8th International Conference on Hydroinformatics 2009

Held in conjunction with the 7th International Symposium on Ecohydraulics to form the International Conference of Science and Information Technologies for Sustainable Management of Aquatic Ecosystems

Concepcion, Chile
12-16 January 2009

Volume 1 of 2

# TABLE OF CONTENTS

## Volume 1

### HIC-1A1-DATA MINING I

**Application of Minimum Relative Entropy Update to Long Term Forecast of Cooling Water Problems in the Rhine**

Steven V. Weijs, Martine Rutten

---

**Bayesian-Based Detection of Measurement Anomalies in Environmental Data Series**

Nemanja Branisavljevic, Zoran Kapelan, Dusan Prodanovic

---

**Sea Level Anomalies from Satellite Altimetry - Retrieval and Validation**

C. J. Calkoen, H. Wensink, D. J. Twigt, A. Sisomphon, A. E. Mynett

---

**Encoding Hydrologic Information Via a Fractal Geometric Approach**

Carlos E. Puente, Belle Sivakumar, Andrea Cortis

---

**Nonlinear Analysis of Monthly Rainfall Dynamics in the Korean Peninsula**

Belle Sivakumar, Min Soo Kyoung, Yong Won Lee, Hwang Soo Kim

---

**Wavelets Transform Applied to Hydrological Time Series**

Diego Rivera, Mario Lillo, José Arumí, Mehmet Cüneyd Demirel

### HIC-1A2-APPLICATIONS OF MODELS I

**Modeling the Impacts of Land Use Change in a Strategic Wetland with a Fully Distributed Model**

Jong-Sook Park, Ian Cluckie

---

**Comparison of Kalman Filter and Inter-model Correlation Method for Data Assimilation in Tidal Prediction**

Yabin Sun, Piyamarn Sisomphon, Vladan Babovic, Eng Soon Chan

---

**An Attempt Towards Improved Flood Forecasting by Basin Level Modelling**

Mohammad Khaled Akhtar, Flemming Jakobsen, Alejandro Ernesto Lasarte

---

**Green LiDAR + Two Dimensional Hydraulic Floodplain Modeling: An Optimal Tool for Flood Outreach and Planning**

Diego Caamaño, Mary McGown, Peter Goodwin

---

**Rainfall Nowcast System**

S. Y. Liong, C. D. Doan, H. H. Nguyen

---

**Real-Time Optimisation in Water Resources Management**

Henrik Madsen, Bertrand Richaud, Claus B. Pedersen, Dan Rosbjerg

### HIC-1A3-COMPUTATIONAL HYDRAULICS I

**Specific Linear Potential in the Stretches of a Hydrological Network: The Mayo-Chinchipe Case in Ecuador**

Pablo Vanegas, Dirk Cattrysse, Felipe Cisneros, Paul Torres, Esteban Pacheco, Diego Mora, Jos Van Orshoven

---

**Three-Dimensional Reservoir Sedimentation Modelling**

Rogério Campos, James C. Bathurst

---

**Modeling of Hydraulic Jumps Formed at Drops Using ANNs**

Abdelazim M. Negm

---

**Hillslope Erosion Submodel for Implementation in a Gis Hydrologic Model**

Alejandro Dussault-1

---

**Considering Factors to Decrease Coastal Sedimentation and Destruction; A Case Zone in Iran**

S. M. Mosaddad, B. Dahanzade, S. H. Mosaddad

---

**A Morphodinamic Process Based Model for Long-Term Basin Filling Studies**

Flávio Martins, Selma Gabriel

### HIC-1A4-PLANNING & WARNING TOOLS I

**An Urban Watershed Division Model for Reduction of Peak Outflows from Urban Sewer Systems**

Joong Hoon Kim, Jung-Ho Lee, Hwandon Jun
Sydney Catchment Authority’s Real-Time Flow Forecasting System MIKE Flood Watch ........................................ 180
  Agnes Sakal, James E. Ball, Grantley Smith

Design of a Maritime Security System under Uncertainty Using an Evolutionary Real Options Framework ........................................ 187
  Stephen Zhang, Vladan Babovic, Joost Buurman

Development of Dynamic Flood Forecasting Services ........................................ 197
  Péter Borsányi, Ivar Olaf Peerboom, Paul Christen Røhr

Combining Different Verification Methods for Analysis of Flood Early Warnings: Fogera Plain, Lake Tana, Upper Blue Nile Case Study ........................................ 207
  Kibreab Amare Assefa, Schalk Jan Van Andel, Andreja Jonoski, Arnold Lobbrecht

A Discussion of Paradigms in Operational Flood Forecasting and Their Influence on Forecasting System Design and Forecasting Organisation ........................................ 217
  Micha Werner, Astrid Janssen

HIC-1B1-DATA MINING II

Statistical Approach to Error Correction on Water Level Forecasts in Venice ........................................ 227
  Cheng Zi Chew, Jacob V. Tornfeldt Sorensen

A Fuzzy Approach in Curve Number Hydrology to Reduce Uncertainty ........................................ 237
  Biswa Bhattacharya

Wavelet Transformation Based Data Assimilation for Improved Water Level Modeling - Singapore Case Study ........................................ 247
  Rao Raghuraj, Vladan Babovic

Submission and Querying Tools for A Hydrologic Information Systems Database ........................................ 257
  Kevin McCarty, Milos Manic, Peter Goodwin, Michael Piasecki

Encapsulation of Monte-Carlo Uncertainty Analysis Results in a Predictive Machine Learning Model ........................................ 266
  Durga Lal Shrestha, Nagendra Kayastha, Dimitri Solomatine

HIC-1B2-APPLICATIONS OF MODELS II

Application of Wavelet Analysis to Facilitate Regionalisation in Rainfall Run-off Modelling ........................................ 276
  I. M. Younas

Evaluation of the Uncertainties in Rainfall-Runoff Model Using Meta-Gaussian Approach ........................................ 284
  Byung Sik Kim, Bo Kyung Kim, Jin Yong Kim, Hahk Hahm Chang

Integration of Hydrologic and Hydraulic Models: Analysis of Flood Inundation Risk ........................................ 291
  Kenichiro Kobayashi, Kaoru Takara, Takahiro Sayama

Utility of Different Strategies in Using Emergency Flood Storage Basins in the Middle Yangzte River, China ........................................ 301
  Liangzhu Chen, Micha Werner

A Hydrology-Hydraulics-Meteo Integrated Tool to Support Operation of Hydropower Reservoirs for Flood Attenuation ........................................ N/A
  Andrea Maffio, Leonardo Mancusi

Comparison between Neural Network and Linear Regression Methods to Estimate Mean Annual Precipitation Using Topographic Variables ........................................ 311
  Sebastian Elgueta-A., Alejandro Dussaillant-J.

HIC-1B3-APPLICATIONS OF MODELS III

ANN - FEM Mixed Simulation in Groundwater Flow ........................................ 322
  Lars Weber, K.-P. Holz

Water Use Management Systems on a Basis of GPRS Application ........................................ 332
  M. V. Markosyan

Enhancing Delft3D-Bloom/Gem for Algae Spatial Pattern Analysis: Model Improvement ........................................ 336
  Hong Li, Mijail Arias, Anouk Blauw, Steef Peters, Arthur E. Mynett

Integration of Environmental Models Using R ........................................ 346
  Wouter Buytaert

Habitat, a Spatial Analysis Tool for Environmental Impact and Damage Assessment ........................................ 356
  M. Haasnoot, J. S. Verkade, K. M. De Bruijn
Hydrologic Modeling Using Object-Oriented Programming ................................................................. 366
Cristiano Das Neves Almeida, Bruno Neiva Moreno, Alain Marie Bernard Passerat De Silans, Amilcar Soares Jr.,
Renato De Queiroz Porto, Celso Augusto Guimaraes Santos

Integration of GIS Tools on Hydrologic and Hydraulic Modelling of Small Urban Rivers .................. 376
Daniel Silva, Ana Padilha, Tiago Gomes, Paulo Monteiro

HIC-1B4-EMERGING COMPUTATIONAL I

Interpretation of River Main-flow from Remote Sensing Images: Studying on Dynamic Transmission
Cross-correlation Fuzzy Analysis Method ............................................................. 386
Lin Han, Xuegong Liu, Yanning Zhang, Hongwei She

Diagnostic Evaluation of Monte-Carlo Model Simulations Using Self-Organizing Maps .................... 396
Marcus Herbst, Markus C. Casper, Hoshin V. Gupta

Multicriteria Interval Goal Optimization in the Regulation of Lake-River Systems ............................ 406
Raimo P. Hämäläinen, Otso Ojanen

Possibilistic Uncertainty Analysis of Hydrological Models ............................................................. 416
Alexandra P. Jacquin, Asaad Y. Shamseldin

Utility of the Wavelet Analysis in Assessing the Performance of Different Soil Moisture Models ............ 425
Ibrahim El-Baroudy, Amin Elshorbagy

Interactive Genetic Algorithm with Mixed Initiative Interaction for Water Resources Optimization ...... 435
Meghna Babbar-Sebens, Barbara S. Minsker

HIC-2A1-DATA MINING III

A Case Study of Rainwater Tank Water Quality Testing in Western Sydney, Australia ......................... 445
Marlène Van Der Sterren, Gary Dennis, Anur Rahman, Garry Ryan, Glenn Barker

Development of a New Case-Based Reasoning Tool for the Comparison of Water Stress Related
Information in Europe ................................................................. 457
Neno Kukuric, Frank Robijn, Jasper Griffioen

Groundwater Recharge Estimation Using Dual Processes of Data-Driven Modelling and Physically-
Based Modelling: A Case Study for Jeju Island, Korea ......................................................... 467
Jejung Lee, Changhui Park, Min-Ho Koo

Prediction of Beach Volumes at Duck Using Transfer Function Models ........................................ 477
Suzana Ilic, Yohama Gunawardena, Harry Pinkerton, Renata Romanowicz

Induction of Lagrangian Sewer Flow Models Using Evolutionary Polynomial Regression .................. 487
Angelo Doglioni, Orazio Giustolisi, Darko Joksimovic, Zoran Kapelan, Dragan A. Savic

HIC-2A2-APPLICATIONS OF MODELS IV

Urban Water Modelling and the Daily Time Step: Issues for a Realistic Representation ....................... 497
Christos Makropoulos, Evangelos Rozos, David Butler

MHBox - Analysis and Prediction of Sea Level Anomalies and Associated Currents in Singapore and
Malacca Straits ................................................................. 507
Herman Gerritsen, Daniel Twigg, Arthur Mynett, C. J. Calkoen, Vladan Babovic

Application of Graph Theory in Calibration of Water Supply System Models ............................. 518
Daniel Kozef, Jochen Deuerlein, Roman Klasinc, Franci Steinman

Runoff Time Series Forecasting of Pearl River Catchment in China .............................................. 528
Yu Xinying, S. Y. Liong

The Severn Barrage: Hydro-environmental Impact Assessment and Water Quality Modelling Studies .......... 538
Reza Ahmadian, Roger A. Falconer, Bui Liang Lin

A Conceptual Flow-Sediment Routing Model for Large Watersheds Part I: Model Description ........ 547
Moayad S. Khaleel, Mohammad E. Mohammad, Hamed R. Rasheed

HIC-2A3-COMPUTATIONAL HYDRAULICS II

A Parallelized Regional Hydrological Soil Model: Conceptual Approach and Application .................. 558
Y. D. W. Wang, J. Delfs, O. Kolditz

Discharge and Bed Roughness Estimation from Water Level Data Analysis ...................................... 568
Giovanni Corato, Tullio Tucciarelli, Roberto Gueli
Numerical Stability Problems in Hydrodynamic Modelling of Confluences with Small Junction Angles ............................................................................................................................... 578
Dejana Dordevic

Numerical Solution of 2D Shallow Water Equations Using High Resolution FV Method over Curvilinear Grid ........................................................................................................... 588
Abdolvahid Mohamadian, Yussef Hassanzadeh

Using MIKE 11 Environment to Develop a Hydrodynamic Computing Models of River System for Lower Kuban River ...................................................................................................... 599
A. M. Zeiliguer, O. S. Ermolaeva, A. L. Buber, M. V. Troshina

Impact of Air Accumulation on the Hydraulic Regime of Canal (Hypothesis of Critical Impact) ............................................................................................................................. 609
Albert Markaryan, Vache Tokmajyan

HIC-2A4-PLANNING & WARNING TOOLS II

Flood Risk Mitigation and Decision Support Systems in the Context of Romanian Water Sector .................................................................................................................... 616
Ioana Popescu, Andreja Jonoski, Schalk Jan Van Andel, Ednah Onyari

Dynamic Hazard Maps of Debris Flow on Arial Social Network Service ................................................................................................................................. 626
T. Moriyaama, H. Nakayama, K. Kon, M. Hirano, H. Hikida

Development of Integrated Flood Analysis System (IFAS) and its Applications ................................................................................................................................. 636
Tomonobu Sugiura, Kazuhiro Fukami, Naoki Fujitawa, Kenichiro Hamaguchi, Shigeru Nakamura, Sadayuki Hironaka, Kazuhiro Nakamura, Takahiro Wada, Masato Ishikawa, Takao Shimizu, Hironori Inomata, Kazuhsa Itou

Multi-Reservoir-Based Flood Control and Management for the Yellow River in China ................................................................................................................................. 646
Shengyang Li, Arthur E. Mynett

Flood Warning IT System Based on 2-D Hydro-Dynamic Rainfall-Runoff Model and Extended Nowcasting ............................................................................................................ 656
Boosik Kang, Sangsik Park, Jinwook Kwon, Dongmin Yang

Coupling Fire and Flood Simulation Models in the Framework of the Eu-Funded Research Project SCIEN .................................................................................................................. 666
Tomas Metelka, Evzen Zeman, Stanislav Vanecek, Jan Spatka

HIC-2B1-DATA MINING IV

Phase Space Dimensionality Reduction in Building Storm Surge Prediction Model .................................................................................................................... 676
Michael Siek, Dimitri Solomatine

Volume 2

System Relations for the Validation, Correction and Interpolation of Measured Water Levels in the Rotterdam Port Area ........................................................................................................... 686
Henk Van Den Boogaard, Herman Gerritsen, Arthur Mynett, Cor Van Der Schelde

Harnessing the Power of Sensors and Cyberinfrastructure Towards Environmental Sustainability: The Waters Network Vision and Testbedding Research ........................................................................................................ 696
Barbara S. Minsker, Evan Coopersmith, Paul Montagna

Real-Time Anomaly Detection in Precipitation Sensors ................................................................................................................................. 706
David J. Hill, Barbara S. Minsker, Eyal Amir, Jaesik Choi

Extreme Event Analysis Using SRES A2 Precipitation Change Scenario High Resolution RCM and Conditional Weather GENerator in Korea ........................................................................................................ 716
Hyun Han Kwon, Byang Sik Kim, Bo Kyung Kim, Seok Young Yoon

Identification of Morphological Tendencies and Velocities in Coastal Zones ................................................................................................................................. 724
Peter Milbradt, Catrin Dorow

HIC-2B2-APPLICATIONS OF MODELS V

Coupled Sediment and Wave Modeling – A Case Study of Paranaguá Bay, Brazil ................................................................................................................................. 734
Gregor Dahlem, Aron Roland, Ulrich Zanke, Peter Mewis

Numerical Morphodynamic Modeling to Trace the Fate of Dredged Matter after Open Disposal in Estuaries ................................................................................................................................. 744
Andreas Warups, Ulrich Zanke
Impact of Scarce Rainfall Data on the Hydrological Modelling of Tropical Andean Basins
Rolando Celleri, Patrick Willems, Jan Feyen

Locating Monitoring Water Level Gauges: An Information Theory Approach
Leonardo Afonso, Arnold Lobbrecht, Roland Price

Hydroinformatics & Waste Waters Management in Sensitive Ecological Coastal Environment
Cheng Zi Chew, Philippe Gourselville

Database and GIS for Watershed Modeling in Korea
Yan Seok Choi, Kyung Tak Kim, Jung Sool Park

HIC-2B3-APPLICATIONS OF MODELS VI

Flood and Pollutant Dispersal Simulation in Urban Areas
Olaf Büttner, Marcus Schulz, Michael Matthies, Michael Rode

Modelling of Singapore’s Coastal Waters
Serene Tay Hui Xin, Piyanand Sisomphon, Vladan Babovic

Application of Delft3D to Water Quality Modeling of Lake Paraná in Brasília, Brazil and Lake Constance in Europe: Preliminary Results
Thomas Wolf, Flavio Giovannetti De Albuquerque

Integrated Sediment Transport Modeling using SWAT-SOBEK OpenMI for Blue Nile
Getnet Betrie, Ann Van Griensven, Arthur Mynett, Stef Hummel, Peter Gijbers

Comparison of Calibration and Uncertainty Analysis Methods: Case Study of Nzoia River Swat Model
Ahmed Adel, Diureka Lal Shrestha, Ann Van Griensven, Dimitri Solomatine

Implementation of Hydroinformatics to Meet Evolving Water Management Practices and Societal Demands
Kenneth W. Knox

HIC-2B4-EMERGING COMPUTATIONAL II

Exploring Multi-Agent Systems in Aquatic Population Dynamics Modelling
Hui Qi, Hong Li, Arthur E. Mynett

Hydrological Risk Modelling Using Adaptive Operators, Overview and Applications
Efrain Antonio Dominguez Calle, Hector Andres Angeles Cordero, Felipe Ardila Camelo, Fabian Mauricio Caicedo Carrascal

Applying An Statistical and Artificial Neural Network Models to Watershed Regionalization
Jorge Alcázara, Cristina Vega-Garcia

The Analysis and Design of Water Supply Decision Support System Based on Remote Sensing Monitoring for Yellow River Delta Wetland
Xuegong Liu, Lin Han, Yanning Zhang, Yunpeng Xue

HIC-3A1-DATA MINING V

Capacity Building in Flood Risk Management through a Decision Support System for Local Scale Mitigation Utilizing Data Mining Approach
Natasa Manojlovic, Ulrich Kemloh, Dejan Antunaskovic, Peter Owotoki, Friedrich Mayer-Lindenberg, Erik Pasche

Downscaling Global Climate Models Using Modular Models and Fuzzy Committees
Gerald Corzo, Andrea Jonaski, Girma Yimer, Yunqing Xuan, Dimitri Salomatine

Statistical Diagnostic on the Change of Extreme Weather Event using Extreme Indices
Byung Sik Kim, Bo Kyung Kim, Seok Young Yoon, Byung Ha Seoh, Hung Soo Kim

Data-Based Modelling: A Comparison between Artificial Neural Networks and Evolutionary Polynomial Regression
Daniele Laucelli, Orazio Giustolisi, Dragan A. Savic

Computer Model to Extract Precipitation Data from Conventional Pluviogram
José Roberto Gonçalves De Azevedo, Renata Do Couto Grandelle

Automatic Control of Irrigation Canals, A New Semi-Decentralized Approach
Carlos Sepúlveda, Manuel Gómez, José Rodellar

The Health-e-Waterways Project: Data Integration for Smarter, Collaborative Whole-of-Water Cycle Management
Jane Hunter, Catharine Van Ingen, Eva Abal

WODCA: A Mobile, Web-Based Field Sampling Support System
Eva Fenrich, Andreas Brodt, Daniela Nicklas

The Web as a User Interface for Computational Modelling and Analysis Software
Hamish Harvey

3D Visualization and Virtual Reality Tools for Accelerating Decision Making Processes
Xuan Zhu, Arthur E. Mynett

HIC-3B2-APPLICATIONS OF MODELS VIII

Influence of Objective Functions on the Automatic Calibration of a Lumped Rainfall Runoff Model
Renato De Queiroz Porto, Cristiano Das Neves Almeida, Alain Marie Bernard Passerat De Silans, Davi De Carvalho Diniz Melo

Enhancing Delft3D-Bloom/Gem for Algae Spatial Pattern Analysis: Filling Missing Data in RS Images
Mijail Arias, Hong Li, Anouk Blauw, Steef Peters, Arthur E. Mynett

Three-Dimensional Hydrodynamic Modelling of the Rio de la Plata Estuary
Javier Rodríguez Uthurburu, Hugo N. Rodríguez, Jose Valena

Dynamic Decision System Support to Assist the Suitable Water Management of an Orchard under Furrow Irrigation
Carlos I. Flores, Eduardo A. Holzapfel

Composite Modelling by Applying an Inverse Technique in Analysing Interactions Between Beaches and Structures
Henk Van Den Boogaard, Herman Gerritsen, Sofia Caires, Marcel Van Gent

A Conceptual Flow-Sediment Routing Model for Large Watersheds Part II: Model Application and Testing
Moayad S. Khaleel, Mohammad E. Mohammad, Hamed R. Rasheed

Sewage Effluent Dispersion from Outfalls in Darwin Harbour, Australia
Philip Totterdell, Eric Valentine

HIC-3B3-APPLICATIONS OF MODELS IX

Development of Real-time Coastal Current Monitoring System Using Ocean Radar with VHF Band
Shin’Ichi Sakai, Takaki Tsubono, Takumi Yoshii, Masafumi Matsuyama

Probabilistic Assessment of the Hydrologic Performance of Reconstructed Watersheds
Nader Keshta, Amin Elshorbagy

Extreme Tidal Surge Modelling in the River Thames Using a Coupled Modelling Approach
Ian Cluckie, Dehua Zhu, Miguel Rico-Ramirez

Development and Application of an Integrated Modeling Tool for Urban Drainage System: With A Case in China
Xin Dong, Siyu Zeng, Jining Chen, Dongquan Zhao

Use of an Hydrological - Hydraulic Model to Evaluate a Urban Drainage System in Mainly Flat Areas
Luis Alejandro Sanchez Roman

A Multi-Criteria Platform for the Rehabilitation of Urban Drainage Systems
Wilmer Barreto, Zoran Vojinovic, Roland Price, Dimitri Solomatine

Eutrophication Predict Modelling of Bohai Bay Based on Hydroinformatics Technology
Jianhua Tao, Xianquan Xiang

HIC-3B4-POLICIES I

Mathematical Modelling Can Be a Pragmatic Tool in Assessing the Impact of Drainage System due to Changing Landuse
Mohammad Khaled Akhtar, Mohammad Abdus Salam

Decision Making Under Severe Uncertainties for Flood Risk Management: A Case Study of Info-Gap Robustness Analysis
Jim W. Hall, Hamish Harvey

Role of Hydroinformatics in Development of 21st Century Water Resources Policy
David R. Tuthill Jr.
