2010 International Conference on Broadband, Wireless Computing, Communication and Applications

(BWCCA 2010)

Fukuoka, Japan
4 – 6 November 2010
# 2010 International Conference on Broadband, Wireless Computing, Communication and Applications

**BWCCA 2010**

## Table of Contents

| Message from the BWCCA 2010 International Conference Organizers | xxii |
| Message from the BWCCA 2010 International Conference Workshop Co-chairs | xxiv |
| BWCCA 2010 Organizing Committee | xxv |
| BWCCA 2010 Program Committee | xxvii |
| BWCCA 2010 Reviewers | xxx |
| Keynote | xxxi |
| Message from ASTSA 2010 International Workshop Organizers | xxxiii |
| ASTSA 2010 Organizing Committee | xxxiv |
| ASTSA 2010 Reviewers | xxxv |
| Message from CWECS 2010 International Workshop Organizers | xxxvi |
| CWECS 2010 Organizing Committee | xxxvii |
| CWECS 2010 Reviewers | xxxviii |
| Message from DCS 2010 Workshop Organizers | xxxix |
| DCS 2010 Organizing Committee | xl |
| DCS 2010 Reviewers | xli |
| Message from ISSE 2010 Workshop Organizers | xlii |
| ISSE 2010 Organizing Committee | xliii |
| ISSE 2010 Reviewers | xlv |
| Message from MAPWC 2010 International Workshop Organizers | xlv |
| MAPWC 2010 Organizing Committee | xlvii |
Session 1: Ad Hoc Networks

Efficient Address Management for Mobile Ad Hoc Networks ................................................................. 1
   Sudath Indrasinghe, Rubem Pereira, and John Haggerty

Analysis of MANET Routing Protocols for Indoor Environment ................................................................. 9
   Makoto Ikeda, Elis Kulla, Masahiro Hiyama, Leonard Barolli, and Makoto Takizawa

A Zone Based Routing Protocol for Ad Hoc Networks and Its Performance Improvement by Reduction of Control Packets ................................................................. 17
   Yuki Sato, Akio Koyama, and Leonard Barolli

Session 2: Sensor Networks I

   Tao Yang, Gjergji Mino, Leonard Barolli, Fatos Xhafa, and Arjan Durresi
A Communication Protocol to Improve Fairness and Data Amount on Sensor Data Collection with a Mobile Sink

Wataru Seino, Tomoki Yoshihisa, Takahiro Hara, and Shojiro Nishio

AntSens: An Ant Routing Protocol for Large Scale Wireless Sensor Networks

M. Goyal, W. Xie, H. Hosseini, and Y. Bashir

Solving K-Coverage Problem in Wireless Sensor Networks Using Improved Harmony Search

Shohreh Ebrahim Nezhad, Hoda Jalal Kamali, and Mohsen Ebrahimi Moghaddam

Session 3: Parallel and Multi-core Systems

Parallel Implementation of a Balancing Domain Decomposition Method for Multi-core Processors

Masao Ogino, Hiroshi Kawai, Ryuji Shioya, and Shinobu Yoshimura

Parallel CAE System for Large Scale Problems Based on Computer Network

Ryuji Shioya, Masao Ogino, and Hiroshi Kawai

Architecture and Design of Efficient 3D Network-on-Chip (3D NoC) for Custom Multicore SoC

Akram Ben Ahmed, Abderazek Ben Abdallah, and Kenichi Kuroda

Advanced Design Issues for OASIS Network-on-Chip Architecture

Kenichi Mori, Adam Esch, Abderazek Ben Abdallah, and Kenichi Kuroda

Session 4: Mesh and Ad Hoc Networks

Tuning Operators of Genetic Algorithms for Mesh Routers Placement Problem in Wireless Mesh Networks

Fatos Xhafa, Christian Sánchez, Admir Barolli, Rozeta Miho, Leonard Barolli, and Makoto Takizawa

Autonomous Power Supplied Wireless Mesh Network for Disaster Information System

Toshihiro Suzuki and Yoshitaka Shibata

Impact of Source and Destination Movement on MANET Performance Considering BATMAN and AODV Protocols

Elis Kulla, Makoto Ikeda, Leonard Barolli, and Rozeta Miho
Provisioning Vehicular Ad Hoc Networks with Quality of Service ........................................102
  Gongjun Yan, Danda B. Rawat, and Bhed B. Bista

**Session 5: Practical Security and Privacy Application I**

A Solution to Protecting USB Keyboard Data .................................................................108
  Kyungroul Lee, Wansoo Kim, Kwangjin Bae, and Kangbin Yim

  Annette Tolnai and Sebastiaan von Solms

An Analytical Evaluation of Network Security Modelling Techniques Applied to Manage Threats .................................................................117
  Valentina Viduto, Carsten Maple, and Wei Huang

**Session 6: Optical Networks**

Differentiated Bandwidth Allocation and WaveLength Assignment Method in WDM EPON .................................................................124
  Min-jun Kim, Yong-suk Jang, Yong-do Choi, and Sung-ho Kim

Design and Evaluation of Fiber Direct Coupling Optical Antennas for Next Generation Optical Wireless Communication Systems ........................................129
  Koichi Takahashi and Nobuo Nakajima

Inter-ONU Scheduling Scheme for QoS Guarantee in 10G EPON ..................................137
  Jae-Hyun Jun, Zhibin Yu, Min-Suk Jung, and Sung-Ho Kim

**Session 7: Sensor Networks II**

Examination of Selection for Relay Nodes Adapted to Priority of Transportation in Triage Network .................................................................142
  Hiroki Tamura, Hikaru Kobayashi, Hiroshi Shigeno, and Ken-ichi Okada

Energy-Efficient Code Dissemination Using Minimal Virtual Backbone in Sensor Networks .................................................................149
  Jisun Kim, Jiyoung Lim, and Kijoon Chae

Defect Identification by Sensor Network Under Uncertainties ........................................155
  Tomonari Furukawa, Jinquan Cheng, Shen Hin Lim, Fei Xu, and Ryuji Shioya
Session 8: Networks Algorithms and Protocols

Energy-Efficient Server Selection Algorithms for Network Applications .................................................. 159
  Tomoya Enokido, Ailixier Aikebaier, and Makoto Takizawa

Modified Estimation Algorithm for Radio Communication Distance along Random Rough Surface ................................................................. 167
  Junichi Honda, Kazunori Uchida, and Kwang-Yeol Yoon

Bandwidth Reservation Method to Consider Reservation Failure in VLAN ................................................. 175
  Yong-Do Choi, Jae-Hyun Jun, Gi-Beom Kil, and Sung-Ho Kim

Solid Convex-Hull Sequential Support Vector Machine ................................................................................... 181
  Zhibin Yu, Min-Jun Kim, Kyung-Seok Park, and Sung-Ho Kim

Session 9: Practical Security and Privacy Application II

Towards a Common Notion of Privacy Leakage on Public Database ............................................................. 186
  Shinsaku Kiyomoto and Keith M. Martin

Constructivist Approach to Information Security Awareness in the Middle East ......................................................... 192
  Mohammed Boujettif and Yongge Wang

A Contextual Access Control Model .................................................................................................................... 200
  Narhimene Boustia and Aicha Mokhtari

Redundancy and Defense Resource Allocation Algorithms to Assure Service Continuity against Natural Disasters and Intelligent Attackers ................................................................. 206
  Frank Yeong-Sung Lin, Yu-Shun Wang, Po-Hao Tsang, and Jui-Pin Lo

Session 10: Distributed Schemes and Protocols

A Scalable Hybrid Time Protocol for a Heterogeneous Group ........................................................................ 214
  Isamu Tsuneizumi, Ailixier Aikebaier, Makoto Ikeda, Tomoya Enokido, and Makoto Takizawa

Queue Management for the Heavy-Tailed Traffics ......................................................................................... 222
  Takuo Nakashima

Fault Tolerant Methods for Intermitted Failures in Virtual Large Scale Disks ................................................. 229
  Minoru Uehara
Session 11: Wireless Networks

Mobility Based MIMO Link Adaptation in LTE-Advanced Cellular Networks ........................................... 235
  Vishwanath Ramamurthi and Wei-Peng Chen

Reliable Message Broadcast Schemes in Distributed Agreement Protocols ..................................................... 242
  Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

Application of Genetic Algorithms for QoS Routing in Mobile Ad Hoc Networks: A Survey ................................................................. 250
  Admir Barolli, Makoto Takizawa, Fatos Xhafa, and Leonard Barolli

Session 12: Disaster Information Systems

Wireless Distributed Network System for Relief Activities after Disasters - A Field Experiment for Channel Setting and a System for Information Exchange among Shelters ......................................................................................................................... 260
  Misako Urakami, Satoshi Innami, Makoto Kamegawa, Tetsuya Shigeyasu, and Hiroshi Matsuno

Performance Evaluation of PC Router Based Cognitive Wireless LANs for Disaster Information System ................................................................. 268
  Goshi Sato and Yoshitaka Shibata

Distributed Disaster Information System in DTN Based Mobile Communication Environment ................................................................. 274
  Yutaka Sasaki and Yoshitaka Shibata

Session 13: Network Security, Privacy and Trust

Darknet Monitoring on Real-Operated Networks ................................................................................................. 278
  Seiichiro Mizoguchi, Yoshiro Fukushima, Yoshiaki Kasahara, Yoshiaki Hori, and Kouichi Sakurai

Secure Hybrid Communications for Medical Applications ............................................................................................... 286
  Arjan Durresi, Mimoza Durresi, Zeynep Salih, and Leonard Barolli

Comments on a One-Way Hash Chain Based Authentication for FMIPv6 ................................................................. 293
  Ilsun You and Jong-Hyouk Lee

Malware Obfuscation Techniques: A Brief Survey ................................................................................................. 297
  Ilsun You and Kangbin Yim
Session 14: Distributed Algorithms and Systems

An Iterative Domain Decomposition Method of Magnetostatic Problems Based on a Mixed Formulation .......................................................... 301

Daisuke Tagami

Introduction of a Direct Method at Subdomains in Non-linear Magnetostatic Analysis with HDDM ................................................................................................................................................. 304

Shin-ichiro Sugimoto, Masao Ogino, Hiroshi Kanayama, and Shinobu Yoshimura

A Parallel Skyline Solver for Coarse Grid Correction of BDD Pre-conditioning in Domain Decomposition Method .................................................................................................................. 310

Hiroshi Kawai, Masao Ogino, Ryuji Shioya, and Shinobu Yoshimura

Session 15: Multimedia and Web Applications

A Cloud-Based Support System for Offshore Software Development .......................................................... 315

Yuki Kaeri, Yusuke Manabe, Claude Moulin, Kenji Sugawara, and Jean-Paul A. Barthès

Two Types of Trustworthiness of Acquaintances in Peer-to-Peer (P2P) Overlay Networks ............................................................................................................................................... 320

Soichi Sawamura, Admir Barolli, Ailixier Aikebaier, Valbona Barolli, and Makoto Takizawa

Multihopped Wireless Disaster Information Network by Automatic Directional Antenna Control Method .......................................................................................................................... 328

Daisuke Asahizawa and Yoshitaka Shibata

Session 16: Wireless Communication

An Approximation for Fresnel Function to Reduce Computation Time Based on DRTM ................................................................................................................................................. 334

Kazunori Uchida, Junichi Honda, and Yuuki Kimura

Wireless Link Selection by Time Transitional AHP Based on Emergent Policy in Cognitive Wireless Network ........................................................................................................................................... 340

Noriki Uchida, Kazuo Takahata, and Yoshitaka Shibata
ASTSA 2010 Session 1: Sensors and Applications

LiNS: A Library Navigation System Using Sensors and Smartphones .................................................................346
   Kazuki Watanabe, Tomoyuki Takahashi, Toshihiko Ando, Kaoru Takahashi, Yoshifumi Sasaki, and Tatsuya Funakoshi

Network-Adaptive Multipath Video Delivery over Wireless Multimedia Sensor Networks Based on Packet and Path Priority Scheduling .................................................................351
   Amir Rastegar Lari and Behzad Akbari

Received Signal Strength Technique Performance in Sensor Network Localization Application ........................................................................................................................................357
   Kazim Firat Taraktas, Osman Ceylan, and Bulent Yagci

Hop-by-Hop Reliable Data Deliveries for Underwater Wireless Sensor Networks ...................................................................................................................................................................363
   Muhammad Ayaz, Azween Abdullah, and Ibrahima Faye

ASTSA 2010 Session 2: Protocols and Algorithms

Enhancing RSSI Technologies in Wireless Sensor Networks by Using Different Frequencies .................................................................................................................................369
   Osman Ceylan, K. Firat Taraktas, and H. Bulent Yagci

A Novel Adaptable Routing Protocol for Wireless Sensor Networks ........................................................................373
   K.G. Aravind and M.M. Manohara Pai

Multipath Data Transfer in Wireless Multimedia Sensor Network ........................................................................379
   Shobha Poojary and M.M. Manohara Pai

CWECS 2010 Session 1: Digital Signature

Contract Signatures in E-Commerce Applications ........................................................................................................384
   Lien Harn, Chu-Hsing Lin, and Che-Wei Hu

A Proxy Partially Blind Signature Scheme with Proxy Revocation ........................................................................389
   Fuw-Yi Yang and Ling-Ren Liang

Varied Oblivious Transfer Protocols Enabling Multi-receiver and Applications .........................................................395
   Shiuh-Jeng Wang, Yuh-Ren Tsai, and Chien-Chih Shen
Efficient Modular Exponentiation Resistant to Simple Power Analysis
in DSA-Like Systems .................................................................................................................. 401

Chia-Yu Lu, Wu-Chuan Yang, and Chi-Sung Laih

CWECS 2010 Session 2: Computer Forensics
VoIP Digital Evidence Forensics Standard Operating Procedure (DEFSOP) .............................. 407
I-Long Lin, Yun-Sheng Yen, Bo-Lin Wu, and Hsiang-Yu Wang

Fast Deployment of Computer Forensics with USBs ................................................................. 413
Chung-Huang Yang and Pei-Hua Yen

Source Camera Identification in Real Practice: A Preliminary Experimentation ...................... 417
Aniello Castiglione, Giuseppe Cattaneo, Maurizio Cembalo, and Umberto Ferraro Petrillo

CWECS 2010 Session 3: Authentication and Privacy
Based on Mobile RFID Device to Design a Secure Mutual Authentication Scheme for Market Application ........................................................................................................... 423
Chin-Ling Chen, Jinn-Ke Jan, and Chih-Feng Chien

The Iterative Distributed Re-authentication Scheme Based on EAP-AKA in 3G/UMTS-WLAN Heterogeneous Mobile Networks .......................................................... 429
Shen-Ho Lin, Jung-Hui Chiu, and Sung-Shiou Shen

Transparent Digital Rights Management System with Superdistribution ............................... 435
Chih-Ta Yen, Hrong-Twu Liaw, Nai-Wei Lo, Ting-Chun Liu, and Jay Stu

CWECS 2010 Session 4: Cloud and Wireless Security
Mutual Authentication with Dynamic Keys in an IEEE802.16e PKM Environment ......................................................................................................................... 441
Yi-Fung Huang, Fang-Yie Leu, and Chao-Hong Chiu

Securing the Cloud’s Core Virtual Infrastructure ...................................................................... 447
A. Tolnai and S.H. von Solms

A Biologically Modeled Intrusion Detection System for Mobile Networks ............................. 453
Brian C. Williams and Errin W. Fulp

High-Capacity Multi-secret Sharing by Random Grid ................................................................. 459
   Tzung-Her Chen, Yao-Sheng Lee, and Ci-Lin Li

Noise-Resistant Joint Fingerprinting and Decryption Based on Vector Quantization ................................................................. 463
   Chih-Yang Lin, Wei-Lun Huang, and Tzung-Her Chen

Lifetime Security Improvement in Wireless Sensor Network Using Queue-Based Techniques ........................................................................ 469
   Fuu-Cheng Jiang, Hsiang-Wei Wu, Der-Chen Huang, and Chu-Hsing Lin

An Enhanced Firewall Scheme for Dynamic and Adaptive Containment of Emerging Security Threats .................................................. 475
   Aniello Castiglione, Alfredo De Santis, Ugo Fiore, and Francesco Palmieri

DCS 2010 Session 1: Fault Detection and Diagnosis

A Wrapper Approach Based on Clustering for Sensors Selection of Industrial Monitoring Systems .............................................................. 482
   Cesar Uribe, Claudia Isaza, Oscar Gualdron, Cristian Duran, and Adrian Carvajal

Discrete Flatness for Non Linear Systems FDI ........................................................................ 488
   Nan Zhang, Andrei Doncescu, and Felix Mora-Camino

Feature Selection for Fault Diagnosis Using Fuzzy-ARTMAP Classification and Conflict Intersection ................................................................. 495
   M. Benkaci, A. Doncescu, and B. Jammes

A Diagnosis Approach Based on Kolmogorov Complexity ......................................................................................................................... 501
   N. Kabbaj, A. Doncescu, and M. Benkaci

ISSE 2010 Session 1: Intelligent Networks

Detour Routing Protocol for Geographic Sensor Networks .......................................................................................................................... 505
   Lih-Chyau Wuu, Wen-Bin Li, and Wen-Chung Kuo

Fast Seamless Secure Handoff for Loosely Coupled Systems in Heterogeneous Wireless Mobile Networks ........................................................................ 511
   Ben-Jye Chang, Ying-Hsin Liang, and Shou-Chi Liang
The Decision Scheme of Frame Importance Factor for Video Streaming System .......................................................... 517

Huan-Yao Kang and Ching-Lung Chang

ISSE 2010 Session 2: Human Behavior Understanding

Frequency Domain Analysis of Human Motions in Surveillance Video .......................................................... 522

Hsuan T. Chang, Chang-Sian Chen, Chun-Wen Hung, and Day-Fann Shen

Automatic Facial Skin Defect Detection System ...................................................................................... 527

Chuan-Yu Chang, Shang-Cheng Li, Pau-Choo Chung, Jui-Yi Kuo, and Yung-Chin Tu

Fingertip-Writing Alphanumeric Character Recognition for Vision-Based Human Computer Interaction .................................................. 533

Chien-Cheng Lee, Cheng-Yuan Shih, and Bor-Shenn Jeng

A Motion Planning of Swarm Robots Using Genetic Algorithm .......................................................... 538

Chien-Chou Lin, Po-Yuan Hsiao, and Kun-Cheng Chen

ISSE 2010 Session 3: Image and Video Analysis

Gaussian Distributive Filtering in Histogram Equalization ........................................................................ 544

Ping-Hsien Lin, Hsu-Chun Yen, and Chia-Chen Yu

A 3D Model Retrieval System Based on the Cylindrical Projection Descriptor ........................................ 550

Jau-Ling Shih, Chang-Hsing Lee, Chih-Hsun Chou, and Hsiang-Yuen Chang

An Information Hiding Scheme Using Magic Squares ............................................................................. 556

Ming-Gun Wen, Su-Chieng Huang, and Chin-Chuan Han

MAPWC 2010 Session 1: Scattering and Diffraction

Numerical Analysis of Scattered Electromagnetic Wave by a Dielectric Cylinder with High Contrast by CIP Method .................................................................................. 561

Hiroshi Maeda, Hiroyuki Terashima, Tetsuo Maruyama, and Shinjiro Hironaka

Back Scattering from Target above Random Rough Surface ........................................................................ 565

Kazunori Uchida, Junichi Honda, Shunsuke Nakasima, and Kwang-Yeol Yoon

Characteristics of Diffracted Waves Going over Building Rooftop ................................................................ 571

Jiro Iwashige, Leonard Barolli, and Katsuki Hayashi
Electromagnetic Scattering from Cylinders Located near Periodic Cylinder Array .................................................................................................................................................................................577

Koki Watanabe and Yoshimasa Nakatake

MAPWC 2010 Session 2: Wireless Modelling and Applications

Relations among 10-Minute Precipitation, Rainfall Intensity and Ku-Band Rain Attenuation in Kyushu Island, Japan ...........................................................................................................................................................................581

Kiyotaka Fujisaki, Goshi Satoh, and Mitsuo Tateiba

Delay Profile Using Scale Model Method for Microcells in Urban Areas ..........................................................587

Ryuichiro Iwakuma, Yu Funaki, Toyokazu Mine, and Shinichi Ichitsubo

Application Techniques of Particle Swarm Optimization ..................................................................................592

Zhiqi Meng

MAPWC 2010 Session 3: Wireless Technologies

2D Wave Propagation Characteristics of the CIP Method with Amplitude Error Compensation .................................................................................................................................................................................596

Tsuyoshi Matsuoka

Frequency-Selection Properties for Composite Periodic Structures .................................................................600

Maurice Sesay and Mitushiro Yokota

Heuristic Maxmin Fairness for the Wireless Channel Allocation Problem ...............................................................606

Mario Köppen, Rodrigo Verschae, Kaori Yoshida, and Masato Tsuru

A New Design of Circular Polarized Planar Antennae ..................................................................................612

Mayumi Matsunaga and Toshiaki Matsunaga

NGWMN 2010 Session 1: Wireless Traffic Control an Resource Allocation

Evaluation of a Fuzzy-Based CAC Scheme for Different Priorities in Wireless Cellular Networks .................................................................................................................................................................................616

Taku Ikebata, Gjergji Mino, Leonard Barolli, Fatos Xhafa, Arjan Durresi, and Akio Koyama

Adaptive Mixed Bias Resource Allocation for Wireless Mesh Networks .................................................................622

Jason B. Ernst and Thabo Nkwe
Effect of Adaptive RTS/CTS ON/OFF Control Method for Mitigating Transmission Overhead of IEEE802.11DCF .................................................................627

Tetsuya Shigeyasu and Hiroshi Matsuno

NGWMN 2010 Session 2: Wireless Communication

Field Estimation for Terrestrial Digital Broadcasting in Western Part of Fukuoka ..................................................................................................................633

Kazunori Uchida, Junichi Honda, Masafumi Takematsu, and Toshiaki Tazume

Particle Swarm Optimization on DSI Method for PAPR Reduction in OFDM Systems ..................................................................................................639

Shu-Hong Lee and Ho-Lung Hung

Phase Error Cancellation for OFDM Systems Using Adaptive Filters .........................................................................................................................643

Chia-Hsin Cheng, Kai-Jie Chen, Gwo-Ruey Lee, and Yung-Fa Huang

NGWMN 2010 Session 3: Intelligent Algorithms

An Intelligent Fuzzy-Based Cluster Head Selection System for WSNs and Its Performance Evaluation for D3N Parameter .................................................................648

Hironori Ando, Leonard Barolli, Arjan Durresi, Fatos Xhafa, and Akio Koyama

Jump Resonance Analysis for Systems with Parametric Uncertainties .........................................................................................................................654

Li-Shan Ma, Chih-Hung Wu, Jieh-La Jaw, Bing-Fei Wu, and Jau-Woei Perng

Dynamic Forensics System with Intrusion Tolerance Based on Hierarchical Coloured Petri-nets ..................................................................................660

Hsing-Chung Chen, Jai-Zong Sun, and Zhen-Dong Wu

NTCCA 2010 Session 1: Network Performance Analysis

Behavior Shaver: An Application Based Layer 3 VPN that Conceals Traffic Patterns Using SCTP ................................................................................666

Mamoru Mimura and Hidehiko Tanaka

DDoS Detection Technique Using Statistical Analysis to Generate Quick Response Time .................................................................................................672

Shunsuke Oshima, Takuo Nakashima, and Toshinori Suyoshi
Experimental Evaluation of a MANET Testbed in Indoor Stairs Scenarios .................................................................678
  Masahiro Hiyama, Makoto Ikeda, Leonard Barolli, Elis Kulla, Fatos Xhafa, and Arjan Durresi

Implementation and Evaluation of Distributed Hash Table Using MPI .................................................................684
  Daisuke Tsukamoto and Takuo Nakashima

**NTCCA 2010 Session 2: Network Services**

A Development of Environment Verification System “View-Aid” Using Digital Wireless Camera for Low Vision .............................................................689
  Yoshifumi Oyama and Yuki Shimada

A Mailing List Management System Mashing-Up with Web Services .................................................................695
  Keisuke Fujiwara, Yoshinari Nomura, and Hideo Taniguchi

Advanced Relay Nodes for Adaptive Network Services - Concept and Prototype Experiment .................................................................701
  Masayoshi Shimamura, Takeshi Ikenaga, and Masato Tsuru

Gathering Large Scale Human Activity Information Using Mobile Sensor Devices .................................................................708
  Yuichi Hattori, Sozo Inoue, Takemori Masaki, Go Hirakawa, and Osamu Sudo

**RI3C 2010 Session 1: Teleoperation and Robot Control**

Teleoperation of a Robot Arm System Using Pneumatic Artificial Rubber Muscles: Teleoperation over the Internet Using UDP and a Web Camera .................................................................714
  Tomonori Kato, Tomoaki Higashi, and Kenichi Shimizu

Application of a JXTA-Overlay P2P Control System for a Biped Walking Robot .................................................................719
  Keita Matsuo, Yuichi Ogata, Evjola Spaho, Fatos Xhafa, and Leonard Barolli

Study on Increase in Propulsion of Flexible Linear Actuator .................................................................725
  Kazuhiro Ohyama, Yasushi Hyakutake, and Hitoshi Kino
RI3C 2010 Session 2: Intelligent Methods and Models for Robotics

Decision Method of Internal Force for Sensorless Positioning of Musculoskeletal System .......................................................... 731

Hitoshi Kino, Shiro Kikuchi, and Kenji Tahara

Character Modeling and Calligraphic Learning by Haptic Device ..................................................................................... 737

Hiroyuki Fujioka, Hiroyuki Kano, and Sousuke Kakehi

Operational Feel Adjustment for Power-Assisted Positioning by an Actor-Critic Method .............................................................. 743

Tetsuya Morizono

RI3C 2010 Session 3: Robot Applications

A Method for Event Handling on Robot Town Platform and a Sharable Personal Mobility Robot .................................................. 749

Takafumi Ienaga, Yosuke Senta, Daisaku Arita, Yoshihiko Kimuro, Kouji Murakami, and Tsutomu Hasegawa

Experimental Studies on Various Types of Animal Mimicking Robots .................................................................................. 755

Y. Kawamura

Iterative Learning Scheme for a Redundant Musculoskeletal Arm: Task Space Learning with Joint and Muscle Redundancies 760

Kenji Tahara and Hitoshi Kino

Development of Detection System for the Bed Accident Using Ultrasonic Wave Sensor ......................................................... 766

Hiroyuki Agatsuma, Takehiko Abe, Takuya Tajima, and Haruhiko Kimura

SCMAS 2010 Session 1: Agent Technology and Multiagent Systems

Design and Implementation of Repository-Based Agent Organization Method on Heterogeneous Agent Platform .................... 772

Takahiro Uchiya and Tetsuo Kinoshita

An OWL-Based Ontology to Represent Knowledge about Location, Space and Perceptual Primitives ..................................... 780

Shigeru Fujita and Kenji Sugawara
Multiagent Architecture of Knowledge Based Network Management Support
System .......................................................................................................................................................................782
Kazuto Sasai, Gen Kitagata, and Tetsuo Kinoshita

Perceptual Integration of Real-Space and Virtual-Space Based on Symbiotic
Reality .........................................................................................................................................................................788
Hiroshi Noguchi, Takuo Suganuma, and Tetsuo Kinoshita

SCMAS 2010 Session 2: Symbiotic Computing and Applications
Implementation of SmartBox End-Device for a P2P System and Its Evaluation
for E-Learning and Medical Applications .................................................................................................................794
Yuichi Ogata, Keita Matsuo, Evjola Spaho, Leonard Barolli, and Fatos Xhafa

Moving Object Detection by a Ghost Cancel Method on Indoor Images .................................................................800
Hiroyuki Utsunomiya and Shigeru Fujita

A Road Location Estimating Method by Many Trajectories to Realize Rapid
Map Survey for a Car Navigation System .................................................................................................................806
Hiromitsu Sugawara, Nobuyoshi Sato, Tsuyoshi Takayama, and Yoshitoshi Murata

WSNR 2010 Session 1: Wireless Sensor Networks Protocols
A.J. Dinusha Rathnayaka, Vidyasagar M. Potdar, Atif Sharif, Saeed Sarencheh, and Samitha Kuruppu

Prototype Design and Analysis of Wireless Vibration Sensor .....................................................................................818
Mohammad Reza Akhondi, Alex Talevski, and Tsung-Hsien Chou

Wireless Sensor Networks: Challenges Ahead ...........................................................................................................824
A.J. Dinusha Rathnayaka, Vidyasagar M. Potdar, Atif Sharif, Saeed Sarencheh, and Samitha Kuruppu

WSNR 2010 Session 2: Wireless Sensor Networks
State of the Art: Carbon Emission Accountability Modeling .....................................................................................830
Valencia Lo and Vidyasagar Potdar

Criteria for Hardware Selection of Wireless Vibration Sensor ....................................................................................836
Mohammad Reza Akhondi, Alex Talevski, and Tsung-Hsien Chou
