2010 Fourth International Conference on Management of e-Commerce and e-Government

(ICMeCG 2010)

Chengdu, Sichuan, China
23-24 October 2010
2010 International Conference on Management of e-Commerce and e-Government

ICMeCG 2010

Table of Contents

Message from General Co-chairs .................................................................xii
Message from Program Co-chairs .................................................................xiii
Organizing Committee ..................................................................................xiv
Program Committee .....................................................................................xv
Reviewers ......................................................................................................xvi

Session 1: Data Management and Intelligence in E-Commerce and E-Government

PAR: Partition-Annotate-Recommend Paradigm for Improved Accessibility in Digital Libraries .................................................................3
   Qing Li, Chen Zhang, Jia Wang, and Lili Zhao
The Knowledge Transfer Evolutionary Model and Simulation Based on the Modeling of System Dynamics .........................................................10
   Yang Bo and Xu Sheng-hua
Pricing Strategies for Custom-Designed Product with Multiple Quality Levels ..........................................................................................16
   Liu Jian and Li Jie
Online Reviews as a Driver of New Product Sales ...........................................20
   Geng Cui, Hon-kwong Lui, and Xiaoning Guo
Constrained Optimization with Genetic Algorithm: Improving Profitability of Targeted Marketing ........................................................................26
   Geng Cui, Man Leung Wong, and Xiang Wan
E-Commerce Automated Negotiation Based on Agent Reasonning ..................31
   Cao Mu-kun
A Comparative Study on Data Mining Algorithms for Individual Credit Risk Evaluation ..................................................................................35
   Hong Yu, Xiaolei Huang, Xiaorong Hu, and Hengwen Cai
Supernetwork Model of Intra-organizational Knowledge Transfer ....................39
   Hong Zou and Shenghua Xu
Constructing Corpus for Query-Oriented XML Text Summarization

Shihan Wu, Dexi Liu, and Xianpei Jiao

Stock Forecast Method Based on Wavelet Modulus Maxima and Kalman Filter

Zhijun Fang, Guihua Luo, Fengchang Fei, and Shuai Li

Research on Brand Maintenance Strategy Nokia Adopts in China Market Based on TD-SCDMA Standard

Rongsheng Lv and Lijun Zou

A Fuzzy Cluster Model for Evaluating E-commerce Trust

Xi Xiu-yan

Mining Social Response to Crisis via Electronic Media

Juan Yang, Xiqian Zhao, and Qing Li

Case Study of Digital Preservation for E-heritage: Digital Preservation Project for the Collection of Penhas Family

Fang Yu

The Similarity of Multivariate Time Series and Its Application

Lin Xun and Li Zhishu

Session 2: E-Commerce and Its Management

The Ripple Effect of Natural Disaster on the Agricultural Industry Chain

Lai Wei and Hong Chen

The Propagation of Events in Small-World Networks Driven by Noise

Peng Wang, Yu Wang, Matti Hämäläinen, and Zhangxi Lin

Research on Influencing Factors of Internet Business Models Based on Web2.0

Lei Bing

The Empirical Study on Buyer Loyalty Formation Mechanism for B2B E-Marketplace

Li Li and Zhaoxia Xie

Hypergraph Model of Product Family Structure for Mass Customization

Xiaoming Wei, Wei Wang, Zhijie Li, and Xiaobing Liu

A Review of Supply Chain Risk Management: From the Perspective of Default Correlation

Shengzhong Zhang and Qian Li

Global Financial Crisis's Impact on the Credit Risk of Logistics Companies: Comparative Analysis between China and US with KMV Model

Shengzhong Zhang, Qian Li, and Dan Wang

Outsourcing E-Commerce Model and Platform System Structure

Peng Ling and Zhang Mian
How Will Purchasing Purpose Influence Unreasonable Consumption in C2C Purchasing? .................................................................................................................................................. 128
  Jufeng Liao and Yao Wan

Online Buying Impulsiveness and Word-of-Mouth Online in the E-Marketing Age: A Theoretical Model Approach ........................................................................................................................................ 133
  Zeng Kaisheng

The Game Model of the Pricing Methodology of B2B e-Marketplace and Its Competitive Strategy on the Basis of Long Tail Theory ........................................................................................................... 137
  Lifang Peng and Limin Chen

A Holistic Governance Framework for e-Business Success .......................................................................................................................................................................................... 142
  Xiaowen Liu, Lihua Wu, Jin Yu, and Xiaochun Lei

Modeling Feedback Mechanism for E-Marketplace ............................................................................................................................................................................................................... 147
  Wensheng Yang and Li Li

A MC Product Family Integration Platform of Residential Products Based on Value Chain ............................................................................................................................................................................. 153
  Yuan-Yuan Jiao, Hui-Hui Fei, Yi Wen-Zhen, Jun Du, and Ying Wang

E-Business Process Analysis and Optimization Based on Activity-Section (Role) Flow Chart and Role-Exchanged ........................................................................................................................................ 157
  Yuan Huilin and Dingwei Wang

Two-Phase Multi-unit Auction Design ............................................................................................................................................................................................................................... 160
  Lanbo Miao and Jiafu Tang

The Game Research between a Direct Internet Marketer and N Retailers in Hybrid Marketing ............................................................................................................................................................................ 164
  Zhongqi Sheng, Wei Liu, Zezhong Liang, and Yujun Li

  DongYu Zhang

A Conceptual Model of Factors Affecting e-Commerce Adoption by SMEs in China ..................................................................................................................................................................................................................................... 172
  Jinlong Bao and Xuewen Sun

Efficiency Evaluation of Pure e-Commerce Companies Listed in Stock Market in China Based on AHP-DEA ...................................................................................................................................................... 176
  Tong Li and Leping Chen

The Game Analysis on the Asymmetrical Competition between UnionPay and Allinpay & Open-Union ........................................................................................................................................................................... 180
  Shuai Qinghong and Jia Wang

The Study of Consumer Trust in C2C e-Commerce Based on Reputation Score, Information Disclosure, Online Consumer Review Quality .................................................................................................. 184
  Hanpeng Zhang, Dongyu Chen, and Ruofan Sun
Study on the Influence of Commitment on Customer Behavior in the Stage of Pre-purchase and Post-Purchase .......................................................................................................................188

Wang Long

Session 3: Management of E-Government

Smarter City: The Event Driven Realization of City-Wide Collaboration .....................................................195
Qiang Wang, John Meegan, Thomas Freund, Fang Tai Li, and Michael Cosgrove

E-Government Challenges in Developing Countries: A Case Study of Pakistan .........................................200
Faizullah Khan, Surat Khan, and Bin Zhang

Environment Improvement Policy is the Means to Promote Economy
Development .............................................................................................................................................................204
Wan Jianxiang

E-government Construction, Informationized Governance and Governing Means Innovation: Based on the Case of Shanghai .................................................................211
Chengzhi Yi

The Improved Diamond Model's Application in the Evaluation of Regional Logistics Competitiveness .......................................................................................................................217
Jianjun Li, Hui Shu, and Feng Qing

The Optimal Concession Period in the Built-Operate-Transfer Project ..........................................................223
Fan Ruizheng and Wan Li

Study on E-government and the Relationship between the Government and the Public ............................................228
He Xiao-ke

Developing E-Government and Enhancing the Modernization of Public Administration: A Case Study of e-Government Development in Yunnan Province, the People's Republic of China .................................................................232
Zhihui Wang and Guangxing Song

The Equilibrium of Labor Resource in Compatible Economical System ................................................................236
Zou Yuren and Li Zhilong

Analysis and Comparison of Administrative Ecology and Information Ecology Theory: Concurrently Discuss the Strategies to Develop e-Government in China .......................................................................................................................240
Liu Weizhang and Zhang Jiefang

Collaborative Sharing Model of Socialized Information in Yangtze River Delta Region ............................................................244
Jiang Ding-fu, Xiong Li, and Xiang Zheng-tao

The Econometric Analysis of the Relationship between Chinese e-Commerce Transactions and GDP .................................................................248
Yueqian Rao, Kai Zhang, and Lin Li
**Session 4: Enterprise Management and Information System**

Study on Impact of e-Commerce Development on Enterprises Operation and Management ................................................................. 255  
  *Dong Shanshan and Zou Lei*

Evaluation of Independent Innovation Capacity of High-Tech Enterprises Based on Hierarchical Comprehensive ........................................... 259  
  *Xu Sheng-hua and Zhang Hui-ming*

Evaluation Method of the Industry's Innovation Capacity Based on Cloud Model ..................................................................................... 264  
  *Li Shan and Xu Shenghua*

A Study on Factors Affecting Customer Equity of Telecommunications Enterprises ..................................................................................... 270  
  *Qi Wang and Xingping Zhang*

Design of Urban Nuclear Accident Emergency Command System Based on Intelligent Navigation ................................................................. 274  
  *Yurong Yang and Xiangli Zheng*

MBO Performance Study of Listed Companies in China Based on Factor Analysis ..................................................................................... 279  
  *Xiao-yan Wang and Jianhua Zhang*

Evaluation of Food Enterprises' Logistics Outsourcing Risk ...................................................................................................................... 283  
  *Liu Beilin and Zhang Wenjuan*

IT Governance in Post-Adoption Stages of CRM Diffusion: An Institutional Perspective ........................................................................ 287  
  *Shutao Dong*

Analysis on the Key Successful Factors of Enterprise-Wide Risk Management: Based on the Insight of Effective Encouragement ................. 293  
  *Yue-hu Lin and Li-hong Du*

Research on Revenue Distribution of the Third-Party Payment Enterprise and Bank ................................................................................ 298  
  *Huo Hong and Wei Yu*

An Empirical Study of Business Intelligence (BI) Application in E-business Enterprises: Taking YNYY Pharmaceutical Chain Enterprise as Example ................................................................. 304  
  *Ye Qiongwei, Song Guangxing, and Li Zhendong*

**Session 5: Logistics and Supply Chain Management**

The Process Integration Evaluation Method of the Fourth Party Logistics Using Fuzzy Theory ............................................................................. 313  
  *Zheng Leina, Pan Tiejun, and Yan Guoqing*
Supply Chain Risk Assessment Based on AHP and Fuzzy Comprehensive Evaluation
Liu Bochao ........................................................................................................................................................................317
Research on Risk Assessment in International Logistics .................................................................323
Shi-zhen Bai and Jing Liu
The Analysis on the Spillover Effect of Logistics Industry FDI ................................................328
Wang Yang and Wang Lusha
TPL Service Level and Pricing Models in Manufacturer-Retailer Supply Chains .................................................................333
Fuguang Bao, Daqiang Chen, Hongliang Miao, and Yili Chen
Transformation of Station and Function of Tourist Attraction in China Based on Supply Chain Management Theory ........................................................................................................338
Lu Ke and Wei Li-ying
Default Correlation and Its Effects in Logistics Service Supply Chain ........................................343
Qian Li, Shengzhong Zhang, and Qunqi Wu

Session 6: Mobile Commerce and Network Technology in E-Commerce
A Fuzzy ELECTRE Approach for Evaluating Mobile Payment Business Models .................................................................351
Fatemeh Asghari, Ali Asghar Amidian, Jafar Muhammadi, and HamidReza Rabiee
Developing an Analytical Framework for Mobile Payments Adoption in Retailing: A Supply-Side Perspective ........................................................................................................356
P.M. Lai and K.B. Chuah
A P2P E-Commerce Model Based on Interest Community .............................................................362
Mo Hai and Yan Tu
A Comparative Case Study of the I-mode Mobile Internet Service between in Japan and in Netherlands ........................................................................................................366
Chen Weizhu
A Novel Velocity Estimation Algorithm of Narrow-Band Mobile Communication Channels ........................................................................................................372
Zhang Hao, Liu Yong, and Gao Junxiang
A Survey of System Platforms for Mobile Payment ........................................................................376
Maryam Asadi Tehrani, Ali Asghar Amidian, Jafar Muhammadi, and HamidReza Rabiee
Research on Influencing Factors of Consumer Willingness to Accept Mobile SMS Advertising ........................................................................................................382
Yini Chen and Xiaotong Jin
A Dynamic Wireless Spectrum Allocation Algorithm for Sliding Scheduled Demands ........................................................................................................387
Xubin Luo, Jie Ma, Qing Li, and Jiafen Liu
Session 7: Security of E-Commerce and E-Government

Evolutionary Game Analysis of Security Information Sharing in Virtual Enterprise
Qiang Xiong

Formal Verification of Protocols in E-commerce
Jiafen Liu, Xiumeng Han, and Xubin Luo

Session 8: Multimedia and Its Applications in E-Commerce

Biometrics Verification Techniques Combing with Digital Signature for Multimodal Biometrics Payment System
JuCheng Yang

MPEG Application in Electronic Records and Document Management
Fang Yu, Feng Dan, and Wang Dandong
