauser, Alex Lucassen

Paper #103: Test and Characterization on the Temperature Dependence of Hyperelastic Behavior of Tire Rubbers Under Moderate Finite Deformation ...................................................... 1729
   Xu Li, Yi Dong, Ziran Li, Yuanming Xia

Paper #104: Factors Influencing Reinforcement of NR and EPDM Rubbers with Short Aramid Fibers ...................................................... 1742
   M. Shirazi, J. Noordermeer

Paper #105: Ultrasonic Aided Extrusion of CNF- and CNF-Filled SBR Compounds and Properties of Their Vulcanizates ...................................................... 1768
   Jaesun Choi, Avraam I. Isayev

Paper #106: Impact of the Direction Dependent Stress Softening on the Multiaxial Material Behavior of Filled Rubber ...................................................... 1816
   Hasan Kahrman, Edmund Haberstroh

Paper #107: Nanocomposites of Nitrile (NBR) Rubber with Multi-Walled Carbon Nanotubes ...................................................... 1832
   Nathathai Warasitiwhin, Lacramioara Schulte Auf’M Erley, Andrew P. Hope, David Norton, Jiun Huang, Joey Mead

   Edward Tervill, James T. Lewis

   C. Oprisnoni, Th. Alshuth, R. H. Schuster

Paper #109: Zinc Oxide in the United States Rubber Industry – A Journey of Discovery and Mystery ...................................................... 1893
   Carl N. Caputo, James W. Campbell, Peter J. Robinson

   Donald Burlett

Paper #112: The Effects of Ethylene Content and Mooney Viscosity of Epdm Polymers on the Mixing Efficiency and Physical Properties of EPDM/IIR Blends ...................................................... 1947
   Bob Ohm, Solomon H. K. Tang

Paper #113: Conducting a Failure Analysis on a Fuel Hose ...................................................... 1979
   Niles Stenmark

   Frederick Ignatz-Hoover, Byron H. To
POSTERS

Effect of Carbon Black on Tearing of Natural Rubber Vulcanizates at Various Temperatures ................................................. 1966
Jiali Jiang, Gary Hamed

Tearing of N115-Filled Natural Rubber Vulcanizates at Various Temperatures ................................................................. 1982
Guangzhou Rong, Gary Hamed

Greener Synthesis of Disulfide Polymers and Disulfide Crosslinked Networks .............................................................. 1998
E. Q. Rosenthal

Thermoplastic Elastomers from Small Particle Size Recycled Rubber ........................................................................ 2018
Andrew Fothergill, Daniel Murphy, Joey Mead

Nitrosamine Free Compounding in NR .................................................................................................................. 2019
James Connors, Patrick Fageman

STUDENT COLLOQUIUM

Alternative CSM Study .................................................................................................................................................... 2037
Andrew Meyer

Reinforcement of SBR with Clay by Using Liquid Rubber as Compatibilizer ............................................................... 2050
Liang Fang, Ming Wei, Carol Barry, Joey Mead

Br-Butyl Rubber (Br-IIR) and Montmorillonite (MMT) Clay Nano Composites for Improved Barrier Properties ............ 2074
Arun Kumar, Satyam Modi, Ming Wei, Daniel Schmidt, Carol Barry, Joey Mead

Electromagnetic Interference (EMI) Shielding Capabilities of a Carbon Fiber/Carbon Nanotube Filled Polyurethane Composite ........................................................................................................ 2099
Mayur Kumbhani

Effect of Thermoplastic Elastomer Properties in Molded Microscale Features .......................................................... 2107
Younghyo Kim, Sung-Hwan Yoon, Joey Mead, Carol Barry

Effect of Buckminsterfullerenes as a Filler on Physical and Dynamic Mechanical Properties of Styrene-Butadiene Rubber .......................................................... 2129
Mikael Wagner, Joey Mead, Carol Barry
