TABLE OF CONTENTS

Mini Workshop - Great Problems Lead to Great Projects: A First Year Seminar Course ............................................................... 1
   Kristin Wobbe, Arthur Heinricher

Special Session - Mixed Methods in Engineering Education: Developing Research Questions and
Mixing Tables ........................................................................................................................................................................ 3
   Erin Crede, Maura Borrego, Elizabeth Creamer

An Interdisciplinary Senior Design Experience using Biodiesel Vehicles ................................................................................... 6
   Steven G. Northrup

Low Cost Runway Incursion Detection System for General Aviation Airports .................................................................................. 12
   I.K. Dabip, J. Bryan Barrows-McElwain, Chris Hartman

Problem-Solving Approach Using Energy Techniques .................................................................................................................. 18
   C. J. Egelhoff, E. M. Odom, B. J. West

Work in Progress - Impact of Early Design Instruction on Capstone Experiences ................................................................. 24
   Mark L. Chang, Jessica Townsend

Innovative Approach to Teaching Undergraduate Reinforced Concrete Design ............................................................................ 26
   Nathan Runsey, Jonathan Russell, Kassim Tarkini

Work in Progress - Mathematics Preparation for a Modern Engineering Program ....................................................................... 31
   Zohra Z. Mansur, Adrian Ieta, Rachid Mansur

Work in Progress - Image Processing (and CATs) as an Introduction to Algorithmic Thinking ................................................... 33
   Osevaldo Clia, Maria Feldgen

Work in Progress - Assessment and Pilot Delivery of an Introduction to Infrastructure Course ...................................................... 36
   Philip J. Parker, Matthew W. Roberts, M. Keith Thompson

Work in Progress - Improving Problem-Solving Skills via Dynamically Worked-out Problems ..................................................... 38
   Asad Azemi, Roxanne Toto, Thomas Litzinger

Role of Larger Software Artifacts in Introductory Computer Science Courses .................................................................................. 41
   Oleg Krogius, Thomas B. Horton, Mark S. Sherriff

Work in Progress - The Costs and Benefits of Using Alternative Approaches in Lecture-Based
Courses: Experience in Electrical Engineering .......................................................................................................................... 46
   Jill Auerbach, Bonnie Ferri

Work in Progress - An Innovation Merging “Classroom Flip” and Team-Based Learning .............................................................. 48
   Chrysanthe Demetry

A Starter Activity Design Process to Deepen Student’s Understanding of Outcome-related Project
Learning Objectives ........................................................................................................................................................................ 50
   Siegfried Rouvrais, Julien Mallet, Bruno Vinouze

Applying a Methodology Based on Personal Welfare to the Final Year Engineering Project .......................................................... 57
   Ferran Badia, Fernando Cores, Gemma Filella, Francesc Giné, Toni Granollers, Margarita Moltó

Work in Progress - Using Interactivity Video Games Factors to Define Role Playing Games as a
Supporting Tool for Learning By Doing ..................................................................................................................................... 63
   Gilberto Huesca, Julieta Noguez, Luis Neri, Victor Robledo-Rella

The Effect of Soliciting Demographic Data on the Performance of Students on Online Tests ......................................................... 65
   Amruth N. Kumar

Work in Progress - Intelligent Project Failure Analysis .................................................................................................................. 69
   Song Tan, Kai Quan, Xiang Fu

Demo Program for Frequency Sampling FIR Filter Design Method .................................................................................................. 71
   Gorodana Jovanovic Dolecek

Work in Progress - Serious 3D Game for Mobile Networks Planning ................................................................................................. 76
   Andres Navarro, Juan V. Pradilla, Patricia Madriñan

Audio Content-Based Feature Extraction Algorithms Using J-DSP for Arts, Media and Engineering
Courses ............................................................................................................................................................................................ 78
   Mohit Shah, Gordon Wichern, Andreas Spunias, Harvey Thornburg

Peer Assessment of Assignment .................................................................................................................................................... 84
   Badri Banerji, Lyn Brodie, John Warden

Work In Progress - Programming Assignment Summary for Analysis, Qualitative Assessment and
Continuous Improvement in CS1 – CS3 ....................................................................................................................................... 86
   Karina Assiter

Supporting Exam Revision via Google Talk and Examopedia Wiki .................................................................................................. 89
   Manish Malik
Evolution of a Digital Paper Exam Grading System................................................................. 94

A Pre-Post Topic Assessment Tool for Uncovering Misconceptions and Assessing Their Repair and Conceptual Change................................................................. 100

Jacquelyn Kelly, Steve Krause, Dale Baker

ECAT: An Electronic Data Analysis Tool for ABET Display Materials................................. 106

Deborah A. Trytten

Explaining Education to Engineers: Feedback Control Theory as a Metaphor......................... 112

Alan R. Cheville, Evan D. Lindsay

Direct Assessment of Engineering Programs at the City College of New York....................... 118

Heather A. Harvey, Margaret A. Krudyucz, Ardie D. Walser

Curriculum Redesign: Concurrently Addressing Content Mastery and Development of Cognitive Abilities......................................................................................................... 125

Debra A. Fowler, Jeffrey E. Froyd, Joan Layne

Program Development Work in Progress: Value Stream Mapping the Educational Process Outcomes................................................................. 130

Carrie Steinlicht, Andrew Neary, Tyler LeBrun, Klint Sauge, Cody Sundermann, Jeff Weber

Work in Progress - Project-Based Learning in Manufacturing Process.................................. 132

Ziliang Zhou, Anthony Donaldson

Undergraduate Research and Complex Problem Solving: Understanding and Translating Such Experiences to the Classroom................................................................. 134

Anna Zilberberg, Olga Pierrakos, Erin Thompson

Summer Innovation Experience for Undergraduates in Semiconductor Technology ................ 140

Santosh Kuriune, Sean Rommel, Dale Evbank, Karl Hirschman

A BDI-based Intelligent Tutoring Module for the e-Learning Platform INES .......................... 142

Fernando A. Mitic-Fonte, Juan C. Burguillos-Rial, Martin Llamas-Nistal, David Fernández-Hermida

Work in Progress - Phenomenographic Approach to Understanding Students’ Ways of Experiencing Human-Centered Design................................................................. 148

Carla B. Zlotowski, William C. Oakes, Monica E. Cardella

Mini Workshop – Real World Engineering Projects: Discovery-Based Curriculum Modules for First-Year Students................................................................. 151

Joan Carletta, Pamela Bhatti, Tom Hartley, Yanfei Liu, Andrea Mitofsky, James A. Smith, Loren Wyand-Scott, Alfred Yu

Panel - Implementing CS Curricula in Secondary Education: An International Perspective ................................. 155

Tim Bell, Arno Pasternak, Chris Stephenson, Allen Tucker, Jan Vahrenhold

Work in Progress - Maximizing Student Engagement in a Learning Management System .......... 158

Julie M. Little-Wiles, Stephen P. Hundley, Adrié Koehler

Work in Progress - Learning Management Systems Acceptances of Instructors from Various Departments: Empirical Investigation................................................................. 160

Sevgi Ozkan, Duygu Findik

Work in Progress - Transitioning an Established Engineering Distance Learning Program

Infrastructure to an On-line Instructional Setting......................................................................... 163

James F. Groves, Sharon A. Caraballo, Rosalyn S. Hobson, Glenda R. Scales, Linda Vahala

Work In Progress: Identifying Adequate Level of Instruction Without Hindering Deeper Learning in Distance Learning................................................................. 165

Anastasia Trecales, Shoji Nakayama

Selection and Sequencing Constraints for Personalized Courses.............................................. 167

Andrea Sterhini, Marco Temperini

Work in Progress - Assessing Engineering Service Students’ Characteristics............................. 173

Adam R. Carberry

Service Learning and Virtual Worlds ............................................................................................ 176

Bruce R. Maxim, Matthew D. Sable, John Cristiano

Designing for the Disabled in the Engineering Classroom............................................................. 182

Laura Stanley, Lenore Page, Carolyn Plumb

Work in Progress - Using Participatory Action Research to Investigate Student Learning in Engineers Without Borders ............................................................................................. 188

Laura Hahn, Valeri Werpetinski

Engineering Service Learning, Engineering Entrepreneurship and Assessment: Building a Program That Works ............................................................................................. 191

Lisa Zidek

Work in Progress - Introducing Modern Optics and Photonics Engineering in the Elementary Classroom: An Australian Perspective ................................................................. 197

Bernardo A. León de la Barra, Karen L. Wilson
Work in Progress - Combining Service Learning with the NSF Research Experiences for Teachers Program ................................................. 205
  Allen H. Hoffman, Jared R. Quinn, Veronica Tate, Beth Singer, Kristen L. Billiar
Work in Progress - Integrating Semiconductor and Nanotechnology Fundamentals into a High School Science Curriculum Module ........................................... 207
  Michael A. Jackson, Elaine Lewis, Daniel Fullerton, Santosh Kurinec, Sean Rommel
Work in Progress - Outsourcing the Lecturing in an Engineering Physics Class ........................................... 209
  Kenneth S. Manning
Integrating Engineering and Biology for Bio-Nanotechnology Curriculum ........................................... 211
  Waseem Asghar, Priyanka P. Ramachandran, Samir M. Iqbal
Work in Progress - Developing Educational Opportunities in Agent-Based Modeling ........................................... 217
  Marcia R. Friessen, Marek Laskowski, Bryan Demianyk, Robert D. McLeod
Work In Progress - Integrate Embedded Systems into CS Curriculum with Labs-in-a-Box Courseware ........................................... 220
  Kai Qian, Xiaolin Hu, Chia-Tien Dan Lo
Work in Progress - Refining a Technical Communication Rubric for First-Year Engineering Instructors ........................................... 222
  Amber Kemppainen, Susan Amato-Henderson, Gretchen Hein
International Diversity in Graduate Engineering Education: Development of a Multi Institutional Survey ........................................... 225
  Erin Crede, Maura Borrego
Pittsburgh Engineering Attitudes Scale – Revised: Evidence for an Improved Instrument ........................................... 230
  Jonathan C. Hilpert, Glenda Stamp, Jenifer Husman
Work in Progress - Measuring Cross-disciplinary Team Learning in Undergraduate Project Teams ........................................... 235
  Scott P. Schaffer, Xiaojun Chen, William C. Oakes
Work in Progress - An Interactive Web-Based Quiz that uses the Java-DSP Editor to Enhance Student Learning Experience ........................................... 238
  Shalini M Mehta, Andreas Spanias, Jayaraman J. Thiagarajan
Individual and Environmental Factors that Significantly Impact Short- and Long-term Interest in Engineering ........................................... 240
  Elizabeth G. Creamer, Catherine T. Amelink, Peggy S. Mezzaros
Climate in Undergraduate Engineering Education from 1995 to 2009 ........................................... 245
  Michelle Madzen Camacho, Susan M. Lord, Catherine E. Browner, Matthew W. Ohland
INSPIRED Broadening Participation in Computing: Most Successful Strategies and Lessons Learned ........................................... 251
  Peggy Doerschuk, Jiangjiang Liu, Judith Mann
Work In Progress - Initial Identification of Program Components Leading to Retention of Women in a Pre-Engineering High School Program, and an Undergraduate Engineering Program ........................................... 257
  Mary Kasarda, Brenda Brand, Eileen Weigand, Hank Yochum, Michael Collyer
Work in Progress - Why Many Smart Women Leave Engineering: A Preliminary Study of How Engineering Students Form Career Goals ........................................... 260
  Serena Wei, Rose Mary Cordova-Wentling, Russell F. Korte, Susan M. Larson, Michael C. Loui
Work in Progress - Learning Styles in Social Bookmarking Systems ........................................... 262
  Fernando J. Sánchez-Zamora, Martín Llamas-Nistal, Manolo J. Fernández-Iglesiias
Work in Progress - Preparing Students for Lifelong Learning in a Capstone Design Environment ........................................... 264
  Gonzal Altugur, Constantin Chassapis
Using Knowledge Building to Support Deep Learning, Collaboration and Innovation in Engineering Education ........................................... 266
  Glenn W. Ellis, Alan N. Rudnitsky, Mary A. Moriarty
Work in Progress - Ethics in Humanitarian Engineering: A Means of Assessment ........................................... 271
  Ryan C. Campbell, Denise Wilson
Special Session - Not All Problems Are Created Equal: From Problem-based Learning Theory to Research on Complex Problem Solving and Implications for the Engineering Classroom ........................................... 275
  Olga Pietrakos, Heather Watson, Ron Kander, Javarro Russell, Robin Anderson
Special Session - A War of Words: Using Sticky Language to Effect Change in Engineering Education ........................................... 278
  Mark H. Somerville, David E. Goldberg, Sherra E. Kerns, Russell Korte
Design of a Multi-Purpose Experiment for use in a Fluid Mechanics Lab ........................................... 280
  Dan Budny, Dave Torick
Microcontroller System: From Concept to Printed Board ........................................... 285
  Edgard J. Guimarães, Neusa M. F. Oliveira
Work in Progress - Influences of Student Experiential Background in a Problem-Based
Multidisciplinary Microfluidics Laboratory Course ............................................................. 290
Catherine V. Mullite, Suzanne van den Hoogenhof, Ian Papautsky

Lab Kits Using the Arduino Prototyping Platform .............................................................. 292
John Sarik, Ioannis Kymissis

Work in Progress - Diversifying STEM: Underrepresented Students’ Experiences in Undergraduate
Research Programs ............................................................................................................. 297
Terrell L. Strayhorn

An Integrated Undergraduate Research Experience in Control, Power Electronics, and Design using a
Microunese ............................................................................................................................ 301
Sergio García-Vergara, José Pabón-De León, Yancy J. Díaz-Mercado, Eduardo I. Ortiz-Rivera

Work in Progress - Promoting the Development of Undergraduate Researchers: Examining the
Significance of Research Engagement Between Faculty Members and African American Collegians .... 307
Tonya N. Saddler

Work In Progress - Does Learning about Research Affect the Graduate Degree Aspirations of STEM
Undergraduates? A Path Analysis ....................................................................................... 310
Terrell L. Strayhorn

Impact of College Learning on Engineering Career Practice ................................................. 313
Hoda Baytiyeh, Mohamad K. Naja

Work in Progress - A Multidisciplinary Introduction to Microfabrication ............................ 319
Wei Li Cui, Wayne Jones, David Klotzkin, Greta Myers, Bruce White

Work in Progress - All Aboard the Engineer of 2020? Programs Chairs’ and Faculty Members’
Reports of Curricular Emphases .......................................................................................... 321
India M. McHale, Lisa R. Lattuca, Patrick T. Terenzini, Alexander C. Yin

A Computer Engineering Technology Body of Knowledge ............................................... 324
Jeffrey J. Evans, Douglas W. Jacobson

ARMs for the Poor: Selecting a Processor for Teaching Computer Architecture .................. 330
Alan Clements

HDL-Based Instruction across the ECE Curricula ............................................................... 336
John A. Nestor, John Greco, Ismail Jouy

Work In Progress - Implementation and Research of Mastery Learning at an HBCU ................. 342
William J. Leonard, John C. Kelly, William J. Gerace

Work in Progress - Hydrogen Energy in Engineering Education (H2E3) .............................. 344
Eileen Cashman, Richard Engel, Peter Lehman

Work in Progress - Synthesizing Design, Engineering, and Entrepreneurship Through a Mobile
Application Development Course ....................................................................................... 346
Mark L. Chang

Work in Progress - Skunk Works Immersion Design Experience, Utilization of the Lockheed Martin
Skunk Works Design Process to Teach Innovation .............................................................. 348
Nathan R. Huntington, Delores Etter

Work in Progress - Towards an Emotional Learning Model for Intelligent Gaming ............ 350
Karla Muñoz, Julieta Noguez, Paul Mc Kevitt, Tom Lunney, Luis Neri

Work in Progress - Medical Imaging Education by a Multi-level Module-based Online Teaching and
Assessment System ............................................................................................................ 352
Xiping Li, Fabrice Manns, Weizhao Zhao

Work in Progress - How Do Engineering Students Misunderstand Number Representations? 354
Geoffrey L. Herman, Michael C. Loui, Craig Zilles

Students’ Interpretation of the Importance and Difficulty of Concepts in Signals and Systems .... 356
Jill K. Nelson, Margret A. Hjalmarson, Kathleen E. Wage, John R. Buck

Work In Progress - A Biomedical Motif for Teaching Artificial Intelligence in Context ....... 362
James Wofler

Work in Progress - Role of Faculty in Promoting Lifelong Learning: Initial Findings .......... 364
John C. Chen, Susan M. Lord, Katharyn Nottis, Michael Prince, Candice Stefano, Jonathan Stolk

Work In Progress - Advising Tool to Improve the Time for Graduation and the Transfer of Students
from a Community College to Engineering School ............................................................ 366
Virgilio Gonzalez, Daniel Espanza

Graduate Students Designing Graduate Assessment: ePortfolio Design as Problem-Based Learning .............................................................. 368
Lisa D. McNair, Maura Borrego

“I Have Never Spent Time to Think About What I Have Gained From My Projects”: Linking
Portfolio Development and Life-Long Learning .................................................................. 374
Brook Sattler, Deborah Kilgore, Jennifer Turns
Work in Progress - Connecting Veterans to Customized Engineering Education at the University of San Diego

Susan M. Lord, Kathleen A. Kramer, Rick T. Olson

Vertical Integration of System-on-Chip and Green Engineering Across the Undergraduate Curriculum

Ravi P. Ramachandran, Peter M. Janss, Ying Tang, Linda M. Head, Lawrence Chatman

Work in Progress - Leveraging Accreditation Efforts to Foster Innovation in Engineering Education

Marcel Castro-Sitiriche, Efrain O'Neill-Carrillo, Christopher Papadopoulos, Cristina Pomales-Garcia, Aida Santiago-Román, Jaime Seguel

Microelectronic Engineering Education for Emerging Technologies

Santosh Kurine, Michael Jackson, Davide Mariotti, Surendra Gupta, Sean Rommel, Dale Ewbank, Karl Hirschman, Robert Pearson, Lynn Fuller

Integrated Study Programs through e-Learning

Sandra Aguirre, Juan Quemada, Joaquin Salvachua

Adapting Computing Curricula to a Multicore World

Richard LeBlanc, Michael Winn

Special Session - Integrating Learning Communities into Engineering Curricula

Reid Bailey, Marie Shoffner, Heather Rowan-Kenyon

Special Session - Henry's Daughters: A New Engineering Ethics Movie

Michael C. Loui, Jimmy H. Smith, Joseph R. Herkert, Steven P. Nichols

Tablet PCs in Undergraduate Mathematics

Carla A. Romney

Work In Progress - A Real Time Java Programming Online Assessment System

Minzhe Guo, Kai Qian, Li Yang, Prabir Bhattacharya

Xuan Quang Phuong, Gabriella Povero, Gustavo Belforte

Animations as a Tool for Enhancing Teaching and Learning Outcomes in Civil Engineering Courses

Vasanth Naivanthi, John Worden

On the Design of Interactive Classroom Environments based on the Tablet PC Technology

José-V. Benlloch-Dualde, Félix Buendia, Juan-Carlos Cano

SpellLit: Development of a Multi-Touch Application to Foster Literacy Skills at Elementary Schools

Florian Scharf, Silke Günther, Thomas Winkler, Michael Herczeg

Development of an Assessment Instrument to Examine Outcomes of Entrepreneurship Education on Engineering Students

Nathalie Duval-Couetil, Teri Reed-Rhoads, Shiva Haghigi

A Model of Entrepreneurship Education for Computer Science and Computer Engineering Students

Simona Doboli, Gerda L. Kamberova, John Impagliazzo, Xiang Fu, Edward H. Currie

Identification in Web Evaluation in Learning Management System by Fingerprint

Identification System

Charo Gil, Manuel Castro, Mudasser Wyne

Work in Progress - Expansion of an Undergraduate Engineering Degree Program to Include Fully Online Studies at a Distance

Stephanie L. Moore, James F. Groves

Analyzing Engineering Design Stories – Predicting Engagement in Inventive Action

Barbara Karanian, Jordan Cox, David Green, Donald Ike, Gregory Kress, Clifford Nass

Work in Progress - Using Video and Self-Reflection to Enhance Undergraduate Teams

Nick Tatar, Debbie Chachra, Yevgeniya V. Zastavker, Jonathan Stolk

First Year Cross-Functional Design Teams: Engineering and Business

Nancy K. Sundheim, JoAnn L. Asquith

Work in Progress - Engineering Leadership Program: The First Year Experience

Elif Eda Miskioglu, Krishna S. Athreya, Nidhi Bhandari, Michael T. Kalkhoff, Diane T. Rover, Alexandra M. Black, Nathan D. Meisgeier

Work in Progress - Eliciting Intuitive Understandings of Binary Operations in a First Course on Computer Organization

Eric A. Feuchtenthal, Bivas Das, Arvind Thekk

Work in Progress - Development of Personas: Emphasizing Human Need in a First-Year Engineering Capstone Course

John K. Estell, Kenneth J. Reid

Work in Progress - Engineering for Society: Engaging Students through Energy Innovation Ventures

Nada Amid
A Mobile Application Development Approach to Teaching Introductory Programming ................................................................. 486
Qusay H. Mahmoud, Pawel Popowicz

Work in Progress – Achieving Student-Centered Learning through Scalable Instructional Academic Support Resources ................................................................. 492
Jia-Ling Lin, Donald C. Woolston, Gregory Moses

Educationally Enhanced Virtual Worlds ............................................................................................................................................ 494
Colin Allison, Alan Miller, Thomas Sturgeon, J. Ross Nicoll, Indika Perera

Interactive Assignment: a Moodle Component to Enrich the Learning Process .............................................................................. 500
Patricia Alves Rodrigues, Leinidias de Oliveira Brandão, Ana Rosa A.F. Brandão

Work in Progress – Preparing High School Teachers to Teach Design ................................................................................................. 506
James F. Young

Work in Progress - Rules of Engagement: Student Interest and Learning in Hands-on Laboratory Experiences ........................................................................................................... 508
Allen White, Glen Livesay, Kay C. Dee

Considerations on a PBL-Based Course on Radio Communications: a Decade’s Experience .................................................................. 510
Pedro Ramos, Guillermo Palacios

Work in Progress – Programs for Recruitment and Retention of STEM Majors ......................................................................................... 516
Rafic Bachnak, Rohitha Goomatilake, Eduardo Chappa, Young-Man Kim

The Role of African American Fraternities and Sororities in Engineering Students’ Educational Experiences at a Predominantly White Institution ........................................................................ 519
Julie Martin Trenor, Denise R. Simmons Grant, Everton Archer

Work in Progress - Intelligent Tutoring System Framework for the Acquisition of Knowledge and Competences ........................................................................................................................................ 525
David Vernet, Ruben Nicolas, Elisabet Golobardes, Albert Fornells, Alvaro Garcia-Piquer

Work in Progress - Engaging Students in Thermodynamics with Engineering Scenarios ............................................................................. 527
Patrick A. Tebbe, Stewart Ross, Jeffrey R. Pribyl

Work in Progress - First Year Retention of Hispanic, First-Generation Students ......................................................................................... 529
Denise Martinez, Jason Jacks, Dennis Jones, Brenda Faulkner, Peter Bell, George Mollick, Peter White

Race, Gender and First Generation Status in Computing Science, Engineering and Math Persistence: ...................................................................... 532
Mary Virocche, Elizabeth A. Eschenbach

Work in Progress - A Mixed-Methods Study of the Effects of First-Year Project Pedagogies on the Motivation, Retention, and Career Plans of Women in Engineering ............................................................................. 538
Marie Parenti, Brett D. Jones, Holly Matasovich, Jacob Moore

Work in Progress - Understanding Design Fixation: A Sunk Cost Perspective on Innovation ........................................................................ 541
Vimal K. Viswanathan, Julie S. Lissey

Work in Progress- Use-Value and Functionality versus Aesthetics and Experience: Inculcation of Design Ideologies in Engineering and Industrial Design Students ............................................................................. 543
Andrea Gioncher, Aditya Johri, Akshay Sharma

Work In Progress - Encouraging Innovation by Having Students Develop their Own Course Design Projects ........................................................................................................................................ 546
Allen H. Hoffman

Work in Progress - Design in First Year Engineering ................................................................................................................................. 548
Tiffany Velman, William Rosehart

A Method for Analyzing Learning Outcomes in Project Courses ............................................................................................................. 551
Mattias Wiggberg

Special Session - It’s A Jungle Safari Out There: An Allegory for Learning to Navigate Academia ................................................................ 553
Euan D. Lindsay, Kurt Paterson

Special Session - Improvisation Methods to Catalyze Engineering Creativity ............................................................................................................. 555
Pete Ludovice, Lew Lefton, Richard Catrambone

Panel - Models of Entrepreneurship Education and its Role in Increasing Creativity, Innovation and Leadership in Computer Science and Engineering Students ..................................................................................... 557

Work in Progress – Restructuring Online Capstone Courses in Partnership with Industry for Professional Science Master’s (PSM) Recognition ................................................................ 561
Irena Bojanova, Rana Khan

Increasing Alumni Engagement through the Capstone Experience ............................................................................................................. 564
Gerald C. Gannod, Kristen M. Bachman, Douglas A. Troy, Steve D. Brockman

Integrating Developmental Instruction in Sustainability Contexts into an Undergraduate Engineering Design Curriculum: Level One ............................................................................................................. 570
Eric Pappas, Olga Pierrakos
Engineering Student-Design Competition Teams: Capstone or Extracurricular? ............................................................................................................................... 575
Sami Khorbotly, Khalid Al-Olmat

Control System Development for Undergraduate Exposure ........................................................................................................................................................................... 580
Trever J. Hassell, Aurencie M. Oliveira, Wayne W. Weaver

Work in Progress – A Concept Map for Mechanics of Materials ........................................................................................................................................................................... 587
C.J. Egelhoff, Nathan Podoll, Kassim Tarhini

Work in Progress – Using Video Phenomenography to Investigate Problem Solving Skill Development in Computer Science I .................................................................................................................................................................................. 589
Carol A. Wellington, Rebecca Ward, Alice Armstrong

A Non-Linear Approach to Solving Linear Algorithmic Problems .......................................................................................................................................................... 591
Orna Muller, Bruria Haberman

Work in Progress – A Proof-of-Concept Prototype of a Communication System for Course Instructions and Laboratory Experiments ........................................................................................................................................................................... 597
Wookson Lee, Sreeramachandra Mutyaa

Work in Progress - Petri Nets as Applied to the Modeling of E-Learning Cooperative Systems ........................................................................................................................................................................... 599
Daniel Capelo Borges, Hermínio Borges Neto, José Neuman de Souza

Red Light-Green Light: Using a Model-Eliciting Activity in a Logic Design Course ........................................................................................................................................................................... 602
Eric W. Johnson, Tamara J. Moore

Enhancing Student Engagement in an Introductory Programming Course ........................................................................................................................................................................... 608
Arnold N. Pears

Work In Progress-Designing and Building a Mini Supercomputer to Improve Parallel Processing Instruction ........................................................................................................................................................................... 610
Stephen W. Turner

Implementing Collaborative Project-Based Learning Using the Tablet PC to Enhance Student Learning in Engineering and Computer Science Courses ........................................................................................................................................................................... 612
Zanj Avery, Mauricio Castillo, Huiping Guo, Jiang Guo, Nancy Warter-Perez, Deborah S. Won, Jane Dong

Improving Learning Effectiveness with Hands-On Design Labs and Course Projects for the Operating Model of a Pipelined Processor ........................................................................................................................................................................... 619
Bo Hatfield, Lan Jin

Assessment of Students' Learning Experience in an Oral Communication Course at MIT for EECS Majors ........................................................................................................................................................................... 625
Rudolph Mitchell, Tony L. Eng

Infused Communication Skills in an Engineering Curriculum ........................................................................................................................................................................... 630
David Vampola, Kristen Eichhorn, Cara Thomson, Fritz Messere, Rachid Manseur

Engineering Based Modeling Activities for Enhancing Student Communication and Teamwork Skills ........................................................................................................................................................................... 636
Nicholas Mousoulides

Contextualizing Professional Development in the Engineering Classroom ........................................................................................................................................................................... 640
Elaine P. Scott, Rebecca Bates, Ryan C. Campbell, Denise Wilson

Self-Managed Teaming and Team Effectiveness in Interdisciplinary Capstone Design ........................................................................................................................................................................... 646
Kahyun Kim, Lisa D. McNair

A One Year Empirical Study of Student Programming Bugs ........................................................................................................................................................................... 651
Renée C. Bryce, Alison Cooley, Amy Hansen, Nare Hayrapetyan

Work in Progress - Assessing the Development of Expertise in Undergraduate Computer Engineering Students ........................................................................................................................................................................... 658
Marcia R. Fri xen, Robert D. McLeod

Assessing Indian Autonomous Institutions using AHP Approach – A Case Study ........................................................................................................................................................................... 661
Alka Kulkarni, M.S. Moodithaya, Narasimha H Ayachit

A Preliminary Pedagogical Comparison Study Using the Digital Logic Concept Inventory ........................................................................................................................................................................... 667
Geoffrey L. Herman, Joseph Handzik

Work In Progress – An Evidence-Based Intervention System to Enhance Engineering Education ........................................................................................................................................................................... 673
Donald L. McEachron, Elisabeth Papazoglou, Fred Allen, Mustafa Sualp

Implementation of Software Residency at a Graduation Course ........................................................................................................................................................................... 675
José Augusto Fabri, Alexandre L’Erário

Tell/Make/Engage: Actions for Innovation ........................................................................................................................................................................... 681
Barbara A. Karanian, Gregory L. Kress

Engineering Management Education Post GFC and Copenhagen: Are We on the Right Track? ........................................................................................................................................................................... 687

Pursuing an Engineering Doctorate: Exploring the Role of the Combined BS/MS Program ........................................................................................................................................................................... 693
Erin Crede, Maura Borrego

Work In Progress - Creating Industry Ready Ph.D. Graduates ........................................................................................................................................................................... 697
Jay Watson, Catherine White, Jed Lyons
Using an IMS-LD Based Questionnaire to Create Adaptive Learning Paths ......................................................... 700
Ana-Elena Guerrero-Roldán, Ivan García-Torrá, Josep Prieto-Bizàquez, Julia Mingaillón

Work in Progress - Development of a framework to Assess Sustainability Knowledge (ASK) in Engineering Undergraduate Students .......................................................... 706
Ranjani Rao, Alice L. Pawley, Stephen R. Hoffmann, Matthew W. Ohland, Monica E. Cardella

Teaching Programming for High School Students: A Distance Education Experience ........................................... 709
Mariana R. do Nascimento, Andréa P. Mendonça, Dalton D. S. Guerrero, Jorge C. A. de Figueiredo

Learning from Students’ Mistakes in Software Engineering Courses ............................................................... 715
Daniela C. C. Peixoto, Vítor A. Batista, Rodolfo F. Resende, Clarindo Isiás P. S. Pádua

Model to Recover the Colombian Cultural Identity Based on ICT Strategy ....................................................... 721
Jimmy Ramirez Cano

Mini Workshop - MUSE – Multi-University Systems Education ........................................................................ 727
Paul Flikkema, Rhonda Franklin, Jeff Fredik, Carol Hadam, Wayne Shiroma, Tom Weller

Panel - Teaching Students to Participate in Open Source Software Projects .......................................................... 730
Heidi J. C. Ellis, Gregory W. Hislop, Mel Chua, Clif Kassmaul, Matthew M. Burke

Work in Progress - A Sandbox Model for Teaching Entrepreneurship .............................................................. 732
Xiang Fu, Simona Doboli, John Impugliazzo

Work in Progress - Preparing Engineers to Solve Global Problems Through Technology and Entrepreneurship ............................................................................................................. 734
Angela Shartrand, Jennifer Keller Jackson, Phil Weilerstein

Work in Progress - Transforming Entrepreneurship and Innovation Instruction in Fluid Mechanics ..................... 736
David Benson

Work in Progress - Measuring and Enhancing the Entrepreneurial Mindset of Freshman Engineering Students .......................................................... 739
Kenneth J. Reid, Daniel M. Ferguson

Work in Progress - The Video Scenario Approach for Developing Computational and Entrepreneurial Thinking Skills............................................................................................................. 741
Madalene Spezialetti

Developing Civil Engineering Leaders at the United States Coast Guard Academy .................................................. 743
Hudson Jackson, Kassim Tarhini, Anne Morrissey, Nathan Podoll

Work in Progress - Partnering with Coast Guard Engineers to Bring the Field into the Classroom using Material Science Case Studies ............................................................................................. 748
David H. Plantz, William M. Simpson

Learning Science Principles for Effective Online Learning in the Workplace ....................................................... 750
Daryl Lawton, John Bransford, Nancy Yye, Michael C. Richey, Vivian T. Dang, David E. French

Work in Progress - Engineering Leadership Program: A Thematic Learning Community ..................................... 756
Krishna S. Athreye, Nidhi Bhandari, Michael T. Kalkhoff, Diane T. Rover, Alexandra M. Black, Elif Eda Miskioglu, Steven K. Mickelson

Outreach Project Introducing Computer Engineering to High School Students ...................................................... 759
Michael Gasser, Yung-Hsiang Lu, Cheng-Kok Koh

Effective In-Class Activities for Middle School Outreach Programs ........................................................................ 764
Chad Mano, Vicki Allan, Donald Cooley

Work In Progress - Lessons Learned during Teacher Professional Development Pilot Program - Impact on Curriculum Teacher’s Guide Development & Future Professional Development Institute .......................................................... 770
Julia Ross, Taryn Bayles

Work in Progress - 2D Paper Trusses as a Mechanism for Teaching K12 Fundamental STEM Topics .................. 772
David Hall, Michael Swanbom, Heath Tims

Work in Progress - Introducing Engineering to Middle-School Students During a Green Summer Institute .......................................................... 774

You Don’t Need a Weatherman to Know Which Way the Wind Blows: The Art & Science of Flow Visualization ............................................................................................................................. 777
