2010 International Conference on Communications and Intelligence Information Security

(ICCIIS 2010)

Nanning, Guangxi, China
13 – 14 October 2010
2010 International Conference on Communications and Intelligence Information Security

ICCIIS 2010

Table of Contents

Message from General Chair ........................................................................................................................x
Message from Program Chair ........................................................................................................................xi
Organizing Committee ....................................................................................................................................xii
Program Committee ........................................................................................................................................xiii
Reviewers ...............................................................................................................................................................xv

Session 1: Computer Technology and Applications

A Node Passive Localization Algorithm Based on Wireless Sensor Networks ...............................................1
  Guo-heng Wei, Jun-ge Zhao, Wei Hu, and Fang Luo

Improved BP Neural Network Algorithm for GPS Height Conversion .................................................................5
  Chuan Hu

Comprehensive Profit Assessment Study on Ecological Water Compensation in Heihe River ........................................................9
  Li Zhang, Yuan Gao, Yu Tian, and Mengna Liu

A New Modeling Method of Pharmacokinetics Mathematical Model .................................................................13
  Shiqiang Zhang

Choice-Making on Distribution Locations of Logistics Center Based on Fuzzy Multi-criteria Decision Making Theory .................................................................................................................................17
  Lin Bai and Xiao-rong Chen

Development and Research of Music Player Application Based on Android ..................................................23
  Yong-Cai Pan, Wen-chao Liu, and Xiao Li

Development of Open-Architecture Motion Controller for Experimental Equipment ........................................26
  Xin Fu, Jia Liu, and Gaohua Liao

Improvement on Blind Symbol Rate Detection under Unfavorable Conditions ..............................................29
  Ya Hu, Siliang Wu, and Huijun Geng
A Research on BIT Single-Fault Threshold Value Setting Approach Based on ROC

Xiaojie Zhang, Daozhen Wang, Tongmin Jiang, Dong Wang, and Xiaofeng Wang

Digital Speed Governor System Based on TMS320F28335 Chip for a Gas Engine

Y. Gu and H.Y. Yu

Study on the Multiple-Information Demonstration Platform of Digital City

Gang Gou and Lingli Huang

A Design of 32-Bit Embedded Microprocessor

Haimin Chen and Bin Zheng

The Study of Distributed Semantic Web Services’ Publishing and Discovery Mechanism

Bingfei Nan, Shuzhi Li, and Shuxing Yang

**Session 2: Network and Information Security**

Secure Error-Correcting Network Codes with Side Information from Source

Zhuojun Zhuang, Yuan Luo, and A.J. Han Vinck

Agent Transport Security Based on Freezing Mode

Wei Zhang and Xiaofei Yan

Research on Architecture and Definition of Content Security

Yinqing Wang, Kaiguo Yuan, and Tianling Xu

A Model of Execution Monitoring Enforcement Mechanism

Chenhong Liu and Bogang Lin

A New Time-Memory-Resource Trade-Off Method for Password Recovery

Wei Zhang, Mengyuan Zhang, Yiyang Liu, and Ruchuan Wang

An Intrusion Alert Correlation Approach Based on Finite Automata

Lei Liu, Kang Feng Zheng, and Yi Xian Yang

Threshold Group Signature Scheme with Privilege Subjects Based on ECC

Xueming Wang and Yurong Dong

Evaluation Model for DoS Attack Effect in Softswitch Network

Yao Jiang, Kang Feng Zheng, Yi Xian Yang, Shou Shan Luo, and Jian Peng Zhao

Design and Implementation of an Intrusion-Tolerant Self-Healing Application Server

Qiang Meng, Rui-peng Zhou, and Xiao-hui Yang

Formal Analysis of Multi-party Non-repudiation Protocols without TTP

Xiaoqiong Wang and Xueming Wang

DDoS Attacks at MAC Layer in Tactical Mobile Ad Hoc Networks

Rui Xu, Zemao Zhao, and Fei He

Improved Impossible Differential Cryptanalysis on SMS4

Gaoli Wang
A Research on Intrusion Detection Based on Support Vector Machines .................................................. 109
  Xiaozhao Fang, Wei Zhang, Shaohua Teng, and Na Han
Bayesian Statistical Inference in Machine Learning Anomaly Detection .................................................. 113
  Ying Zhao, Zhigao Zheng, and Hong Wen
A Key Management Scheme Based Generalized Signcryption in Mobile Ad
Hoc Network ............................................................................................................................................. 117
  Liang Wei, Chuan-Rong Zhang, and Lian-Qing Zheng
Cube Testers on Bivium ............................................................................................................................. 121
  Shunbo Li, Yan Wang, and Jialong Peng
A Method of Adaptive Selection of Hybrid Interrupt-NAPI Scheme ...................................................... 125
  Kai Zhu, Xingshu Chen, and Jun Tan
An Adaptive Automated Trust Negotiation Model and Algorithm .......................................................... 130
  Shaoxu Guo and Wenbao Jiang

Session 3: Signal and Information Processing

Full Rate and Full Diversity STBC in Decode-and-Forward Relay Systems .............................................. 135
  Yong Wang and Hui Li
A Reduced Symbol Synchronization Algorithm for OFDM Systems .......................................................... 139
  Wenxiu Li, Chaowei Yuan, and Jie Shen
Research on Data Fusion in the Process of AUV Retrieve ......................................................................... 143
  Wei Dong, Dawei Wang, and Meng Li
Detection and States Estimation of Multiple Mobile Targets in Wireless Sensor Network ................................ 147
  Changyin Sun, Peng Zhang, and Qiuling Tang
An Analytic Method for Doppler Changing Rate Based on Frequency Measurement - A Formula of Doppler Direct Ranging .................................................................................................................. 152
  Tao Yu
Application of Rough Set-SVM Model in the Evaluation on Water Quality ............................................... 156
  Fengxiang Ren, Xuanchi Zhou, and Chao Zhang
Identification of Frequency-Hopping Spread Spectrum Signals Using SVMs with Second Generation Wavelet Kernels ........................................................................................................................................... 160
  Jiasheng Huang, Yajian Zhou, Na Sun, and Zhengming Hu
Fast Target Detection for SAR Images Based on Weighted Parzen-Window Clustering Algorithm ........................................... 164
  Huiyan Liu
A New Pre-distorter Based on Neural Network for the Nonlinear HPA in Satellite Communications .............. 168
  Yong Xu and Xinhai Tong
Turbo Equalization in Blind Receiver ........................................................................................................ 172
  Hua Peng and Jing Li
Session 4: Network Theory and Technology

Improvement of Complex Field Network Coding for Cooperative Networks ................................................................. 176
  Jing Wang and Xiangyang Liu

TCFOM: A Robust Traffic Classification Framework Based on OC-SVM
  Combined with MC-SVM .................................................................................................................................................. 180
  Gang Lu, Hongli Zhang, Xuefu Sha, Cheng Chen, and Lizhi Peng

An Improved Particle Filter Algorithm Based on Target Tracking in Wireless Sensor Network ................................................ 187
  Jun Li and Chen Xu

Session 5: Communication and Information System

COMPASS Augmentation Using LEO Telecommunication Satellites ......................................................................................... 192
  Shiwei Tian, Guangxia Li, Jiang Chang, and Zhiqiang Li

The Design and Achievement of Motor Speed Remote Control System Based on CC2510 ................................................................. 196
  Jian-sheng Peng

The Security Analysis of Graphical Passwords ....................................................................................................................... 200
  Wei Hu, Xiaoping Wu, and Guoheng Wei

Interference Avoidance Based on Forward Modification and Multi-step-ahead Prediction for Cognitive Radio ............................................................ 204
  Jianhua Liu, YiHong Hu, and ZhiYong Feng

From Prime Codes to Cubic Prime Sequences .................................................................................................................. 211
  Qingge Liu and Xiang Gao

MS²IFS: A Multiple Source-Based Security Information Fusion System ..................................................................................... 215
  Jun Chang, Jiang Yu, and Yijian Pei

Performance of Adaptive MQAM with Space-Time Coding over Nakagami Fading Channel ......................................................... 220
  Xiangbin Yu, TingTing Zhou, and YanFeng Li

DSR-Based Cross-Layer QoS Design in Ad Hoc Networks ................................................................................................ 224
  Keming Du, Yilin Chang, and Bin Li

Application of Fuzzy-AHP Method in the Evaluation of Logistics Capability in E-Commerce Environment ...................................................... 228
  Lei Yang and Yizhen Zhang

Design and Implement of MVB BUS Controller Based FPGA ........................................................................................... 232
  Lixia Zuo, Qingfeng Ding, and Yunbao Tang

Design of ADTR-DSSS-IR-UWB Transmitter for BPSK Modulation ..................................................................................... 236
  Zhifeng Lin, Wei Lei, and Kaihang Li

Performance Analysis of an Adaptive Hybrid FEC/ARQ Based on Hops for Wireless Multimedia Sensor Networks ................................. 240
  Yong Jin, Jinyi Chang, and Deguang Le
Discussion of a Smart House Solution Basing Cloud Computing ........................................... 244
   Yu Hua Zhang, Jian Zhang, and Wei Hua Zhang
Information Dissemination Management Based on Hierarchical Strategy
Control .................................................................................................................................................. 248
   Yang Zhu, Zhichun Gan, and Ye Huang
Design and Implementation of a TCP Performance Enhancement Gateway
for Satellite Networks .......................................................................................................................... 252
   Yasheng Zhang, Hua Peng, and Jujuan Gu

**Session 6: Artificial Intelligence and Machine Learning**

An Anomalistic Electromagnetism Signal Detection Model Based on Artificial Immune System ................................................................................................................................. 256
   Jie Ma, Ying-chun Shi, Zi-fa Zhong, and Xiang Liu
WLAN Indoor GA-ANN Positioning Algorithm via Regularity Encoding Optimization
.......................................................................................................................................................... 261
   Lin Ma, Ying Sun, Mu Zhou, and Yubin Xu
Research on a Skin Color Detection Algorithm Based on Self-Adaptive Skin Color Model .............................................................................................................................................. 266
   Guoliang Yang, Huan Li, Li Zhang, and Yue Cao
Using Shannon’s Information Theory and Artificial Neural Networks to Implement Multimode Authentication ......................................................................................................................... 271
   Jackson Phiri and Tie Jun Zhao
A Novel Subspace Method for Face Recognition .............................................................................. 275
   Yusheng Lin and Guang Li

**Author Index** .................................................................................................................................. 279
