2010 International Conference on Wireless Communications & Signal Processing

(WCSP 2010)

Suzhou, China
21 – 23 October 2010

Pages 1-598
TABLE OF CONTENTS

Neighbor Selection and Progress Rate in Multi-channel MIMO Wireless Networks: the Two Antenna Case .......................................................... 1  
Q. Gao

A Time-Sharing Resource Allocation Method in Heterogeneous Cognitive OFDM Network ............................................................... 7  
L. Li, B. Zheng

A Spectrum Sharing Method based on Fuzzy Logic in IEEE 802.22 WRAN ................................................................. 12  
S. Yang, J. Wu

Modified Truthiness Propagation Algorithm for Lossy Source Compression based on LDGM Codes ........................................... 17  
J. Zheng, B. Bai, Y. Li, J. Liu

Optimization of Energy Detection Based Cooperative Spectrum Sensing in Cognitive Radio Networks ........................................ 20  
Q. Liu, J. Gao, L. Chen

ISAR Super-resolution Imaging Based on Sparse Representation ............................................................................. 25  
F. Ye, F. Zhang, J. Zhu

Lattice-Reduction-Aided Robust Detection for MIMO Systems with Channel Estimation Error .................................. 30  
R. Chen, J. Li, W. Liu

Distributed Precoding for Multicell MIMO Networks .......................................................................................... 35  
Y. Zou, C. Li, L. Yang

Design of Waveguide E-plane Hybrid Metal Insert Filters for Millimeter-Wave Application .............................................. 39  
W. Zhang, L. Ye, H. Zhao, S. Chai

A Simulated Method of Modeling Wireless Channel Based on CDL ...................................................................................... 43  
J. Zhang, Z. Zhang, X. Wang, Z. Tan, Q. Guo

Sub-pixel Image Registration Based on Physical Forces .......................................................................................... 47  
A. Ghayoor, S. Ghorbani, A.A.B. Shirazi

Localized Address Autoconfiguration in Wireless Ad Hoc Networks .............................................................................. 52  
X. Li, Y. Deng, V. Narasimhan, A. Nayak, I. Stojmenovic

A UHF Wide Bandwidth Omni-directional Wire Antenna Based on Genetic-Algorithms .............................................. 58  
C. Peng, C. Lu, Y. Zhang

Performance Analysis of Self-calibration Algorithm for Concentric-UCA ........................................................................ 61  
C. Hui, B. Zheng

A Unified Framework for SNR Mismatch in Turbo Algorithms ...................................................................................... 66  
K. Xu, B. Shahrrava, J. Wan

A Markovian Game-Theoretical Power Control Approach In Cognitive Radio Networks: A Multi-Agent Learning Perspective ........................................................................... 70  
J. Li, C. Yang

Design and Implementation of Microwave Amplifiers With Matching Transformers ...................................................... 75  
L. Tsai, W. Lai

Wideband Band-pass Filters with Spurious Band Suppression ..................................................................................... 79  
L. Tsai, W. Lai

PDA+LDPC Iterative Detector for Cooperative CDMA Networks ................................................................................ 83  
Z. Mei, X. Li, Z. Yang, L. Wu

Joint Network Coding and Channel Coding for Cooperative Relay Communication System .............................................. 87  
R. Yu, T. Wu

On The Tradeoff Performance of Severely Fading Channels ................................................................................ 91  
H. Yang, G. Li, Z. Guo, Y. Xiong

The Study of Routing Strategies in Vehicular Ad-Hoc Networks ................................................................................ 94  
J. Liu, F. Chen, J. Xu

NLOS Error Mitigation Based on Modified Kalman Filter for Mobile Location in Cellular Networks .............................................. 99  
Z. Deng, Y. Yu, W. Guan, L. He

Pulse-shaped Offset QAM in Discrete-time ............................................................................................................... 104  
Y. Dandach, P. Stohan

Optimal Antenna Layout under Uniformly Scattering Environments ............................................................................. 109  
Q. Wang, H. Yang

Study on Bandwidth of Optical Filter in Beacon Sub-system of Satellite Optical Communications ...................................... 114  
C. Wen, L. Tang, X. Yang, H. Hu

Pilot Pattern Optimization for Compressed Sensing Based Sparse Channel Estimation in OFDM Systems .................................................................................. 118  
X. He, R. Song
Grubbs and Wright Algorithms For WiMAX and LTE Systems .......................................................... 123
W. Yin, P. Xiao, C. Cowan, L. Hu
Transmit and Receive Filter Design For OFDM Based WLAN Systems ........................................... 128
P. Xiao, C. Tao, D. Burns, V. Fusco, C. Cowan
Single Chip Design of Closed-loop Class D Audio Power Amplifier .............................................. 132
Y. Xu, F. Zhao, R. Min, Z. Sun, L. Tang
Performance Analysis of Dynamic Bandwidth Allocation Scheme Based on QoS in Satellite Networks ............................................................................................................................... 137
X. Xin, T. Kai, S. Yan, J. Li, S. Yang
Speech Enhancement using Microphone Array Neural Switched Griffiths-Jim Beamformer ............. 143
Y. Yoganathan, T.J. Moir
Low-complexity Two-stage Detection for Long Intersymbol Interference Channel ......................... 148
H. Li, Y. Shen, K. Xu
Securing Wireless Mesh Network with Mobile Firewall ................................................................. 153
J. Hong, N. Liu, P. Yi, F. Zou, Q. Zhai
An Efficient CMOS DC Offset Cancellation Circuit for PGA of Low IF Wireless Receivers .......... 159
X. Fan, Y. Sun, Y. Feng
Probabilistic Tree Pruning for Fixed-Complexity Sphere Decoder in MIMO Systems .................. 164
S. Lei, Q. Tu, D. Yang, J. Chen
Robust Turbo Decoding over Rayleigh Fading Channels ............................................................... 170
K. Xu, J. Wan, Z. Xu
A Novel Emitter Localization Method Using an Interferometer on a Spin-Stabilized Satellite ............. 173
T. Li, F. Guo, W. Jiang
Cyclostationary Spectrum Sensing for Cognitive Radio and Multiantenna Systems .................... 178
V. Kontorovich, F. Ramos-Alarcon, O. Filio-R, S. Primak
A Study of Multi-Priority Opportunistic Directional Routing for VANET .................................... 184
Z. Jia, W. Deng, Y. Nan, B. Li
Limited Feedback Unitary Precoding Using Improved Euclidean Distance Metrics for Spatial Multiplexing Systems ................................................................................................................ 188
L. Ding, R. Liu, B. Jiang, X. Gao
A New Relay Assisted Hybrid ARQ Scheme ....................................................................................... 194
Z. Zhang, H. Yang, L. Dai
Performance Analysis of a Cooperative MAC Based on Opportunistic Relaying for Ad Hoc Networks ........................................................................................................................................... 198
N. Li, N. Cheng, Y. Cai, X. Xu
Extension to Gardner Timing Error Detector for QPSK Signals ........................................................ 204
D. Yang, C. Yan, H. Wang, J. Kuang, N. Wu
Performance Analysis of A Selection Cooperation Scheme in Multi-Source Multi-Relay Networks ................................................................. 209
W. Gao, J. Liu, L. Zheng, Y. Liu, G. Zhang
Practical Node Deployment for Unique Localization in Large Scale Wireless Sensor Networks ......... 215
L. Zhang, X. Zhang, J. Yang, G. Chen
An Adaptive Link Management for Vehicular Ad Hoc Networks .................................................. 221
W. Cha, J. Jeong, J. Kim, S. Yu
Performance Evaluation of Different Detectors for Frame Synchronization in DVB-S2 System ....... 225
D. Yang, C. Yan, H. Wang, J. Kuang, H. Zhang, N. Wu
Block Diagonalization Eigenvalue Based Beamforming Precoding Design for Downlink Capacity Improvement in Multiuser MIMO Channel ............................................................................. 230
H. Liu, X. Cheng, Z. Zhou, G. Wu
A Cooperative Transmission Design Combining Network Coding and Superposition Coding .......... 235
H. Wang, Y. Huang, L. Yang, Y. Du, M. Zhao
Blind Source Separation-based 2-D Angle Estimation with Uniform Circular Array ........................ 240
Z. Hu, F. He, J. Zhu
Fast DOA Estimation with Temporal-Spatial 2-Dimension Resolving ........................................... 244
J. Wang, Z. Liu, W. Jiang
Channel Characterization Including Path Loss and Doppler Effects with Sea Reflections for Mobile Radio Propagation Over Sea at 2 GHz .................................................................................. 250
K. Yang, T. Roste, F. Bekkadak, T. Ekman
DoA Estimation Based on 2D-ESPRIT Algorithm with Multiple Subarrays in Hexagonal Array ....... 256
T. Kitada, J. Ozawa, J. Cheng, Y. Watanabe
A Simple DoA Estimator Using Adjacent Pattern Power Ratio with Switched Beam Antenna ........ 262
MUD for WCDMA using Modified PSO Algorithm ........................................................................... 268
M.A.S. Choudhry, M. Zabair, I.M. Qureshi

Systematic Construction and Performance Comparison for Higher Order Hierarchical Tetrahedral Vector Elements ................................................................. 416
W. Yin, J. Dong, L. Ye, H. Qi, J. Mao

Reputation-based Trust Model in Vehicular Ad Hoc Networks ...................................................................................................................... 420
Q. Ding, X. Li, M. Jiang, X. Zhou

TOA Estimation using Phase-Locked Loop in Non-coherent IR-UWB Systems .......................................................................................... 426
L. Zheng, M. Wang, J. Liu

Compression of CQI Feedback with Compressive Sensing in Adaptive OFDM Systems ............................................................ 431
H. Gao, R. Song, J. Zhao

Capacity Optimization with Stream Control for MIMO Mesh Networks ...................................................................................... 435
J. Zhang, Y. Ding, J. Hu, D. Pang, J. Shi

A Non-Parametric Estimation Approach for Spectrum Entropy Computation in Music-Fingerprinting System ........................................... 440
X. Shao

On Exploring SVDSPM Algorithm for More Accurate DOA Estimation of Low Altitude Target ...................................................... 444
H. Xiao, J. Yuan

A Novel Adaptive Cooperative Diversity Scheme ......................................................................................................................... 448
X. Diao, S. Zhang

SLNR Precoding based on QBC with Limited Feedback in Downlink CoMP System ........................................................................ 452
L. Qiang, Y. Yang, F. Shu, W. Gang

Comparison of Adaptive Algorithms Performance for Power Amplifiers Linearization in a DVB-T Context ........................................................................ 457
J. Dubois, M. Djoko-Kouam, A. Skrzypczak

Pitch Period Estimation Base on Voiced Degree Weighted Sub-frame Octave Region Dynamic Programming ................................................. 463
L. Zeng, L. Chen, Q. Xiao

Precise BER Performance of BPSK in Two-Wave with Diffuse Power Fading Channel and Cochannel Interference ...................................................................... 468
L. Sun, J. Lu, Y. Han, H. Liu

J.W.P. Ng

The FPSO-DML Algorithm for 1-DOA Estimation of Wideband Signals .............................................................................................. 478
J. Yang, J. Wang, Y. Xu, X. Ma, X. Pang

A Code-matched Interleaver Design based on the Parity-Check Weight Low-bound of Component Codes for Turbo Codes ...................................................................... 482

Closed-Form BER Analysis of MIMO Systems with Impulsive Noise Using Bi-parameter Cauchy-Gaussian Mixture Approximation .............................................. 488
L. Fan, X. Lei, F. Gao

Robust Adaptive Beamforming with Steering Vector Errors Decomposition ............................................................................................. 493
X. Zou, Z. Zhong, M. Zhang, Y. Shi

Bayesian Color Image Denoising via a Joint Model and Space Projection .............................................................................................. 498
S. Xiao

Increasing the Coding Opportunity of Random Access Protocol Based on Network Coding in Wireless Relay Networks ....................................................................................... 502
X. Xin, T. Kai, S. Yan, F. Hua

A New Spectrum Allocation Algorithm for IMTAdvanced System over Rayleigh-Fading Channels .................................................................................. 507
X. Zhang, Z. Tan

Bandwidth Enhancement of a CPW-fed Monopole Antenna for 2.4 GHz/UWB Applications with Sub-band Rejection Filter ................. 513
Y. Bai, S. Feng, Y. Li, X. Yang

Unknown Noise Estimation with DPM Model and its Application ........................................................................................................ 517
S. Guo, B. Yang, N. Liu

Distributed Algorithm for Energy Optimal Multi-Commodity Network Flow Routing in Sensor Networks ...................................................... 521
J. Trdlicka, Z. Hanzalek

An Improved Low Phase Noise and Low Power Consumption VCO for WSN Applications ................................................................. 527
J. Zeng, X. Fan, B. Li, W. Zhu

Two-Level Multicarrier UWB: A Case Study ......................................................................................................................... 532
J. Dong, Z. Zhang, X. Wang
Performance Analysis of the Pairwise Error Probability of Space-Time Coding over Correlated Rayleigh-Fading Channels ................................................................. 537

X. Qiu, Z. He, Z. Wan, M. Li

Efficient Energy Detector for Spectrum Sensing in Complex Gaussian Noise ................................................................. 541

G. Zhang, J. Liu, L. Chen, W. Guo

Blind Modulation Recognition of PSK Signals Based on Constellation Reconstruction ................................................................. 545

X. Tan, H. Zhang, Y. Sheng, W. Lu

Blind Separation of Multiple Sequences from a Single Linear Mixture Using Finite Alphabet ................................................................. 551

F. Gu, H. Zhang, N. Li, W. Lu

Impact of Channel Estimation Errors in Amplify-and-Forward Cooperative Transmission ................................................................. 556

L. Wang, Y. Cai, W. Yang

On the Throughput Issue when IEEE 802.11 Meets with WANETs ................................................................................................. 561

C. Dong, P. Yang, H. Wang, G. Chen, C. Qian

A Successful Iterative Optimization Precoding Method for Downlink Multi-user MIMO System ................................................................. 566

X. Gao, X. Fei, S. Lei

Approach of Linear Phase Differentiators and Integrators ................................................................................................. 571

W. Lai, L. Tsai

An Optimal Adaptive Transmitting and Waiting Durations Based on Detected Energy Values in Cognitive Radio Networks ................................................................................................. 575

H. Li, H. Xu, J. Jin, S. Liu

An Improved Variable Length Coding Scheme Using Structured LDPC Codes ................................................................................................. 581

M. Jiang, C. Wang, Y. Zhang, C. Zhao

The Iterative Demodulation And Decoding Algorithm for Convolutional Coded GMSK Signals over Mobile Satellite Channel ................................................................................................. 586

T. Wu, Y. Xu, L. Gui, W. Ma

Combine Non-binary LDPC Codes With M-ary Orthogonal Spread Spectrum Modulation ................................................................. 590

Y. Huang, Y. Cheng, Y. Zhang, G. Yu, J. Chen

A Packet Level FEC Code for Deep Space Communications ................................................................................................. 594

Z. Xie, G. Zhang, H. Zhu, D. Bian, Y. Jiang, J. Hu

A Novel MEO Constellation for Global Communication without Inter-Satellite Links ................................................................. 599

Y. Jiang, S. Feng, Z. Xie, G. Zhang, G. Li

Bayesian Cramér-Rao Bound for Channel Estimation in Cooperative OFDM ................................................................................................. 604

W. Wu, X. Jia, Y. Cai, X. Wu

Effective Capacity Region of Two-user Opportunistic Spectrum Access in Fading Channel under Discrete Transmission Rate Policy ................................................................................................. 610

Y. Xu, J. Wang, Q. Wu

A Discrete-time Model for Multichannel Opportunistic Spectrum Access Based on Preempted Queuing ................................................................................................. 615

Y. Xu, J. Wang, Q. Wu

Low Bitrates Audio Coding Using Lattice Vector Quantization Based on Scalable and High Order Codebook Extension Scheme ................................................................................................. 621

K. Xiang, R. Hu

A Sected Cell Architecture in Two-hop Relay-enhanced OFDMA Cellular Networks ................................................................................................. 625

Y. Pan, S. Zhang, W. Zhou

Improvement of ETX Metric Base on OLSR ................................................................................................. 630

Y. Liu, Z. Mi, J. Zhang, X. Qu

Spectrum Sharing Through Receiver Beacons in Fading Channels ................................................................................................. 634

J. Jing, L. Wu, Y. Xu, W. Ma

An Accurate Estimation Algorithm of Frequency and Phase at low Signal-Noise Ratio Levels ................................................................................................. 639

Z. Ye, G. Xu, D. Guo

An Efficient Power Allocation Algorithm for Relay Assisted Cognitive Radio Network ................................................................................................. 644

Z. Liu, Y. Xu, D. Zhang, S. Guan

Multi-services Supporting Weighted Power Scheduling Algorithm Based on LWDF ................................................................................................. 649

A Cooperative Multicast Strategy Based on Spatial Diversity with Power Constraint ................................................................................................. 654

W. Xie, L. Song, Y. Xu, W. Zhang

Iterative Interference Suppression Algorithm Based on EST ................................................................................................. 658

S. Liu, L. Xia, J. Hua, S. Li

An Effective Puncturing Scheme for Rate-Compatible LDPC Codes ................................................................................................. 663

H. Su, M. Wang, S. Xia

Optimal Wideband Spectrum Sensing Order Based on Decision-making Tree in Cognitive Radio ................................................................................................. 669

H. Han, J. Wang, Q. Wu, Y. Huang
Joint Design of Constellation and Network Coding in Wireless Cooperative System ........................................ 674
T. Wu, R. Yu

Detection Scheme for Quantum Multiple Access Channel with Noisy Coherent State ................................ 678
S. Zhao, F. Guo, X. Dong, B. Zheng

A BICM-MD-ID Scheme in FFH System for Combatting Partial-Band Interference .................................. 682
J. Dai, D. Guo, B. Zhang

W. Liu, A. Hu

Lifetime Maximization in Multihop Mixed AF-DF Relay Networks ................................................................. 692
G.A. Sidhu, X. Liao, F. Guo

Large-Scale Fading Model for Mobile Communications in Disaster and Salvage Scenarios ......................... 698
L. Chen, M. Loschonsky, L.M. Reindl

Fast Block Edge Direction Analysis In DCT Domain ...................................................................................... 703
X. Wang, H. Wang, Y. Huang

Fast Decoding Methods for a MIMO System with Finite-bit Feedback .......................................................... 708
H. Wang, Z. Zhao

A Novel Compact Dual-band Micro-strip Band-pass Filter Design ................................................................. 714
T. Jiang, Y. Li, C. Liu, J. Zhang

Distributed Link-aware Rate Allocation for R-D Optimal Multiple Video Streaming over Wireless Networks ........................................ 718
Z. Ma, L. Song, C. Zhi, L. Yang

An Adaptive Approach to Reduce Complexity of EBB in LTE Downlink TDD Systems ................................. 724
